

**CITY OF FORT LAUDERDALE
City Commission Agenda Memo
REGULAR MEETING**

#23-1151

TO: Honorable Mayor & Members of the
Fort Lauderdale City Commission

FROM: Greg Chavarria, City Manager

DATE: December 19, 2023

TITLE: Resolution Approving the Fiscal Year 2024 Public Transportation Agency
Safety Plan for the City's Community Shuttle Program, and Authorizing the
City Manager or the City Manager's Designee to Provide and Execute
Annual Updates and Project Certifications to the Safety Plan–
(Commission Districts 1, 2, 3 and 4)

Recommendation

Staff recommends the City Commission adopt a resolution approving the Fiscal Year 2024 Public Transportation Agency Safety Plan (PTASP) and authorize the City Manager or the City Manager's designee to administratively provide and execute annual updates and project certifications to the Safety Plan.

Background

The City of Fort Lauderdale, through its participation in the Broward County Transit (BCT) Community Shuttle Program operates public transportation service within the City. Additionally, the City is an annual recipient of formula funds from the United States Department of Transportation's Federal Transit Administration (FTA). Pursuant to the Code of Federal Regulations (49 C.F.R. Part 673), the FTA requires each public transportation operator that receives federal funding to review, update, and approve its PTASP on an annual basis to continue to be eligible for FTA funding.

The PTASP must be approved by the public transportation agency's governing board. The City of Fort Lauderdale's PTASP formalizes the safety programs and procedures already in place and improves safety performance targets as part of an overall safety management plan. BCT recently completed an annual review of City's PTASP and approved it. This action would also authorize updates to the PTASP to be done administratively through the annual certification process.

Resource Impact

There is no fiscal impact associated with this action.

Strategic Connections

This item is a 2024 *Commission Priority*, advancing the Transportation and Traffic initiative.

This item supports the *Press Play Fort Lauderdale 2024* Strategic Plan, specifically advancing:

- The Infrastructure Focus Area
- Goal 2: Build a multi-modal and pedestrian friendly community.
- Objective: Improve transportation options and reduce congestion by working with partners

This item advances the *Fast Forward Fort Lauderdale 2035* Vision Plan: We Are Ready

CONSENT PURCHASE

RESOLUTION NO. 23-290

A RESOLUTION OF THE CITY COMMISSION OF THE CITY OF FORT LAUDERDALE, FLORIDA, APPROVING THE FISCAL YEAR 2024 PUBLIC TRANSPORTATION AGENCY SAFETY PLAN FOR THE CITY OF FORT LAUDERDALE'S COMMUNITY SHUTTLE PROGRAM AND AUTHORIZING THE CITY MANAGER OR THE CITY MANAGER'S DESIGNEE TO PROVIDE AND EXECUTE ANNUAL UPDATES AND PROJECT CERTIFICATIONS TO THE PUBLIC TRANSPORTATION AGENCY SAFETY PLAN FOR THE CITY OF FORT LAUDERDALE'S COMMUNITY SHUTTLE PROGRAM; AND PROVIDING FOR AN EFFECTIVE DATE.

WHEREAS, the City of Fort Lauderdale, Florida (City), through its participation in the Broward County Transit (BCT) Community Shuttle Program, operates public transportation services within the City; and

WHEREAS, the City is an annual recipient of formula funds from the United States Department of Transportation's Federal Transit Administration (FTA); and

WHEREAS, pursuant to Title 49 of the Code of Federal Regulations, Part 673, each public transportation operator that receives federal funding is required to review, update, and approve its Public Transportation Agency Safety Plan (PTASP) on an annual basis, to continue to be eligible for FTA funding; and

WHEREAS, the PTASP must be approved by the public transportation agency's governing board; and

WHEREAS, the City's PTASP formalizes the safety programs and procedures in place and improves safety performance targets, as part of an overall safety management plan; and

WHEREAS, in September 2023, BCT completed an annual review of the City's PTASP and approved it;

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF FORT LAUDERDALE, FLORIDA:

SECTION 1. That the City Commission of the City of Fort Lauderdale, Florida, hereby approves the Fiscal Year 2024 Public Transportation Agency Safety Plan for the City of Fort Lauderdale's Community Shuttle Program.

SECTION 2. That the City Commission of the City of Fort Lauderdale, Florida, hereby authorizes the City Manager or the City Manager's Designee to provide and execute annual updates and project certifications to the Public Transportation Agency Safety Plan for the City of Fort Lauderdale's Community Shuttle Program.

SECTION 3. That this Resolution shall be in full force and effect upon final adoption.

ADOPTED this 19th day of December, 2023.

State of Florida Requirements

Introduction

This document serves as the City of Fort Lauderdale's Public Transportation Agency Plan (PTASP) for all transit services the City of Fort Lauderdale provides including the Broward County Transit (BCT) Community Shuttle Program (CSP) located in Broward County, Florida. It is intended to encompass all current and future operations, services and projects and applies to all activities which involve planning, design, procurement, installation and testing of equipment or facilities, operations, maintenance, support activities, and the environment in which the transit system operates.

PTASP Rule and Requirements

The City of Fort Lauderdale is committed to comprehensive safety planning. As an operator of a small public transportation system that receives Federal Financial assistance under Title 49 of the United States Code (USC), the City of Fort Lauderdale is subject to FTA's 49 CFR Part 673 Final Rule and as delineated in Florida Administrative Code Section 14-90.004(1), has adopted the principles and methods of Safety Management Systems (SMS) as the basis for enhancing the safety of its public transportation system.

