Re: **RFQ #946-11345 AN ANNUAL CONTRACT FOR GENERAL ENGINEERING - CONSTRUCTION MANAGEMENT SERVICES**

Dear Members of the Selection Committee:

Especially in this era of ever-tighter dollars and accountability, our project-tested team understands the importance of protecting the City of Fort Lauderdale's interests at every stage of any project. ACAI is a multi-disciplinary firm providing Project Management, Construction Management, Contract Administration, Architecture/Engineering, Landscape Architecture, Interior Design and Building Information Modeling (BIM) Consulting services. Our team of construction professionals, architects, engineers and LEED professionals specialize in public facilities and are intimately familiar with the design, engineering, operational, safety and sustainable consideration for all projects no matter the size. This capability makes us unique and allows our projects to run seamless from start to finish, saving our clients time and money. Our extensive experience in the A/E/C industry spans every level of county, state and federal government agencies and private concerns.

Please allow this submittal to serve as our expression of interest to serve as your City's Representative for General Engineering - Construction Management Services.

As your representative, ACAI is highly qualified to deliver all of the services required in your project. We provide a responsive, local presence coupled with a networked structure of companies designed to facilitate sharing of information. We have extensive cross-industry experience allowing us to help our clients find the best solution.

ACAI has extensive experience with Construction Administration and Management contracts. We are familiar with technical and code compliance reviews, constructability reviews where we work diligently to provide the most efficient and cost-effective suggestions and offer realistic feedback on phasing, methods, materials and specifications, budgetary and cost controls and schedule management. Our experience includes managing and administering all aspects of construction contracts, contract interpretations and negotiations, alternative dispute resolutions, payment administration, maintaining documentation, experience with Critical Path Method schedules which are critical to effective project management, pre-construction and construction meetings, change order estimating and processing, performing inspections, field reports and preparation of punch lists and the obtaining of Certificates of Occupancy.

Similar to the scope of services for this solicitation, ACAI had been retained by our Civil Engineering subconsultant, Kimley-Horn and Associates, to perform construction phase services for the Opa-Locka Executive Airport Air Traffic Control Tower. The work included review of the architectural, mechanical, electrical and plumbing components. ACAI served as the part-time Resident Project Representative and Engineer's agent at the site, by providing review of the progress schedule, shop drawings and sample submittals and served as the liaison between the contractor and engineer. Services provided included Construction Management, Owner Representation, Scheduling, Progress Monitoring and Inspections.

This assignment brings a unique set of challenges -- in addition to providing the necessary oversight to the project, the Construction Management firm needs to track the other stakeholders and players: the Architect and Engineers of Record, the City's Construction Manager, the LEED Consultant and the Department of Homeland Security/Customs and Border Protection. Our approach to the project explains our method of addressing these challenges.

ACAI is familiar with your City, as we had served under a continuing services contract to provide architectural services, we have served as the Design Criteria Professional for the Executive Airport Administration Complex, as well as the Design Architect, Design Criteria Professional and Construction Management Representative for the Executive Airport's Airfield Rescue and Fire Fighting Facility (ARFF). This 30,000 sf ft facility consolidates a number of the City's airport-related, fire-fighting activities under one roof -- the City's West Emergency Operations and Communications Center (for addressing disaster coordination) and a centralized Hazmat and Fire Rescue Training Facility.

Recognizing that the construction phase is critical to successful project management, ACAI maintains carefully documented records, including meeting minutes, logs for RFIs, COs, shop drawings, submittals, etc., to keep all parties abreast of current developments and possible concerns. The project's designated Contract Representative (CR) reviews the construction documents prior to the pre-construction meeting and visits the construction site regularly to monitor construction progress and answer the contractor's questions. The CR keeps the client abreast of construction progress and answers the contractor's questions, issues a punch list and verifies completion of the project.

The legal name of our firm is ACAI Associates, Inc. The point of contact for the RFQ will be Adolfo J. Cotilla, AIA, President. His phone number is (954) 484-4000 and fax number is (954) 484-5588. His e-mail address is adolfo@aecmworld.com.

When short-listing for this project, please consider the advantages that ACAI brings to the City of Fort Lauderdale:

ACAI has Proven Construction Experience:

We have developed a method of delivering quality construction, low cost facilities through efficient planning and simple straightforward detailing: This has demonstrated a consistent ability to meet realistic budgets. ACAI is familiar with governmental agencies having worked on a variety of projects located in the State of Florida.

ACAI has Experienced Personnel:

The ACAI Team includes a staff of professionals who have many of years of experience in their respective fields. Our in-house team includes registered General Contractors, Architects, Engineers, an Interior Designer and LEED Accredited Professionals. All are professionals with meaningful experience in public service buildings and are familiar with governmental agencies quality standards, requirements and facilities.

ACAI actively promotes participation of Minority and Small Business Enterprises:

ACAI Associates is an FDOT Certified DBE and Florida Statewide MBE firm and will hold the prime contract.

Knowing the importance of this project to you and your community, we wouldn't expect you to settle and know you want the best firm to handle the job. Look no further, for ACAI and our team of consultants truly are the BEST! We would appreciate the opportunity to present to you in more detail our qualifications and thank you for your consideration.

Sincerely,

ACAI Associates, Inc.

Cindy W. Baldwin, CM-BIM, GCG, LEED AP
Chief Operating Officer

a.	BROWARD COUNTY RAVENSWOOD BUS MAINTENANCE FACILITY Fort Lauderdale, Florida	On-going	
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm ACAI Associates was selected by Broward County, Florida to provide programming, design and construction administration services for the replacement of facilities at the Ravenswood Bus Maintenance Facility. The 9-acre site will be reconfigured, replacing the existing 1970's structures with new state-of-the-art facilities for current and future needs. When completed, the facility will accommodate up to 150 fleet vehicles including (130) 40-foot buses and (20) 60-foot articulated buses along with staff and visitor parking, the majority of which will be provided by a new 268 - space multi-level parking garage. The existing facilities to be replaced include: an operations building, an 11-Bay bus maintenance building, a fueling and fare retrieval facility, bus washing facility and surface parking. In addition, ancillary structures include: a sanitary lift station, guard gate, a compressor building and other miscellaneous storage buildings. All of these are proposed to be removed as part of this project. As part of Broward County's ongoing efforts to provide more energy efficient, environmentally sustainable building, the new Ravenswood Maintenance Facility will pursue a LEED® Gold Certification .		
b.	SFWMD ENVIRONMENTAL LAB West Palm Beach, Florida	2012	2012
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm ACAI was commissioned to provide complete Architectural services including Facility Programming, Site Planning, and overall Architectural Design and construction documentation for a new Laboratory Building for the South Florida Water Management District. This project involved the design and development of a new 2-story, 36,000 sf facility based upon a Basis of Design Report (BODR) and site configuration studies completed by ACAI, as well as compliance with the Districts Standards. The \$9 million facility consolidates and centralizes five ecological and water quality groups associated with the management and protection of South Florida's coastal resources. The new facility includes state-of-the-art modular laboratories, staff offices, sampling and environmentally controlled storage facilities designed around a central 2-story atrium. We were later selected to provide Construction Administration services for the construction of this new Environmental Service Laboratory. Our scope of services for the Construction Administration included assistance during the bidding phase, review of shop drawings, responses to RFI's, attendance at bi-monthly construction meetings and construction observation. This project was designed using sustainable design principles and has recently been designated as a LEED® Gold building .		
c.	SFWMD LAKESIDE RANCH STA Okeechobee, Florida	2012	2012
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm As part of a continuing service contract with the prime consultant, MACTEC Engineering and Consulting Inc., ACAI Associates had been involved in various SFWMD's projects. For the Lakeside Ranch Stormwater Treatment Area (STA), ACAI's scope of work consisted on providing quality control structural inspection oversight and documentation of the work during the construction of structural components. Our inspection services required detailed review of approved project construction drawings, specifications, and shop drawings. The Lakeside Ranch STA involved the construction of a 2,700-acre wetland area, adjacent to Lake Okeechobee in western Martin County, which provides approximately nine to 19 metric tons of phosphorus reduction. The reduction of phosphorus levels in runoff flows bound for Lake Okeechobee which provides for a healthier lake and also benefits the entire Everglades ecosystem.		
d.	NSU / KIDS IN DISTRESS DENTAL AND OPTOMETRY CLINIC Wilton Manors, Florida	2010	2010
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Kids In Distress is a community-supported agency providing services for the prevention and treatment of child abuse in South Florida. KID's programs offer a continuum of care and essential services to child victims and children and families at risk for abuse and neglect. This project was an interior tenant build-out for Kids In Distress with Nova Southeastern University as the tenant. KID and NSU agreed to renovate an existing two-story office building to accommodate a dental clinic on the first floor and an optometry clinic on the second floor. The dental clinic has seven chairs with support spaces and the optometry clinic has six exam rooms, a dispensary and support spaces. The project included engineering of Mechanical, Electrical and Plumbing systems as well as fire protection services in addition to architecture.

