PUR-9 13-0920 CITYWIDE TOWING SERVICES - REJECT ALL PROPOSALS UNDER RFP 135-11084 AND AWARD TWO-YEAR CONTRACT UNDER RFP 135-11212 in the total revenue amount of \$460,000 from West Way Towing, Inc.

The City Manager advised that both parties have met with staff. The Commission's proposal to geographically divide the city was not acceptable to both parties.

John Milledge, representing All County Towing, recalled concern expressed at the last meeting about Westway's facility being in Lauderdale Lakes and the distance that would have to be traveled. City staff has proposed a north and south geographic zone division. All County is agreeable with this concept. Staff also asked All County to pay for half of Westway's special hold facility so that the Police Department could send all vehicles to one location. Subsequently, Westway proposed that the contract be divided based on types of calls. He provided more detail on this concept that is attached to these minutes. He contended that seventy-five percent of the revenue would go to Westway. He also presented a list of All County personnel along with their years of experience in the industry that is also attached to these minutes.

Joe Goldstein, representing Westway Towing, noted this is procurement for police tow requests, different than private property towing. They are unique and specialized, such as traffic accidents, abandoned vehicles and those vehicles involved in arrests. The City's request for proposals based on facilities, experience and permit fees. Although All County proposed a greater permit fee, every member of the Evaluation Committee rated Westway number one in the other categories. Westway has worked with the City for the past six years, towing approximately in excess of 50,000 with three complaints during the course of six years. All of the complaints were resolved amicably. He elaborated on Westway's experience throughout the county. Westway's special hold facility is in the city limits and separate from their Lauderdale Lakes facility which is 1 ½ miles out of the northern city limits. The RFP calls for the proposer that has had a similar contract with a similarly sized city which All County does not possess. In theory All County should have been found non-responsive. Nevertheless, Westway met with All County but was unable to reach agreement. He referred to the City's bid protest procedure and questioned it not being followed. City staff recommends Westway.

Mr. Goldstein read a portion of the RFP (page 32) concerning experience for Commissioner Rogers. As to similar experience, the City has the discretion to allow it by the company or key personnel. In further response, Mr. Goldstein advised that his partner attended the meetings with City staff and All County and he is now on vacation. He understood the meetings occurred sequentially and Westway was not in the first one when the geographical split was discussed. He was not aware that there was ever a formal agreement at any point or that All County agreed to make Westway whole because of the special hold facility. He only heard tonight about All County compensating Westway for the special hold facility. Westway does not believe the north-south arrangement is feasible from a practical standpoint and he believe City staff supports this. He acknowledged that All County's detail on the concept is more beneficial to Westway, but he did not agree with the quoted 75/25 percent break. Westway was the number one ranked vendor. He felt the percentage break is likely 60/40. He explained the logistics of the proposal with respect to the special hold facility accommodation for Westway. If All County would agree with Westway's financial split on the special hold facility and the breakdown be based on tow type, Westway would be agreeable with discussing this. However, he understood that City staff has some concerns. In response to Commissioner Rogers, Kirk Buffington, Deputy Director of Finance, advised that the initial concern is after dispatching goes to the County, whether the dispatcher will know the

difference between types of tows. However, negotiations were not shut down by staff based on this point. Commissioner Rogers wanted it to be worked out between the two companies in order for there to be competition in the picture.

Vice Mayor Roberts referred to experience and that it was made clear that the company possess the experience and not simply employees, who may come and go. Mr. Buffington advised that the RFP is clear that the proposer have a contract of similar nature, police towing, with a similar size city. A determination was made that the Evaluation Committee make the determination whether experience that employees bring to the table is sufficient. It was discussed by the committee. Vice Mayor Roberts noted that All County did not meet the criteria just through the proxy of their employees. He emphasized that Westway has been under contract for six years, over 50,000 tows and very few complaints. Having special holds in a secure facility and close to police headquarters for investigation is extremely important. There is a risk of crime scene material and solving crimes. It is felt that Westway provides by far the best facility for those purposes. He recalled when the contract was split years ago and it was a nightmare. It is not the way to do business. He supported staff’s recommendation of Westway. He encouraged All County to gain experience somewhere else and compete in the future. Commissioner DuBose felt the contract could be split. He also felt the two should work out an equitable arrangement. He thought clear direction had been given by the Commission. Mayor Seiler agreed with Vice Mayor Roberts. He suggested a one-year contract award to Westway. He noted the track record. There is a bid protest process yet this came to the Commission.

Motion made by Vice Mayor Roberts and seconded by Commissioner Trantalis to award a one-year contract to Westway Towing.

