

**CITY OF FORT LAUDERDALE
City Commission Agenda Memo
REGULAR MEETING**

15-0309

TO: Honorable Mayor & Members
Fort Lauderdale City Commission

FROM: Lee R. Feldman, ICMA-CM, City Manager

DATE: April 7, 2015

TITLE: QUASI-JUDICIAL –Site Plan Level IV Development Permit – Bayshore Club
(Case File R14041)

Recommendation

It is recommended that the City Commission adopt a resolution approving the issuance of a Site Plan Level IV Development Permit for the Bayshore Club project.

Background

The City Commission will determine if the proposed development or use meets the standards and requirements of the Unified Land Development Regulations (ULDR) and criteria for development in the Central Beach.

The applicant proposes to construct a residential project consisting of 18 multifamily units on Bayshore Drive. The development consists of an 11 story building (approximately 116 feet in height). Parking and a lobby will be placed on the first floor. The remaining ten floors will include residential dwelling units. The applicant is requesting a reduced rear setback through the Site Plan Level IV (City Commission) review process.

The Development Review Committee (DRC) reviewed the proposal on September 23, 2014. All comments have been addressed. The site plan was reviewed by the Planning and Zoning Board (PZB) on February 18, 2015. The PZB recommended approval of the application by a vote of 8-0. The associated plans and corresponding project narratives are provided as Exhibit 1 and Exhibit 2, respectively. The staff report and draft meeting minutes are attached as Exhibits 3 and 4, respectively.

Review Criteria

Multifamily developments up to 120 feet in height are permitted in the North Beach Residential Area (NBRA) zoning district, provided they meet the criteria outlined for NBRA District, Central Beach Development Design Criteria, Neighborhood Compatibility and Adequacy requirements, as defined further below.

Pursuant to Section and Section 47-12.5.E.1.e of the Unified Land Development Regulations of the City of Fort Lauderdale, the rear yard setback may be reduced from ½ the building height requirement to 20 feet through the Site Plan Level IV (City Commission) process. A reduced rear setback has been requested with this application.

Pursuant to ULDR Section 47-12.6.B, the following criteria shall apply for developments in the Central Beach area:

1. It shall first be determined whether the proposed development or use is compatible with the character of the overall plan of development contemplated by the revitalization plan for the central beach area;
2. It shall then be determined whether the architectural design of the proposed development is compatible with the design guidelines provided in Sec. 47-25.3. The design guidelines provided in Sec. 47-25.3 are intended to provide a framework for design review of proposed developments and outline the design elements which have been determined to be compatible with the revitalization plan;
3. The design guidelines provided in this section are not intended to be exclusive. Alternative architectural and design concepts outlined in the development application will be considered during review of the development application. It shall be the applicant's burden to show that the proposed alternative architectural and design concepts are compatible with the character of the overall plan of development contemplated by the revitalization plan for the central beach area and not incompatible with the design guidelines provided in this section;
4. It shall then be determined whether the proposed development incorporates design or architectural elements which mitigate the development's impacts, if any, on existing uses in the immediate vicinity of the proposed development;
5. The goal of the city in the adoption of the revitalization plan is to facilitate development of the central beach area as a world-class destination resort. The primary objective of the design review shall be to implement the overall plan of development and to foster redevelopment as contemplated in the revitalization plan.

The draft Central Beach Master Plan (CBMP) was intended to take the place of previous plans for the Central Beach area and is currently in the process of being updated. The applicant has made efforts to accommodate the intent of the original draft plan guidelines. As per ULDR Sec. 47-25.3.A.3.e.i.b, consideration shall be given to the recommendations of the adopted neighborhood master plan in which the proposed development is to be located, or which it abuts, although such neighborhood master plan shall not be considered to have the force and effect of law. The draft Central Beach Master Plan encourages continuous improvements to streets over time to enhance the overall pedestrian environment.

Through the DRC process, staff requested that the applicant consider creating a more pedestrian-friendly ground level experience. The applicant responded by providing more

glass around the lobby, incorporating a water feature, and limiting the fence to the pool area, further opening the lobby entry and providing more building presence along the street. The resulting plan will improve pedestrian conditions by removing back-out parking on the northern end of the site and adding landscaping and shade trees along the sidewalk.