Lauderdale Hollywood International Airport. This project entailed installation of a new wastewater force main along the North and South Perimeter Road. ACAI's responsibilities included attendance at meetings between the Owner's Representative, EAC and contractor; review of and daily reporting on contractor's performance; inspection of work in progress and completed work on a daily basis and completion of all necessary close out and construction completion forms and documentation in coordination with BCAD for the project.		
b.	BROWARD COUNTY RAVENSWOOD BUS MAINTENANCE FACILITY Fort Lauderdale, Florida	On-going	
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm ACAI Associates was selected by Broward County, Florida to provide programming, design and construction administration services for the replacement of facilities at the Ravenswood Bus Maintenance Facility. The 9-acre site will be reconfigured, replacing the existing 1970's structures with new state-of-the-art facilities for current and future needs. When completed, the facility will accommodate up to 150 fleet vehicles including (130) 40-foot buses and (20) 60-foot articulated buses along with staff and visitor parking, the majority of which will be provided by a new 268 - space multi-level parking garage. The existing facilities to be replaced include: an operations building, an 11-Bay bus maintenance building, a fueling and fare retrieval facility, bus washing facility and surface parking. In addition, ancillary structures include: a sanitary lift station, guard gate, a compressor building and other miscellaneous storage buildings. All of these are proposed to be removed as part of this project. As part of Broward County's ongoing efforts to provide more energy efficient, environmentally sustainable building, the new Ravenswood Maintenance Facility will pursue a LEED® Gold Certification .

		PROFESSIONAL SERVICES	CONSTRUCTION (if applicable)
a.	MIAMI-DADE COUNTY FIRE RESCUE DEPARTMENT HOMESTEAD FIRE RESCUE STATION 70 LEED CONSULTING Homestead, FL	On-going	N/A
(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm ACAI was selected by the Miami-Dade Fire Rescue Department to provide LEED process management services in achieving a LEED silver certification for Fire Station 70. Work included a LEED Credit Assessment, the development of a LEED Implementation Plan, monitoring the documentation process & providing guidance, monitoring design review credits, supervising the contractor with regards to Construction Administration credits, monitoring Construction Administration credits and Energy modeling.			
b.	CORAL SPRINGS MEDICAL CENTER 3RD AND 4TH FLOOR ADA RENOVATIONS Coral Springs, Florida	2013	N/A
(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm This project consisted of design and renovation of 7 patient rooms and 1 toilet room to address ADA violations on the 3rd and 4th floor of BHCS. ACAI prepared presentation documents to identify the scope of work, prepared construction documents addressing approved scope, obtained necessary city permits and AHCA approvals, and provided construction administration services.			
c.	TIMOTHY HAAHS AND ASSOCIATES MIAMI OFFICE Miami, Florida	2010	2010
(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Victor Caban served as the Prime Designer, Project Manager and LEED Administrator for this 2500 sqft office building which houses 13 staff members. His task as LEED Administrator was to manage the LEED process in order to attain LEED Silver certification for this project. The floor plan includes welcome area, conference room, lounge, print/supplies area, IT/Storage closet, two offices and work area for 10 production staff. Design intent was to communicate the type of work that would occur which was structural engineering and architecture.			
d.	MIAMI PARKING AUTHORITY COURTHOUSE CENTER PARKING GARAGE (MIXED-USE) Miami, Florida	2010	2010
(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Victor Caban served as Principal Construction Administrator for this 800 space, 11-story, mixed-use parking garage intended to serve as headquarters of the Miami Parking Authority. This was a cast-in-place project with complex architectural features such as large spans of curtain-wall glazing, metal panels anchored to the structure, and a corrugated mesh façade that hid the parking element of the building. The mixed-use elements of this project consisted of retail on the ground floor, and office spaces on the second, third, and 11th floor. The parking garage footprint and structure was designed for horizontal expansion to add 400 more parking spaces in the future.			
e.	BAY HARBOR ISLAND PARKING MIXED-USE GARAGE Bay Harbor Islands, Florida	2010	2010
(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Victor Caban played an integral role in managing the construction of the Bay Harbor Islands Parking Garage from ground breaking to Certificate of Occupancy. This project consisted of a 400 space parking garage to serve as parking for teachers in the elementary school next door with portions of the ground floor dedicated for a community center and a county fire station. As project designer, he managed the permitting process by interacting with building officials and addressing comments. He then assisted the project manager with the construction administration by attending meetings, typing minutes, reviewing shop drawings and answering RFIs. Mr. Caban also administered the close out of the project by producing the punch list.

a.	CITY OF PARKLAND FIRE STATION AND PUBLIC WORKS FACILITY <i>Parkland, Florida</i>	2008	2010
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm ACAI was commissioned to provide programming, design, construction documents, bidding and contract administration services to remodel an existing one story building and expand to a footprint of 7,545 sf to house a Public Works and Fire Station Facility designed as a Category III essential facility. The project implemented LEED® design elements and was designed to USGBC Standards, although no certification was required. Some of the sustainable principals include the use of solar energy, water efficient plumbing fixtures, energy efficient Air Conditioning units and a state of the art irrigation system which reduces water usage due to an ET controller broadcasting a wireless signal to automatically control the frequency of watering.		
b.	TSA PBI SECURITY CHECKPOINT <i>West Palm Beach, Florida</i>	2007	2007
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm This project was for the US Department of Homeland Security, Transportation Security Authority (TSA) located at Palm Beach International Airport (PBI) at security checkpoint 'A-B'. The project was a "Tenant Build-Out" of approximately 4,800 s.f. of leased space from PBI with architecture, engineering, fire protection and testing as part of the professional services performed. The space was designed to include administrative offices, support spaces, operations center, and crisis room. All work was permitted through Palm Beach County and PBI. Our scope consisted of pre-design and design services, testing (ACM, EE & T&B), FIV's and Permitting.		
c.	NSU / KIDS IN DISTRESS DENTAL AND OPTOMETRY CLINIC <i>Wilton Manors, Florida</i>	2010	2010
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input checked="" type="checkbox"/> Check if project performed with current firm Kids In Distress is a community-supported agency providing services for the prevention and treatment of child abuse in South Florida. KID's programs offer a continuum of care and essential services to child victims and children and families at risk for abuse and neglect. This project was an interior tenant build-out for Kids In Distress with Nova Southeastern University as the tenant. 	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Carroll served as the Lead Estimator for the construction of a 5,400 SF amenities building on a 6 acre site. The building comprises of CMU walls, stone veneer, metal gates, wood trusses, wood ceiling and beams, wood trim, custom cabinetry and countertops, concrete barrel tile roof, exterior glazing, doors, louvers, stucco, drywall, tile flooring, carpet, ACT ceilings, paint, copper finial, metal chimney shroud, division 10 accessories, faux shutters, fire place, HVAC, plumbing, and electrical. The site comprises of new construction of a pool and spa, playground, tennis court, volleyball court, cabanas, faux rock/waterfall feature with slide, new entry road/drive up, mulched walking path, Bermuda lawn field, construction of a grand lawn and amphitheater area, and underground utilities.		
b.	POMPANO BEACH FIRE STATION NO. 103 <i>Pompano Beach, Florida</i>		
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Carroll served as the Project Estimator for the construction of a new two-story CBS three-bay fire station on an existing vacant lot. New services and utilities were required with connections to existing systems and new landscaping and irrigation were required as well. The building has a stucco finish, impact windows, and standing-seam metal roof over metal trusses. The building has been designed to obtain a minimum of Certified LEED Certification and will require full documentation.		
c.	SFWMD ENVIRONMENTAL LAB <i>West Palm Beach, Florida</i>	2012	2012
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Carroll served as the Project Estimator for the sustainable construction of a two-story, 36,000 square-foot facility at the South Florida Water Management District's Field Operations Center complex. Facility was designed to sustain high velocity winds with emergency backup systems capable of maintaining full operations for seven days. This project involved design and development of a new facility based upon the final site plan selected by the District's Basis of Design Report (BODR), preliminary plans as well as complying with the Districts Standards. This project was designed using sustainable design principles and has recently been designated as a LEED® Gold building .		
d.	GSA FEDERAL BUILDING <i>Miramar, Florida</i>		
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Carroll served as the Project Estimator for the new construction of a Federal Office Building located near Miramar, Florida. The project included the design and construction of office and related facilities to house a federal agency in Broward County, Florida. The total space requirement consists of approximately 475,000 gross square feet, available for use by the agency for personnel, furnishings and equipment. Unique requirements included a 100 foot setback, enhanced security specifications, a parking structure, and special purpose space. The facility has substantial electrical and HVAC requirements. This project will be designed to conform with the requirements of the Facilities Standards for the Public Buildings Service and to earn LEED certification . It also met the congressionally required energy efficiency and performance requirements in effect during design.		
e.	MIAMI-DADE COUNTY CHILDREN'S COURTHOUSE <i>Miami, Florida</i>		
	(3) BRIEF DESCRIPTION (Brief scope, size, cost, etc.) AND SPECIFIC ROLE <input type="checkbox"/> Check if project performed with current firm Prior to joining ACAI, Mr. Carroll served as the Project Estimator for a 371,500 square-foot, 14-story juvenile courthouse. Lower floors of the sustainable building are open and airy for public spaces, while the upper floors house secure areas, detention centers, and the courthouse. The space also includes offices for the building's attorneys and judges. Additional features include a mechanical penthouse, rooftop elevator, machine rooms, landscaped entry, vehicular sally port, and a pedestrian bridge connecting the new building to secure outdoor parking. This sustainable project is designed and constructed for LEED Silver certification .

