FIDUCIARY UPDATE

Retirement plan fiduciaries should be mindful of recent compliance issues that may impact their plans.

DOL FORM 5500 CHANGES: FINAL

The DOL made several changes to the 2023 Form 5500 filing (to be filed in 2024), including:

- The participant counting methodology—which establishes whether a plan is considered large or small for audit purposes—has changed from all eligible participants to only those with account balances at the beginning of the year. The change will push many plans—403(b)s in particular—below the audit threshold, potentially saving plan sponsors time and money.
- Questions regarding compliance testing that were removed more than a decade ago were reinstated.
- New categories were added to the Administrative Expenses lines of Schedule H, including audit fees, bank or trust company fees, actuarial fees, legal fees, valuation fees, salaries, and trustee fees and expenses.

IRS REGULATIONS ON FORFEITURES: PROPOSED

On February 27, the Internal Revenue Service issued long-awaited proposed regulations on forfeitures that clarify the following:

- Forfeitures incurred under a defined contribution plan must be used within 12 months following the close of the plan year. This is less restrictive than prior informal guidance that stated that forfeitures should generally be utilized in the plan year in which they occurred.
- To ensure that forfeitures are properly utilized, recordkeepers should ideally maintain separate forfeiture accounts by plan year.
- Defined benefit plan forfeitures cannot be used to reduce required employer contributions.

BACK TO BASICS: STABLE VALUE AND GENERAL ACCOUNT PRODUCTS

STABLE VALUE FUND

Objective: Capital Preservation & Liquidity

Funds invest in high quality, short- to intermediate-term fixed income securities with perceived minimal interest rate and credit risk. They can be housed in a collective investment trust, insurance separate account, or separately managed account.

PROS:

- Underlying portfolio and crediting rate transparency
- Higher long-term yield compared to cash accounts
- Book value accounting provides for a more stable crediting rate versus money market funds
- Principal is guaranteed by wrap providers
- Lower interest rate sensitivity due to shorter duration securities versus general account products

CONSIDERATIONS:

- Liquidity constraints at the plan level, typically 12 months
- Higher interest rate sensitivity due to longer-duration securities versus money markets
- Trading constraints at the participant level depending on other funds in the plan (e.g., equity wash provisions)

GENERAL ACCOUNT OPTION

Objective: Stable Returns with Full Principal and Interest Guarantee

Investments are held in a group annuity contract that is supported by the assets of the insurer's general account (balance sheet includes insurer's liabilities, surplus, and reserves).

PROS:

- Provide attractive crediting rates relative to other product types due to longer duration securities
- Crediting rates are typically preannounced and guaranteed for a certain period
- Principal plus interest is guaranteed by insurer
- Potential to increase rates faster than stable value funds, particularly for new business

CONSIDERATIONS:

- Liquidity restrictions of five years (typically) or market value adjustment (MVA)
- Lack of portfolio and crediting rate transparency
- Guarantee is backed by the claims-paying ability of insurer
- Assets may be tied up in the event of insolvency
- Recordkeeper portability constraints

STABLE VALUE FUNDS VS. MONEY MARKET: MARKET IMPACT

In response to high levels of inflation, the Federal Reserve rapidly increased its overnight lending rate with a series of eight rate hikes starting in March 2022. Through these hikes, the target fed funds rate increased from 0.00%-0.25% to 4.75%-5.00% as of March 2023. Short-term bonds have been most impacted by this shift in market environment, warranting an assessment of capital preservation options in retirement plans.

- Rapid rate increases have created an inverted yield curve where short-term bonds are yielding more than long-term bonds.
- As money market funds reinvest in higher yielding bonds, their short-term returns have exceeded stable value funds recently.

- Money market funds hold shorter-term securities, typically one year or less, and follow changes in interest rates quickly.
- Historically, the structural advantage of stable value is that insurance wraps allow the funds to purchase a mix of short- and intermediate-term bonds while maintaining price stability for investors.

