TASK ORDER No. 13

Dated the 20th day of November 2012

CITY PROJECT No. 11843

CITY OF FORT LAUDERDALE PROGRESSO DURRS DORSEY-RIVERBEND NEIGHBORHOODS STORMWATER SYSTEM IMPROVEMENTS PHASE I - PRELIMINARY DATA INVESTIGATIONS STUDY

On May 3, 2011 the City Commission authorized a Continuing Services Agreement with CDM Smith Inc. for the General Wastewater Consulting Professional Architectural - Engineering Services (RFQ No. 606-10482) associated with the City's wastewater and stormwater systems ("Master Agreement") as amended and approved by City Commission on May 1, 2012. This Task Order is being performed under the terms and conditions of the Amended Master Agreement.

BACKGROUND

The City manages a stormwater infrastructure service area that covers approximately 23,000 acres. The Progresso neighborhood covers approximately 315 acres (0.50 square miles) and is bounded to the north by Sunrise Boulevard, to the east by the FEC Railway, to the west by NW 11th Avenue, and to the south by Broward Boulevard. The adjacent Durrs and Dorsey-Riverbend neighborhoods which are located just west of the Progresso neighborhood, cover approximately 237 acres (0.37 square miles) and 380 acres (0.60 sq mi) respectively. The Durrs neighborhood is bounded to the north by Sunrise Boulevard, to the east by NW 12th Avenue, to the west by I-95, and to the south by NW 6th Street; and the Dorsey-Riverbend neighborhood which is immediately south of Durrs, is bounded to the north by NW 6th Street, to the east by NW 7th Avenue, to the west by I-95, and to the south by West Broward Boulevard. The total combined hydrologic project area overlaps two additional neighborhoods (Home Beautiful Park and City View Townhomes) and encompasses a larger topographical area of approximately 993 Acres.

The purpose of this Phase I task order is to perform preliminary investigations and analyses of the study area to determine the location, type, and quantity of geotechnical and hydrogeological investigations to be implemented in subsequent Phase II which will determine the feasibility of stormwater management via recharge wells and exfiltration trenches in the neighborhood.

SCOPE OF SERVICES

A combined kickoff meeting with Task Order 19 (Edgewood Stormwater System Improvements Phase I Preliminary Data Investigations) shall be attended and meeting minutes shall be produced.

The Consultant shall review and analyze available digitally published information on the geotechnical subsurface conditions in the project area from Broward County DERD, USGS, SFWMD, and FDEP to define known geotechnical data to be used in Phase II.

The Consultant shall perform calculations and site visits to the project area to identify the locations for testing and develop a testing plan and the data collection protocols.

The Consultant shall produce a proposed project schedule and develop a work plan sequence for the geotechnical and hydrogeologic testing.

The Consultant shall work with appropriate City staff to determine and identify the potential land areas available for future stormwater management.

The Consultant shall develop a brief Technical Memorandum summarizing the data gathered, proposed schedule, and testing plan and present the findings to the City in a meeting.

Project Management and Quality Control

Project management and quality management shall run concurrent to the project execution.

DATA OR ASSISTANCE TO BE PROVIDED BY THE CITY

- a. Updated flooding map complaint data from October 2011 storm.
- b. Meeting attendance.
- c. Available survey, geotechnical data, land availability guidance, and easements. Additional required survey spot elevations shall be performed by the City during the project as necessary.
- d. Existing record drawings for water, wastewater, and stormwater facilities to be impacted in the project area, as well as atlas, zoning, roadway, and special right-of-way information, parcel information as needed in GIS or CAD format.
- e. Assistance with neighborhood public awareness, field verification of existing structures as requested and escort of the Consultant or sub-consultants within project site and on private property as required.
- f. Timely reviews of submittals.

DELIVERABLES

The deliverables for this Task Order shall be the electronic transmittal in pdf format of the kickoff and final meeting minutes, and the Technical Memorandum containing the data, testing plan, schedule, and a figure of land areas for future stormwater management.

TIME OF COMPLETION

Scope of Services shall be completed within 6 weeks from the notice to proceed and signed purchase order.

PAYMENT AND COMPENSATION

Invoicing for the services shall be monthly based on services performed and cost incurred. A status report shall accompany each progress invoicing. A breakdown of the labor estimate is provided in Attachment 1.
