Assessment Profile
Details the top 5 assessed problems as a result of the face to face EAP assessment. This measurement also serves as a comparison to the initial presenting problem. Critical Incident*
Any critical situation which causes a work group to experience strong reactions or have the potential to interfere with present or future productivity and the client organization has consulted with Cigna EAP for assistance.

Assessment Profile
Details the top 5 assessed problems as a result of the face to face EAP assessment. This measurement also serves as a comparison to the initial presenting problem. By comparing presented and assessed problems, one can see that the EAP intervention and assessment is beneficial in assisting people to more accurately define the underlying issues connected to presenting problems.

Closed Cases and Referral Recommendations
Indicates resolution of closed cases within the EAP and referral options given after completion of EAP services. Issues may be resolved solely by the EAP intervention or customers referred for additional treatment or services.

The number of crisis callers who access services for immediate assistance. This may include issues such as a threat to harm oneself or others, or unexplainable and/or unpredictable shifts in mood or behavior.

Critical Incident*
Any critical situation which causes a work group to experience strong reactions or have the potential to interfere with present or future productivity and the client organization has consulted with Cigna EAP for assistance.

Demographics
Shows if the person presenting is an Employee, Spouse/Partner or Dependent, their gender and age. Other represents HR or a manager.

EAP Utilization Rate
The sum of the number of opened EAP cases per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

Manager/Supervisor Referral*
Manager or Supervisor requested referral for EAP evaluation and assistance for work performance issues or other concerns about an individual employee.

Management Consultations*

Glossary

Web Utilization Rate
The sum of the number of unique EAP sessions per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

Work/Life Utilization Rate
The sum of the number of opened work/life requests per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

While the report provides EAP and Work/Life utilization as separate metrics to meet client needs, these two metrics are typically combined to represent EAP utilization results.

For the YTD Monthly EAP Utilization graph included in the Executive Summary, the EAP data represents EAP + Work/Life utilization as a single metric.

Book of Business norms are based on the aggregate book of EAP business results for the prior 12-month period.

* Actual number provided in parentheses, as well as a percentage based on total count of EAP presentations (or cases) opened in the reporting period.

Assessment Profile
Details the top 5 assessed problems as a result of the face to face EAP assessment. This measurement also serves as a comparison to the initial presenting problem. By comparing presented and assessed problems, one can see that the EAP intervention and assessment is beneficial in assisting people to more accurately define the underlying issues connected to presenting problems.

Closed Cases and Referral Recommendations
Indicates resolution of closed cases within the EAP and referral options given after completion of EAP services. Issues may be resolved solely by the EAP intervention or customers referred for additional treatment or services.

Crisis Calls*
The number of crisis callers who access services for immediate assistance. This may include issues such as a threat to harm oneself or others, or unexplainable and/or unpredictable shifts in mood or behavior.

Critical Incident*
Any critical situation which causes a work group to experience strong reactions or have the potential to interfere with present or future productivity and the client organization has consulted with EAP for assistance.

Demographics
Shows if the person presenting is an Employee, Spouse/Partner or Dependent, their gender and age. Other represents HR or a manager.

EAP Utilization Rate
The sum of the number of opened EAP cases per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

Manager/Supervisor Referral*
Manager or Supervisor requested referral for EAP evaluation and assistance for work performance issues or other concerns about an individual employee.

Management Consultations*
Call from Manager or Supervisor handled directly by EAP consultant regarding management or employee concerns.

Glossary

Web Utilization Rate
The sum of the number of unique EAP sessions per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

Work/Life Utilization Rate
The sum of the number of opened work/life requests per reporting period, divided by the sum of the average headcount, multiplied by a factor to annualize and multiplied by 100 to create a percentage.

Please note:
While the report provides EAP and Work/Life utilization as separate metrics to meet client needs, these two metrics are typically combined to represent EAP utilization results.

For the YTD Monthly EAP Utilization graph included in the Executive Summary, the EAP data represents EAP + Work/Life utilization as a single metric.

Book of Business norms are based on the aggregate book of EAP business results for the prior 12-month period.

* Actual number provided in parentheses, as well as a percentage based on total count of EAP presentations (or cases) opened in the reporting period.

RECOMMENDATIONS

OPPORTUNITY AREA	RECOMMENDATION	WHY?
Plan design: Pharmacy is on the rise, largely driven by Specialty drug spend and utilization. By 2030, Specialty drugs are likely to represent 70%-80% of total healthcare spend Specialty drug spend under the pharmacy benefit was $1,612,958 and was 41% of the total pharmacy spend. 63% of the specialty plan spend was acquired in a retail setting	First Fill at Specialty Home Delivery (Accredo) Access with scale for cost management Clinical capabilities drive optimal outcomes Personalized experience for customer choice	First Fill at Home Delivery means: •Faster time to therapy: meds shipped within 2-3 days •Earlier opportunities for coaching: welcome call with one-on-one clinical assessment, adherence education and monitoring, financial assistance, and proprietary depression screening. •No disruption on the second fill: •All driving lower costs, better adherence, and a better customer experience
Plan design: Specific to manufacturer copay assistance customers view these programs favorably, as specialty drug affordability is a significant concern While manufactures regularly provide copay assistance to those in need, these programs can drive up plan costs for payers if left unmanaged	**SaveonSP Program** Increases manufacturer copay assistance use for both plan sponsors and customers Reduces limitations as the program works beyond plan copays and out-of-pocket requirements Leverages an exclusive partnership between SaveonSP and Cigna/Express Scripts Targets 75+ specialty drugs in several therapy classes Decreases customer responsibility for select specialty drugs to $0 Product includes the **Out of Pocket Adjuster** program which eliminates members from artificially reaching their out-of-pocket maximum	Estimated BOB savings ranging from $2.00 to $4.00 PMPM. Applies only to specialty medications dispensed through Accredo Requires Exclusive Specialty Home Delivery (ESHD) and Best Start at Specialty (no retail fills) Program fee equal to 25% of realized savings (billed to clients monthly) Must begin on plan start or renewal date Self funded clients (not applicable to insured clients) Copay/coinsurance benefit plans (not applicable to HSA qualified HDHP plans as Specialty drugs are not given a “preventive” designation
Diabetes prevention: Chronic condition identification rate at 41% of the total population for 2019	Implement Cigna Diabetes Prevention Program in Collaboration with Omada Health during 2020	Diabetes was the highest cost condition among the top 10 most prevalent chronic illnesses
Plan design: steerage opportunities for ER and PCP visits	Cigna Virtual Care telehealth option implemented for 1/1/120	$23k savings opportunity from shift of existing PCP visits to virtual care

- Centers of Excellence (COE) are considered not available if more than 60 miles away. Opportunity assessment is therefore limited to centers within 60 miles.
- COE and Non-COE procedure cost are derived using average book of business cost.
- Efficiency is derived by taking the difference between COE and Non-COE procedure costs and multiplying by the actual procedure opportunity.