(1) TITLE AND LOCATION <i>(City and State)</i>	(2) YEAR COMPLETED	
	PROFESSIONAL SERVICES	CONSTRUCTION <i>(If Applicable)</i>
St. Lucie County International Airport, Aircraft Rescue and Fire Fighting (ARFF) Station, Fort Pierce, FL	2005-2006	2006-2007
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE	<input checked="" type="checkbox"/> Check if project performed with current firm	
a. Served as project manager for the ARFF facility; Project included technical specifications as well as bid phase services including permitting and inspection for construction services. The project consisted of constructing an 8,300-square-foot Airport Rescue and Firefighting Facility (ARFF) and ancillary facilities on approximately 2.36 acres at St. Lucie County International Airport, as well as the dewatering of the existing ditch and removal of organic material prior to placing new fill for the ditch relocation.		
General Consulting Services at Tallahassee Regional Airport (TLH), Tallahassee, FL		
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE	<input checked="" type="checkbox"/> Check if project performed with current firm	
b. Serving as project manager. First selected as a General Consultant in 2006, Kimley-Horn's contract was just extended until 2011. Projects include: design and construction phase services for the rehabilitation of the terminal and North Apron. The project included rehabilitation of an existing 13.7-acre apron, including the rubbilization in place of 6.4 acres of existing 16-inch-thick concrete to allow its reuse as base course. This approach minimized construction cost and reduced time for construction. This sustainable approach also reduced the amount of waste material being hauled from the site, the amount of virgin material needed for the project and the amount of hydrocarbons emitted during construction of the project. <i>Upon completion, the project won the FAC Environmental Award for Air Carrier Airports.</i>		
FDOT Aviation Office Consultant Contract, Airfield Pavement Management Program, Statewide, FL	2015	
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE	<input checked="" type="checkbox"/> Check if project performed with current firm	
c. Serving as contract project manager (CMP) for the Kimley-Horn team that was originally selected in 2009 by the FDOT Central Aviation Office for a three-year contract for aviation consulting services. Again in 2012, we were reselected for the contract and were selected for a separate contract for airside pavement management systems. Services that have been or will be provided include planning, financial, information technology, environmental, engineering, emergency response, security, and technical analysis, pavement management, and services related to the statewide aviation system and airports and/or spaceports. To date, we have provided services on more than 25 projects. Firm cost: \$2.5 million.		
St. Petersburg-Clearwater International Airport (PIE) Runway 4-22 Rehabilitation, Clearwater, FL	2009 - 2012	2012
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE	<input checked="" type="checkbox"/> Check if project performed with current firm	
d. Served as deputy project manager. The project includes design of the rehabilitation of Runway 4-22, including paving, drainage, and electrical systems. As part of the project, Kimley-Horn prepared a cost-benefit analysis to determine FAA eligible runway width and length. The final plans also included corrections to airfield pavement markings over the whole airport and re-designation of two runways to correct for magnetic variance. Total project cost: \$6.3 million; firm cost: \$1.25 million.		
Sarasota Bradenton International Airport – Various Aviation Consulting Services, Sarasota, FL	Ongoing (as of 2010)	
(3) BRIEF DESCRIPTION <i>(Brief scope, size, cost, etc.)</i> AND SPECIFIC ROLE	<input checked="" type="checkbox"/> Check if project performed with current firm	
e. Serving as project manager. Over the past 10 years, Kimley-Horn has completed design and construction phase services for projects, including Extension of Runway 14-32 and Taxiway Alpha; Taxiway Echo; Taxiway Juliet and Service Road Extension; Runway 14-32 Rehabilitation; Taxiway Alpha Rehabilitation; and Runway 4-22 Rehabilitation. Construction of those projects were completed 7% below the initial construction contract amount through careful monitoring during construction and working with the contractors to identify cost savings opportunities without sacrificing quality. Total project cost: \$12 million; firm cost: \$900,000.		

F. EXAMPLE PROJECTS WHICH BEST ILLUSTRATE PROPOSED TEAM'S QUALIFICATIONS FOR THIS CONTRACT <i>(Present as many projects as requested by the agency, or 10 projects, if not specified. 24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost.)
 As part of the Owner's Representative Project Management Team, ACAI was very involved in the Airport Expansion Program at the Fort Lauderdale-Hollywood International Airport.

ACAI provided construction management services associated with the phased redevelopment of Passenger Terminal A, the Airport Roadway system, Airfield Improvements and related facilities. ACAI was responsible for developing cost loaded schedules, monitoring and approving monthly construction progress, conducting civil inspections, developing master schedule update procedures, and revising scheduling specifications for all new construction projects while providing quality assurance and minimizing operational disruptions.

Involvement included participation in the following projects and initiatives:

- Concourse A
- Rental Car Center
- Exit Roadways
- Long Term Sanitary Sewer
- Pedestrian Bridges
- Taxiway C and Westside Infrastructure
- Utilities Relocation

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost.)
 ACAI was retained by Kimley-Horn and Associates to perform construction phase services for the Opa-Locka Executive Airport Air Traffic Control Tower. The work included review of the architectural, mechanical, electrical and plumbing components. The project also required special inspectors for the steel connection and precast elements as well as threshold inspections.

ACAI served as the part-time Resident Project Representative and Engineer's agent at the site, by providing review of the progress schedule, shop drawings and sample submittals and served as the liaison between the contractor and engineer.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost.)

ACAI was commissioned to provide complete Architectural services including Facility Programming, Site Planning, and overall Architectural Design and construction documentation for a new Laboratory Building for the South Florida Water Management District.

This project involved the design and development of a new 2-story, 36,000 sf facility based upon a Basis of Design Report (BODR) and site configuration studies completed by ACAI, as well as compliance with the Districts Standards.

The \$9 million facility consolidates and centralizes five ecological and water quality groups associated with the management and protection of South Florida's coastal resources. The new facility includes state-of-the-art modular laboratories, staff offices, sampling and environmentally controlled storage facilities designed around a central 2-story atrium.

We were later selected to provide Construction Administration services for the construction of this new Environmental Service Laboratory. Our scope of services for the Construction Administration included assistance during the bidding phase, review of shop drawings, responses to RFI's, attendance at bi-monthly construction meetings and construction observation

This project was designed using sustainable design principles and has recently been designated as a **LEED® Gold** building.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost.)
 This project was for the US Department of Homeland Security, Transportation Security Authority (TSA) located at Palm Beach International Airport (PBIA) at security checkpoint 'A-B'.

The project was a "Tenant Build-Out" of approximately 4,800 s.f. of leased space from PBIA with architecture, engineering, fire protection and testing as part of the professional services performed. The space was designed to include administrative offices, support spaces, operations center, and crisis room. All work was permitted through Palm Beach County and PBIA.

Our scope consisted of pre-design and design services, testing (ACM, EE & T&B), FIV's and Permitting.

24. BRIEF DESCRIPTION OF PROJECT AND RELEVANCE TO THIS CONTRACT (include scope, size, and cost.)

Kids In Distress is a community-supported agency providing services for the prevention and treatment of child abuse in South Florida. KID's programs offer a continuum of care and essential services to child victims and children and families at risk for abuse and neglect.