The plan incorporates the framework and principles of SMS for the City of Fort Lauderdale's potential transit services as well as its CSP operations and all applicable Subcontracted organization(s) to the extent practical and consistent with applicable requirements for each SMS component: I) Safety Management Policy, II) Safety Risk Management, III) Safety Assurance, and IV) Safety Promotion. The PTASP adheres to the fundamentals and framework of SMS and reflects the specific safety objectives, standards and priorities for the City of Fort Lauderdale transit services including the CSP and includes the following required elements:

- The Safety Plan and subsequent updates will be signed by the Accountable Executive and approved by the City of Fort Lauderdale.
- The Safety Plan documents the processes and activities related to SMS implementation.
- The Safety Plan includes performance targets based on the safety performance criteria established under the National Public Transportation Safety Plan (NSP), and the state of good repair standards established in the regulations that implement the National Transit Asset Management System and included in the NSP.
- The Safety Plan will comply with the minimum performance standards authorized through the National Public Transportation Safety Plan (NSP)
- The City of Fort Lauderdale will establish a process and timeline for conducting an annual review and update of the Safety Plan.
- The City of Fort Lauderdale will maintain the Safety Plan in accordance with the recordkeeping requirements in subpart D of Part 673.

Issuance and Update

The SMS plan will be reviewed and updated, as applicable, annually beginning on the date of issuance. Immediate changes to the Public Transportation Agency Safety Plan (PTASP) SMS

procedures deemed paramount to safety mitigation may be authorized via a signed SMS Immediate Policy Amendment Change Memo that has been reviewed and approved by the City's Transportation Manager/ CONTRACTOR's General Manager.

For these immediate changes, the CONTRACTOR's General Manager will be responsible for ensuring communication to all concerned parties through established internal communication venues and the update will be noted on the PTASP Activity Log by the Transportation Manager/ CONTRACTOR's General Manager.

Scope and Objectives

The SMS has been established consistent with business needs and regulatory impetus. The SMS is designed to reduce safety risks to an acceptable level through a continuous process of hazard identification and safety risk management practices to achieve the following goals:

- Reducing transit safety, employee, and environmental risks by better managing the City of Fort Lauderdale's transit program safety risks and setting goals to eliminate or reduce risks.
- Communication of safety risks to employees and their roles and responsibilities related to risks.
- Increase awareness of safety issues at all levels, thereby providing a better framework/structure for management to play a leadership role in addressing safety concerns.
- Continuous improvement of Contractor and Contractors organization SMS and risk controls.
- Compliance with all applicable state and federal regulations.
- Foster a culture of change management so that safety issues are identified, and risks are eliminated or reduced in the planning process and delays or other impediments to business goals are avoided.

The SMS applies to all the City's transit programs including those that are Contracted and/or Subcontracted organizations subject to Florida Department of Transportation and the Federal Transit Administration regulation on SMS and all City of Fort Lauderdale's transit operations.

History and Overview

Broward County is in southeast Florida and is bordered by 2 counties: Palm Beach County to the north, and Miami-Dade County to the south. The City of Fort Lauderdale is a direct recipient of FTA Section 5307 funds and operates transit services primarily within the City limits and bordering neighborhoods.

In addition, the City has an Interlocal Agreement (ILA) with BCT with an effective date of October 23, 2019, to provide transit service to the local community under its CSP. BCT's CSP is a collaborative transit service that operates in partnership with Broward County municipalities. The partnership is bound by an ILA in which the County provides supplemental funding and buses to

participating municipalities and each municipality operates a BCT approved local fixed-route shuttle service with designated bus stops in their community.

According to the U.S. Census Bureau, the City of Fort Lauderdale had an estimated residential population of 182,729 in 2022. The municipality covers a 36 square mile area. The City of Fort Lauderdale provides fixed-route and micro transit on-demand services typically operating between the hours of 9am – 5pm on weekdays and weekends. Routes are designed to complement the County's Fixed-Route system and to provide increased mobility and connectivity options in areas within the community where larger buses are unable to serve.

With regards to service provided under the CSP, the City of Fort Lauderdale is responsible for the overall planning of the service, including bus stop locations. Assisted by BCT staff, the City of Fort Lauderdale determines the major origins and destinations to be served by the route. Modifications to the routes are allowed; however, implementation must coincide with the schedule established by the County for Fixed-Route service. Travel times used for the implementation of bus schedules are calculated by BCT staff. Bus operator training, printed bus schedules, and shuttle/bus stop signs are provided by BCT. The City of Fort Lauderdale must provide monthly passenger boarding/ridership reports to BCT and maintain performance of a minimum average of 7.1 Passengers Per Revenue Service Hour per route during any rolling twelve (12) month period to remain qualified for the CSP.

The City of Fort Lauderdale uses a purchased transit model to operate all of its transit programs.

Funding for the CSP is paid quarterly in advance to municipalities for operations and maintenance (O&M) at an established O&M rate for the total vehicle hours of the service. Buses equipped with wheelchair securements and bicycle racks are purchased by BCT and leased to municipalities for \$10.00 per bus annually. The buses are currently gasoline-fueled and will be retrofitted as applicable for propane. Should municipalities choose to purchase non-propane-fueled buses, the County will reimburse municipalities on a per-vehicle basis up to the County's current purchase price of a propane-fueled bus less the propane conversion or similar type vehicle from the Florida state contract.

Capital assets that the City of Fort Lauderdale owns, leases, operates, maintains, or has a direct capital responsibility comprises of the following asset categories:

Rolling Stock

Ten (10) Vehicles for transporting of passengers.

Equipment

Contractor provides one (1) non-revenue service vehicles for use in its daily operations.

Facilities

One (1) Maintenance Facility located on the Contractor's property at 2000 N St Rd 7 Lauderdale Lakes, FL 33313.

