

CITY OF FORT LAUDERDALE

TURN SPACES INTO PLACES

PARKLET PILOT PROGRAM

The City of Fort Lauderdale is seeking 'Parklet' partners for a one-year pilot project

Businesses are invited to reclaim the street for feet with the conversion of on-street parallel parking spaces into mini-parks called parklets.

Parklets are semi-permanent wooden or metal decks that expand the pedestrian area beyond the sidewalk into parking spaces, allowing business owners to provide outdoor seating without the need for permanent street re-design and construction.

Eligible Parklet applicants are business owners interested in creating a Parklet in parking spaces adjacent to their storefront.