Commissioner Rogers explained his concern is about the industry and desire for a check and balance or an exception to the rule based on that concern. Vice Mayor Roberts expressed his comfort with Westway in the police towing field based on their experience with the City although he shared the same concerns about practices that have been seen publicly. Commissioner Trantalis did not want to second guess staff any more than necessary. At the same time he agreed with Commissioner Rogers. He supported a one-year contract. In response to Commissioner DuBose, Mr. Buffington advised with a one-year contract, the City would move forward with towing service competition in five to six months. He speculated on what could occur in the marketplace. The scope and specifications will probably be changed as a result of these discussions. Commissioner DuBose did not see that a one-year contract is a true resolution to the issue.

MD-2 13-0969 CITY COMMISSION REQUEST TO REVIEW - GALLERIA LANDINGS SITE PLAN LEVEL III - Case 47-R-13

Applicant: Premier Developers V, LLC
Location: 1180 North Federal Highway
Zoning: Boulevard Business B-1
Future Land Use: Commercial

Mayor Seiler noted that Commissioner Trantalis has filed a statement of intent with the City Clerk requesting a hearing to review this development permit application.

Commissioner Trantalis believed there are significant aspects of the development that contradict the North U.S. 1 Urban Design Plan (Design Plan) developed in 2008. He reviewed the history of the Design Plan's development, its boundaries and purpose. The City should stay with the visioning process. He believed there will be a negative impact to East Point Towers which is adjacent to the proposed site as well as those that live in the George English Park area.

The following discussion took place in response to questions posed by other members of the Commission. Commissioner Trantalis explained he is concerned about height and setback. Moreover the building is more than the customary 200 foot length. The building will set a shield such that George English Park will never see the sun after 3 p.m. He stressed the importance of the City following the visioning process conclusion. Vice Mayor Roberts noted that the Planning and Zoning Board reviewed the development and staff believes it meets the criteria of the Design Plan. Although the Design Plan was accepted by the Commission, it was not enacted by ordinance. Depending on setback, it calls for heights in excess of six stories. The shadow only becomes an issue in the middle of the winter and only starts to infringe on the park. The Coral Ridge Homeowners Association has discussed this matter but has taken no stand on it. Greg Brewton, Director of Sustainable Development, confirmed staff found it meets the Design Plan criteria. The 200 foot maximum length does not apply to this location because of its zoning district. There is no maximum length because it is mixed-use. The length is determined by being able to meet several conditions and criteria in the zoning district. The six-story on waterfront is a design guideline established by the Design Plan, however, height can be varied in areas where it meets other criteria. He elaborated upon staff's thinking to allow for the proposed height. The Design Plan recommends mixed-used development. The City Attorney explained that the Commission simply accepted the Design Plan. It was not adopted because the notice requirement for amending the Unified Land Development Regulations (ULDR) is significant and would have created problems with vested rights. It was voted on. Commissioner Rogers felt the proposal fits the area. A car dealership will be frontage for this site. The developer has not requested any exceptions to the ULDR. The reality of urban development is the view will be blocked at some point in time. He concurred that the Design Plan criteria should be taken into consideration along the U.S. 1 corridor, but he felt the proposal will be a plus on this site. The developer is taking a risk. Commissioner Trantalis felt there will be urban infill throughout and with that thinking, no parcel would have to comply. Mr. Brewton provided more historical insight on the Design Plan and its acceptance. There was a majority but not unanimous consensus amongst the property owners along the corridor on specific issues. Staff has plans to codify it in the next few months. This development will be a conditional use based on mixed-use and waterway criteria. It could be built without the Design Plan guidelines and could result in less of a development than is presented. It is B-1 zoning. Neighborhood compatibility could come into play.

Mayor Seiler opened the floor for public comment.

Greg Brintlinger, President of East Point Towers, indicated this is not just about view. East Point Towers of 274 residents has participated in planning processes. He noted East Point residents directly participated with Coral Ridge and Lauderdale Gate in obtaining a new bridge height by working with the State. The Design Plan took almost two years to develop. During that process, this property was shown as two parcels described as needing special attention. The proposed development was not the intent when the Design Plan took form. East Point is excited about a new development, but would like an opportunity to meet with the developer and City staff and find a better site plan.

Steve Dolgin, resident of and member on the East Point Towers Board of Directors, noted that this development will set a precedent. He was concerned about the setback footage. He urged the Commission to authorize a hearing on this development.

Marcie Nolan, representing East Point Towers, stressed that East Point is not opposed to development, but concerned with the scale and massing along the Middle River. This Design Plan is on the City's

website. She thought it was approved by the Commission as a model to use. Mayor Seiler explained that apparently the plan was only accepted, not adopted and approved. Mr. Brewton confirmed that is correct. Ms. Nolan felt that nevertheless it begs the question as to why it was placed on the City's website. She urged the Commission to set a hearing for August 20 so that East Point could reach out to the developer during the interim. The biggest concern is how it abuts East Point.