Transit Agency Name	City of Fort Lauderdale
Agency Address	290 NE 3 rd Avenue, Fort Lauderdale, FL 33313
Name and Title of Accountable Executive	Benjamin Rogers, Director of Transportation
Name of Chief Safety Officer	Milos Majstorovic
Mode(s) of Service Covered by This Plan	Fixed route and On-demand Community Shuttle
List of all FTA Funding types	5307
Modes of Service Provided by the Transit Agency (Directly operated or Contracted service)	Subcontracted Limousines of South Florida
Does the agency provide transit services on behalf of another transit agency or entity?	In some instances - yes
Description of Arrangement	Community Shuttle Program – Interlocal Agreement with Broward County Transit
Name and Address of Transit Agency or Entity for Which Service is Provided	Broward County Transit 1 N. University Drive, Suite 3100A Plantation, FL 33324

Plan Development, Approval, and Certification of Compliance

The City of Fort Lauderdale's Chief Safety Officer/ SMS Executive ensures that the Public Transportation Agency Safety Plan (PTASP) is developed, implemented, and maintained in an appropriate and effective manner. Contracted General Manager, with oversight of Operations and Fleet Maintenance, assists the Chief Safety Officer in this effort. Any changes in policy, organization, rules, regulations, or operations necessitating plan adjustments are to be accomplished within the established guidelines of this plan and require review and approval by the Accountable Executive and/or Chief Safety Officer. The PTASP will have ongoing updates as necessary, including changes that will be implemented immediately. All updates to the plan will be recorded on the PTASP activity log of this plan.

Plan Review and Modification

The City of Fort Lauderdale's Transit Director will review with its Contracted General Manager, and the Driver Trainer/Programs Assistant for CSP program, will review the PTASP annually beginning the date of issuance. The PTASP is adopted by the County Commission with subsequent updates/approvals completed administratively by the designee. At the time of review, the City of Fort Lauderdale will discuss performance targets and any other safety hazards identified previously. The plan will have ongoing updates as necessary including changes that will be implemented immediately. Any updates to the plan will be recorded on the activity log of this plan. This Agency Safety Plan addresses all applicable requirements and standards for Small Transit Agencies as set forth in FTA's Public Transportation Safety Program and the National Public Transportation Safety Plan.

Revision Number	Section/Pages Affected	Reasons for Change	Date Issued
Original			

Safety Objectives and Performance Targets

This section specifies performance targets based on the safety performance measures established under the National Public Transportation Safety Plan (NSP) and the state of good repair standards established in the regulations that implement the National Transit Asset Management System which are included in the NSP.

It is the mission of the City of Fort Lauderdale to provide safe, reliable public transit services to its community. To implement the City of Fort Lauderdale's safety policies, goals, and objectives, this plan requires coordination, integration, communication, and cooperation among all directors, managers, supervisors, departments, and City of Fort Lauderdale employees.

Safety performance targets, as defined in CFR Part 673.5 are to be compiled after reviewing the previous 5 years of performance data for:

- Fatalities: Total number of reportable fatalities and rate of fatalities per total vehicle revenue miles (VRM), by mode.
- Injuries: Total number of reportable injuries and rate of injuries per total vehicle revenue miles, by mode.
- Safety Events: Total number of reportable events and rate of events per total vehicle revenue miles, by mode.
- System Reliability: Average distance between major mechanical failures, by mode.

The City of Fort Lauderdale has set the following performance targets for its transit program, including the CSP, based on the safety performance criteria established under the National Public Transportation Safety Plan (NSP).

Mode of Transit Service	Fatalities (total)	Fatalities (per thousand VRM)	Injuries (total)	Injuries (per thousand VRM)	Safety Events (total)	Safety Events (per thousand VRM)	System Reliability MDBF (Miles)
Community Shuttle	0	0.0	9	0.568	12	0.946	3,420

A reportable safety event is defined in CFR Part 673.5 as any accident, incident, or occurrence.

Agency Coordination

This section describes the coordination with FDOT and the Broward Metropolitan Planning Organization (MPO) in the selection of State and MPO safety performance targets.

To aid in the planning process, BCT shares the safety performance targets with the Broward Metropolitan Planning Organization (MPO) and the City of Ft. Lauderdale each year prior to the PTASP's annual update. BCT also provides the performance targets to the Florida Department of Transportation (FDOT) Central Office Transit Safety Programs Manager. City of Ft. Lauderdale personnel are available to coordinate with FDOT and the Broward MPO in the selection/coordination of State and MPO safety performance targets upon request.

Targets Transmitted to State	State Entity Name	Transmittal Date
	Florida Department of Transportation District 4	10/28/2022
Targets Transmitted to MPO	MPO Name	Transmittal Date
	Broward MPO	10/28/2022

TAM	Transit Asset Management

Definitions of Terms

The following definitions apply to all related information in this manual.

Accident – an Event that involves any of the following: a loss of life; a report of a serious injury to a person; a collision of public transit vehicles; an evacuation for life safety reasons; at any time, whatever the cause.

Accountable Executive – a single, identifiable person who has ultimate responsibility for carrying out the agency's Public Transportation Agency Safety Plan (PTASP) and Transit Asset Management Plan (TAMP); and control or direction over the human and capital resources needed to develop and maintain both the agency's PTASP, in accordance with 49 U.S.C. 5329(d), and the agency's TAMP, in accordance with 49 U.S.C. 5326.

Audit – an examination of records and related materials, including, but not limited to, those related to financial accounts.

Broward County Transit – the County's Fixed Route/ADA public transportation system serving unincorporated Broward County and local municipalities within Broward County, Florida.

Chief Safety Officer or SMS Executive – an adequately trained individual who has the responsibility for safety and reports directly to a transit agency's chief executive officer, general manager, president, or equivalent officer.

