RE: Letter of Support

Dear Mr. Pawuk,

The Marine Industries Association of South Florida enthusiastically supports the development of additional dockage for larger recreational vessels in South Florida. An adequate dockage offering is critical to maintaining South Florida's competitive advantage in the marina as well as service and repair segments of the larger vessel market known as megayachts and superyachts.

The megayacht and superyacht market is very mobile and dockage availability is a key factor in their destination decisions. The Marine Industries Association of South Florida supports developments in South Florida that improve the available local dockage options for these larger recreational vessels. Additional dockage improves the region's international market leadership position and improvements to facilities such as the Las Olas Marina and the Hall of Fame Marina work to maintain South Florida as an international destination of choice.

Sincerely,

Carlos Vidueira
Executive Director

RE: **Hall of Fame Marina**
Letter of Support

Dear Mr. Pawuk,

I have reviewed the plans for the proposed project to renovate the Hall of Fame Marina. I understand that the proposed project will require a waiver of limitations through the City of Fort Lauderdale along with permitting through the regulatory agencies. Please accept this letter as support of the proposed renovation of the marina and thank you for requesting our input in the design.

Sincerely,

Dane Graziano
Senior Vice President & COO

RE: **Hall of Fame Marina Letter of Support**

Dear Mr. Pawuk,

On behalf of The Venetian Condominium Board of Governors, we appreciate the opportunity that our Dock Committee had to meet with your consultant, The Chappell Group, Inc. (TCG), and your marina management company, Westrec Marinas, in order to gather our input and feedback regarding the design of your proposed marina renovation at Hall of Fame Marina. The Dock Committee met with TCG on two separate occasions to discuss the proposed plan and to make recommendations and revisions. As such, a proposed plan was formulated by the Dock Committee and TCG to accommodate the requested revisions we had and to still meet the needs and operations of the owner and the marina. The Dock Committee understands that the proposed project will require a waiver of limitations through the City of Fort Lauderdale along with permitting through the regulatory agencies.

As the President of the Venetian Condominium Association, please accept this letter as the condominiums support of this project as proposed and illustrated in the attached plan dated March 15, 2013.

Sincerely,

A handwritten signature in cursive script that reads "Larry K. Burnette".

Larry K Burnette, President