TAKEAWAYS

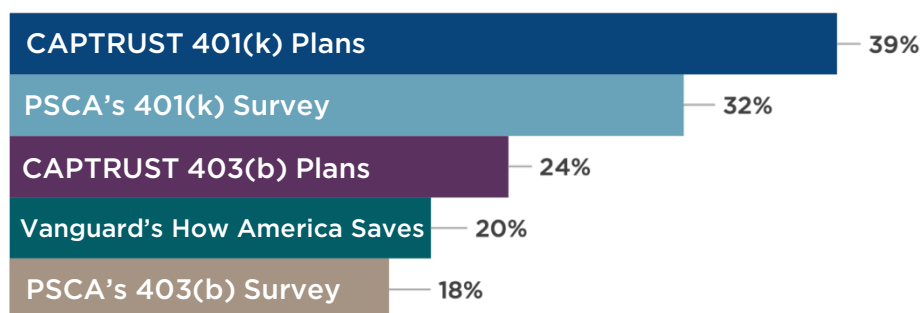

- CAPTRUST continues to recommend stable value funds for defined contribution plans. Over longer periods, they have delivered a higher return with less volatility than money markets.
- Stable value funds track interest rate movements over time but their movements up and down are slower by design.
- A return to a normal yield curve—where longer-term bonds yield more than shorter-term bonds—will reestablish the structural advantage for stable value funds over money market funds.

SELF-DIRECTED BROKERAGE ACCOUNT: TRENDS & CONSIDERATIONS

Under ERISA 404(a), brokerage windows—or self-directed brokerage accounts (SDBAs)—are excluded as designated investment alternatives, yet the implementation and ongoing monitoring of SDBAs are likely considered fiduciary acts and subject to ERISA. However, there is limited DOL guidance setting standards or expectations for how plan fiduciaries should evaluate, implement, and monitor SDBAs.

PERCENTAGE OF PLANS OFFERING SDBAs¹

SDBA IMPLEMENTATION TRENDS²

Types of Investment Options	Percentage of Plans	
	Mutual Funds Only	Broader Options
Schwab	13%	87%
Fidelity	16%	84%
Empower	7%	93%
Maximum Allowable Percentage	Capped	Uncapped
Schwab	<10%	>90%
Fidelity	75%	25%
Empower	19%	81%

CONSIDERATIONS	EVALUATION	IMPLEMENTATION	MONITORING
	<ul style="list-style-type: none"> Will this add value for our participants? Does our vendor offer different SDBA options? What is the brokerage provider's reputation and experience? What are the fees for the service? 	<ul style="list-style-type: none"> Should a limit be placed on the types of available investments? Is there a need to limit certain investments for compliance or business reasons? Should there be a limit on the amount or percentage of assets in the SDBA? 	<ul style="list-style-type: none"> Are transaction, account, and other participant fees reasonable? Do our participant disclosures include general descriptions of the SDBA including fees and expenses?

CAPTRUST does not advise on self-directed brokerage accounts. The information above is intended to be educational in nature. Plan sponsors should consult their ERISA counsel for further guidance or questions related to fiduciary obligations and SDBAs.

FIDUCIARY FLASH TRAINING – COMMITTEE EDUCATION

Fiduciary training is a critical part of being a fiduciary and a way to minimize fiduciary risk through education and governance. The DOL views fiduciary training as an important element to managing a retirement plan and frequently looks for evidence of formal training during plan investigations. A sound fiduciary curriculum covers a range of topics—from an overview of ERISA to best practices for monitoring investments. In this installment, we cover the basics of training: who should receive it and why, recommended frequency, and available resources.

WHO

Committees and designated plan fiduciaries have a responsibility to continuously monitor and make decisions regarding the plan's investments, operations, administration, fees, and more. Providing formal fiduciary training is an effective way to ensure the committee understands its responsibility to act exclusively in the best interest of plan participants and comply with ERISA.

WHEN

New committee members should have formal training as soon as practical following their appointment. Existing committee members should receive periodic refreshers and ongoing training to build a deeper level of understanding, stay informed of current industry trends and updated regulations, and review plan-related litigation outcomes. All training should be documented in your fiduciary file.

HOW

CAPTRUST provides comprehensive fiduciary training to meet committee members' needs, including in-person training, webinars, and printed materials. Work with your CAPTRUST advisor to develop a program and cadence that best fits the needs of your committee and overall governance structure.

IT'S NOT EASY BEING GREEN: ESG TAKEAWAYS FROM OUR 2022 SURVEY

While environmental, social, and governance (ESG) investments have experienced increasing popularity and adoption in recent years, there are new indications that enthusiasm may be plateauing or modestly waning. In CAPTRUST's 2022 Annual Survey on Endowments and Foundations, participants reported a first-ever decline in the use of ESG in their organizations' portfolios.