Community Shuttle Program – a collaborative transit service that operates in partnership with municipalities in Broward County. The partnership is bound by an Interlocal Agreement (ILA) in which Broward County provides funding and buses to the municipalities, and the municipalities operate a pre-defined local fixed-route shuttle service with designated bus stops in their communities.

Community Transit: Transit service provided via BCT's CSP.

Contractor – municipality participating in the Broward County Transit Community Shuttle Program under an Interlocal Agreement (i.e., contract) and is accountable for the terms of the agreement.

Corrective Action Plan – a plan developed by recipient that describes the actions the recipient will take to minimize, mitigate, correct, or eliminate risks and hazards, and the schedule for taking those actions. Either BCT, a State Safety Oversight Agency (FDOT), or FTA may require a transit agency to develop and carry out a corrective action plan.

Equivalent Authority – an entity that carries out duties similar to that of a Board of Directors for a recipient or sub recipient of FTA funds under 49 U.S.C. Chapter 53, including sufficient authority to review and approve a recipient or sub recipient's Public Transportation Agency Safety Plan.

External Service Provider – performs operations, maintenance, safety, or risk management services related to transit service delivery from outside a recipient's immediate organizational structure and work is performed under an inter or intra governmental agreement, statute, or regulation, not a contract.

Event – any Accident, Incident, or Occurrence.

Florida Department of Transportation (FDOT) – state agency that administers rules and regulations as outlined in Florida Administrative Code Chapter 14-90

Florida Administrative Code Rule Chapter 14-90 – is the official compilation of the administrative rules and regulations of state agencies that outlines state law regarding bus systems specific to operational, maintenance, and safety rules concerning public transportation.

Hazard – any real or potential condition that can cause injury, illness, or death; damage to or loss of the facilities, equipment, rolling stock, or infrastructure of the transit system or damage to the environment.

Hazard Report – a report filed regarding a hazard identified in the workplace.

Incident – an Event that involves any of the following: a personal injury that is not a serious injury, one or more injuries requiring medical transport; or damage to facilities, equipment, rolling stock, or infrastructure that disrupts the operations of the transit agency.

Investigation – the process of determining the casual and contributing factors of an accident, incident, or hazard for the purpose of preventing reoccurrence and mitigating risk to the lowest manageable level practicable.

National Public Transportation Safety Plan – a plan to improve the safety of all public transit systems that receive Federal financial assistance under 49 U.S.C. Chapter 53.

Near Miss – a safety event where conditions with potential to generate an accident, incident, or occurrence existed, but where an accident, incident, or occurrence did not occur because the conditions were contained by chance or by existing safety risk mitigations.

Near Miss Report – a report filed from a narrowly avoided collision or other accident.

Occurrence – an event without any personal injury in which any damage to facilities, equipment, rolling stock, or infrastructure does not disrupt the operations of the transit agency.

Operator – a public transportation system provider of public transportation as defined under 49 U.S.C. 5302.

Performance Measure – an expression based on a quantifiable indicator of performance or condition that is used to establish targets and to assess progress toward meeting the established targets as prescribed by the National Public Transportation Safety Plan for the following: 1) fatalities; 2) injuries; 3) safety events; and 4) system reliability.

Performance Target – a specific quantifiable safety performance level related to safety management activities established in the National Public Transportation Safety Plan (NSP)

Public Transportation Agency Safety Plan (PTASP) – documented comprehensive agency safety plan as required by 49 U.S.C. 5329 and Part 673.

Recipient – a State or local government authority, or any other operator of public transportation that receives financial assistance under 49 U.S.C. Chapter 53. The Ter, “recipient” includes State Safety Oversight Agencies.

Recordable Injury – injury resulting in lost time at work.

Reporting Manager – an employee’s direct supervisor.

Risk – the composite of predicted severity and likelihood of the potential effect of a hazard

Risk Assessment – a systematic study or examination and determination of a hazard to establish the significance or value of the risk.

Risk Mitigation – a method or methods to eliminate or reduce the effects of hazards to the lowest manageable level practicable.

Root Cause – The exact cause of an incident or accident where had the root cause found not to be present, the accident or incident would not have happened.

Safety Assurance – the processes within the transit agency's Safety Management System that functions to ensure the implementation and effectiveness of safety risk mitigation; and to ensure that the transit agency meets or exceeds its safety objectives and activities through the collection, analysis, and assessment of information.

Safety Management Policy – the transit agency's documented commitment to safety, which defines the agency's safety objectives and the accountabilities and responsibilities of its employees regarding safety.

Safety Management System – the formal, top-down organization-wide approach to managing safety risk and assuring effectiveness of the agency's safety risk mitigation. SMS includes effective systematic procedures, practices, and policies for managing risks and hazards.

Safety Performance Target – a performance target related to safety management activities.

Safety Promotion – a combination of training and communication of safety information to support SMS policy and procedure practices throughout the transit agency as applied to the agency's public transportation system.

Safety Review – an on-site assessment to determine if a bus transit system has adequate safety management controls in place and functioning in accordance with the safety standards provided and incorporated by reference in this rule chapter.

Safety Risk Management – a process within the transit agency's Agency Safety Plan for identifying hazards and analyzing, assessing, and mitigating safety risk.

Serious Injury – an injury which (1) requires hospitalization for more than 48 hours, commencing within 7 days from the date the injury was received; (2) results in a fracture of any bone (except simple fractures of fingers, toes, or noses); (3) causes severe hemorrhages, nerve, muscle, or tendon damage; (4) involves an internal organ; or (5) involves second or third-degree burns, or any burns affecting more than 5 percent of the body surface.

Small Public Transportation Provider – means a recipient or subrecipient of Federal financial assistance under U.S.C. 5307 that has one hundred (100) or fewer vehicles in peak revenue service and does not operate a rail fixed guideway public transportation system.