This project was an interior tenant build-out for Kids In Distress with Nova Southeastern University as the tenant. KID and NSU agreed to renovate an existing two-story office building to accommodate a dental clinic on the first floor and an optometry clinic on the second floor. The dental clinic has seven chairs with support spaces and the optometry clinic has six exam rooms, a dispensary and support spaces. The project included engineering of Mechanical, Electrical and Plumbing systems as well as fire protection services in addition to architecture.

In addition, the following additional services were provided:

- Master planning of the 1st floor unassigned spaces to include an additional quiet room and four (4) chairs
- Re-sizing the dental equipment and piping to support the added chairs on the 1st floor
- Addition of the cashiers station and children waiting room to the 2nd floor optometry clinic
- Rearrangement of 2nd floor spaces including elimination of a classroom, relocation of the Lounge and Special Testing Room and rearrangement of two (2) exam rooms

Careful attention to value engineering, detail, constructability issues, design details and full time construction oversight was paramount in the successful delivery of the new Convention Center for Palm Beach County in West Palm Beach, Florida.

ACAI Associates, Inc. was selected as part of the Owner's Representative and Construction Management Team for the Architecture, Structural and MEP Engineering Peer Reviews and Full Time on-site oversight of West Palm Beach's newest landmark building in City Place.

ACAI worked very closely with the Owner, URS/O'Brien Krietzberg and its design/construction team in delivering this \$83,000,000, 19-acre award-winning project where a site of grand International Art and Antique shows featuring vendors from around the world can be seen.

H. ADDITIONAL INFORMATION

30. PROVIDE ANY ADDITIONAL INFORMATION REQUESTED BY THE AGENCY. ATTACH ADDITIONAL SHEETS AS NEEDED.

Looking for a Firm you can trust? A Firm that will meet your schedules, maintain your budgets and help make your job easier? A Firm and Staff with extensive Construction Management and City of Fort Lauderdale work experience? If so, ACAI is the Firm for you. Just ask your staff and our past and current clients.

ACAI is a multi-disciplinary firm providing Construction Management, Contract Administration and Architecture/Engineering services. This capability makes us unique and makes our projects run seamless from start to finish, saving our clients time and money. ACAI staff maintains over 40 years of Design and Contracting experience and understands the numerous responsibilities involved with construction projects. As your representative, ACAI is highly qualified to deliver all of the services required in your projects. We provide a responsive, local presence coupled with a networked structure of companies designed to facilitate sharing of information. We have extensive cross-industry experience allowing us to help our clients find the best solution.

We have extensive experience with Construction Management Contracts and are familiar with technical and code compliance reviews, constructability reviews where we work diligently to provide the most efficient and cost-effective suggestions and offer realistic feedback on phasing, methods, materials and specifications, budgetary and cost controls and schedule management.

ACAI's experience includes managing and administering all aspects of construction contracts, contract interpretations and negotiations, alternative dispute resolutions, payment administration, maintaining documentation, experience with Critical Path Method schedules which are critical to effective project management, pre-construction and construction meetings, change order estimating and processing, performing inspections, field reports and preparation of punch lists.

At ACAI, our personnel have had years of "in the field" experience in the construction industry with personal knowledge of how General Contractors and Subcontractors operate on construction projects.

Construction Management Services

With 29 years of construction management experience, ACAI has grown steadily through consistent client satisfaction, repeat business and a conservative management philosophy.

Our professional construction management staff provides vigilant control of design, bidding, budgets and construction scheduling -- from design to ground-breaking to occupancy. With general contractors, architects, project managers and permit expeditors on staff, ACAI knows all of the critical questions to ask. By blending innovative problem-solving skills, solid research methodology, quality construction techniques, and a collaborative approach, the ACAI team consistently completes projects on time and within budget.

The ACAI staff is uniquely qualified to deliver construction projects. Our one-stop shop is well versed on utilization of design-bid-build, design-build, fast-track, construction management and construction management at-risk methods, and our professional construction management staff is committed to providing independent Owner Representation, and Design Criteria Professional and Program Management services for our valued clients. ACAI's long history of construction management projects have ranged from major sports venues to governmental and healthcare facilities of all sizes, both public and private.

Contract Administration

Recognizing that the construction phase is critical to successful project management, ACAI maintains carefully documented records, including meeting minutes, logs for RFIs, COs, shop drawings, submittals, etc., to keep all parties abreast of current developments. A project's designated Contract Administrator (CA) reviews the construction documents prior to the pre-construction meeting and visits the construction site regularly to monitor construction progress and answer the contractor's questions. The CA keeps the client abreast of construction progress and answers the contractor's questions, issues a punch list and verifies completion of the project. Our services include a one-year post-occupancy walk-through to review project issues after the user-group is in place and prior to the expiration of warranties and construction management delivery for especially challenging projects.

Please see section 11 for information regarding our subconsultants company information.

SUSTAINABLE BUSINESS PRACTICES

As members of the US Green Building Council, and ranked as the largest LEED Architectural firms in Broward County in 2009 by the South Florida Business Journal, ACAI is firmly committed to green design and green practices. Examples include providing financial incentives to use public transportation (e.g., giving Tri-Rail passes to employees to promote use of South Florida's commuter rail service), using electronic forms whenever possible, e-mail letters and documents to be read online rather than printed out, promote our staff to take their laptops or iPads if available to team meetings to avoid printing of reports or other meeting material, provide washable china and utensils in our lunchroom, recycling of documents twice a week, recycling of toner cartridges, provide water-efficient faucets and toilets which help conserve water by providing a lower flow rate and providing for company use hybrid vehicles to help reduce the environmental impact of ACAI's automobile and truck use. ACAI and its staff take active steps to protect and preserve our environment.

At ACAI, we believe the most effective green projects are created when there is synergy between all members of the project team. LEED Design and practices are cost efficient and environmentally sound. Good, green design accelerates the project approval process with local governmental agencies and will result in a building which is easier to maintain. Our designs meet LEED certification requirements, by utilizing energy efficient mechanical systems, day-lighting, drought-tolerant planting, a cool roof systems, high-performance glass, water clarifiers and recycled or renewable building materials.

ACAI follows the US Green Building Council's "LEED" Rating system. The LEED system takes into account the design, construction, and performance of buildings, and is based on five main categories: sustainable site development, water savings, energy efficiency, material selection, and indoor environmental quality. Each category receives a number rating, and levels of LEED certification are awarded accordingly. ACAI understands these principles and practices and is committed to making our projects better for the people we serve and the environment for which we live.

The ACAI "Green Team", with 9 LEED Accredited Professionals in-house, serves as the catalyst for this synergy. Our passion for green building drives us to meet a project team's needs through a holistic, integrated design process. While our direct client may be the owner, architect, contractor or facility manager, we invariably serve every team member to ensure the best possible results. Our Environmental Design and LEED Consulting capabilities include the following services: Green Material Sourcing; Green Building Charrettes and Project Strategy Sessions; Integrated Design Project Management; LEED Certification/Registration; LEED Consulting; LEED Project Administration and Sustainable Design.

KEY PERSONNEL

The Project Team will include the following:

Adolfo J. Cotilla, Jr., AIA, Principal in Charge, has over 35 years of diverse experience in the field of Architecture. Mr. Cotilla earned his Masters of Fine Arts in Architecture from the University of Florida. He is a Florida Registered Architect (License number 8011) and also a Florida Certified General Contractor (License number CGC010769). He has been consulting, designing and delivering projects since 1979. In 1985, Mr. Cotilla founded ACAI Associates, Inc., a Florida Statewide Minority Business Enterprise and FDOT Disadvantaged Business Enterprise Certified firm with Corporate Headquarters located at 2937 W. Cypress Creek Road, Suite 200, Fort Lauderdale, FL 33309 and branch offices in Boca Raton and Miami. ACAI Associates, Inc. is a licensed Architecture, Landscape Architecture, Engineering and General Contracting firm offering a wide range of services revolving around new design, rehabilitation, additions and remodeling of existing facilities. As Principal in Charge, Mr. Cotilla oversees the management of all assignments for which he is responsible and maintains direct contact with Clients throughout the project duration. His responsibilities include overseeing the project team, reviewing financial project goals, meeting with the Project Managers & project teams, reviewing the schedule and maintaining relationships with the client contacts as well as with the Developer's Project Manager and construction team.