There are differing views on ESG and SRI investments, from their long-term potential to change the world to the impact they may have on donor engagement. What falls under the umbrella of these categories can vary materially depending on the organization considering them. Consider whether such an investing philosophy is consistent with your organization's mission and objectives.

GOVERNANCE INSIGHTS: USE OF BEST PRACTICES FROM OUR 2022 SURVEY

There are several governance best practices to consider when operating a nonprofit. In CAPTRUST's annual Endowment and Foundation Survey, participants indicated whether their organizations had these policies in place.

Survey Respondents: 105

There are some common elements that may be worth memorializing as formal policy. Implementing best practices in the governance of nonprofit organizations can help increase transparency and accountability as well as facilitate decision-making processes.

STRONG RETURNS, SHAKY NERVES

After a strong start to 2023, the first quarter ended on a high note despite a rapid-fire array of troubling news. In early March, two large banks failed, and policymakers stepped in to keep isolated problems from becoming a systemic crisis. Despite the headlines, stock and bond markets were surprisingly calm.

- In the U.S., large-cap stocks floated upward, with their small-cap counterparts trailing behind.
- The financial sector faced understandably stiff headwinds, and investors reacted to banking sector news by rotating back to the comfort of mega-cap technology companies with ample cash flows.
- Skeptical of future Fed actions, bond investors drove prices higher as yields slipped lower.
- Outside the U.S., international developed and emerging markets saw modest but steady gains. The post-pandemic reopening of China, stabilizing energy prices across Europe, and a weakening U.S. dollar contributed.
- Real estate posted a modest gain for the quarter, although many of the same challenges of last year remain as headwinds.
- 2022's standout performer, commodities, was the only major asset class in negative territory for the quarter as oil prices slipped.

Asset class returns are represented by the following indexes: Bloomberg U.S. Aggregate Bond Index (U.S. bonds), S&P 500 Index (U.S. large-cap stocks), Russell 2000® (U.S. small-cap stocks), MSCI EAFE Index (international developed market stocks), MSCI Emerging Market Index (emerging market stocks), Dow Jones U.S. Real Estate Index (real estate), and Bloomberg Commodity Index (commodities).

CAPTRUST

DIGGING DEEPER: FIXED INCOME MARKET

Interest Rates	3 Months	2 Years	5 Years	10 Years	30 Years	Mortgage Rate
December 2022	4.37%	4.43%	4.00%	3.88%	3.97%	6.66%
March 2023	4.75%	4.03%	3.58%	3.47%	3.65%	6.81%
Change	0.37%	-0.40%	-0.43%	-0.41%	-0.31%	0.15%

U.S. Treasury yields moved mostly lower this quarter as turmoil in the banking sector left investors with the expectation of less aggressive future Fed policy. Mortgage rates remain exceptionally high, contributing to a slowing housing market.

Bloomberg U.S. Aggregate Bond Index	Yield to Worst	Duration	Total Return Q1 2023	Spread	Treasury Rate	AA Spread	BBB Spread
December 2022	4.68%	6.17	2.96%	0.51%	4.17%	0.73%	1.59%
March 2023	4.40%	6.33		0.57%	3.83%	0.75%	1.67%
Change	-0.28%	0.16%		0.06%	-0.34%	0.02%	0.08%

Performance for core bonds was positive for the quarter, after declining 13% in 2022. Yields moved lower for core fixed income, while credit spreads increased only slightly.

Bloomberg U.S. Long Credit Index	Yield to Worst	Duration	Total Return Q1 2023	Spread	Treasury Rate	AA Spread	BBB Spread
December 2022	5.59%	12.81	5.42%	1.57%	4.02%	1.06%	1.93%
March 2023	5.28%	13.05		1.59%	3.69%	1.06%	1.93%
Change	-0.31%	0.24		0.01%	-0.32%	0.00%	0.01%

Performance for longer-maturity bonds was boosted this quarter by lower yields and nearly unchanged credit spreads.

ECONOMIC OUTLOOK

The economy's forward path has become even more complicated with recent high-profile but isolated bank failures accentuating the impact of rising rates. While the Fed remains committed to taming inflation, it must also consider the lagged impact of prior tightening actions. Stricter regulation and tighter lending conditions could compound the effect of its restrictive monetary policy and further slow the economy.

HEADWINDS

The Fed Conflict

- Although inflation remains elevated, prices have descended. The Fed now faces the task of achieving price stability while avoiding strain on the financial system.

