

# ULDR 47-21 Revisions Stakeholder Meeting March 18, 2022

CASE: UDP-T24007 PZB Exhibit 4 Page 1 of 64

> CAM#24-0836 Exhibit 4 Page 1 of 64

#### Introduction

**Facilitator** Commissioner Ben Sorenson

<u>City Project Managers</u> Glen Hadwen, CC-P, LEED AP, Sustainability Manager

Dr. Nancy Gassman, PhD, CC-P, Assistant Director Public Works - Sustainability

Mark Williams, ISA, ASCA, LIAF, City Urban Forester

<u>City's Consultant</u> Calvin, Giordano & Associates, Inc.

Michael D. Conner, PLA, ISA, Senior Landscape Architect

Tammy Cook-Weedon, PLA, LEED AP BD+C, Director of Landscape Architecture

CASE: UDP-T24007 PZB Exhibit 4 Page 2 of 64

> CAM#24-0836 Exhibit 4 Page 2 of 64

### **Goal of Meeting**

To engage stakeholders in discussion to clarify the code and, if
required, make minor revisions that will result in bringing forward
ULDR 47-21 revisions to second reading without requiring
reapproval by Broward County or the Planning and Zoning Board.

CASE: UDP-T24007 PZB Exhibit 4 Page 3 of 64

> CAM#24-0836 Exhibit 4 Page 3 of 64

### **Ground Rules**

- Discussion shall be respectful and courteous.
- Scope shall be limited to text changes that can be accommodated without going back to PZB or require recertification of the proposed ordinance by Broward County.
- Changes may include clarifications.
- The Feb 9, 2022, Advisory Group communication will be the basis for discussion.
- Per the March 7, 2022, meeting with Commissioner Sorensen, additional concerns submitted prior to the 3/18 meeting will be discussed as time allows.
- Discussion will be limited to one two-hour meeting.
- Topics outside this scope or not appropriate for inclusion in ULDR 47-21 will be noted for future consideration.

CASE: UDP-T24007 PZB Exhibit 4 Page 4 of 64

> CAM#24-0836 Exhibit 4 Page 4 of 64

#### **Recent Activity**

March 20, 2021 – PZB Direction April — City Contracted with Calvin, Giordano & Associates, Ice. (CGA) May/June — (3) Stakeholder Group Meetings - Multiple Review Meetings with City staff July/August — Preparation of Revised Draft Ordinance - Approval from Broward County - Submitted to City Attorney September/October — Revision to address Attorney's comments - Final Reviews by City staff November / December — Ordinance to Planning & Zoning board - Approval with comments February 15, 2022 — First reading at City commission - Approval pending resolution Of Final Issues

CASE: UDP-T24007 PZB Exhibit 4 Page 5 of 64

> CAM#24-0836 Exhibit 4 Page 5 of 64

### **Clarifications of Some Issues Raised**

Concern: Proposed ordinance increases the number of trees required in some cases

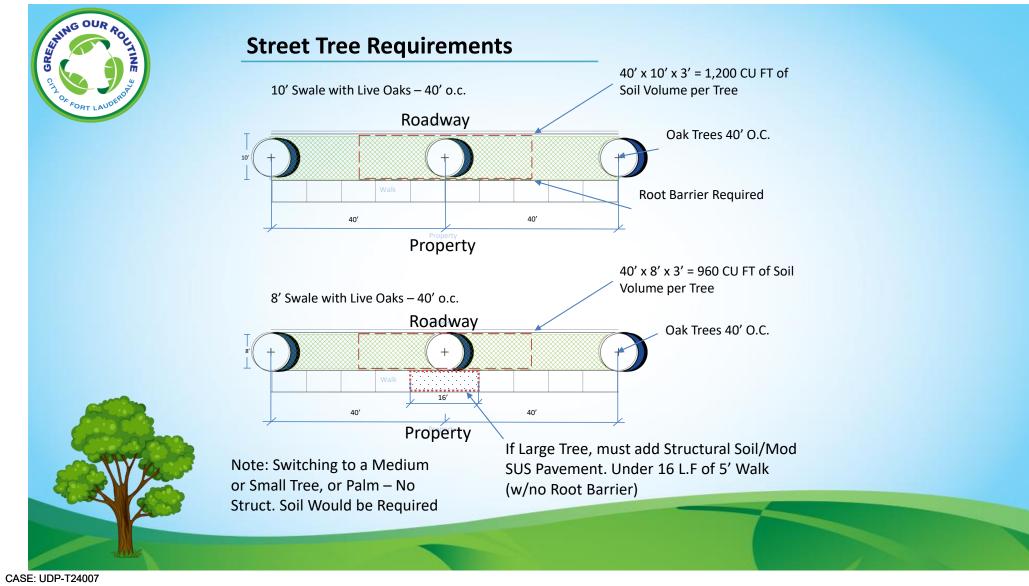

**<u>Response</u>**: The number of required trees has not increased in any of the zoning districts or categories. They all stay the same, except that the required number of street trees has actually been reduced because the drive ways can be subtracted.