State of Good Repair – the condition in which a capital asset can operate at a full level of performance.

State Safety Oversight Agency – an agency established by a State that meets the requirements and performs the functions specified by 49 U.S.C. 5329e and the regulations set forth in 49 CFR part 659 or 49 CFR part 674.

Subcontractor – entity that provides operations and/or maintenance services to a municipality participating in the BCT CSP under a subcontract and is accountable on the terms of the subcontract.

Transit Agency – an operator of a public transportation system

Transit Asset Management (TAM) – the strategic and systematic practice of procuring, operating, inspecting, maintaining, rehabilitating, and replacing transit capital assets to manage their performance, risks, costs over their life cycles, for purpose of providing safe, cost effective, and reliable public transportation, as required by 49 U.S.C. 5326 and 49 CFR Part 625.

Transit Asset Management Plan (TAM) – a plan developed for Broward County Transit pursuant to 49 CFR part 625 that includes, at minimum, capital asset inventories and condition assessments, decision support tools, and investment prioritization.

Safety Management System (SMS) Framework

This section outlines the SMS Framework incorporated under the PTASP by the City of Fort Lauderdale, including.

- I. **Safety Policy** – Establishes senior management’s commitment to continually improve safety; defines the methods, processes, and organizational structure needed to meet safety goals.
- II. **Safety Risk Management** – Determines the need for, and adequacy of new or revised risk controls based on the assessment of acceptable risk.
- III. **Safety Assurance** – Evaluates the continued effectiveness of implemented risk control strategies; supports the identification of new hazards.
- IV. **Safety Promotion** – Includes training, communication, and other actions to create a positive safety culture within all levels of the workforce.

Safety Management Policy

- ❖ *A transit agency must establish its organizational accountabilities and responsibilities and have a written statement of safety management policy that includes the agency's safety objectives.*
- ❖ *The safety management policy must be communicated throughout the agency.*
- ❖ *A transit agency must establish and implement a process that allows employees to report safety conditions to senior management, protections for employees who report safety conditions to senior management, and a description of employee behaviors that may result in disciplinary action.*
- ❖ *The transit agency must establish the necessary authorities, accountabilities, and responsibilities for the management of safety amongst the following individuals within its organization, as they relate to the development and management of the transit agency's Safety Management System (SMS).*
- ❖ *The transit agency must identify an Accountable Executive. The Accountable Executive is accountable for ensuring that the agency's SMS is effectively implemented throughout the agency's public transportation system. The Accountable Executive is accountable for ensuring action is taken, as necessary, to address substandard performance in the agency's SMS. The Accountable Executive may delegate specific responsibilities, but the ultimate accountability for the transit agency's safety performance cannot be delegated and always rests with the Accountable Executive.*
- ❖ *The Accountable Executive must designate a Chief Safety Officer or SMS Executive who has the authority and responsibility for day-to-day implementation and operation of an agency's SMS. The Chief Safety Officer or SMS Executive must hold a direct line of reporting to the Accountable Executive. A transit agency may allow the Accountable Executive to also serve as the Chief Safety Officer or SMS Executive.*
- ❖ *A transit agency must identify those members of its leadership or executive management, other than an Accountable Executive, Chief Safety Officer, or SMS Executive, who have authorities or responsibilities for day-to-day implementation and operation of an agency's SMS.*
- ❖ *A transit agency may designate key staff, groups of staff, or committees to support the Accountable Executive, Chief Safety Officer, or SMS Executive in developing, implementing, and operating the agency's SMS.*

I: Safety Management Policy

Safety Management Policy Statement

The City of Fort Lauderdale is committed to providing a safe, comfortable, and accessible transit service as a viable means of mobility to the citizens and visitors of the city. Safety is the number one (1) priority and is a core value to the City of Fort Lauderdale. To ensure the highest level of safety performance we are implementing, developing, and improving strategies, management systems, and the processes to ensure that all our activities uphold to the highest level of safety performance. We will develop and embed a safety culture in all our activities that recognizes the importance and value of effective safety management and acknowledges that safety is paramount always. Delegated Executive Management will lead all transit service activities, from project planning through operations and maintenance with a balanced allocation of organizational resources to support this goal. Any Contractor and /or Subcontractor hired to perform services for the City of Fort Lauderdale has the duty to adhere to the City's Public Transportation Agency Safety Plan (PTASP); to recognize, report and correct hazards; to work in a safe manner; to promote safety awareness; and to actively assist in accident prevention.

All levels of management and all employees are accountable for the delivery of the highest level of safety performance, starting with the Director of Transportation. The Chief Safety Officer is responsible for ensuring that all employees, Contractors and/or Subcontractors will support safety management by ensuring that hazards are identified and reported and that all reasonable steps are taken to perform activities established as part of the Safety Management System (SMS). Each department manager is also responsible for implementing the SMS in their transit area of responsibility and actively supporting and promoting the SMS ensuring staff compliance with all processes and procedures. We will also work to ensure that all frontline transit employees are provided with adequate and appropriate safety information and training and are competent in safety matters.

The City of Fort Lauderdale will minimize the safety risk associated with transit service to its lowest level practicable and whenever possible, exceed legislative and regulatory requirements and standards. We will foster an open communication system whereby employees at all levels are encouraged to report all safety hazards and concerns without fear of reprisal.

The City of Fort Lauderdale has established safety performance targets to help measure the overall effectiveness of its processes and ensure the transit system meets the City's PTASP safety objectives. The city will evaluate ongoing City of Fort Lauderdale SMS performance by analyzing key safety performance indicators, reviewing inspections, investigations, and corrective action reports, and auditing the processes that support the SMS which will become the basis for revising or developing safety objectives, safety performance targets and plans with the goal of continuous safety improvement.

