Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jerry Fazio

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Tai Houser

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.
This project went before the DDA two months ago and received positive comments. I anticipate bringing it back before them at the DDA May/June meeting for a recommendation to you for support.

Marina Lofts will benefit the Downtown in many ways. A simple list is as follows: Needed residents to add vibrancy, worker housing, spending power, 24 hour eyes on the street (I live in Tarpon River and know this area does not feel safe in the evening). Additionally building contributing to the list of Fort Lauderdale renown architectural buildings, preserve and enhanced marina!!!, Riverwalk connection, south side development, retail, jobs, and community open space. I suspect the last remaining issue contributing to community conflict is the Rain Tree. As a Landscape Architect I have wrestled the keep or relocate issue. Without getting into the fact it is on private property, I have made a final verdict on how I weigh in. Let the Developer move forward with the relocation plan as designed in a coummunty settign. I have come to this as follows:
1. We are the urban center of Broward County and as such we need to encourage urban developmental that has many features beyond a privet building with people living there: public marina and public riverwalk .
2. The care ,expertise and expense shows this is not a causal decision and one the developer fully intends to have the tree become a central feature of the development plan.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.
Sincerely,

chris wren

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Pam Cefalu

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Lisa & Mike
Melissa Purtill

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jamie Sherman

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Matt Pici

Letter:
Dear Mayor, Commissioners and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
George M. Mihaiu

As a soon-to-be homeowner in downtown, I think this will increase property values and stimulate the economy and I am excited about the possibilities.

Thank you.

Sincerely,
Maggie Gunther

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Ina Lee

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Caroline Bass

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Gary Mercado

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Steve Schram

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project. There are parts of the downtown area which currently are just an embarrassment to have tourists see (I.e. the Riverfront area) and i cring when I'm asked directions there. I think Marina Lofts will contribute to a better urban community. I wholly agree with what was written recently in the So. Fla. Biz Journal about Ft. Laud not having the same community "vibe" as Miami. I've lived in downtown FTL for over 5 years, while my brother has been in Miami for only 1, and yet, he is in tune with a lot more things going on regularly in his community with other young professionals. I also mainly agree with what's written in the form letter below.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Johanna Ordaz

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
William Kester

Letter:
Dear Mayor & CIty Commission:

I am writing to voice my support the Marina Lofts development project.

The Marina Lofts project will be an important and positive development along New River here in downtown Fort Lauderdale, and help connect the southern stretch of the Riverwalk to the City proper.

Our offices at APEX Marine are located just east of this project, and I feel that such projects should have the support of this neighborhood.

After having met with the developer, and hearing his support for the Marine Industry, and his concern about a careful and considerate development plan for the area, I strongly support their efforts to see this project come to fruition.

The development plan helps preserve the marine industry by maintaining marine uses such as boat storage and as the home to the Water Taxi.

It also allows the public to have access to the waterfront, through the existing marina facility, as well as preserving the existing Pirateês Republic restaurant, which is currently on the site.

The economic impact for the city should be very positive, as this project will create a significant number of new jobs.

The fact that this development will be preserving a large number of tree, including the historic Rain Tree, shows their committment to the local environment.

As a resident since 1948, and a long-standing member of the local Marine Industry, I would appreciate your support of this project.

Sincerely,
Kit Denison

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase revenues for the City of Fort Lauderdale by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jesus Fuentes

Mr Rodgers,

We met at a Phi Delta Theta Alumni Club luncheon about a year ago, and you awarded my home a WOW award for design improvements on my home a few years before that.

I wanted to write you about the Marina Lofts project.

The Marina Lofts project will be a world-class iconic building in the Fort Lauderdale skyline. It is designed be a world-renown architect Bjarke Ingles. Please Google his name, his work is amazing. For years to come, this will be a jewel in our skyline.

It will also connect and activate the south side of the Riverwalk, and therefore the south side of the city (such as the Andrews redevelopment) even more. Living in your district on the south side, this is of personal importance to me and my neighbors.

The marina, boat storage, Water Taxi and the restaurant on site are all being preserved and are part of the development plan. In addition, 70+ trees including the Rain Tree will be moved to a new park by the most respected tree moving company in the United States.

I know there are a few vocal critics about this project. But the developer has been sincere, listend, and made major adjustments to accommodate those concerns.

I request that you too support the project so together we can move Fort Lauderdale forward and attract young urban professionals to live work and play in our downtown.

Thank you for your attention to this matter.

