NOT FDIC INSURED : NO BANK GUARANTEE : MAY LOSE VALUE

Current Market Themes

- ▶ The U.S. economy is characterized by:
 - ▶ Headline inflation numbers trending lower, but the Fed's current focus, "supercore inflation," is showing little sign of slowing
 - ▶ A labor market that has proven to be exceptionally strong
 - ▶ A more optimistic sentiment around economic growth due to resilient consumer spending

- ▶ Fed temporarily pauses rate hikes
 - ▶ The most aggressive series of interest rate hikes in recent history has come to a temporary pause in June
 - ▶ The Fed's most recent dot plot shows the potential for two additional rate hikes by the end of the year
 - ▶ Rates have moved up due to the Fed's rate trajectory shifting higher, the economy remaining stronger than expected, persistent inflation, and the market's "higher-for-longer" mindset

- ▶ Bond markets see continued volatility
 - ▶ The debt ceiling saga incited a separate spate of market volatility due to concern about a potential U.S. default
 - ▶ After plummeting at the end of Q1 due to volatility in the banking sector, short and medium-term yields steadily climbed throughout the quarter, with the 2-year rising over 100 basis points
 - ▶ The curve inversion fell dramatically at the start of Q2, but moved toward historic levels in June

Inflation Measures Remain Above Fed's Target

Treasury Issuance Expected to Surge Following Debt Ceiling Deal

The Reason

The U.S. Treasury needs to refill its depleted general fund while also covering higher outflows and lower tax receipts

The Impact

The net new issuance is expected to pull liquidity out of other markets and place upward pressure on short-term Treasury yields and on other sectors

U.S. Treasury Bills Issuance

Fixed-Income Sector Commentary – 2Q 2023

- ▶ **U.S. Treasuries:** After plummeting at the end of Q1 due to volatility in the banking sector, short and medium-term yields steadily climbed throughout the quarter, with the 2-year rising over 100 basis points.
- ▶ **Federal agency** yield spreads tightened during the quarter. Agency discount notes were favored over U.S. Treasury bills during the debt ceiling impasse; however, during Q1 value waned and callable spreads moved to the tighter end of their historical range.
- ▶ **Supranational** issuance was heavier than usual in the first couple months of the year which allowed spreads to widen and sporadic buying opportunities to arise. As supply dried up, spreads narrowed and traded in a tight range for the balance of the quarter.
- ▶ **Investment-Grade Corporate** spreads continued to retrace from their Q1 wides but remained above longer-term averages. Following the “risk-on” theme in the latter part of Q2, the IG curve flattened, resulting in longer durations and lower quality (BBB) performing best. Although the spread between financials and industrials remained well above typical levels, financials outperformed in Q2 as retracement from the exceptionally wide spreads in Q1 was significant.
- ▶ **Asset-Backed Security** spreads also retraced from mid-March wides, but not nearly to the extent as in corporates. Auto ABS issuance increased during Q2, which was a function of pent-up consumer demand.
- ▶ **Mortgage-Backed Securities** whipsawed in Q2 as a steep tightening of spreads through the second half of the quarter more than offset the steady and consistent widening through April. As a result, the sector generated attractive excess returns for the quarter. Strong returns were driven largely by the risk-on sentiment through much of the quarter and a modest decline in supply due to a drop in existing home sales and refinancings.
- ▶ **Taxable Municipals** issuance remained heavily oversubscribed due to a lack of new issuance. The secondary market had sporadic but limited opportunities that offered an attractive pickup versus industrial corporates.
- ▶ **Short-term credit** (commercial paper and CDs) yields increased during Q2 as the market repriced to actual Fed rate increases and reduced expectations for Fed rate cuts in late 2023. Spreads in short credit remained elevated and attractive for most of Q2 and added notable incremental income to shorter-term portfolios and liability-matching strategies inside of 12-month maturities.