The City of Fort Lauderdale will:

- Provide appropriate resources to comply with all federal, state, and local safety-related requirements, rules, and standards for development and implementation of SMS activities within the Public Transportation Agency Safety Plan (PTASP).
- Enhance hazard identification and analysis, and safety risk evaluation activities to include: (1) establish and measure our safety performance against realistic, data-driven safety performance indicators and targets; (2) develop an employee safety reporting program that supports continuous improvement and (4) ensure externally supplied systems and services meet all transit safety performance standards.
- Ensure that no action will be taken against any employee who discloses a safety concern through the employee safety reporting program (unless disclosure indicates, beyond any reasonable doubt, an illegal act, gross negligence, or a deliberate or willful disregard of regulations or procedures).

The SMS Executive Management Team for the City of Fort Lauderdale's transit system, including the CSP, hereby adopts the principles and methods of Safety Management Systems (SMS) as the basis for enhancing the safety of public transportation. All rules, regulations, policies, guidance, best practices, and technical assistance administered will, to the extent practical and consistent with legal and other applicable requirements, follow the principles and methods of SMS.

The signatures in this section attest that this plan is understood, accepted, and approved; and that the Key SMS Management Team is fully committed to implementing SMS through the City's Public Transportation Agency Safety Plan (PTASP) and achieving its safety goals and objectives.

Annual Safety Certification and Adoption

Date:

Name: City of Fort Lauderdale

Address: 290 NE 3rd Avenue

Fort Lauderdale, FL 33313

In accordance with FTA 49 CFR Part 673 Final Rule, the bus system named above hereby adopts and certifies to the following:

1. The adoption and update of an Agency Safety Plan (ASP), formerly called the System Safety Program Plan (SSPP), and a Security Program Plan (SPP), in accordance, and at a minimum, with the established standards set forth in Chapter 14-90, Florida Administrative Code.
2. Compliance with adopted standards of the ASP, formerly called the SSPP, and the SPP.
3. Performance of safety inspections on all buses operated in accordance with Rule 14-90.009.

Safety Management Policy Communication

The City of Fort Lauderdale recognizes that communication is the essential component to the promotion of its safety objectives, targets, and safety culture and will use a variety of methods to communicate issues important to the operation of the SMS, including:

- Ensuring that all staff are aware of the SMS and their roles/responsibilities.
- Conveying SMS lessons and information
- Explaining why SMS related activities are introduced or changed.
- Conveying SMS activity updates
- Educating personnel on procedures for hazard and near miss reporting
- Promotion of the company's safety objectives, targets, and culture

The PTASP will be made available to all employees and will be maintained and kept in an accessible electronic file and in hard copy format by Key SMS Personnel in locations accessible to all employees under their supervision and management. All employees and Subcontractors will support safety management by ensuring that hazards are identified and reported.

Safety communication will comprise both internal and external communication tools/venues to include face to face meetings and interactions, posting and/or distribution of bulletins, department notices, and memoranda. All posted information can be found at a central location in each department area easily accessible to employees. Other communication methods include posters, signs, brochures, training materials, rule books, and operating procedures.

Authorities, Accountabilities, and Responsibilities

This section describes the role of the following individuals in the development and management of the transit agency's Safety Management System (SMS).

Title	Responsibilities
Accountable Executive	The Director of Transportation serves as the City of Fort Lauderdale's Accountable Executive with the following authorities, accountabilities, and responsibilities under this plan: • Controls and directs human and capital resources needed to develop and maintain the PTASP and SMS. • Designates an adequately trained Chief Safety Officer who is a direct report. • Ensures that the SMS is effectively implemented. • Ensures action is taken to address substandard performance in the SMS. • Broward County Transit maintains responsibility for carrying out the agency's Transit Asset Management Plan.

Chief Safety Officer or SMS Executive	The Accountable Executive designates the Deputy Director of Transportation as the City of Fort Lauderdale Chief Safety Officer. The Chief Safety Officer has the following authorities, accountabilities, and responsibilities under this plan: • Develops the City of Fort Lauderdale’s PTASP and SMS policies and procedures. • Ensures and oversees day-to-day implementation and operation of the City of Fort Lauderdale’s SMS. • Manages the City of Fort Lauderdale’s Employee Safety Reporting Program (ESRP). • Chairs the City of Fort Lauderdale Safety Committee and a. Coordinates the activities of the committee. b. Establishes and maintains Safety Risk Register and Safety Event Log to monitor and analyze trends in hazards, occurrences, incidents, and accidents; and c. Maintains and distributes minutes of committee meetings. • Advises the Accountable Executive on SMS progress and status. • Identifies substandard performance in the City of Fort Lauderdale’s SMS and develops action plans for approval by the Accountable Executive. • Ensures the City of Fort Lauderdale policies are consistent with the City of Fort Lauderdale’s safety objectives. • Provides Safety Risk Management (SRM) expertise and support for other City of Fort Lauderdale’s personnel who conduct and oversee Safety Assurance activities.
Agency Leadership and Executive Management	Agency Leadership and Executive Management also have authorities and responsibilities for day-to-day SMS implementation and operation of the City of Fort Lauderdale’s SMS under this plan. The City of Fort Lauderdale Agency Leadership and Executive Management include: • Director of Human Resources • Director of Finance • Contracted General Manager • Contracted VP of Operations • Contracted Dispatcher The City of Fort Lauderdale’s Leadership and Executive Management personnel have the following authorities,