In the spirit of full transparency, Marina Lofts is a Starmark client, as is the Greater Fort Lauderdale Convention and Visitors Bureau (including the port and the airport), the Riverwalk Arts & Entertainment District, the Broward Center for the Performing Arts, the Museum of Art Fort Lauderdale, Nova Southeastern University, and many others. I believe in all my clients, and I believe all my local clients will benefit from this project and its importance for Fort Lauderdale and for the perception of our city globally.

Brett Circe

Subject: Esplanade Board of Directors/Marina Lofts Project
Date: Wednesday, October 31, 2012 2:39:57 PM ET
From: Tara G. Gartner
To: Romney Rogers

Romney Rogers, Commissioner
City of Fort Lauderdale

Dear Commissioner Rogers:

We are grateful for the time and attentiveness you and your colleagues provided us in our recent discussion concerning the Marina Lofts Project. We were especially pleased that you have found that the developer, Mr. Asi Cymbal, has shown flexibility in responding to city planning and traffic concerns—as we ourselves as representatives of the Board of the Esplanade have found as well. We hope and believe progress will continue to be achieved in factoring city and neighborhood concerns into the final project design.

We do have a question: is a meeting of the Commissioners scheduled for November 6, Election Day, that will address the Marina Lofts Project? If so, could we request that one member of the Esplanade Board of Directors be added to the meeting's schedule of speakers? The same request would apply to the next meeting which discusses the Project, if our information concerning the Election Day meeting is incorrect.

Once again, thanks to you and to Randall Robinson and Ella Parker for your time and courtesy.

Marion Radeer
O. Ralph Raymond

Email: Tclarke@islandmarineelectric.com

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

T M Clarke 5 March 2013

MARINA LOFTS

WE NEED YOUR SUPPORT

If you are in support of the Marina Lofts project, including its environmental preservation, architectural excellence or for connecting and activating the south Riverwalk, please fill out and sign to show your support.

To: Fort Lauderdale Mayor, City Commissioners and the City Manager

First Name: Steve

Last Name: Bozas-Wassiliyef

Address:

City: Ft. Lauderdale

ZIP: 33313

Email: yachts480@aol.com

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Signature and Date

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Patricia Wolverton

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

DM Watson 11-24-12

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Signature and Date

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Dear Mayor Seiler:

I am writing on behalf of the Board of Riverwalk Fort Lauderdale to provide a letter of support for the proposed Marina Lofts project in relation to how it meets the requirements of the Riverwalk Master Plan and the Downtown Master Plan. On April 03, 2013 the board voted unanimously to support submission of this letter. We look forward to welcoming this new addition to the Riverwalk.

The Riverwalk Fort Lauderdale Trust is made up of volunteers from all levels of the business community who serve as the primary advocates for the Riverwalk Park. Since its creation in 1988, the Riverwalk Trust has raised funds and support for Riverwalk programming and the beautification and enhancement of the Riverwalk Park.

Representatives of the development team for Marina Lofts met and discussed their project with our Executive Board and again with our full Board. They spent time with us, fully reviewing the development plans and addressing questions and comments. The project is a multi-family residential project with ground floor restaurant, retail and residential uses. These ground floor uses provide significant interaction with the Riverwalk while bringing new residents to the South side of the river.

As you know, we participated in the creation of the New River Master Plan and feel that it is applicable to this project. It is our understanding that the proposed development meets the guidelines and intent of the Master Plan and we are encouraged that the developer is working with the City to realize the goals of the plan.

The future success of the Riverwalk is dependent upon the continued investment in our waterfront and the addition of active uses along the Riverwalk. We are excited that the developer shares our vision and we look forward to welcoming the new residents of this project to the Riverwalk.

Very truly yours,

Eugenia Duncan Ellis
President/CEO

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Kenny Rainelli

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

In addition, I am a current architecture student at the nearby FAU School of Architecture in Fort Lauderdale. I believe that the development and construction of this project will be a great learning experience for myself and my fellow colleagues. We admire the work of the Bjarke Ingels Group of architecture and would really like the opportunity to see his work come to life, here in Ft Lauderdale. The Marina Lofts will be very inviting for newcomers to the city who are looking for residences and jobs and will also attract the public to expand Ft Lauderdale's attraction further than just Las Olas. The Esplanade area will become a new hot spot for boats, residence owners and young couples experiencing the Riverwalk. Ft Lauderdale will once again blossom and add to South Florida's beauty.

Thank you.

Sincerely,

Armando Luna

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Dan Pleitez

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Brian Crews

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Steve Wessinger

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Michael McClain

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
michelle collette gerant

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jody Leshinsky

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase revenues for the City of Fort Lauderdale by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Bumi Adeboye Jr.