Financial System in Turmoil

- Regional and community banks risk losing cash deposits to the perceived safety of larger institutions. Such moves may lead to tighter lending conditions across several economic sectors.

Earnings at Risk

- Despite cost-cutting, certain sectors could see squeezed margins. Financial firms may see tighter regulation and lower net interest margins, while a mild winter and cost inflation could create headwinds for energy companies.

Debt-Ceiling Deadlock

- To avoid the consequences of a default, Congress needs to raise the debt ceiling by mid-summer.
- This debt-ceiling compromise must be struck between polarized parties with thin margins, raising the odds of political fireworks.

TAILWINDS

Consumer Goods Inflation Easing

- The cost of key consumer goods, like food, gas, and housing, is gradually abating.
- Reduced logistic pressures and the Chinese economic reopening have improved supply-side capacity.
- Warmer weather, conservation, and the use of energy reserves have benefited oil and gas prices.
- A wave of new supply has tempered rent growth.

Resilient Labor Market and Consumer Spending

- While wage pressures have eased, job growth remains robust. A stronger labor market provides greater household confidence, supporting consumer spending across goods and services.

Traditional Diversification Benefits

- 2022's highly unusual environment made diversification an ineffective tool.
- Supported by a higher risk-free rate, the new year has shown hints of more normal diversification relationships between asset classes, with stock and bond prices reacting differently to economic data.

The wide range of potential outcomes and an uncertain policy environment limit the ability to create a singular forecast with confidence. Investors should remain vigilant, diversified, and prepared for ongoing volatility.

A FED IN CONFLICT

Before the banking system stresses that emerged in March, the Fed was prepared to maintain higher-for-longer interest rates in the face of labor market strength and inflation that remains above target. Now, the Fed must balance its goal of lowering inflation while maintaining stability in the financial system. With so much uncertainty surrounding the forward path, expectations are diverging.

OBSERVATIONS

- For much of 2022, both the market's expectations and the Fed's forecasts were aligned about where the fed funds rate would land at the end of 2023. However, the two began to diverge in late 2022, with the Fed maintaining its higher-for-longer stance, while markets envisioned a quicker Fed pivot.
- Both sides remain data-dependent. A stronger-than-expected January jobs report sent market expectations above Fed targets. However, the bank collapses in March sent expectations sharply lower as the market anticipated rate cuts before 2024. How this difference of opinion reconciles will be a critical contributor to market conditions and investor sentiment for the remainder of the year.

Sources: Bloomberg, CAPTRUST Research. Data as of 3.31.2023.

BANK STRESS IMPACTS MAY PERSIST

After the collapse of Silicon Valley Bank and Signature Bank in early March, regional and community banks have come under pressure. The week after these disruptions, savers withdrew more than \$180 billion from small banks, the largest weekly deposit decline of the last 20 years. Large banks were the primary beneficiaries, as investors flocked to their perceived safety. Continued declines in deposit balances could ultimately leave small and midsize banks vulnerable, leading to tighter lending conditions across several economic sectors.

Percent of Bank Credit

Issuers of Commercial Real Estate Loans

OBSERVATIONS

- Generally, large banks maintain a higher percentage of their bank credit—or a portion of total assets—in securities and lend approximately 65% of available credit. Conversely, loans make up approximately 75% of smaller banks' available bank credit. Consequently, a deposit shift from small banks to larger ones will likely restrict the amount of credit available across the overall economy.
- Most vulnerable is the commercial real estate market, where small banks provide nearly 70% of all commercial real estate loans. Restrictive credit conditions could create challenges for these markets that are already facing valuation pressure from rising interest rates.

Sources: Board of Governors of the Federal Reserve System, CAPTRUST Research. Large banks are defined as the largest 25 U.S. chartered commercial banks. Small banks are defined all chartered U.S. commercial banks excluding the top 25.

RELIEF FOR CONSUMERS AS PRICES FALL

Consumer purchasing power has improved as the prices of key items such as groceries and gasoline have receded from their 2022 peaks. The robust labor market has also contributed to a more confident consumer by driving wages higher. However, these same high labor costs are adversely impacting the price of worker-dependent services, like home repair, travel, and entertainment, contributing to higher overall inflation.

