Re: Change Order No. #2 for Project #P12387

---

Job Description: Project P12387, Design Build Services for George T. Lohmeyer Wastewater Treatment Plant Effluent Force Main  
Contractor: Ric-Man Construction Florida, Inc.  
Amount: Total amount of Change Order # \$4,873,352.14, plus 0 additional days  
Funding: 10-496-7999-536-60-6534-P12387

---

The purpose of this Change Order is:

Change Order No. 2 addresses changes requested by the City during the design. During the design process, it was discovered that the large valves on the injection wells and at the effluent pump station are unable to be closed and are stuck in the “open” position. When the original 54” effluent force main was hit by a subcontractor in September 2024, the City was unable to stop the groundwater under artesian pressure from coming up from the injection wells after the effluent flow was diverted to the Intercoastal Waterway. This delayed the repair of the force main and prolonged the flooding of nearby streets and businesses until multiple line stops were able to be procured and installed on the force main. The City’s injection wells are also not up to current standards of design, with new injection well installations having two valves for redundancy, to promote regular exercising and prevent the issue of getting stuck in one position. This change order addresses the replacement of the valves and construction of a fully redundant system of the City’s injection wells.

The City requested the DBF to proceed with the design of this fully redundant system in November 2024 under the Owner Contingency Allowance. The 100% design was completed in April 2025, then the construction cost estimate could be prepared.

Due to strict FDEP Consent Order deadlines, the contractor will be working overtime and on Saturdays to try to speed up the schedule. The full schedule impact will be better understood once materials are delivered and we are complete with the first injection well installation, then we can estimate the time necessary for the remaining four injection wells.

Re: Project Number P12387 Design Build Services for GT Lohmeyer WWTP Redundant Effluent Force Main Rough Order of Magnitude Phase 3

Ms. Bork,

The letter is regarding the City of Fort Lauderdale's request to Ric-Man Construction Florida (RMCF) to provide a construction cost estimate for the phase 3 changes from the Design Criteria Package to the now requested completely redundant injection well connections.

The design portion of this changed Phase 3 work was approved by the City of Ft. Lauderdale on November 15, 2024, and was completed April 15, 2025. The redesign and change of method of construction was requested by the City of Fort Lauderdale after concerns were raised about the Design Criteria Package plan to tap into the existing 45-year-old 54-inch effluent force main to the injection wells.

The cost estimate has considered a completely redundant system with connections to each of the 5 injection wells with newly installed valves at each of the 5 wells and required line stops to facilitate the required work. The additional MOV Gate Valves, concrete supports, installation of magnetic meters, alterations to the work platforms, additional electrical and process controls, MIT pad restoration and salting of the wells to avoid the artesian effect of the wells, necessary to stop reverse flows, forms the basic scope of redesigned work. Pricing is based on current market conditions and can fluctuate with the potential of added tariffs at time of purchase. Backup documentation for actual work performed will be submitted and reviewed with each pay application.

RMCF will work a 10-hour day while performing this extra work which equates to a 50-hour work week, thus incurring overtime expenses for the labor on the project. The equipment (Loader, Excavator, Skid Steer and Crane) used during the performance of the Phase 3 work is owned by RMCF with the hourly rate being obtained from Equipment Watch which provides hourly rates for owned and operated heavy construction equipment, copies of which are included in the backup. The Labor burden is calculated taking into account the fringe benefits pension and health insurance, vacation and holiday pay, and the taxes of FICA, FUTA, SUTA and the General Liability and workers compensation along with the umbrella policy.

3100 SW 15<sup>th</sup> Street  
Deerfield Beach, Florida 33442  
Office: (954) 426-1221  
Fax: (954) 426-1226

The ROM for each injection is attached, and net of the credits due from the base contract work. The following represents the changes needed to comply with the Phase 3 re-design, making the connections to each injection well a completely redundant connection.

- Injection Well # 1 \$769,734.13
- Injection Well # 2 \$822,343.56
- Injection Well # 3 \$811,335.92
- Injection Well # 4 \$ 1,067,209.53
- Injection Well # 5 \$ \$853,002.45

The total up-charges for Phase 3 Well configuration making the system completely redundant with independent connections to each injection well is \$4,323,625.59

Additional items that RMCF has been asked to include in this submission are:

- The replacement of the in-line 54" Butterfly valve and 54" Victaulic coupling at GT Lohmeyer WWTP. The additional charges for the valve and coupling replacement are \$ 180,273.36
- The up Charge from a 25 MGD Bypass Operation to the newly requested 50MGD bypass operation \$369,453.19

Thus, the total amount of this submission is \$4,873,352.14

It is not known, at this time, the full extent of this extra work on the contract milestone dates contained under article 6. Consequently, RMCF reserves its right pursuant to Article 8 of the contract to pursue a time extension. This contract time extension, if any, will cover the added time needed to make the complete and independent redundant connections at each of the 5 injections wells.

Please contact me with any questions you may have.