David Schwartz, resident of East Point Towers, felt this development will be precedent setting. The neighborhood deserves protection from this kind of development.

Charles King, 105 North Victoria Park Road, commented that John Weaver, President of Central Beach Alliance, commented on this development, saying nothing should be built around an existing development that would lower that development's property values. He supported the proposed development.

Shannon Harmeling, 1106 NE 11 Avenue, indicated she is a member of Lake Ridge Civic Association. She drew attention to the need to look at traffic impact. She urged the Commission to set a hearing in August.

Courtney Crush, representing Premier Developers, noted that as a conditional use, the development is subject to neighborhood compatibility. Neighborhood compatibility requires that consideration be given to the applicable master plan. The development is designed to minimize or eliminate all adverse impacts. It meets the code and master plan (Design Plan). City staff focused on height. The master plan speaks about heights up to 150 feet as a conditional use. The Planning and Zoning Board (Board) is supposed to consider if the development meets design and site plan criteria in order to be approved as a conditional use. The Board concluded unanimously that this is an appropriate use and design at this location. The Board also indicated that in the future if there are sites that are configured differently, those regulations should be looked at. Premier Developers met with East Point and will continue to do so. A height variance would be required for some ideas of Ms. Nolan's client. Based on feedback from the City, she did not think that is a path to follow. As to a hearing, she noted that there was one and the applicable regulations and plan were voted upon.

There was no one else wishing to speak.

Motion made by Commissioner Trantalis to set a hearing for review on August 20, 2013 died for lack of a second.

RESOLUTIONS

- R-1 13-0120** SIDEWALKS ON BAYVIEW DRIVE BETWEEN NE 13 STREET AND NE 16 STREET - requiring property owners to reconstruct or repair sidewalks abutting their properties

Commissioner DuBose introduced the resolution, which was read by title only.

Commissioner Rogers asked if there are other sidewalks in need of addressing. The City Manager advised that these are the only two in this area that are trip hazards. Vice Mayor Roberts advised that there have been several complaints in this particular area. They are on the west side. In response to Commissioner Trantalis, the City Manager advised that the sidewalks are the property of the City, but he was uncertain who installed them originally. Commissioner Trantalis questioned why this is being imposed upon the property owners. The City Manager noted that the City's ordinance provides for the responsibility to rest with the abutting property owner and in these cases, the owners have trees that have caused the sidewalks to uproot. If there is no conduct on the part of the property owner disrupting the sidewalk, his position has been that the City repairs them. This is on the books of cities in his experience. Mayor Seiler felt the ordinance should be followed otherwise there would not be any motivation to maintain one's sidewalk. Taxpayers throughout the city should not have to pay for one individual's sidewalk that was not properly maintained by that individual. In this case, it is difficult for someone in a wheelchair to make their way. Commissioner Trantalis did not think it is fair to impose this without an actual causal connection between the property owner and the disrepair. The City Attorney explained the legal support for the ordinance and Commissioner Rogers discussed how it is generally clear if it is the property owner's fault.

Fred Carlson referred to two appointments to the Beach Redevelopment Board that expired five months ago Mel Rubinstein and Judith Scher. Both of these individuals reside in the same building which he did not think should be occurring in the interest of representative government. He questioned how many terms the individuals have served. Commissioner Trantalis advised it has only been three consecutive years. He suggested the individuals fill the balance of the one year term and then consider whether they should be replaced. He felt that geographical area is not the sole consideration for an individual's involvement, but rather it is their perspective, experience, goals and vision, which he shares with those individuals. However, he believes as many people as possible should be involved on all boards. Because they will have served for four consecutive years, he would ask them to step down at the end of this term so others can participate. Mr. Carlson explained the issue is that the City is facing development of the critically important old Escape Hotel. He alluded to the Central Beach Alliance's approval of the proposed design. However, the two individuals recommended for appointment to the Beach Redevelopment Board is complaining about the proposed building height. Commissioner Trantalis indicated it may be that he shares the same opinion.

PUBLIC HEARINGS

PH-1 13-0948 RESOLUTION - UNDERGROUNDING OF OVERHEAD UTILITY LINES - SETTING FEE FOR INITIAL UPFRONT COSTS - Idlewyld - Riviera Isles - Service Area A

Mayor Seiler opened the public hearing and noted the public hearing for PH-2 and PH-3 will be held along with this public hearing.

Roslyn Morvay, 334 Isle of Capri, Las Olas Isles, indicated that she is not a member of the Las Olas Isles Association (Association). She has not seen results of the vote and further, the vote was not sponsored by the City and has not seen any of the ballots. This is a standing problem with the Association. The City Attorney outlined the ordinance adopted concerning undergrounding and the history leading up to the ordinance in response to Commissioner Trantalis. Discussion ensued as to the process wherein the City Manager advised that there is no requirement for a formal vote by the homeowner association at this point in order to get the matter before the Commission.