OBSERVATIONS

- Consumer sentiment reached an all-time low in June 2022, just as food and energy prices peaked. Sentiment has improved as prices have come down.
- Landlords are holding rents steady in anticipation of competition, as the market is expected to see the largest delivery of new unit supply since 1986. Much of this supply comes from real estate developers seeking to capitalize on pent-up housing demand.
- The cost of services has risen 20% in just two years as workers return to the office and in-person activities. This increase is driving persistently high headline inflation even as the cost of goods has ebbed.

Sources: U.S. Bureau of Economic Analysis, U.S. Department of Housing and Urban Development, University of Michigan Consumer Sentiment Index, CAPTRUST Research. Data as of March 31, 2023.

REGISTERS KEEP RINGING WITH JOBS, SAVINGS

While the strong labor market is proving to be a thorn in the Fed's side, it continues to support economic activity, giving consumers greater confidence to maintain spending. While personal savings rates have recently fallen below long-term averages, this additional spending has been supported by excess savings accumulated during the pandemic. Based on the February 2020 savings level, economists estimate approximately \$1 trillion in excess savings remains in the system.

U.S. Real Consumer Spending - Goods

OBSERVATIONS: GOODS

- Spending on goods continues to run above pre-pandemic levels. At the end of February 2023, spending on goods was approximately \$285 billion above the long-term trend line.
- The easing of inflation across goods sectors has supported real spending.
- As supply chains have reopened, supply-demand imbalances have quickly cleared.

U.S. Real Consumer Spending - Services

OBSERVATIONS: SERVICES

- While spending on services has not fully returned to long-term trends, the recovery across the industry has been robust.
- Continued inflation pressures, especially wage inflation, across the services sector have restricted real spending.
- While higher wages support nominal spending, higher real wages are also driving up the cost of services, limiting the impact of spending.

---	------------------	---	-------------------	---	--------------------------

The CAPTRUST Investment Policy Monitor ("Scorecard") is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields for actively managed investment options. Quantitative scoring areas include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; Style Attribution; and Confidence. Qualitative Scoring Areas measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. This material is for institutional investor use only and is not intended to be shared with individual investors.

The CAPTRUST Financial Advisors Investment Scorecard is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields. Quantitative scoring areas for target date funds include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; and Glidepath. Qualitative Scoring Areas for target date funds measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. Qualitative Scoring for Target Date funds also includes a score for Portfolio Construction and Underlying Investment vehicles to express CAPTRUST's views on the manager or strategy. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have a Fund Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Investments that are not mutual funds or have less than 3 years of performance history may not be scored. Capital Preservation options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics, depending on the type of capital preservation option being evaluated, and may include quantitative criteria such as: Crediting Rate/Yield, Market to Book Ratio, Average Crediting Quality, Insurer Quality/Diversification, Duration, and Sector Allocations, and/or qualitative criteria such as quality and experience of the Management Team and stewardship of the investment option's parent company. Passively Managed options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics and may include quantitative criteria such as: Tracking Error, Fees, and Performance versus relevant peer group, and/or qualitative criteria such as index replication strategy, securities lending practices, and fair value pricing methodology. Distinct investment options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics. This material is for institutional investor use only and is not intended to be shared with individual investors.