Letter:
As small business owner where both my business and home reside in the downtown area (Flagler Village), I wanted to reach out to you in support of the Marina Lofts project.

My dad recently read Jim CollinsÕ leadership book called ÒGood to GreatÓ and his biggest takeaway from the whole entire book was the opening line. The lines reads: ÒGood is the Enemy of Great.Ó And this is one of those instances where I couldnÕt agree more with my dad.

I share this with you because I love this city and I think weÕre a really good city. But our greatest enemy is that we okay with just being good. I want to be great. Many people in our community want us to be great. Fort Lauderdale is on the break of greatness and I believe the Marina Lofts is one of the projects can get us there.

Yes, the project will bring jobs. Yes, it will help complete the Riverwalk. Yes it aligns with the Downtown Master Plan. But do you know what IÕm most excited about? IÕm excited about the Millennial generation.

Millennials out of college do not want their parentsÕ suburban lifestyle; theyÕd prefer to find an affordable rental apartment in a city they love where economic opportunities are better.

They donÕt want to go into debt buying a big house and a big car, just so they can endure a long commute.Ó The fact is that Millennials arenÕt interested in the suburban cul-de-sacs and office parks of their parentÕs generation.

Millennials are tired of wasting time and money driving to do simple tasks _ buying groceries, eating at a restaurant, or going to the gym. They want to be in close proximity to excitement, diversity, and vibrancy. They want the ability to walk to their favorite restaurants, music venues, and theaters.

This project caters to the Millennial generation and I donÕt want to us to miss out on the economic impact they can and will have on our city.

To be honest, IÕm tired of hearing about the great cities Millennials are moving to. I want to compete with the Charlottes, the Portlands and the Austins of the world and give them a run for their money. I want cities around this country to look to Fort Lauderdale and model us because they view us as a GREAT city.

If we donÕt approve this project we will continue to stand still. And standing still is the fastest way of moving backwards in a rapidly changing world.

Sincerely,

Kelly Alvarez Vitale

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
David Neubauer

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Sherry W. Rudolph 2/27/1

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

11/24/12

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

Letter:
Dear Mayor, Commissioners, and City Manager,

I think I'd move from Coral Gables for this.

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
jason ibarra

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Nedia Hicks

Letter:
Dear Mayor, Commissioners, and City Manager,

I am writing to support the Marina Lofts development project.

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Manuel Laverde

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirateês Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase revenues for the City of Fort Lauderdale by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Dale Dykes

The Marina Lofts project will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk.

It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

The development plan helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. The project also preserves the existing Pirate's Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this project will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive project that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support the project so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Gary Kossman

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jerry Seay

BROWARD COUNTY

May 10, 2013

Asi Cymbal
President
Cymbal Development
3470 North Miami Avenue, Upper Suite
Miami, FL 33127

Dear Asi:

I am pleased to support Cymbal Development's Marina Lofts project. The willingness of your company to include due and sincere consideration of the diversity of contractors that make up Broward County for this project is commendable. Thank you for creating economic opportunities for all groups while fostering economic development and giving new life to the vitality of the downtown Fort Lauderdale area. You have committed among other things that Marina Lofts will:

- Provide affordable options for those wanting to live in a luxury rental community in a Downtown design-driven environment that will keep residents from leaving our urban core to other places that have more affordable or design-driven options.
- Preserve our local history by preserving the working marina, all existing businesses and marine uses, and over 75 mature trees on marina Lofts property; planting landscaping along the riverfront that is native to Fort Lauderdale, and continuing the historic red brick pavers and lighting along the Riverwalk.
- Meet or exceed the City's vision to activate the Riverwalk District as an urban center, and providing a unique South Florida destination that strikes a balance between iconic architecture, the natural environment, and urbanism.
- During the life of the project create over **600 jobs** and generate over $100 million in economic impact for Fort Lauderdale and Broward County .
- Be open to the public by creating public amenities, restaurants, dock space, a "Rain Tree Park", retail space, and pedestrian corridors to the New River.
- Preserve existing businesses such as the Pirate Republic Restaurant, Water Taxi, Riverfront Marina, Freedom Boat Club, and Boatech boat repair.
- Revitalize the South Side of the New River.
- Create iconic architecture and public art, to compliment Fort Lauderdale's renaissance.
- Balance development with the local environment by adding more green space for downtown, designing green roofs and living walls, creating a "green" LEED-certified community, and planting landscaping that is native to Fort Lauderdale.