 <u>Concern</u>: Proposed ordinance significantly increases the amount of large shade trees required.

**<u>Response</u>**: The term "shade" tree in the existing ordinance refers to large trees that are greater than thirty (30) feet in canopy diameter at maturity. Proposed ordinance does not use this term anymore. Instead, trees are listed as either large trees (>30'), Medium trees (>20'), or small trees (<20').

CASE: UDP-T24007 PZB Exhibit 4 Page 6 of 64

> CAM#24-0836 Exhibit 4 Page 6 of 64

PZB Exhibit 4 Page 7 of 64

> CAM#24-0836 Exhibit 4 Page 7 of 64

**Response (cont.)**: Example — Looking at the net lot area — Tree requirements... The existing ordinance requires 20% of those trees to be "shade" trees (>30' DIA canopy). The proposed ordinance increases the required number of large trees (>30' DIA canopy) from 20% to 50% (not 75%) then 25% can be medium trees, and the remaining 25% can be a combination of small trees and palms.

Thus, the proposed ordinance does increase the amount of large trees in this category, but this is aimed at achieving the policy direction of enhancing the City's tree canopy.

This type of flexibility, with a mix of large, medium, and small trees and palms, carries through the entire proposed ordinance.

CASE: UDP-T24007 PZB Exhibit 4 Page 8 of 64

> CAM#24-0836 Exhibit 4 Page 8 of 64

 <u>Concern</u>: Proposed ordinance requires the installation of structural soils and modular suspended pavement systems, which will dramatically increase costs for builders/developers

**<u>Response</u>**: The use of these systems is only required in the proposed ordinance when a large tree (or medium tree) is being planted without the proper amount of root space. So, if there is adequate room for that size tree, then there is no requirement to install structural soil.

It is intended to encourage the right tree in the right place. However, when that is <u>not</u> possible, then the emerging technologies in our industry will help prevent costly damage to private and City-owned hardscapes from tree roots and grow larger, healthier trees.

Yes, it costs a little bit more, but it will not be required for most, if not all trees, on most sites.

CASE: UDP-T24007 PZB Exhibit 4 Page 9 of 64

> CAM#24-0836 Exhibit 4 Page 9 of 64

**Concern:** The proposed ordinance increased the equivalent value of trees being removed too much.

**<u>Response</u>**: The current ordinance under values the monetary cost of replacing existing trees. The proposed ordinance is updating the formula so that it uses current costs and more accurately reflects a cost similar to that of planting replacement trees.

**Example**: Removal of 20 "D.B.H. Live oak tree with a 50% condition rating.

Old Code: (Uses \$65.00 per caliper inch)

Uses "A" species = 100% x \$65.00/in x 50 = 10" or replacement trees, or \$650.00

**Note:** Cost or planting (5) 2" cal. live oak is closer to \$2,500.00 – (5) x 500.00/ea.

This, when replacement trees are not proposed to be planted, then the equivalent replacement value being paid into the City's tree canopy trust fund is way too low.

CASE: UDP-T24007 PZB Exhibit 4 Page 10 of 64

> CAM#24-0836 Exhibit 4 Page 10 of 64

#### Response (cont.):

<u>New Code</u>: (Uses \$250.00 per caliper Inch – \$100.00 wholesale x 2.5 = \$250.00

Class "A" Species = 100% x 250.00/in x .50 = 10" of replacement trees, or \$2500.00

**Note**: This amount more closely matches the actual cost of planting (5) 2" Cal. Live Oaks

CASE: UDP-T24007 PZB Exhibit 4 Page 11 of 64

#### **Structural Soil Cost**

Example: 9' x 18' island with a large tree Total volume needed: 9x18 = 162sf x 3 = 486 cu ft Structural soil volume needed: 1200 - 486 = 714 cu ft /27 = 26.44 cu yds Cost for structural soil material: 26.44 cu yds x \$66/cu yd = \$1,745.33 Cost w labor & installation: + \$1,200 = \$2945.33 or @2x = \$3,490.66 Credit for material that would have been typically installed: 12'' limerock base: 8.81 cu yds x\$20/cu yd = \$176.26 12'' completed sub base - 8.81 cu yds x \$10/ cu yd = \$88.13 Total cost with labor & installation @2x = 2x(\$176.26 + \$88.13) = \$528.79 Net cost: \$2,945.33 - 528.69 = \$2,426.54 or \$3,490.66 - 528.79 = \$2,961.87