Donald Wilkin, RA, Project Architect, has over 33 years of diverse experience in the field of architectural design, including governmental, educational, commercial, medical, recreational, office and industrial facilities. Mr. Wilkin earned his B.A. Architecture from the University of Tennessee and is a Florida Registered Architect (License number 11619). He is CPTED certified and most recently earned his Certificate of Wind Load Calculations and Other Wind Issues certification and Certificate of Wind Load Calculations-Structural Applications certifications through the University of Florida. Mr. Wilkin has been responsible for various management and technical duties for all architectural projects, including planning, working drawing production and design. His focus is providing the utmost satisfaction to the client by ensuring projects are functional, code compliant and that they are completed on time and within the budget. He conducts weekly staff meetings to set production goals on a task-by-task basis. He also reviews the design budget on a bi-weekly basis to verify that the progress being made is consistent with the time charges and will constantly monitor the team's production rate and determine if additional staff is needed to meet the target milestone dates. Additionally, he is responsible for reviewing the project schedule and making periodic updates to reflect milestones & deadlines and control work efforts and budget.

W. Randy Scott, Project Manager, has over 23 years of experience in all facets of architecture and building construction, including planning, design, production, project coordination and construction administration. He has extensive knowledge and experience in construction, building code enforcement, and project management. He has effectively provided project management as well as coordination with clients, contractors and a variety of municipalities to assure successful project completion. Mr. Scott's experience and management skills are successfully applied to various projects encompassing a variety of building types.

Charles H. Wilson, CGC, Construction Representative, has over 26 years of diverse experience in Construction Management and is responsible for ACAI's Construction Administration Post-Design Services. He is a Certified General Contractor (License number CGC 1517786) and has extensive field experience and his first-hand knowledge is one of his greatest assets to ACAI. He is experienced with public, commercial and private facilities.

Ricardo Rupcich, FTE Inspector, has over 29 years of practical engineering experience. Mr. Rupcich is a resourceful, hands-on, analytical and detail driven engineer. He is involved in all aspects of engineering and construction with solid knowledge of the project development process. As Senior Engineer, he is responsible for on-site inspections and identifies and resolves inefficient operational processes which are not in line with the projects approved construction drawings, specifications and shop drawings.

Victor Caban, LEED AP BD+C, LEED Consultant, has 10 years of experience in Architecture, Project Management, LEED and Construction. He has extensive knowledge of safety codes, regulatory compliance and on-site management. Mr. Caban is a former Vice President of the USGBC Miami Chapter and has a strong background in LEED administration and consulting. He is recognized as a hands-on project leader adept at directing cross-functional teams and multiple projects and has comprehensive skills in establishing and maintaining productive working relationships with clients and team members.

Rafael G. Oranday, LEED AP BD+C, Permitting, has over 18 years of architecture and building construction experience, including design, production, project coordination and construction administration. His responsibilities have included such areas as construction administration, design, permitting, code enforcement and project

management. Mr. Oranday is certified in permitting and is proficient in South Florida building codes and standards. He has in-depth knowledge of building code compliance requirements, which makes this process as smooth as possible for our clients.

Derek Carroll, LEED AP, Cost Estimator, has over 12 years of experience in the construction industry. He has extensive experience cost estimating for construction projects and utilizes 3D modeling programs to aid in the estimating process. His responsibilities have included preparing and developing detailed estimates for all phases of construction, monitoring cost trends, developing value engineering solutions and implementing BIM. His advanced modeling practices include the use of DProfile, Navisworks, ArchiCAD Graphisoft, OnScreen Takeoff and Autodesk Revit to leverage increased accuracy, coordination and constructability in the design and construction process.

John M. Poteat, Scheduler, has over 35 years of diverse experience in the field of Engineering and Construction Management. He has been participating in the planning, scheduling, design development and construction management of projects since 1979. He specializes in scheduling and coordination services for commercial, institutional and government projects. Mr. Poteat's primary services include formulating overall project schedules, monitoring project progress, coordinating on-going work and conducting bi-weekly job coordination meetings.

David Bardt, P.E., Senior Engineer, has more than 35 years of experience in Engineering, including more than 13 years of Project Manager experience for various projects at Fort Lauderdale Executive Airport. He manages projects from permitting through construction administration and has diverse, multidisciplinary experience which includes pavement management, zoning, permitting, airport design, construction administration, water supply & sewer main design, stormwater management, utility coordination & design and roadway access & parking design. Mr. Bardt earned his B.S. in Engineering from the University of Hartford and is a Florida Registered Professional Engineer (License number 33614). In addition, Mr. Bardt designed the airfield, drainage, security and landslide parking components for the new US Customs & Border Patrol Facility at the Fort Lauderdale Executive Airport.

Sri S. Sritharan P.E., Principal in Charge, has been involved in structural engineering design, construction administration of buildings and project management for over 23 years. He has experience in structural design and is responsible for structural design, developing design procedures and standards, quality control of designs and drawing products. He has completed over two thousand projects of small additions costing few thousands to airport terminals and medium rise buildings costing over \$150 million. Mr. Sritharan earned his M.S. in Structural Engineering from Vanderbilt University and is a Florida Registered Professional Engineer (License number 51133). Mr. Sritharan is the founder and principal of S & F Engineers, Inc. His responsibilities include project management, quality control of engineering products and marketing engineering services.

Donata M. Williams P.E., LEED AP, Vice President, Director of Engineering, is a Structural Engineer with more than 11 years of experience of analysis, design and detailing of various types of structures for the governmental, commercial, aviation, educational and residential sectors. She utilized various computer aided analysis and design tools such as Ram Structural System, Ram Concept, Ram Advance, Adapt, PCA Walls, AutoCAD and Revit Structure 2012. Ms. Williams is a LEED Accredited Professional who worked on one of the first LEED certified buildings in Florida. Ms. Williams earned her M.S. in Architectural Engineering with a Structures Concentration from the North Carolina Agricultural and Technical University and is a Florida Registered Professional Engineer (License number 67337). She is Vice President, Director of Engineering for S & F Engineers, Inc. Her responsibilities include project management, office standards, quality control of engineering products and marketing.

Steven Feller, P.E., LEED AP, President/Principal in Charge, has done extensive work with various state and local agencies assisting with the formulation codes of practical smoke control and life safety codes and compliance methods. He has extensive experience with all types of Municipal, City, County and Mixed-Use projects. Mr. Feller believes that building lasting relationships with clients based on competent, responsive and personal service is a major key to a successful, professional engineering practice. We have worked with many of our clients for more than 20 years. Additionally, he has obtained the U.S. Green Building Council's LEED Professional Accreditation, enabling Steven Feller P.E., Inc. the expertise to successfully integrate environmentally responsible building design. Mr. Feller earned his M.S. in Engineering from Newark College of Engineering and is a Florida Registered Professional Engineer (License number 22046).

David Bardt, P.E.

Senior Engineer

Representative Experience

Fort Lauderdale Executive Airport (FXE) General Engineering Consultant, Fort Lauderdale, FL

Serving as project manager. Kimley-Horn has served as a general consultant to the City of Fort Lauderdale for FXE for more than 13 years. In that role, we have completed numerous services, including The design of a new US Customs & Boarder Protection Facility; evaluation of the existing customs facility and site selection for a new facility; the airfield-wide rehabilitation of airside signage, lighting, and electrical services; the rehabilitation of Runway 8-26 and relocation of Taxiway Hotel; the rehabilitation of Runway 13-31; a new Airport Rescue and Fire Fighting (ARFF) station; a fiber-optic communications system connecting the airport gate system to a central computer; security improvements; relocation of Taxiway Alpha; design of an Aviation Equipment and Services Facility; rehabilitation of Taxiway Bravo; an Airport Master Plan and Strategic Business Plan; a pavement management study; and numerous other projects. We have truly functioned as an extension of FXE's staff, filling the gaps and helping the City as it operates one of the busiest general aviation airports in the country.

General Consulting Services at Tallahassee Regional Airport (TLH), Tallahassee, FL — Serving as project manager. First selected as a General Consultant in 2006, Kimley-Horn's contract was just extended until 2011. As one of three consultants available to the Airport, TLH has consistently turned to Kimley-Horn for their most critical projects, including airside design and landside transportation. Projects have included: design and construction phase services for the rehabilitation of the terminal and North Apron. The project included rehabilitation of an existing 13.7-acre apron, including the rubbilization in place of 6.4 acres of existing 16-inch-thick concrete to allow its reuse as base course. This approach minimized construction cost, as well as reduced time for construction. This sustainable approach also reduced the amount of waste material being hauled from the site, the amount of virgin material needed for the project and the amount of hydrocarbons emitted during construction of the project. Upon completion, the project won the FAC Environmental Award for Air Carrier Airports. Other work at TLH included the following: Taxiways Mike, Zulu, and Sierra; design and construction phase services for the rehabilitation of the South Apron Overlay; preparation of an airport pavement management system; and, on the landside, assisting the Airport with reallocating trips within their development of regional impact (DRI) to allow continued development of Airport property for revenue production.