Project: **Port Everglade - Phase 3 WWTP  
Redundant Effluent Force Main**  
Location: 1534-1698 SE 18th St, Fort Lauderdale -  
Broward County, FL 33316  
Prepared by: HCD Estimating Dtp.  
Bid Date: 5/15/2025

### SCOPE OF WORK:

Thank you for considering Homestead Concrete and Drainage in your offer for, Port Everglade - Phase 3 WWTP Redundant Effluent Force Main Injection Well 1 Connection Project. We are pleased to submit our contractor's proposal for your review and consideration. The Proposal is in accordance with the 100% Submittal provided by City of Fort Lauderdale, Public Works. The price covers all offered elements and the scope of work detailed in the attached Price Breakdown. The work will be executed according to the dimensions and notes specified in the Bid Set, the Summary of Quantities, and the project specifications, ensuring full compliance with current codes and standards.

Port Everglade - Phase 3 WWTP Redundant Effluent Force Main Injection Well 1 Connection is as follows:					<b><u>\$370,558.35</u></b>
<b>Alternate-01:</b>	<b>Alternate-02:</b>	<b>Alternate-03:</b>	<b>Alternate-04:</b>	<b>Alternate-05:</b>	<b>Grand Total Bid Amount:</b>
\$0.00	\$0.00	\$0.00	\$0.00	\$0.00	<b><u>\$370,558.35</u></b>

### Addendum:

Agreed upon during negotiations:  
\$30,182.27 per injection well

### Clarification:

The price applies to standard working days during off-peak hours, with extra costs for weekend, night, or holiday concrete mixing plant and labor mobilization. It reflects the attached scope; changes may adjust the final cost. Concrete type and strength align with project specifications. The proposal uses a fixed unit price with adjustable quantity, with final charges based on actual usage. Material costs, subject to market shifts, are valid for five days, potentially requiring budget updates at signing.

### Exclusions:

The bid price excludes several costs and services, including bonding, permits, inspection fees, professional design fees, surveying, and as-built documentation. It does not account for irregular working hours (weekends or weekdays), prevailing wages, or temporary installations such as traffic maintenance, protection of underground and adjacent structures (new and existing surfaces), work access, or sanitary facilities. Testing laboratory services and soil poisoning are also excluded. Pre-concrete installation tasks—earthwork, subgrade or base preparation, excavation, backfill, environmental and erosion control, and pest control—are not covered. Additionally, contributions from other trades, such as miscellaneous metals, welding, embed layout, concrete admixtures (including integrated color), pavers, restoration of existing pavement, utilities, and disturbed surface features, are not included. The price also omits any work beyond the property line shown in the drawings and items not explicitly listed in the attached bid breakdown. However, it does include items detailed in the estimating breakdown provided by others.

All Materials guaranteed to be as specified. All work to be completed in a professional manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements are contingent upon strikes, accidents, or delays beyond our control. Client agrees that payments will not be withheld due to any delayed work that is beyond the scope of this contract or any conditions beyond our control. This proposal will be reviewed prior to the signing of a contract.

### Submitted by:

Well #5  Application area measures approximately 700 SQ. FT. Apply tack to surface. Install 1" of HOT DOT MIX SP-9.5 TLC and 2" of HOT DOT MIX FC 9.5 compact and tack between each lift.  All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays are beyond our control. Any restitution for a lien will be at clients cost. This proposal is subject to acceptance within (30) days and is void thereafter.  According to Florida's Construction Lien Law (Sections 713.001-713.37, Florida Statutes), those who work on your property or provide materials and are not paid in full have a right to claim for payment against your property. This claim is known as a construction lien. If your contractor or a subcontractor fails to pay subcontractors, sub-subcontractors, or materials suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. If you fail to pay your contractor, your contractor may also have a lien on your property. This means if a lien is filed your property could be sold against your will to pay for labor, material, or other services that your contractor or a subcontractor may have failed to pay. Florida's Construction Lien Law is complex and it is recommended that whenever a specific problem arises, you contact an attorney.	8,372.00

| <p>This Request to use the allowance account is for the charges that will be incurred by the City of Ft Lauderdale for the work associated with the installation of Phase 3 (Well Field portion) of the project. This installation is a result of the redesign to provide a completely redundant effluent pipeline to each of the 5 injection wells. This is to furnish and install of the materials required for Well #2. A credit has been given for the materials, labor and equipment that is a duplicate for the new installation. This request covers the materials, labor and equipment that is required due to the Phase 3 redesign to provide a completely redundant connection to Well # 3. This work Includes the restoration of the MIT pad, the well driveway and the additional items required to be complainant with Phase 3 Re-Design. This work has be requested by the City of Ft Lauderdale. This work will take place on the Project known as Design Build Services for GT Lohmeyer WWTP Redundant Force Main</p>

Well #5  Application area measures approximately 700 SQ. FT. Apply tack to surface. Install 1" of HOT DOT MIX SP-9.5 TLC and 2" of HOT DOT MIX FC 9.5 compact and tack between each lift.  All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays are beyond our control. Any restitution for a lien will be at clients cost. This proposal is subject to acceptance within (30) days and is void thereafter.  According to Florida's Construction Lien Law (Sections 713.001-713.37, Florida Statutes), those who work on your property or provide materials and are not paid in full have a right to claim for payment against your property. This claim is known as a construction lien. If your contractor or a subcontractor fails to pay subcontractors, sub-subcontractors, or materials suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. If you fail to pay your contractor, your contractor may also have a lien on your property. This means if a lien is filed your property could be sold against your will to pay for labor, material, or other services that your contractor or a subcontractor may have failed to pay. Florida's Construction Lien Law is complex and it is recommended that whenever a specific problem arises, you contact an attorney.	8,372.00

4	30"	LCP	\$213,855.00 Each	\$855,420.00	\$1,750.00 Per day, per single line stop

Note: Rangeline cannot guarantee a 100% shutdown due to debris, mineral deposits, solids and/or sediments in the pipe.