CASE: UDP-T24007 PZB Exhibit 4 Page 12 of 64

> CAM#24-0836 Exhibit 4 Page 12 of 64

#### **Modular Suspended Pavement Cost**

Example: 9' x 18' island with a large tree

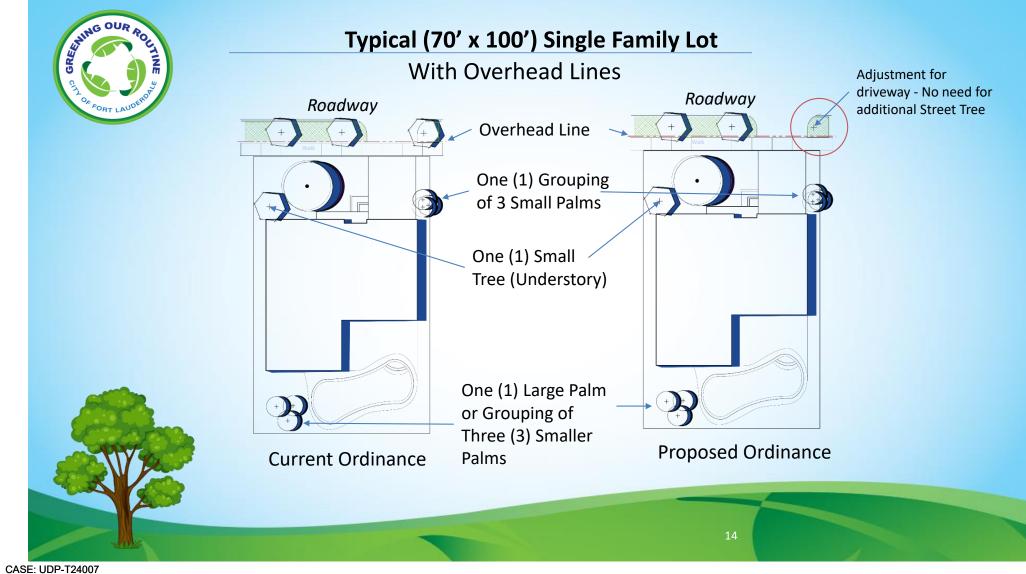

Net cost: \$5,659.33 or

\$7,916.99

#### **Specific Line Change Requests**

- 1. 47-21.13.B.10.i add word "required" to allow additional palms after minimum requirements met (5) (FS)
- 2. 47-21.13.B.16.b Delete fruiting trees eligible trees for public right of way. (6) (FS)
- 3. 47-21.13.B.16.d Increase palm clear trunk to 16 ft to allow pedestrian clearance. (FS)
- 47-21.13.B.16.e Delete this item entirely requirement to maintain street trees for maximum canopy spread (FS)
- 5. 47-21.14.A.1.d.iii Increase palm clear trunk to 16 feet allow pedestrian clearance. (FS)
- 6. 47-21.14.A.1.d Delete fruiting trees as option for RAC. Most can't meet size requirements. (FS)

#### **Broader Comments**

- 7. Review and eliminate where possible occurrences of "As determined by Department" (DC)
- Extensively review tree spacing requirements and addressing spacing conflicts throughout ordinance. (5b) (DC)
- 9. Street tree spacing requirements compare 47-23.9 Interdistrict corridor requirements to 47-21 requirements. (5a, 6) (FS)

CASE: UDP-T24007 PZB Exhibit 4 Page 34 of 64

> CAM#24-0836 Exhibit 4 Page 34 of 64

# **Additional Comments**

#### **Broader Comments**

- 10. 47-21.2.A.76 Specimen tree definition review specimen criteria for palms particularly multi-stemmed palms (FS)
- 11. New Specimen tree requirements for small and medium trees are too broad, and for palm trees are unnecessary (RE)
- 12. City must give exact methodology (not a way they plan to do it) to calculate new tree removal costs so public and commission can property assess new costs. (RE)
- 13. Owners/builders of Single family homes should still be able to design their own landscape plans. Surveyors should not be given tasks they are unable to complete (RE)
- 14. Soil Analysis should be limited to complex projects that really need it, consider allowing opinion letters for more obvious/simple soil conditions. (RE)
- 15. Required Soil volumes should not be in code. (3) (RE)
- 16. Modular Suspended Pavement systems are insanely expensive, complex to install, and have major drawbacks. They should only be used where absolutely necessary. (2a) (RE)
- Relax/remove tree spacing requirements when planting replacement trees on a site. Consider that large spacing requirements are not needed for optimum tree health. Also tree spacing requirements inhibit optimum design of landscapes. (RE)

