The City agrees and acknowledges that the documents listed in **Exhibit G** (Government Site Investigation Reports) were made available by the Government prior to entering into this Exchange Agreement, and subject to the City's rights set forth in Article II, that the City knows and accepts the condition and state of repair of the Exchange Parcel. The Government shall not be liable for any latent or patent defects in the Exchange Parcel, and the City acknowledges the Government has made no representation or warranty, express or implied, concerning the condition and state of repair of the Exchange Parcel nor any agreement or promise to alter, improve, adapt, or repair the Exchange Parcel. The City agrees that its decision to acquire a leasehold interest for 22 years in the Exchange Parcel is based solely upon its own independent investigation. Except as set forth in the Ground Lease and subject to the rights of the City set forth in Article II, the City has assumed all risks regarding all aspects of the Exchange Parcel and the condition thereof, including, without limitation: (a) the risk of any physical condition affecting the Exchange Parcel including, without limitation, the existence of any soils conditions or the existence of archeological or historical resources on the Exchange Parcel; (b) the risk of any damage or loss to the Exchange Parcel caused by any means including, without limitation, erosion, flood, or earthquake; (c) the risk of use, zoning, habitability, merchantability, value, or quality of the Exchange Parcel or the suitability of the Exchange Parcel for its present use or future development; and (d) the activities of the federal government and others on adjacent or other nearby lands.

4.3 <u>Inspection</u>. The Exchange Partner is invited, urged, and cautioned to inspect the Exchange Parcel prior to entering into this Exchange Agreement. The failure of the Exchange Partner to inspect, or to be fully informed as to the condition of all or any portion of the Exchange Parcel will not constitute grounds for any claim or demand for adjustment or withdrawal of the exchange values or terms agreed herein.

4.4 <u>Fair Rental Value (FRV)</u>: The Government, at its sole cost and expense, conducted an appraisal on the Government Land to determine the FRV of a 22-year ground lease on the Exchange Parcel. The City shall have the right to reject a Ground Lease if the City is not able secure financing for the design and construction of the public parking garage on terms and conditions, including interest rates, acceptable to the City in its sole discretion. Such a determination will be made by the City upon consideration of revenue projections for the garage, cost of credit, pledge of revenue, operational and maintenance expenses and such other factors affecting the operation of a self-sustaining parking garage. In the event the City rejects the Ground Lease for lack of financing, the Government shall be released from all liability under this Exchange, including any and all claims for damages or payment for the services performed or streets vacated hereunder.

5.2 <u>Government Default: Failure to Convey Exchange Parcel</u>. Should the Government fail to convey the Exchange Parcel, notwithstanding the City's satisfaction of all conditions for conveyance of same, the City shall be entitled to whatever remedies at law may lie for consequential damages and costs incurred in performance of its obligations under this Agreement. The Exchange Partner shall not be entitled to specific performance or to exercise any other equitable remedy for the Government's failure to perform.

5.3. <u>Notice of Default and Opportunity to Cure</u>. In the event of default by either Party, each shall have such remedies as are available under the law. In case of default of any term herein, the party claiming default shall first send written notice to the other party notifying them of the default and that Party with an opportunity to cure said default within a reasonable time.

CAM #23-0461 Exhibit 1 Page 12 of 82 5.4 <u>Remedies Cumulative</u>. The failure of either Party to insist in any one or more instances, upon strict performance of any of the terms, covenants, or conditions of this Agreement shall not be construed as a waiver or a relinquishment of that Party's rights to future performance of any such term(s), covenants, or conditions by the other Party. No waiver by the Government or the City of any provisions of this Agreement shall be deemed to have been made unless expressed in writing and signed by an authorized representative of the Government or an authorized representative of the City as the case may be.

## Water Main Relocation Scope of Work

The Project includes the design, permitting, construction, testing, and startup of a new watermain and related work. The scope of work includes:

- 1. New 30-inch internal diameter watermain connecting from the intersection of SE 9<sup>th</sup> St and the intersection of SE 4<sup>th</sup> Ave to SE 11<sup>th</sup> St and SE 3<sup>rd</sup> Ave.
- 2. The new watermain will be installed via open cut in SE 9<sup>th</sup> St and via HDD in SE 3<sup>rd</sup> Ave to cross Tarpon River under the bridge.
- 3. Work shall also include any demolition, reconstruction, relocation, and incidentals required within City right-of-way, and County right-of-way to complete the project.
- 4. Design/Build Firms can provide an alternate bid for installation of the pipe on SE 9<sup>th</sup> Street via HDD. DBF is responsible for verifying all existing conditions and site constraints.

Included in the scope of work are design, permitting, construction, as well as inspection, testing, construction certification and all associated work delineated herein or determined by the DBF as required to meet the Project intent. The RFP Documents, including the Design Criteria Package (DCP), and the successful proposal, shall form the terms and conditions of the Contract.