The City is in the process of updating the Central Beach Master Plan. The updated plan will include streetscape designs for the North Beach Area including specific criteria for pedestrian areas, on-street parking, and landscaping. If the updated Central Beach Master Plan is adopted before a building permit is issued, staff recommends updating the plans to accommodate any streetscape elements in conflict with the adopted updated plan in order to provide consistency with future developments. This provision is included as part of condition 3 and the applicant was amenable to this condition.

Adequacy and Neighborhood Compatibility

The neighborhood compatibility criteria of ULDR Sec 47-25.3 include performance standards requiring all developments to be “compatible with, and preserve the character and integrity of adjacent neighborhoods...include improvements or modifications either on-site or within the public rights-of-way to mitigate adverse impacts, such as traffic, noise, odors, shadow, scale, visual nuisances, or other similar adverse effects to adjacent neighborhoods. These improvements or modifications may include, but shall not be limited to, the placement or orientation of buildings and entryways, parking areas, bufferyards, alteration of building mass, and the addition of landscaping, walls, or both, to ameliorate such impacts”

The properties to the north, south and east of the site are zoned NBRA. Sites to the west are located in the Intracoastal Overlook Area (IOA). The buildings surrounding the project site range from two to eight stories. Directly to the west are two story and eight story multifamily residences. To the north and south are two story multifamily buildings. To the east is a four story multifamily building

The applicant has submitted narratives regarding the project’s compliance with Section 47-25.2, Adequacy Requirements, and Section 47-25.3, Neighborhood Compatibility Requirements, attached with the site plan and submittal material, to assist in determining if the proposal meets these criteria. A context plan and perspective renderings depicting the height, mass, scale, shadow, materials and details, etc. of the proposed development as it relates to surrounding properties have also been provided with the site plan submittal material.

Transportation & Mobility

As per ULDR Sec. 47-20, Parking Requirements, a total of 37 parking spaces are required for the proposed use. The applicant is proposing to provide 37 parking spaces. A two-way ingress/egress has been provided from Bayshore Drive. Parks lifts will be used to accommodate the parking requirement. In addition, four on-street parking spaces will be provided on Bayshore Drive.

Comprehensive Plan Consistency

The proposed development is consistent with the City's Comprehensive Plan in that the residential use and density proposed are permitted in the Central Beach Regional Activity Center (RAC) land use category. The Future Land Use Element of the Comprehensive Plan permits up to 5,500 dwelling units in the Beach RAC. This request is for 18 units. If approved, there will be a remaining balance of 1,607 units available (including all pending projects). The total peak hour trips generated by this development is four; if approved there will be 232 remaining (including all pending projects) in the Central Beach Regional Activity Center.

Conditions of Approval

Should the City Commission approve the development, the following conditions are proposed:

1. If approved, the residential units are subject to School Board of Broward County public school concurrency review and mitigation. As applicable, applicant shall provide a student mitigation satisfaction letter from the Broward County School Board prior to Final DRC approval.
2. Applicant will be required to pay a Park Impact Fee for the proposed residential units prior to issuance of building permit in accordance with ULDR Sec. 47-38A.
3. Planned streetscape improvements for Bayshore Drive, approved as part of this application, shall be updated to be consistent with updates to the Central Beach Master Plan that are approved by the City Commission prior to submission of an application for a building permit for the project, or as agreed to by the applicant if designs are completed prior to commencement of associated right-of-way improvements for the project.

Resource Impact

There is no fiscal impact associated with this action

Strategic Connections

This item is a *Press Play Fort Lauderdale Strategic Plan 2018* initiative, included within the Neighborhood Enhancement Cylinder of Excellence, specifically advancing:

- Goal 6: Be an inclusive community made up of distinct, complementary, and diverse neighborhoods.

This item advances the *Fast Forward Fort Lauderdale 2035 Vision Plan: We are Community and We Are Here*.