CASE: UDP-T24007 PZB Exhibit 4 Page 35 of 64

> CAM#24-0836 Exhibit 4 Page 35 of 64

## **Additional Comments**

#### **Broader Comments**

- 18. Proposed protection barricades are way too large and will conflict with other onsite building requirements. (RE)
- 19. Root cutting requirements are overly prescriptive and leave too much discretion up to landscape inspector. Allow property owner to use own arborist and best management practices. (RE)
- 20. Single Family homes should still be allowed to hand/machine water sites. Smaller lots often do not need expensive and water intensive underground systems. (RE)
- 21. Modular systems should not be required to meet minimums. (2a) (NB)
- 22. Palms as specimens should remain as one to one replacement with minimum height of 8'. (NB)
- 23. Restrictions on use of palms should be reduced and 30' diameter canopy palms should be considered shade trees. (NB)
- 24. Provide credits for keeping trees same as # replacement trees if it had been removed. (NB)

CASE: UDP-T24007 PZB Exhibit 4 Page 36 of 64

> CAM#24-0836 Exhibit 4 Page 36 of 64

#### **Big Picture Comments**

- 25. Define consensus for this process. (DC)
- 26. City is not losing canopy, but growing! There is plenty of time to craft a much better ordinance and not push through the current extremely detrimental draft. (RE)
- 27. City Staff did not consider housing affordability, future development, or construction costs in formulation of proposed code (RE)
- 27. Proposed code not only does not meet, but does the exact opposite of its stated goal "to establish minimum standards for the development, installation, and maintenance of Florida-Friendly Landscaping<sup>™</sup> without inhibiting creative landscape design, construction, and management." (RE)
- 28. By making tree preservation excessively costly and complex it will discourage tree planting and encourage removal by citizens afraid of how trees may devalue their property. (RE)
- 29. City is not using its own "Right Tree, Right Place" philosophy by encouraging plantings of large shade trees in areas without the space for mature growth and instead requiring very expensive substructures for where certain trees really should not be planted. (RE)

CASE: UDP-T24007 PZB Exhibit 4 Page 37 of 64

> CAM#24-0836 Exhibit 4 Page 37 of 64

#### **Big Picture Comments**

- 30. The external effects of this ordinance will be to significantly raise construction costs when they have already skyrocketed and limit low and medium density residential development at a time of a severe housing shortage. (RE)
- 31. Code should simply calculate the required trees by open space and then the licensed professional design the site accordingly and choose where the right place is for the number of required trees. (NB)

CASE: UDP-T24007 PZB Exhibit 4 Page 40 of 64

> CAM#24-0836 Exhibit 4 Page 40 of 64

### Introduction

**Facilitator** Commissioner Ben Sorenson

<u>City Project Managers</u> Glen Hadwen, CC-P, LEED AP, Sustainability Manager

Dr. Nancy Gassman, PhD, CC-P, Assistant Director Public Works - Sustainability

Mark Williams, ISA, ASCA, LIAF, City Urban Forester

<u>City's Consultant</u> Calvin, Giordano & Associates, Inc.

Michael D. Conner, PLA, ISA, Senior Landscape Architect

CASE: UDP-T24007 PZB Exhibit 4 Page 41 of 64

> CAM#24-0836 Exhibit 4 Page 41 of 64

### **Ground Rules**

- Discussion shall be respectful and courteous.
- Scope shall be limited to text changes that can be accommodated without going back to PZB or require recertification of the proposed ordinance by Broward County.
- Changes may include clarifications.
- The Feb 9, 2022 Advisory Group communication will be the basis for discussion.
- Per the March 7, 2022 meeting with Commissioner Sorensen, additional concerns submitted prior to the 3/18 meeting will be discussed as time allows.
- Items 1-5 discussed and agreed upon at the March 18, 2022 meeting are considered resolved and will not be revisited at the April 21 meeting.
- The April 21 gathering is the last planned stakeholder meeting prior to submission of the modified ordinance for Commission final approval.
- Topics outside this scope or not appropriate for inclusion in ULDR 47-21 will be noted for future consideration.