FDOT Aviation Office Statewide Airfield Pavement Management Program, Statewide, FL — Served as contract project manager (CMP) for the Kimley-Horn team, which was the lead consultant to the FDOT in the update of the SAPMP. The project included inspection of approximately 95 airports across Florida and developed individual, district, and statewide pavement management reports. As CPM, coordinated directly with Aviation Office project manager (AO-PM). Was responsible for schedule development, coordination of all inspection teams, and managed all subconsultants. Worked with Aviation Office project manager in developing report templates, performed quality control for Kimley-Horn and subconsultant produced reports, participated with weekly calls with AO-PM, handled all billings and dealt with special requests from the AO-PM and individual airports, and oversaw technical enhancements developed for the project.

St. Petersburg-Clearwater International Airport (PIE) Runway 4-22 Rehabilitation, Clearwater, FL — Served as deputy project manager. The project includes design of the rehabilitation of Runway 4-22, including paving, drainage, and electrical systems. As part of the project, Kimley-Horn prepared a cost-benefit analysis to determine FAA eligible runway width and length. The final plans also included corrections to airfield pavement markings over the whole airport and re-designation of two runways to correct for magnetic variance.

Special Qualifications

- Has 38 years of experience
- Manages projects from permitting through to construction administration
- Diverse, multidisciplined experience includes pavement management ; zoning and permitting; airport design; construction administration; design of water supply and sewer mains; stormwater management; utility coordination and design; roadway access and parking design; and paving, grading, and drainage design
- More than 13 years of experience as Project Manager for various aviation projects at Ft. Lauderdale Executive Airport
- Designed airfield, drainage, security, and landside parking components for the new US Customs & Boarder Protection Facility at Ft. Lauderdale Executive Airport

Professional Credentials

Bachelor of Science, Engineering, University of Hartford

Professional Engineer in Florida, Georgia, North Carolina, South Carolina, Tennessee, and Colorado

Professional Organizations

American Society of Civil Engineers (ASCE)

Mr. Sritharan has been involved in structural engineering design, construction administration of buildings and project management for over 23 years. He has experience in nearly all types of building materials and structural framing systems used in construction today and in the past century. He has completed over two thousand projects of small additions costing few thousands to airport terminals and medium rise buildings costing over \$150 million.

Mr. Sritharan is the founder and principal of S & F Engineers, Inc. His responsibilities include project management, quality control of engineering products and marketing engineering services.

RELAVENT PROJECT EXPERIENCE

**Ansin Sport Park Community Center
Miramar, Florida**

The project consists of a new two story building for a community center. The approximate size of the facility is 8,000 sq. ft. Construction Cost: \$4,000,000

**Public Services/ Fire Station Facility
6500 Parkside Drive, Parkland, FL 33067 MAINTANENCE**

The project consisted of renovation and addition of the existing single story 3,660 sq. ft. building (used to the City Hall) for a new Fire Station. The approximate size of the facility is 10,000 sq. ft. Construction Cost: \$2,100,000.

**JAFCO Respite & Residential Center
Sunrise, FL**

The project involves three (3) identical single story residential buildings sq. ft. each and a two story Multi-Purpose facility with approximately 46,000 sq. ft. The residential buildings consist of exterior reinforced masonry walls and concrete columns as load bearing elements. The roof may consist of pre-fabricated wood trusses or precast concrete slab system.

**Seminole Police Department
Hollywood, FL**

The work under this project included interior remodeling to convert the old car dealership's show room into a police department office with holding cells and offices, addition of handicapped ramps and exterior wall alterations.

Fire Station No. 47, Ft. Lauderdale, FL

The project consists of a two story fire rescue facility. The structural framing consists of concrete floor slab for the second floor and for the roof. The building measures approximately 7,800 sq. ft. Construction Cost: \$3, 800,000

Ms. Williams is a Structural Engineer with more than 11 years of experience of analysis, design and detailing of various types of structures for the governmental, commercial, aviation, educational and residential sectors. She utilized various computer aided analysis and design tools such as Ram Structural System, Ram Concept, Ram Advance, Adapt, PCA Walls, and AutoCAD. She has also been trained in Revit Structure 2012.

Ms. Williams is a LEED Accredited Professional who worked on one of the first LEED certified buildings in Florida. She has worked on several other buildings that have completed construction and are pursuing LEED certification and is currently involved in two other LEED projects.

Ms. Williams was one of the first 3 people in the state of Florida to receive her CM-BIM certification.

Ms. Williams is Vice President, Director of Engineering for S & F Engineers, Inc. Her responsibilities include project management, office standards, quality control of engineering products and marketing.

RELAVENT PROJECT EXPERIENCE

**Urban League of Broward County: Community Empowerment Ctr.
Fort Lauderdale, FL**

Ms. Williams served as project manager and special inspector for this two-story building that was completed in May 2012. This multi-purpose facility has approximately 30,000 sq. ft. of floor area housing new offices for the Broward County Urban League, as well as large meeting rooms and training rooms. The building also includes a two story space with allowance for future 2nd floor addition.

This facility was constructed with tilt-up, composite steel floors, bar joist low roof and a cast-in-place concrete high roof.

This project was completed in 2012.

**Foster Park Community Center
Hallandale Beach, FL**

Ms. Williams served as project manager and special inspector for a new one-story Community Center building with approximately 9,130 sq. ft. to house a banquet hall, library, classroom, a small gymnasium and support spaces. She did most of the analysis, design and detailing for this CMU, bar joist, composite bar joist and cold form steel trusses. Approximately half of this one-story building was designed for a future second floor.

The project was completed summer 2012.

Experience

As President and Founder of this firm, Mr. Feller has done extensive work with various state and local agencies assisting with the formulation codes of practical smoke control and life safety codes and compliance methods. He has extensive experience with all types of Convention Centers and Community Centers, as well as other Municipal, City, County and Mixed-Use projects. Steve believes that building lasting relationships with clients based on competent, responsive and personal service is a major key to a successful, professional engineering practice. We have worked with many of our clients for more than 20 years. Additionally, he has obtained the U.S. Green Building Council's LEED Professional Accreditation, enabling Steven Feller P.E., Inc. the expertise to successfully integrate environmentally responsible building design.

PROJECT MANAGER'S EXPERIENCE

CITY OF FORT LAUDERDALE
CITY HALL, DIVISION OF PROCUREMENT SERVICES
100 N. Andrews Avenue, Room 619
Fort Lauderdale, FL 33301

ACAI Associates' approach to each project is to examine the Clients' goals, budget and projected schedule at Project Start-up in order to ascertain how to best fulfill these requirements. Once the project is underway, ACAI's Project Coordinator reviews its progress on a weekly basis and ensures that each project is receiving the quality service it deserves. ACAI believes that proactive management is critical to each project's successful completion. Each of our Project Managers participates in a weekly Manager's meeting at which time each project's status and requirements are discussed. In addition, ACAI has an in-house, certified permit expediter and project schedulers who will be actively involved in the project and who are very familiar with all codes, regulations and requirements.

Our proposed Team Project Manager is Mr. W. Randy Scott, who has current project experience with your City. He has over 23 years of experience in all facets of architecture and building construction, including planning, design, production, project coordination and construction administration. He received a B.A. in Architecture from Southern University.

Mr. Scott has diverse experience in the field of Construction Management and Construction Administration, including aviation, governmental, educational, commercial, medical, recreational, office and industrial facilities. He has extensive knowledge and experience in construction, building code enforcement, and project management. Mr. Scott has effectively provided project management as well as coordination with clients, contractors and a variety of municipalities to assure successful project completion. His experience and management skills are successfully applied to various projects encompassing a variety of building types.

Recently completed was the North and South Perimeter Road Water and Wastewater Improvements project for Broward County Aviation Department (BCAD), where Mr. Scott served as Project Manager. In this project, ACAI was selected to provide full-time resident project inspection services as part of the General Engineering Consulting Services contract for Ft. Lauderdale Hollywood International Airport. This project entailed installation of a new wastewater force main along the North and South Perimeter Road. Mr. Scott's involvement included attendance at meetings between the Owner's Representatives and the contractors; review of and daily reporting on contractors' performance; maintenance of daily logs; inspection of work in progress and completed work on a daily basis and completion of all necessary close out and construction completion forms and documentation in coordination with BCAD for the project.

