Digital Vehicular Repeater Systems 2 x \$16,735.50 \$33,471.00

Night Vision Goggles 2 x \$13,000.00 \$26,000.00

**Digital Vehicular Repeater Systems (DVRS):** These devices amplify radio signals into locations such as schools, hospitals and other large infrastructure that do not have Bi-Directional Amplifier (BDA) systems installed; which frequently results in the inability of officers inside the structure to receive or transmit radio communication. We intend to purchase two DVRS which will be placed into rescue vehicles for deployment during critical incidents such as an active killer situation. It will allow for Operations Command on the exterior to communicate with officers inside and allow for inside resources to relay requests needed inside such as rescue EMS teams.

**Night Vision Goggles:** These devices permit the user to see in low light environments and to not announce the user's location or movement. The user will have complete situational and spatial awareness in their environment. Funding will be used to acquire two Night Vision Goggles. These devices will permit the user to identify, track, and record happenings undetected and discreetly.

#### **SUPPLIES-**

Matcher System (Latent print comparison) 1 x \$2,793.00 \$2,793.00

**Matcher System:** In instances where latents are typically difficult to compare, a software called *Matcher* can be used to enlarge the whole latent and minutiae for easier examination and comparison with the known standard. The *Matcher* system allows the Latent Print Examiners to take a physical latent lift and put it on the computer screen to produce a magnified view, and adjust contrast levels and color sliders. Not only can the *Matcher* system adjust the latent image, but it also allows for side by side comparison. These features will help significantly decrease the amount of time an examiner looks for a latent on a known standard. The project cost also includes maintenance for two years.

**Outreach Items:** Packets containing pencils, crayons, stickers and coloring books will be distributed by officers during the course of their community outreach activities. Our Community Engagement Team, Mounted Unit and Motor Unit Officers visit day cares, elementary schools, alternative education programs and summer JAG BUDGET WORKSHEET, SUMMARY, NARRATIVE camps, where they deliver safety messages related to many themes: traffic safety, seat belt use, 911 use, etc. Packets will contain items related to this topics and will

provide opportunities for one-on-one engagement with children.

**CONSULTANTS/CONTRACTS**

Latent Print Examiner Proficiency Testing 3 x \$350.00 \$1,050.00

IA Pro Software 1 x \$11,900.00 \$11,900.00

**Latent Print Examiner Proficiency Testing:** Best practices recommend that Fingerprint Units have a quality assurance program in place that measures the quality of each Latent Print Examiner’s work performance. This is accomplished thru Proficiency Testing, which measures individual performance, application of the ACEV methodology, and identifies areas where improvements may be needed. These tests also add weight to a Latent Examiner’s expert opinion in the courtroom setting.

**IA Pro Software:** In addition to the formal complaints that are presented at the Department’s Internal Affairs Office, there are also calls and complaints from the public that do not rise to the level of a necessitating a formal investigation, but should be recorded and documented none the less. This is beneficial to the department to track early warnings or gather additional information related to a specific employee or incident. Acquisition of IA Pro software will allow for the capture of this data by supervisors. Additionally, protocols will be established in order to review and take action to prevent an issue from becoming worse.
