**GTL Generator No. 1 (Model Cat-D-3516, SN PBR00272)**

- GTL 2250 KW generator installed May 2008, manufactured 2005. This is an email from Pantropic detailing the timeline of the GTL generator: On Sep 30, 2014, at 10:43 PM, "Eduardo Riveron" <[Eddie\\_Riveron@pantropic.com](mailto:Eddie_Riveron@pantropic.com)<[mailto:Eddie\\_Riveron@pantropic.com](mailto:Eddie_Riveron@pantropic.com)>> wrote:

“Pat,  
I asked engineering and sales department to assist me with your inquiry. They retrieved the file and were able to determine the following. Although the unit was delivered in 2006, the project bid in mid-2005, at which time the generator set was ordered, prior to the EPA Tier unit availability. Thus, the unit is not EPA Tier labeled. The use of a DOC will accomplish RICE NESHAP, which will permit the generator to be used in conjunction with the FPL demand response program.”

**The Fiveash Diesels are all significantly older models ranging all the way back to 1941. None of these would be affected by the 2006 date in the rule. Pat provided the information why the GTL generator is also not affected by that date.**

**Fiveash Generator’s J & K (Model Cat-D-399, SN 36Z0706 & 36Z01643)**

**Fiveash Diesel Pumps 6 & 8 (Model Cat-D-379, SN 68B07894 & 68B07895)**

**Fiveash Diesel Pump 7 (Model Cat-D-397 SN 41B2092)**

**Fiveash Diesel Pumps 9, 10, & 11 (Model Cat-D398A, SN 66B0178 & 66B0749, Cat-D-398B, SN 66B9702)**