FUND MANAGEMENT ITEMS	COMMENTARY
Lazard International Strategic Equity	<p>Mark Little and Robin Jones have been co-portfolio managers on the International Strategic Equity strategy since 2009. Over this time period, Mr. Little had final decision making authority for the strategy. Effective 12/31/2022, this final decision making authority was shifted over to Mr. Jones. Mr. Little will remain as a co-portfolio manager on the strategy, but is looking for broader opportunities at the firm and wants to delegate more decision making authority to his co-portfolio manager.</p> <p>The strategy invests primarily in developed market companies that the team believes are undervalued based on their earnings, cash flow, or asset values. Up to 15% can be allocated to companies located in emerging markets. The strategy is benchmark agnostic and will actively invest across the full market capitalization spectrum and may have more exposure to midsize and smaller capitalization securities. The strategy is executed by a broad team of five portfolio managers, many of whom have been on the team for well over ten years, leading to a consistently applied process. The strategy has experienced successful results over prior periods including the years from 2010 through 2014 and 2017 through 2020. The last two years have been more challenging for the strategy as the higher valuation securities that the portfolio has been invested in more recently have corrected more sharply than the broader market. Given the stability of the team and process and a strategy that has delivered attractive returns for investors historically, we would recommend that clients currently utilizing the strategy continue to do so.</p>
Carillon Eagle Small Cap Growth	<p>We were encouraged by the strategy's outperformance in 2020 vs. the benchmark. However, significant underperformance in Q1 2021, due to negative stock selection in most sectors, was cause for concern. We had not seen that broad-based weakness in prior years. Although most small growth managers struggled in January, as the market was led by lower quality, higher beta stocks, they rebounded later in the quarter as these headwinds subsided. Unfortunately, the Carillon Eagle strategy continued to underperform later in Q1. Results have stabilized since then, although performance still meaningfully lagged the peer group for the year, while having slightly outperformed in 2022. Unlike in prior years, higher growth, higher valuation stocks did not lead the market in the last two years, which should have been a more conducive backdrop for the strategy's valuation-conscious approach. We believe that the team is not executing well relative to its peers and our expectations, and thus believe that the strategy merits further consideration.</p>
Vaughan Nelson Small Value	<p>Stephen Davis retired, and no longer serves as a portfolio manager for the Vaughan Nelson Small Cap Value strategy, which is a sleeve within the Principal Small Cap Value II Fund. The strategy is now managed by Chris Walls, lead-portfolio manager, alongside CIO James Eisenman. Chris Walls has been and will remain the primary portfolio manager on this portfolio.</p>

FUND FIRM ITEMS	COMMENTARY
Prudential Global Investment Management	Head of Multi-Asset Research and Co-Head of ESG Yesim Tokat-Acikel left Prudential to pursue an outside opportunity. Her multi-asset responsibilities were absorbed by William Liang, who was named director of Multi-Asset Research. Gavin Smith, the firm's head of Equity Research and co-head of ESG, was named head of Equity Research and Sustainable Investing. In addition, Harshad Lalit was named director of Multi-Asset Sustainability, reporting to both Mr. Liang and Mr. Smith. Gavin Smith, co-head of ESG Research for PGIM Quantitative Solutions, has become the sole head of ESG Research following the departure of Yesim Tokat-Acikel.
Lazard Asset Management LLC	Ron Temple has been appointed chief market strategist for Lazard. Prior to this role, Mr. Temple was head of U.S. Equity and co-head of Multi-Asset Investing. Nathan Paul has been appointed chief operating officer (COO) of Lazard Asset Management. Prior to his role as COO, Mr. Paul served as the firm's chief business officer for 5 years and general counsel for over 15 years. CEO of Lazard Asset Management Evan Russo announced a new leadership structure for Lazard's asset management business. He has created a new Executive Leadership team and dedicated management groups responsible for oversight of key business areas, including Fundamental Equity, Fixed Income, and Quantitative/Multi-Asset/Alternatives Investment Management Groups, a Sales and Marketing Management Group, an Infrastructure Management Group, and the Strategic Growth Group.
Aristotle Capital Management	Aristotle Capital Management and Pacific Life Insurance Company announced Aristotle's planned acquisition of Pacific Life's third-party credit asset management firm, Pacific Asset Management. The transaction will bring \$20.7 billion in assets under management and over 50 professionals, including 23 investment team members, to Aristotle. Following the close of the transaction in the first half of 2023, Pacific Asset Management will be known as Aristotle Pacific Capital.
Rhumblin Advisors Corp	Wayne Owen has retired from his role of CEO of RhumbLine Advisers. Denise D'Entremont, president, has been promoted as Mr. Owen's replacement. Mr. Owen will continue to serve as an owner and consultant of the firm. As part of the leadership transition, Mr. Owen is selling the majority of his ownership in the firm to Ms. D'Entremont.

ALPHA

Alpha measures a manager's rate of return in excess of that which can be explained by its systematic risk, or Beta. It is a result of regressing a manager's returns against those of a benchmark index. A positive alpha implies that a manager has added value relative to its benchmark on a risk-adjusted basis.

BATTING AVERAGE

Batting Average, an indicator of consistency, measures the percentage of time an active manager outperformed the benchmark.

BETA

Beta measures a manager's sensitivity to systematic, or market risk. Beta is a result of the analysis regressing a manager's returns against those of a benchmark Index. A manager with a Beta of 1 should move perfectly with a benchmark. A Beta of less than 1 implies that a manager's returns are less volatile than the market's (i.e., selected benchmarks). A Beta of greater than 1 implies that a manager exhibits greater volatility than the market (i.e., selected benchmark).