Notes:

1. City Operating Funds – Self-Directed performance is calculated based on the weighted average yield of the City Self – Directed Account portfolio and the self-directed bank accounts, as well as the Florida CLASS and FL PALM Holdings.
2. Total City of Fort Lauderdale Funds calculated as the weighted average return of City Operating Funds - Self Directed, CRA Funds, and Fixed Income Investment Portfolio – PFMAM
3. Bond Proceeds balance includes all bond proceeds portfolios. Current quarter yields estimated based on all bond proceeds holdings. Fiscal Year to Date and Trailing 12 Month yields are estimated based on current quarter yields and 2018 Water & Sewer bond yield data.
4. Performance and Market Values from Fixed Income Investment Portfolio – PFMAM, OPEB Trust Fund, OPEB Post Retirement Pay Steps Plan Fund, Cemetery Trust Fund, General Employees Retirement System ("GERS"), and Police & Fire Retirement System ("P&F") are derived from their manager reports as of June 30, 2023.

Important Disclosures

- Market values that include accrued interest are derived from closing bid prices as of the last business day of the month as supplied by Refinitiv, Bloomberg, or Telerate. Where prices are not available from generally recognized sources, the securities are priced using a yield-based matrix system to arrive at an estimated market value.
- In accordance with generally accepted accounting principles, information is presented on a trade date basis; forward settling purchases are included in the monthly balances, and forward settling sales are excluded.
- Performance is presented in accordance with the CFA Institute's Global Investment Performance Standards (GIPS). Unless otherwise noted, performance is shown gross of fees. Quarterly returns are presented on an unannualized basis. Returns for periods greater than one year are presented on an annualized basis. Past performance is not indicative of future returns.
- Bank of America/Merrill Lynch Indices provided by Bloomberg Financial Markets.
- Money market fund/cash balances are included in performance and duration computations.
- Standard & Poor's is the source of the credit ratings. Distribution of credit rating is exclusive of money market fund/LGIP holdings.
- Callable securities in the portfolio are included in the maturity distribution analysis to their stated maturity date, although, they may be called prior to maturity.
- MBS maturities are represented by expected average life.

Glossary

- **Accrued Interest:** Interest that is due on a bond or other fixed income security since the last interest payment was made.
- **Agencies:** Federal agency securities and/or Government-sponsored enterprises.
- **Amortized Cost:** The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized on a straight line basis. Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- **Asset-Backed Security:** A financial instrument collateralized by an underlying pool of assets – usually ones that generate a cash flow from debt, such as loans, leases, credit card balances, and receivables.
- **Bankers' Acceptance:** A draft or bill or exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the insurer.
- **Commercial Paper:** An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- **Contribution to Total Return:** The weight of each individual security multiplied by its return, then summed for each sector to determine how much each sector added or subtracted from the overall portfolio performance.
- **Effective Duration:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **Effective Yield:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- **FDIC:** Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- **Interest Rate:** Interest per year divided by principal amount and expressed as a percentage.
- **Market Value:** The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.
- **Maturity:** The date upon which the principal or stated value of an investment becomes due and payable.
- **Negotiable Certificates of Deposit:** A CD with a very large denomination, usually \$1 million or more, that can be traded in secondary markets.
- **Par Value:** The nominal dollar face amount of a security.
- **Pass-through Security:** A security representing pooled debt obligations that passes income from debtors to its shareholders. The most common type is the mortgage-backed security.

Glossary

- Repurchase Agreements: A holder of securities sells these securities to an investor with an agreement to repurchase them at a fixed price on a fixed date.
- Settle Date: The date on which the transaction is settled and monies/securities are exchanged. If the settle date of the transaction (i.e., coupon payments and maturity proceeds) occurs on a non-business day, the funds are exchanged on the next business day.
- Supranational: A multinational union or association in which member countries cede authority and sovereignty on at least some internal matters to the group, whose decisions are binding on its members.
- Trade Date: The date on which the transaction occurred; however, the final consummation of the security transaction and payment has not yet taken place.
- Unsettled Trade: A trade which has been executed; however, the final consummation of the security transaction and payment has not yet taken place.
- U.S. Treasury: The department of the U.S. government that issues Treasury securities.
- Yield: The rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
- YTM at Cost: The yield to maturity at cost is the expected rate of return based on the original cost, the annual interest receipts, maturity value, and the time period from purchase date to maturity, stated as a percentage on an annualized basis.
- YTM at Market: The yield to maturity at market is the rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