Earl Goldberg, 337 Isle of Capri, Las Olas Isles, advised that he is a member of the homeowner association and went on to say that a vote was not taken. He believed the City is taking the word of one individual.

Evelyn Goldberg, 337 Isle of Capri, Las Olas Isles, advised that she has attended all of the homeowner association meetings on this matter. There were supposed to be two votes and ballots were to be mailed out. She has never seen any tally of fifty-one percent or evidence of a vote. Mayor Seiler advised that their president, Ken Cooper, contacted him today and asked for his support.

Tamara Tennant, president of Riviera Isles Homeowner Association, explained that the board voted to go forward with the process to find out the cost. Once the cost is known, petitions will go to every homeowner for a vote.

Mary Fertig, of Idlewyld Improvement Association, explained that after the City's ordinance was amended, the board mailed out a ballot and letter of explanation, including a survey. Over seventy percent responded in favor. Idlewyld also joined Riviera Isles to keep the cost down.

Howard Steinholz, president of Seven Isles Homeowner Association, advised that numerous meetings were held with the neighborhood. The board voted to moved forward. There are 305 lots and he has not

had a single objection to their letter of June 3.

Bob Osborn, 411 Isle of Capri, Las Olas Isles, explained their area does not know the cost or who is in favor.

Commissioner Trantalis commented that he attended Las Olas Isles Homeowner Association annual meeting shortly after being elected and Mr. Cooper announced at that meeting that the undergrounding was going forward.

CITY OF FORT LAUDERDALE
City Commission Agenda Memo
REGULAR MEETING

#13-0759

TO: Honorable Mayor & Members of the
Fort Lauderdale City Commission

FROM: Lee Feldman, ICMA-CM, City Manager 

DATE: July 2, 2013

TITLE: ~~Resolution~~ Motion approving GRANT APPLICATION AND ACCEPTANCE
– Florida Department of Transportation Transit Corridor Program for two
years, including match requirements.

Recommendation

It is recommended that the City Commission approve a ~~Resolution~~ Motion authorizing application for the "Beach Link Expansion" and "Downtown WAVE Imitation Link" grants and ~~authorizing the proper City officials to receive grant dollars from the Florida Department of Transportation (FDOT) Transit Corridor program for two years of operational costs and an additional trolley replacement, including cash match requirements.~~

Background

The City is requesting approval to apply for:

- (1) operating and administrative costs of \$365,360 and capital funds in the amount of \$250,000 for the SunTrolley Downtown WAVE Imitation Link with an equal cash match.
- (2) operating funds of \$307,520 plus \$11,800 capital funds for the Beach Link Expansion.

The operating costs are \$672,880 total for a two year period, with an equal cash match. The match for both grants will be provided by the Downtown Fort Lauderdale Transportation Management Association (TMA) under a sub-recipient agreement.

City staff and the TMA contacted FDOT in June and determined that some grant funds are still available in the Transit Corridor program that expires June 30, 2013, the end of the State fiscal year. Timely application is required to be eligible and the City will apply for those funds on behalf of the TMA, an ineligible applicant. FDOT District IV has requested approval of the preliminary budget by the State-level Central Office prior to a formal application.

The grant for the operation and expansion of the Downtown Link will enable the TMA to slightly modify the route to mimic the planned Wave Streetcar service and expand

from four-day to daily service. The grant will provide one additional trolley for this route to decrease headways, equipped with auto-annunciators and other technologies to assist riders, to reduce wait times between shuttles, and to serve more riders. FDOT requested these enhancements to the SunTrolley service to help build the ridership along the route, ahead of the WAVE implementation.

The Beach Link grant will fund the expansion to daily service for coordinated linkage to the Downtown Route and the planned WAVE and will provide cameras for five trolleys as well as a server to host the "Trolley Tracker" smartphone app.

It is anticipated that the FDOT grant approval and agreement(s) will be received in July 2013. Grant funding will provide support for up to two years from the date of execution. Staff is prepared to meet these deadlines.

The City will advance the cost of purchasing the trolley and equipment and be reimbursed by grant funds. We will also reimburse the Transportation Management Association for grant-eligible operational and administrative costs for the routes, and will then be reimbursed from the grant funds.

Resource Impact

No current fiscal impact to the City. If successful, Commission approval to accept the grant and appropriate funds will be requested, an agreement will be required from the TMA for provision of the required match funds throughout the term of the grant, prior to acceptance of the grant. A budget amendment will be requested to appropriate revenues and expenditures which will have net zero fiscal impact to the City upon reimbursement from the grant.