In addition, Mr. Scott served as Project Manager for the South Florida Water Management District Environmental Laboratory Facility project. This project involved the design and development of a new 2-story, 36,000 sf facility based upon a Basis of Design Report (BODR) and site configuration studies completed by ACAI, as well as compliance with the District's Standards. For this project, ACAI provided complete Architectural services including Facility Programming, Site Planning, and Architectural Design and Post Design services (Construction Management) for a new Laboratory Building for the South Florida Water Management District. Our scope of services for the Construction Management services included assistance during the bidding phase, review of shop drawings, responses to RFI's, attendance at bi-monthly construction meetings and construction observation. This project was designed using sustainable design principles and has recently been designated as a LEED® Gold building.

Mr. Scott also served as Project Manager for the following recently completed projects:

- North Perry Airport HWO Wayfinding Signage
- SFWMD Pump Station G508
- Miramar Ansin Park Sports Complex

6

APPROACH TO SCOPE OF WORK

CITY OF FORT LAUDERDALE
CITY HALL, DIVISION OF PROCUREMENT SERVICES
100 N. Andrews Avenue, Room 619
Fort Lauderdale, FL 33301

APPROACH

The City of Fort Lauderdale should seek a well qualified Firm that can represent its interest in an objective and unbiased fashion while providing the construction management services required in the delivery of the Customs Building. We believe ACAI Associates is that Firm for a number of reasons:

- We do this type of work regularly and have a vision
- Our office is in very close proximity to the project site
- We know the airport and have the right Team

This assignment is what's normally considered a construction administration phase of a design project with the added benefits of having enhanced on-site visits (FTE) and including the Owner in the role of Construction Manager as an added resource.

We're familiar with both the project and FXE. Prior to the Customs Facility becoming a City designed project the ACAI/Kimley-Horn (KHA) General Consultant Team was originally tasked with its programming and design -- Kimley-Horn is the Civil Engineer of Record for the Customs Facility. In addition, we were the Design Criteria Professional for the Airport's Administration Building and the Architect of Record for its Air Rescue and Fire Fighting Facility constructed just to the west – both roles were very similar to the role defined in the Customs scope of work; there's no other civil engineering firm more familiar with the project and FXE than Kimley Horn; and our offices are across the street from the airport.

Our approach is to create a collaborative atmosphere through commitment and planning by staying close to the construction team. This approach will minimize problems and delays by noting areas of challenges and those that could be expected through tracking staged "what if scenarios" along with possible solutions.

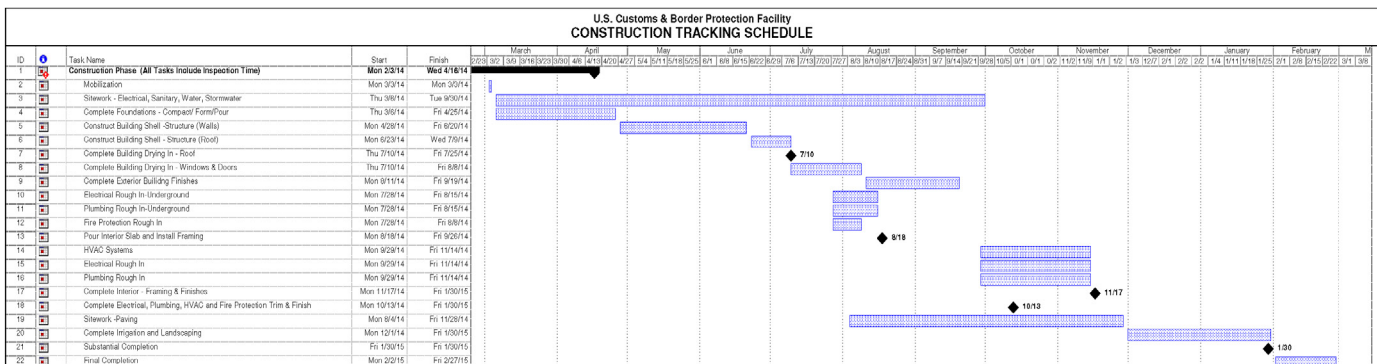

Vision, Ideas and Methodology

The eighteen items making up your list of services expected for this project provide an overview of our methodology. All eighteen items are well represented by our team's resources. Our FTE will be in daily communication with our Project Manager and will interface in the same schedule as the Contractor. Our office location affords us a "real time" access to the project.

Our vision is to hover ahead of the construction timeline, take advantage of our closeness to the job site and stay really familiar with the project. Tools we use are mostly Timeline Project Schedule, Primavera and Project Submittal Log.

- Hold windshield visits within the biweekly intervals – don't wait for the interval;
- Integrate our Inspector and PM through impromptu on-site meetings with our FTE;
- Create a separate timeline schedule to track and identify progress and any departures from the construction schedule;
- Discuss noted items with the on-site Contractor and Maintain an up to date project submittal log with special players tracking for AOR/LEED/EOR/CM. Of particular importance is the submittal log because of the tracking requirement of the extra layer of reviewers involved in the process.
- Maintain clear lines of communications with the Contractor through field reports

Timeline Project Schedule

Actual Project Cost: \$8,098,666

Completion Date: 2012

Services Provided: Construction Administration, Facility Program, Site Plan Design, Architectural Design, LEED® Certification

Project Description

ACAI was commissioned to provide complete Architectural services including Facility Programming, Site Planning, and overall Architectural Design and construction documentation for a new Laboratory Building for the South Florida Water Management District. This project involved the design and development of a new 2-story, 36,000 sf facility based upon a Basis of Design Report (BODR) and site configuration studies completed by ACAI, as well as compliance with the Districts Standards.

The \$9 million facility consolidates and centralizes five ecological and water quality groups associated with the management and protection of South Florida's coastal resources. The new facility includes state-of-the-art modular laboratories, staff offices, sampling and environmentally controlled storage facilities designed around a central 2-story atrium. This project was designed using sustainable design principles and has recently been designated as a LEED® Gold building.

Estimated Project Cost: N/A

Actual Project Cost: N/A

Completion Date: 2007

Services Provided: Architecture, Permitting

Project Description

This project was for the US Department of Homeland Security, Transportation Security Authority (TSA) located at Palm Beach International Airport (PBI) at security checkpoint 'A-B'.

The project was a "Tenant Build-Out" of approximately 4,800 s.f. of leased space from PBI with architecture, engineering, fire protection and testing as part of the professional services performed. The space was designed to include administrative offices, support spaces, operations center, and crisis room. All work was permitted through Palm Beach County and PBI.

Our scope consisted of pre-design and design services, testing (ACM, EE & T&B), FIV's and Permitting.

Estimated Project Cost: \$

Actual Project Cost: \$11,381,915

Completion Date: 2011

Services Provided: Construction Management, Owner Representation, Scheduling, Progress Monitoring, Inspections

Project Description

ACAI was retained by Kimley-Horn and Associates to perform construction phase services for the Opa-Locka Executive Airport Air Traffic Control Tower. The work included review of the architectural, mechanical, electrical and plumbing components. The project also required special inspectors for the steel connection and precast elements as well as threshold inspections. ACAI served as the part-time Resident Project Representative and Engineer's agent at the site, by providing review of the progress schedule, shop drawings and sample submittals and served as the liaison between the contractor and engineer.

ACAI provided construction management services associated with the phased redevelopment of Passenger Terminal A, the Airport Roadway system, Airfield Improvements and related facilities. ACAI was responsible for developing cost loaded schedules, monitoring and approving monthly construction progress, conducting civil inspections, developing master schedule update procedures, and revising scheduling specifications for all new construction projects while providing quality assurance and minimizing operational disruptions.

FORT LAUDERDALE-HOLLYWOOD INTERNATIONAL AIRPORT EXPANSION, PHASE III, Fort Lauderdale, Florida

Contact: Juli Edwards **Phone:** (954) 684-1320

Email: jedwards@pgal.com

Estimated Project Cost: N/A

Actual Project Cost: \$83,000,000

Completion Date: 2003

Services Provided: Construction Management, Program Management, Value Engineering

Project Description

Careful attention to value engineering, detail, constructability issues, design details and full time construction oversight was paramount in the successful delivery of the new Convention Center for Palm Beach County in West Palm Beach, Florida.