- Establish the "Rain Tree Park" which will be the new home of the cherished Rain Tree where the tree will provide an urban anchor and centerpiece for Marina Lofts, all cradled by landscaping, benches, and tables for public use. You have indicated that the tree preservationists have developed a ten-year maintenance plan to ensure the Rain Tree's long-term health. Environmental Design will preserve and relocate the Rain Tree to the Rain Tree Park, where it will be accessible to the public for the first time in over a decade and placed outside the construction zone.
- Post a $1 million bond to further show your confidence in the world-class team of tree preservations. (Of note - Environmental Design has successfully moved many trees some greater in size and older than the Rain Tree, including having moved giant trees in front of the Supreme Court of the United States, and being in charge of the giant Christmas tree installation for the White House.)

To this end, I remain confident that Cymbal Development has taken into consideration the majority of the public and elected officials concerns regarding the Marina Lofts project and has or shall duly implement all the necessary steps, plan, procedures and policies to ensure that our concerns are mitigated.

Sincerely yours,

Dale V.C. Holness
Broward County Commissioner, District 9

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Lee Bowser

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Jaime Anderson

I work full-time in Downtown Fort Lauderdale, and I am very interested in relocating from Downtown Miami to Downtown Fort Lauderdale. However, there are not many options for affordable, luxury living here (in comparison to Downtown Miami). If this structure was to be built, that would not be the case. Please consider building the Marina Lofts for young professionals like me yearning for a great, safe, green, and affordable building to call home in Downtown Fort Lauderdale.

Thank you,

Catherine Houlihan

Employee of Take Stock in Children of Broward County at the School Board of Broward County's KC Wright Administration Center

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

As with every development project, there are those who support and those who oppose...nothing is ever 'perfect' and often BOTH have good reasons for their positions.

In all such cases, I do just as you must do...make a list of positives and negatives, weigh them against each other and try to determine the best course of action for the greatest good.

In my determination process, and as a member of the city's Economic Development Advisory Board, it appears to me that the needs of the many in this matter far outweigh the needs of the few or the ones who object to this project. The Marina Lofts development will benefit our city and residents immeasurably through the jobs, economic impact, affordable downtown living, activation of the south side Riverwalk and overall improvement of what has been a virtually blighted/eyesore area that so desperately needs attention and which should be a jewel of our downtown Riverfront.

I'd also caution that many of those objecting to moving the Rain Tree who use it as a basis for their opposition to the development offer nothing in terms of the benefits to the city, to our residents and to the area. Many of those in the forefront of objecting to this are the very same people who brought the Shippey House fiasco with their vociferous cries of historical preservation and have cost this city over $200,000 already by their inability or unwillingness to follow through on their 'promises'.

In the end, even if the tree doesn't survive the proposed move as the ojectionists argue...despite the assurances that it won't die from the company moving it, which has an outstanding track record of actually, really doing these kinds of moves (and not just guessing as to what dire consequences may happen)...the sun WILL come up the next day, we WILL NOT be deprived of any oxygen in our atmosphere, there WILL still be 100+ other big trees in the area and we WILL see a prime area of Fort Lauderdale's New River riverfront become an economic and social engine for new vitality along the south side of our downtown riverfront...one of our city's greatest assets.

I believe the project merits your support and hope that you'll support Marina Lofts as a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
George Mihaiu

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts.

Why not build a great new development in downtown. This will bring more people to the area. Young people. It seems to be an ecological and responsible project.
Reading about it seems to be only good for downtown Fort Lauderdale to move forward with this development. Connection with new rail transit will make this project and the city of Fort Lauderdale a GREEN and better place to live.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

I am writing to support Marina Lofts.

Marina Lofts will be an architectural icon, and will rejuvenate, activate and connect the blighted southern stretch of the Riverwalk. It will offer compelling urban housing that will keep residents living, working, and playing in downtown Fort Lauderdale.

Marina Lofts helps preserve the marine industry by maintaining marine uses such as dry dock boat slips and the Water Taxi, and keeps the marina wet slips open to the public. Marina Lofts also preserves the existing Pirate Republic restaurant currently on the site.

The economic impact for the city is tremendous, as this community will create lots of new jobs and increase public revenues by more than $100 million over its life span.

Marina Lofts is an environmentally sensitive development that is preserving over 70 trees, including the historic Rain Tree, by employing a professional team with a successful 100-year history of relocating and preserving such trees.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
kim harris

Dear Mayor, Commissioners, and City Manager,

I am writing to support Marina Lofts. This would be a place I would like to live. I am 23-years-old and am just finishing up on a management training program. It would be a fantastic and affordable way for me to stay in Fort Lauderdale.

I request that you too support Marina Lofts so together we can make Fort Lauderdale a more attractive destination for those seeking to live in the urban core.

Thank you.

Sincerely,
Allie Linbdlade