	accountabilities, and responsibilities: • Participate as members of the City of Fort Lauderdale's Safety Committee (operations managers and supervisors will be rotated through the Safety Committee on a one year term and other positions are permanent members). • Complete training on SMS and the City of Fort Lauderdale's PTASP elements. • Oversee day-to-day operations of the SMS in their departments. • Modify policies in their departments consistent with implementation of the SMS, as necessary. • Provide subject matter expertise to support implementation of the SMS as requested by the Accountable Executive or the Chief Safety Officer, including Safety Risk Management (SRM) activities, investigation of safety events, development of safety risk mitigations, and monitoring of mitigation effectiveness.
Key Staff	The City of Fort Lauderdale uses the Safety Committee, as well as the monthly Drivers' Meeting and quarterly All-Staff Meetings, to support its SMS and safety programs: • Safety Committee: Any safety hazards reported will be jointly evaluated by the Safety Committee and the Chief Safety Officer during the bimonthly meeting. The Safety Committee members include the Chief Safety Officer, VP of Operations, and general manager, a representative from dispatch, a representative from fixed route, a representative from paratransit, and a representative from County Risk Management who meet bimonthly to review issues and make recommendations to improve safety. • Drivers' Meetings: A permanent agenda item in all monthly Drivers' Meetings is dedicated to safety. Safety issues are discussed and documented. • Quarterly All-Staff Meetings: Hazard reports and mitigations will be shared, safety topics will be brought up for open discussion, further feedback solicited, and hazard self-reporting further encouraged. Information discussed in these meetings will be documented.

Employee Safety Reporting Program

Describe the process and protections for employees to report safety conditions to senior management. Describe employee behaviors that may result in disciplinary action (and therefore, are excluded from protection). This includes:

- A process that allows employees to report safety conditions to senior management.
- Protections for employees who report safety conditions to safety management.
- A description of employee behaviors that may result in disciplinary action, and therefore are excluded from protection.

One of management's most important responsibilities under SMS is to encourage and motivate others to want to communicate openly, authentically, and without concern for reprisal. The City of Fort Lauderdale's PTASP requires proactive reporting of safety hazards or safety concerns on the part of all employees to maintain a proactive position on risk. All employees are responsible for reporting any adverse safety conditions, events, or acts, any observed or foreseeable hazards, and any safety concerns. Employees may report directly via email, text, verbally, or via written document to the Accountable Executive, Chief Safety Officer/SMS Executive, Agency Leadership or Executive Management, or Key SMS Staff members.

Protected Self-Reporting	Unprotected Self-Reporting
➤ Traffic Signal violations not resulting in an accident, injury, or damage to property. ➤ Failure to report an adverse event immediately, but within 4 hours of occurrence. All information connected to the investigation of the reported event will fall under this protection. ➤ Hours of Service violations. ➤ Reporting a safety concern that investigation reveals is not valid. ➤ Failure to wear proper PPE. ➤ Operating a revenue vehicle without proper equipment and uniform, including carrying the CDL on the employee's person. ➤ Fatigue that presents an unacceptable hazardous condition if duties are continued.	➤ Defined accidents/incidents ➤ Willful violations including but not limited to: ▪ Violations of Drug and Alcohol policies and requirements ▪ Criminal acts ▪ Failure to report criminal acts immediately.

Self-reported violations can be reported as an initial instance without disciplinary action. However, no willful violations will be subject to self-reporting protections. All employees have the option of reporting anonymously at any time. Employees who do not report anonymously will receive feedback from the key SMS staff member in their area as to the disposition of the report. Any person receiving a report of a hazard will immediately notify the key SMS staff member in his or her department. All reports will be documented and investigated in a timely manner.

A second instance of a self-reported violation will be evaluated by the City of Fort Lauderdale's Chief Safety Officer to determine if circumstances warrant disciplinary action. A third instance of the same violation will result in disciplinary action, whether self-reported or not.

All Hazards determined to be unacceptable and undesirable for operations and/or fleet maintenance will be referred to the Chief Safety Officer and Sub-Contractors General Manager/SMS Executive to ensure it is addressed immediately with mitigation or elimination. The hazard will be tracked by the SMS Manager and the corrective action plan will be monitored through full resolution by the designated SMS Executive and FDOT when appropriate.

Safety Risk Management

- ☐ *A transit agency must develop and implement a Safety Risk Management process for all elements of its public transportation system. The Safety Risk Management process must be comprised of the following activities: safety hazard identification, safety risk assessment, and safety risk mitigation.*
- ☐ *A transit agency must establish methods or processes to identify hazards and consequences of the hazards.*
- ☐ *A transit agency must consider, as a source for hazard identification, data and information provided by an oversight authority and the FTA.*
- ☐ *A transit agency must establish methods or processes to assess the safety risks associated with identified safety hazards.*
- ☐ *A safety risk assessment includes an assessment of the likelihood and severity of the consequences of the hazards, including existing mitigations, and prioritization of the hazards based on the safety risk.*
- ☐ *A transit agency must establish methods or processes to identify mitigations or strategies necessary as a result of the agency's safety risk assessment to reduce the likelihood and severity of the consequences.*

The Safety Risk Management process is comprised of the following activities each having specific procedures and accountabilities to ensure that the safety hazard has been mitigated to the level “as low as reasonably practicable”.

1. Safety Hazard Identification
2. Safety Risk Assessment
3. Safety Risk Mitigation
4. Documented system Safety Risk Management tracking

Safety Hazard Identification

Identification of hazards is the responsibility of all City of Fort Lauderdale’s transit service employees whether contracted or not. The continuous identification, monitoring, and elimination of hazards is key to an effective system safety program. Hazard identification methods include but are not limited to the following.

- Observation, inspection, and interaction of all City of Fort Lauderdale transit employees whether contracted or not.
- Reports from drivers, passengers, customer service, etc.

- Evaluation of accidents, incidents, near misses, to include data trends and projections.
- Internal and external safety audits, inspections, observations, defects, findings, violations, and reviews.

