

TRANSPORTATION AND MOBILITY DEPARTMENT

Memorandum No. TAM 12 -

DATE: October 27, 2012

TO: Skip Margerum, Community Inspections Supervisor, DSD

FROM: Darlene Pfeiffer, Business Manager, T&M Department

SUBJECT: Approval of "Cycle Party" Application for Certificate of Public Convenience and Necessity

We have *reviewed* the subject applicant's permit application and Business Tax application and approve the request for the route in the Himmarshee Area of downtown Fort Lauderdale. Please continue the process as necessary so that this applicant can *move* forward with his business proposal as presented. I have forwarded the original applications *via* interoffice mail to your attention.

Please note that the original application included requests for two more routes, along Las Olas Boulevard and in the beach area. We are unable to support those requests because of safety concerns in those two areas. The Las Olas area route is along streets that are too congested and too narrow for safe passage without interfering with traffic. Most of the proposed beach route is along roads that are high-traffic and/or heavy pedestrian areas and public safety is a concern relative to the design and configuration of the proposed multi-rider vehicle.

Feel free to contact me if you have any questions.

cc: Diana Alarcon, Director, T&M Department