# Additional comments

CASE: UDP-T24007 PZB Exhibit 4 Page 49 of 64

> CAM#24-0836 Exhibit 4 Page 49 of 64

#### **Specific Line Change Requests**

- 1. 47-21.13.B.10.i add word "required" to allow additional palms after minimum requirements met (5) (FS)
- 2. 47-21.13.B.16.b Delete fruiting trees eligible trees for public right of way. (6) (FS)
- 3. 47-21.13.B.16.d Increase palm clear trunk to 16 ft to allow pedestrian clearance. (FS)
- 47-21.13.B.16.e Delete this item entirely requirement to maintain street trees for maximum canopy spread (FS)
- 5. 47-21.14.A.1.d.iii Increase palm clear trunk to 16 feet allow pedestrian clearance. (FS)
- 6. 47-21.14.A.1.d Delete fruiting trees as option for RAC. Most can't meet size requirements. (FS)

#### **Broader Comments**

- 7. Review and eliminate where possible occurrences of "As determined by Department" (DC)
- Extensively review tree spacing requirements and addressing spacing conflicts throughout ordinance. (5b) (DC)
- 9. Street tree spacing requirements compare 47-23.9 Interdistrict corridor requirements to 47-21 requirements. (5a, 6) (FS)

CASE: UDP-T24007 PZB Exhibit 4 Page 50 of 64

> CAM#24-0836 Exhibit 4 Page 50 of 64

#### **Broader Comments**

- 10. 47-21.2.A.76 Specimen tree definition review specimen criteria for palms particularly multi-stemmed palms (FS)
- 11. New Specimen tree requirements for small and medium trees are too broad, and for palm trees are unnecessary (RE)
- 12. City must give exact methodology (not a way they plan to do it) to calculate new tree removal costs so public and commission can property assess new costs. (RE)
- 13. Owners/builders of Single family homes should still be able to design their own landscape plans. Surveyors should not be given tasks they are unable to complete (RE)
- 14. Soil Analysis should be limited to complex projects that really need it, consider allowing opinion letters for more obvious/simple soil conditions. (RE)
- 15. Required Soil volumes should not be in code. (3) (RE)
- 16. Modular Suspended Pavement systems are insanely expensive, complex to install, and have major drawbacks. They should only be used where absolutely necessary. (2a) (RE)
- Relax/remove tree spacing requirements when planting replacement trees on a site. Consider that large spacing requirements are not needed for optimum tree health. Also tree spacing requirements inhibit optimum design of landscapes. (RE)

CASE: UDP-T24007 PZB Exhibit 4 Page 51 of 64

> CAM#24-0836 Exhibit 4 Page 51 of 64

#### **Broader Comments**

- 18. Proposed protection barricades are way too large and will conflict with other onsite building requirements. (RE)
- 19. Root cutting requirements are overly prescriptive and leave too much discretion up to landscape inspector. Allow property owner to use own arborist and best management practices. (RE)
- 20. Single Family homes should still be allowed to hand/machine water sites. Smaller lots often do not need expensive and water intensive underground systems. (RE)
- 21. Modular systems should not be required to meet minimums. (2a) (NB)
- 22. Palms as specimens should remain as one to one replacement with minimum height of 8'. (NB)
- 23. Restrictions on use of palms should be reduced and 30' diameter canopy palms should be considered shade trees. (NB)
- 24. Provide credits for keeping trees same as # replacement trees if it had been removed. (NB)

CASE: UDP-T24007 PZB Exhibit 4 Page 52 of 64

> CAM#24-0836 Exhibit 4 Page 52 of 64

#### **Big Picture Comments**

- 25. Define consensus for this process. (DC)
- 26. City is not losing canopy, but growing! There is plenty of time to craft a much better ordinance and not push through the current extremely detrimental draft. (RE)
- 27. City Staff did not consider housing affordability, future development, or construction costs in formulation of proposed code (RE)
- 27. Proposed code not only does not meet, but does the exact opposite of its stated goal "to establish minimum standards for the development, installation, and maintenance of Florida-Friendly Landscaping<sup>™</sup> without inhibiting creative landscape design, construction, and management." (RE)
- 28. By making tree preservation excessively costly and complex it will discourage tree planting and encourage removal by citizens afraid of how trees may devalue their property. (RE)
- 29. City is not using its own "Right Tree, Right Place" philosophy by encouraging plantings of large shade trees in areas without the space for mature growth and instead requiring very expensive substructures for where certain trees really should not be planted. (RE)

CASE: UDP-T24007 PZB Exhibit 4 Page 53 of 64

> CAM#24-0836 Exhibit 4 Page 53 of 64

#### **Big Picture Comments**

- 30. The external effects of this ordinance will be to significantly raise construction costs when they have already skyrocketed and limit low and medium density residential development at a time of a severe housing shortage. (RE)
- 31. Code should simply calculate the required trees by open space and then the licensed professional design the site accordingly and choose where the right place is for the number of required trees. (NB)