ACAI Associates, Inc. was selected as part of the Owner's Representative and Construction Management Team for the Architecture, Structural and MEP Engineering Peer Reviews and Full Time on-site oversight of West Palm Beach's newest landmark building in City Place. ACAI worked very closely with the Owner, URS/O'Brien Kretzberg and its design/construction team in delivering this 19-acre award-winning project where a site of grand International Art and Antique shows featuring vendors from around the world can be seen.

CIVIL ENGINEERING - KIMLEY-HORN AND ASSOCIATES, INC.

Kimley-Horn and Associates, Inc. was founded in 1967 in Raleigh, North Carolina by Bob Kimley and John Horn—two senior engineering professors at North Carolina State University. The expertise of the firm was initially focused on traffic planning and public transportation projects. In the ensuing 47 years, the firm has expanded both geographically and in the variety of planning, engineering, and environmental services that it provides. We have been providing engineering and planning services at airports for more than 37 of those years.

Today, Kimley-Horn is a full-service, multidisciplinary consulting firm with more than 1,900 employees in 59 offices in 19 states offering a full range of consulting services to local, regional, national, and international clients. In Florida alone, there are more than 400 employees in 14 offices, 20 devoted full time to serving our aviation clients. Whether it's runways, roadways, or parking; landside access or environmental studies; operations or technology; the firm's experienced professionals can develop innovative solutions you can rely on. Kimley-Horn offers comprehensive airside and landside services to meet wide-ranging needs at airports large and small. Our staff also has extensive experience and is very familiar with the procedures and requirements of the Federal Aviation Administration (FAA), and the Florida Department of Transportation. Our Florida based aviation personnel include former FAA Orlando Area District Office (ADO) personnel who maintain strong personnel relationships with the ADO staff. We currently serve as an on call consultant for the FDOT Central Aviation Office, as well as their prime consultant for the Statewide Aviation Pavement Management Program. In 2013, Kimley-Horn was ranked 10th for airport consulting firms in the nation by Engineering News-Record.

We pride ourselves in our ability to tailor comprehensive airside and landside services to our clients' needs. Kimley-Horn's approach gives our clients the best of both worlds—the resources of a large, nationally-ranked firm and the personal attention and response of a small dedicated professional team. With both aviation specific engineering and planning services in house and in Florida, you get the responsiveness, expertise, and experience you need for the Fort Lauderdale Executive Airport.

With the Kimley-Horn team, you get a consultant that can help you meet any challenge you face at Ft. Lauderdale Executive Airport, one that listens to your needs and delivers solutions to meet those needs.

STRUCTURAL ENGINEERING - S & F ENGINEERS, INC.

Since 2001, S&F Engineers, Inc. worked with nearly every major city building department in South Florida on a regular basis while providing high-quality, creative and conscientious structural engineering services to a diverse clientele including Architects, Contractors, Developers, Building Owners, Facility Managers and Government Agencies. In the past twelve years, we have been involved in over a thousand projects ranging from small repair work to new building projects costing over \$100 million. In that the majority of our completed projects were permitted in Florida, we are very familiar with the Florida Building Code and the associated codes that it references such as, ASCE 7 (for wind loads). S & F staff is also very familiar with the IBC, FM Global requirements and FEMA guidelines.

Services provided by SFE includes, structural design for new construction, design of building additions, existing building evaluations for new occupancy, structural integrity studies, structural repair design, construction inspections, special inspection of structures, peer review and expert witness testimonies.

Mr. Sritharan, P.E., principal and founder of S & F Engineers, Inc. has over twenty-two years of experience in structural design and is responsible for structural design, developing design procedures and standards, quality control of designs and drawing products. Ms. Donata Williams, P.E., LEED AP serves as Director of Engineering and handles project management, structural design and construction document production controls. She has over 10 years of experience in the design of structural systems and project management.

From its office centrally located in Fort Lauderdale, SFE serves the tri-county area very effectively and its exceptionally qualified and trained staff insures all of our projects meet the clients' lofty expectations. The firm currently has 10 employees, including four (6) engineers and two (2) CAD designers with more than 60 years of total experience in structural engineering.

SFE has been certified as Small, Disadvantaged and/or Minority Owned Business (CBE/DBE/MBE) by Broward County under the Uniform Certification Program (UCP) administered by FDOT, The School District of Palm Beach County, State of Florida office of supplier diversity and several other agencies.

MEP ENGINEERING - STEVEN FELLER, P.E., INC.

Steven Feller P.E., Inc. was founded in 1979 by Steven Feller. Over our first 5 years we grew from a 1 person firm to 15 engineers and designers. During the next 15 years we grew slowly, adding only very experienced and thoroughly qualified engineers and designers to our current staff of 50 (this number also includes a few overworked administrative personnel). We have consistently evolved along with our industry - from hand drafting to 100% computer aided design and drafting. Our staff level has remained constant over the past eight years. Our office is currently in the process of implementing the latest software systems in computer aided drafting and design – Revit 2008.

Over the past 35 years we have gained a tremendous resume of varied projects. From high rise office buildings, condominiums and hotels to large single family homes, regional malls, industrial warehouses, airports, municipal and Federal facilities, sports arenas and much more. We have designed the Electrical, HVAC, Plumbing, Fire Sprinkler, and Life Safety Systems for all of these projects.

Design schedules are consistently met. All documents incorporate sufficient detail to expedite Building Department approval and Contractor's bidding. Cost effectiveness is foremost in our engineers' minds during all phases of design and contract administration.

Being a member of the Broward County Board of Rules and Appeals for the past 17 years has also given Steven Feller and our firm an opportunity to help reshape the local Building Code and work closely with all Building Departments in both Dade and Broward Counties. Familiarity with Plan Reviewers and Building Department procedures enable us to help expedite permitting through these departments, which saves our clients time and money.

Our commitment to the team concept requires that the mechanical and electrical engineering of a project support the architectural and interior design concepts which have been approved by the client. As engineers, we look for inventive methods and solutions to maintain the integrity of the design, comply with codes and meet expected probable construction costs.

We have chosen consciously to remain a mid-size firm with an engineering staff of 60 qualified engineers, designers, draftsmen, and administrative personnel. This allows Steven Feller P.E., Inc.'s associates, officers and principals to provide personal attention to our client's needs, assure that all the project requirements are met without over or under design, and that they are within the agreed budget.

We are not only committed to the design areas of the project, but once the construction documents are completed and the contractors are selected, we will meet with the client/architect and the assigned contractors to review the MEP design and resolve any areas of concern. During the construction of the project, our company commits itself to prompt shop drawing review and periodic site observations to assure that the project's design intent and compliance with code are being met. The contractor's requests for information or clarifications, extensive final punch listing and witness testings of the completed MEP construction are performed promptly and professionally.

This commitment assures the client that Steven Feller P.E., Inc. will not only provide the design for the project, but will also provide engineering services through the entire construction and startup occupancy phases. Additionally, we remain available to resolve any issues that arise naturally or as a result of system changes as the projects ages.

NON-COLLUSION STATEMENT

CITY OF FORT LAUDERDALE
CITY HALL, DIVISION OF PROCUREMENT SERVICES
100 N. Andrews Avenue, Room 619
Fort Lauderdale, FL 33301

NON-COLLUSION STATEMENT:

By signing this offer, the vendor/contractor certifies that this offer is made independently and *free* from collusion. Vendor shall disclose below any City of Fort Lauderdale, FL officer or employee, or any relative of any such officer or employee who is an officer or director of, or has a material interest in, the vendor's business, who is in a position to influence this procurement.

Any City of Fort Lauderdale, FL officer or employee who has any input into the writing of specifications or requirements, solicitation of offers, decision to award, evaluation of offers, or any other activity pertinent to this procurement is presumed, for purposes hereof, to be in a position to influence this procurement.

For purposes hereof, a person has a material interest if they directly or indirectly own more than 5 percent of the total assets or capital stock of any business entity, or if they otherwise stand to personally gain if the contract is awarded to this vendor.

In accordance with City of Fort Lauderdale, FL Policy and Standards Manual, 6.10.8.3,

3.3. City employees may not contract with the City through any corporation or business entity in which they or their immediate family members hold a controlling financial interest (e.g. ownership of five (5) percent or more).

3.4. Immediate family members (spouse, parents and children) are also prohibited from contracting with the City subject to the same general rules.

Failure of a vendor to disclose any relationship described herein shall be reason for debarment in accordance with the provisions of the City Procurement Code.

NAME

RELATIONSHIPS

In the event the vendor does not indicate any names, the City shall interpret this to mean that the vendor has indicated that no such relationships exist.