CAPTURE RATIO

Up Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was positive. Down Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was negative. An Up Market Capture of greater than 100% and a Down Market Capture of less than 100% is considered desirable.

INFORMATION RATIO

The Information Ratio measures a manager's excess return over the passive index divided by the volatility of that excess return, or Tracking Error. To obtain a higher Information Ratio, which is preferable, a manager must demonstrate the ability to generate returns above its benchmark while avoiding large performance swings relative to that same benchmark.

PERCENTILE RANK

Percentile Rankings are based on a manager's performance relative to all other available funds in its universe. Percentiles range from 1, being the best, to 100 being the worst. A ranking in the 50th percentile or above demonstrates that the manager has performed better on a relative basis than at least 50% of its peers.

RISK-ADJUSTED PERFORMANCE

Risk-adjusted Performance, or RAP, measures the level of return that an investment option would generate given a level of risk equivalent to the benchmark index.

R-SQUARED

R-squared measures the portion of a manager's movements that are explained by movements in a benchmark index. R-squared values range from 0 to 100. An R-squared of 100 means that all movements of a manager are completely explained by movements in the index. This measurement is identified as the coefficient of determination from a regression equation. A high R-squared value supports the validity of the Alpha and Beta measures, and it can be used as a measure of style consistency.

SHARPE RATIO

Sharpe ratio measures a manager's return per unit of risk, or standard deviation. It is the ratio of a manager's excess return above the risk-free rate divided by a manager's standard deviation. A higher Sharpe ratio implies greater manager efficiency.

STANDARD DEVIATION

Standard Deviation is a measure of the extent to which observations in a series vary from the arithmetic mean of the series. This measure of volatility or risk allows the estimation of a range of values for a manager's returns. The wider the range, the more uncertainty, and, therefore, the riskier a manager is assumed to be.

TRACKING ERROR

Tracking Error is the standard deviation of the portfolio's residual (i.e. excess) returns. The lower the tracking error, the closer the portfolio returns have been to its risk index. Aggressively managed portfolios would be expected to have higher tracking errors than portfolios with a more conservative investment style.

TREYNOR RATIO

The Treynor Ratio is a measure of reward per unit of risk. With Treynor, the numerator (i.e. reward) is defined as the annualized excess return of the portfolio versus the risk-free rate. The denominator (i.e. risk) is defined as the portfolio beta. The result is a measure of excess return per unit of portfolio systematic risk. As with Sharpe and Sortino, the Treynor Ratio only has value when it is used as the basis of comparison between portfolios. The higher the Treynor Ratio, the better.

	QUANTITATIVE EVALUATION ITEMS	QUALITATIVE EVALUATION ITEMS
 MARKED FOR REVIEW The following categories of the Investment Policy Monitor appear “Marked For Review” when:	3/5 Year Risk- adjusted Performance The investment option's 3 or 5 Year Annualized Risk Adjusted Performance falls below the 50th percentile of the peer group.	Fund Management A significant disruption to the investment option's management team has been discovered.
	3/5 Year Performance vs. Peers The investment option's 3 or 5 Year Annualized Peer Relative Performance falls below the 50th percentile of the peer group.	Fund Family A significant disruption to the investment option's parent company has been discovered.
	3/5 Year Style The investment option's 3 or 5 Year R-Squared measure falls below the absolute threshold set per asset class.	Portfolio Construction The investment option's combined Portfolio Construction score is 6 or below out of a possible 15 points.
	3/5 Year Confidence The investment option's 3 or 5 Year Confidence Rating falls below the 50 th percentile of the peer group.	Underlying Investment Vehicles The investment option's combined Underlying Investment Vehicles score is 6 or below out of a possible 15 points.
	Glidepath Assessment % of Equity Exposure: The combined percentage of an investment option's equity exposure ranks in the top 20th percentile or bottom 20th percentile of the peer group. Regression to the Benchmark: The investment option's sensitivity to market risk - as measured by beta relative to a Global Equity Index - is above 0.89.	
CAPTRUST's Investment Policy Monitoring Methodology The Investment Policy Monitoring Methodology document describes the systems and procedures CAPTRUST uses to monitor and evaluate the investment vehicles in your plan/account on a quarterly basis. Our current Investment Policy Monitoring Methodology document can be accessed through the following link: captrust.com/investmentmonitoring