Rangeline will use existing and serviceable linestop fittings and blowdown saddles to perform the following:

Unit	Size	Pipe Type	Single Re-Stop Force Main (80 PSI or less)	TOTAL	Line Stop Equipment Overnight charges After 7PM on 3 <sup>rd</sup> Calendar Day "When Equipment is on the Pipe"
1	24"	DIP/LCP	\$24,000.00	\$24,000.00	\$1,500.00 Per day
4	30"	DIP/LCP	\$42,000.00 Each	\$168,000.00	\$1,750.00 Per day, per single line stop

**PLEASE NOTE:** Rangeline will make every attempt to remove the completion plug and re-insert the line stopper through the existing fitting. If the completion plug cannot be removed, the existing line stop fitting will have to be abandoned and a new line stop fitting and location will be needed in order to shut the system down.

Rangeline will provide Hydra-Stop Insta-Valve™ Valve Inserts and perform the following services:

Unit	Size	Pipe Type	Non-Standard Service Notes	Valve Insertion (80 PSI or less)	TOTAL
1	24"	DIP	N/A	\$59,525.00	\$59,525.00
Please add \$5,700.00 for left handed bevel gear option for horizontal/side mounting of the valve.

Well #5  Application area measures approximately 700 SQ. FT. Apply tack to surface. Install 1" of HOT DOT MIX SP-9.5 TLC and 2" of HOT DOT MIX FC 9.5 compact and tack between each lift.  All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays are beyond our control. Any restitution for a lien will be at clients cost. This proposal is subject to acceptance within (30) days and is void thereafter.  According to Florida's Construction Lien Law (Sections 713.001-713.37, Florida Statutes), those who work on your property or provide materials and are not paid in full have a right to claim for payment against your property. This claim is known as a construction lien. If your contractor or a subcontractor fails to pay subcontractors, sub-subcontractors, or materials suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. If you fail to pay your contractor, your contractor may also have a lien on your property. This means if a lien is filed your property could be sold against your will to pay for labor, material, or other services that your contractor or a subcontractor may have failed to pay. Florida's Construction Lien Law is complex and it is recommended that whenever a specific problem arises, you contact an attorney.	8,372.00

WORK PERFORMED FOR:		City of Ft Lauderdale		DATE: April 21, 2025																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
DESCRIPTION OF WORK:		INVOICE		Rev 08/28/2025 008 Well # 5																																																																																																																																																																																																																																																																																																																																																																																																																																																																													
<p>This Request to use the allowance account is for the charges that will be incurred by the City of Ft Lauderdale for the work associated with the installation of Phase 3 (Well Field portion) of the project. This installation is a result of the redesign to provide a completely redundant effluent pipeline to each of the 5 injection wells. This is to furnish and install of the materials required for Well #5. A credit has been given for the materials, labor and equipment that is a duplicate for the new installation. This request covers the materials, labor and equipment that is required due to the Phase 3 redesign to provide a completely redundant connection to Well # 5. This work Includes the restoration of the MIT pad, the well driveway and the additional items required to be complainant with Phase 3 Re-Design. This work has be requested by the City of Ft Lauderdale. This work will take place on the Project known as Design Build Services for GT Lohmeyer WWTP Redundant Force Main</p>

Well #5  Application area measures approximately 700 SQ. FT. Apply tack to surface. Install 1" of HOT DOT MIX SP-9.5 TLC and 2" of HOT DOT MIX FC 9.5 compact and tack between each lift.  All material is guaranteed to be as specified. All work to be completed in a workmanlike manner according to standard practices. Any alteration or deviation from the above specifications involving extra costs, will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents or delays are beyond our control. Any restitution for a lien will be at clients cost. This proposal is subject to acceptance within (30) days and is void thereafter.  According to Florida's Construction Lien Law (Sections 713.001-713.37, Florida Statutes), those who work on your property or provide materials and are not paid in full have a right to claim for payment against your property. This claim is known as a construction lien. If your contractor or a subcontractor fails to pay subcontractors, sub-subcontractors, or materials suppliers or neglects to make other legally required payments, the people who are owed money may look to your property for payment, even if you have paid your contractor in full. If you fail to pay your contractor, your contractor may also have a lien on your property. This means if a lien is filed your property could be sold against your will to pay for labor, material, or other services that your contractor or a subcontractor may have failed to pay. Florida's Construction Lien Law is complex and it is recommended that whenever a specific problem arises, you contact an attorney.	8,372.00