The DBF shall be revsponsible for design, any additional surveying, geotechnical investigations, borings, environmental investigation, compliance, preparation of completed permit submittal packages, and procurement of all required permits for construction, construction phasing, maintenance of traffic and all other related work or services.

This Design Criteria Package sets forth minimum requirements regarding design, construction, and maintenance of traffic during construction, including specifications and other requirements relative to project management, scheduling and coordination with other agencies and entities such as the state, county and local government environmental permitting agencies and the public.

## Lift Station and Sanitary Sewer Line Relocation Scope of Work

The selected DBF shall perform the complete design, permitting, and construction of all aspects of the PROJECT to fulfill the intent of the PROJECT as described in this Design Criteria Package (DCP) and all supporting documents. Included in the PROJECT is the acquisition of all tools, equipment, materials, and other supplies including but not limited to fuel, power, water, and communication devices required to complete the PROJECT.

The work also includes the performance of all labor, work, and other operations required to complete the PROJECT. All work must be complete with all work, materials, and services not directly specified in the Contract Documents but necessary for the completion of the PROJECT to fulfill the intent of the CITY performed and installed by the DBF at no additional cost to the CITY above what is agreed upon in the Contract Documents.

PROJECT shall include:

- 1. Construction of a new submersible duplex wastewater pump station with control panel and electrical service (Pump Station A-16) relocated to a site approximately 210 feet east of the SE 4th Avenue and SE 11th Street intersection on SE 11th Street.
- Construction of approximately 220 linear feet of new 18-inch PVC gravity sewer with new sanitary manholes from an existing sanitary sewer manhole located at the intersection of SE 4<sup>th</sup> Avenue and SE 11<sup>th</sup> Street to the new Pump Station A 16 location on SE 11th Street.
- 3. Connection of the new 18-inch PVC gravity sewer piping at the proposed Pump Station A-16 and with the existing manhole at the intersection of SE 4th Avenue and SE 11th Street as shown on the Conceptual Drawings.
- 4. Construction of approximately 2,150 linear feet of new 12-inch HDPE force main from the new Pump Station A-16 on SE 11th Street to a connection point with the CITY's existing 36-inch force main on SE 7th Street. As shown on the conceptual drawings, the proposed 12-inch force main route is along SE 11th Street, SE 3rd Avenue, SE 8th Street, and SE 4th Avenue. The 12-inch HDPE force main is proposed to be installed utilizing HDD methods, requires a subaqueous crossing where SE 3rd Street crosses Tarpon River, and includes approximately 170 linear feet of open cut, 12-inch C900 PVC pipe with DIP fittings at force main connections and bends. All costs associated with existing utility exploration, design development of the complete force main system including HDD and open cut plans and coordination as needed with the separate water related DBF are the responsibility of the DBF.
- 5. Connection of the new 12-inch HDPE force main at the proposed Pump Station A-16 on SE 11th Street and with an existing 36-inch force main at the intersection of SE 4<sup>th</sup> Avenue and SE 7<sup>th</sup> Street as shown on the Conceptual Drawings.
- 6. Abandon and decommission the existing wet pit/dry pit duplex Pump Station A-16 including controls and electrical service located on SE 4<sup>th</sup> Avenue just north of SE 11<sup>th</sup> Street.
- 7. Abandon all existing gravity sewer piping and sanitary manholes on SE 4th Avenue and SE 10th Court associated with the existing Pump Station A-16 as shown on the Conceptual Drawings.

Abandon all existing force main piping on SE 4th Avenue from the existing Pump Station A-16 to an
existing sanitary manhole on SE 4th Avenue just south of SE 9th Court as shown on the
Conceptual Drawings.

Additional to the design, permitting, and construction of the PROJECT, the DBF is to perform inspections, utility testing, construction certification, construction management, coordination with separate water main DBF, public involvement, equipment startup, and all associated work described in the DCP or as determined necessary by the DBF and confirmed by the CITY to fulfill the PROJECT intent. The terms and conditions of the contract shall consist of the RFP documents including the DCP with all exhibits and attachments in addition to the proposal accepted by the CITY.

The DBF will be responsible for the complete design, topographic survey, benthic survey, geotechnical reports, environmental reports, submittal and procurement of all required design, environmental, and construction permit packages, construction phasing, dewatering, stormwater pollution prevention, maintenance of traffic, public involvement, and all other related work/services. The DBF will assume all responsibilities associated with being the PROJECT Engineer of Record (EOR).

This DCP conveys the minimum requirements of the CITY regarding the design, permitting, construction, maintenance of traffic operations, management, and scheduling of the PROJECT including coordination with local, county, and state governments and regulating agencies necessary to obtain permits for construction.
