Main Switchboard Lead Time - Currently Moss is being quoted 85 weeks for fabrication and delivery of the Main Switchboard. The lead time included in the schedule (41 weeks) has been reduced to allow Moss to present a "what if schedule" to show what the schedule would be assuming the Main Switchboard is available when required by the schedule. Please see page 8 of

Main Switchboard Lead Time Currently Moss is being quoted 85 weeks for fabrication and delivery of the Main Switchboard.The lead time included in the schedule (41 weeks) has been reduced to allow Moss to present a "what if schedule" to show what the schedule would be assuming the Main Switchboard is available when required by the schedule. If 85 weeks is inserted for the lead time, the project would be delayed approximately 10 months. Moss is working on several strategies to address the lead time issue including:1 - Release the Main Switchboard earlier.2 - Work through industry contacts to reduce the lead time.3 - Increase size of temporary power to allow operation of the HVAC system during construction, to accommodate later delivery of the Main Switchboard.It will likely take a combination of all the of the above
