The tidal barrier ordinance adopted on March 23, 2023 (CAM 23-0168) includes requirements for habitat enhancement when installing a tidal barrier replacing a natural shoreline and encourages seawall construction that incorporates living shoreline features, use of hybrid green-grey materials, and the use of biological forms. City Commission requested a presentation on the topic to better understand the costs, challenges and benefits of habitat enhancement, living shorelines, and living seawalls.