Examples of observed hazards may include:

- An uneven sidewalk joint that could cause a trip and fall.
- An extension cord or garden hose laying across a pathway.
- Oil leaked out of a Bus in the parking lot.
- Missing fire extinguisher
- Low hanging tree limb along routes
 - Problematic routes due to route design
 - Service door entry steps, safety tread attached.

Every employee, hired directly or contracted, is required to report all hazards or unsafe conditions to his/her Supervisor, Department Manager, or other appropriate authority as defined in the PTASP. However, employees may also communicate the identification of a potential hazard directly to the City's designated Chief Safety Officer or any Key SMS staff member verbally or in writing or by communicating through other established communication channels within the Employee Safety Reporting Program.

Safety Risk Assessment

This section describes the methods or processes used to assess the safety risks associated with identified safety hazards. The City of Fort Lauderdale's safety risk assessment process provides the ability to assign identified hazards an overall Hazard Rating of High, Serious, Medium, Low, based on a combination of Hazard Severity and Hazard Probability (or likelihood).

Hazard Severity may be rated as Catastrophic, Critical, Marginal, and Negligible.

Severity	Rating	Description
Catastrophic	1	Deaths (not including suicide or death by natural causes); Equipment destroyed.
Critical	2	A large reduction in safety margins: Serious injury, fracture, severe bleeding, paralysis, brain injury; Major equipment damage.
Marginal	3	A reduction in safety margins, injury, bruising, abrasions, bleeding, sprains, (ambulance transport); Sub-system or component failure; Procedural deficiencies
Minor	4	Nuisance, operating limitations, minor incidents, minor injury, bruising, abrasions, (no ambulance transportation)
Negligible	5	Insignificant

Hazard Probability is the likelihood that a hazard may occur in potential occurrences per unit of time, events, items, or activity. The City of Fort Lauderdale derives qualitative hazard probability from research, analysis, and evaluation of existing safety data from the operating experience from the City of Fort Lauderdale and/or similar transit agencies. Hazard probability may be rated as Frequent, Occasional, Remote, Improbable, Extremely Improbable.

Frequency	Rating	Probability
Frequent	A	Likely to occur frequently/has occurred frequently to an individual item. Continuously experienced in the fleet inventory.
Occasional	B	Likely to occur/has occurred sometimes in life of an item; will occur several times in fleet/inventory.
Remote	C	Unlikely to occur/has occurred rarely in life of an item; unlikely to occur but possible to occur in fleet/inventory.
Improbable	D	So unlikely, it can be assumed occurrence will not be experienced to an individual item; very unlikely to occur or no known occurrences in fleet/inventory.
Extremely Improbable	E	Almost inconceivable that this hazard will ever occur.

Before implementation of any Corrective Action to mitigate a safety risk/hazard, the City of Fort Lauderdale will assign each identified hazard an overall Hazard Rating, which reflects the severity and probability for each identified hazard.

		Risk Severity				
		1	2	3	4	5
		Catastrophic	Critical	Marginal	Minor	Negligible
Risk Probability						
A	Frequent	1A	2A	3A	4A	5A
B	Occasional	1B	2B	3B	4B	5B
C	Remote	1C	2C	3C	4C	5C
D	Improbable	1D	2D	3D	4D	5D
E	Extremely Improbable	1E	2E	3E	4E	5E

Safety Risk Mitigation

This section describes the methods or processes used to identify mitigations or strategies necessary as a result of the safety risk assessment to reduce the likelihood and severity of hazards.

The City of Fort Lauderdale acts to eliminate identified safety hazards or to reduce the associated risk. In accordance with the risk acceptance criteria below, the City eliminates “unacceptable”

hazards or reduces their associated risk to an acceptable level. If this is impossible or impractical, alternatives are recommended to the appropriate City's transit management decision makers.

The risk assessment and acceptance criteria assist the City of Fort Lauderdale's management in understanding the amount of risk involved by accepting the safety hazard relative to the costs (schedule, dollars, operations, etc.) to reduce the hazard's risk to an acceptable level. The following table identifies the hazard acceptance criteria:

High	Unacceptable	Corrective Action required
Serious	Undesirable	Corrective Action may be required, decision by management
Medium	Acceptable W/ review	With review and documentation by management
Low	Acceptable	Without review

Corrective Action Plan Procedures

The City of Fort Lauderdale compares risk assessment criteria to the identified hazards based on their estimated severity and likelihood of occurrence to determine acceptance of the risk or the need for corrective action to further reduce the risk. In accordance with FDOT and BCT requirements, City of Fort Lauderdale is required to develop corrective action plans for various deficiencies and hazards identified through on-site safety and security review process, accident or hazard investigations, and internal safety or security reviews. Either FDOT, BCT or the City of Fort Lauderdale may identify the need for corrective actions. If FDOT or BCT identifies a need for corrective action, it will notify the City of Fort Lauderdale in writing.

Causes for Initiation of Corrective Action Plan:

- **On-Site FTA, FDOT and BCT Safety and Security Reviews** – Upon receipt of the final report for an external regulatory agency safety or security review, the City of Fort Lauderdale will develop a corrective action plan to correct identified deficiencies and submit the CAP as required.
- **Accident/Incident/Hazard Investigations** – Regardless of the agency conducting the investigation process, any final report indicating findings and recommendations for addressing deficiencies or unsafe conditions that have met the overall Hazard Rating of High or Serious according to the City of Fort Lauderdale will be the primary responsibility of the City and/or the City's Operations and Maintenance Subcontractor SMS Staff (where applicable) to correct. Upon receipt of the final report, the Contractor and/or Subcontractor will have 15 calendar days to develop a corrective action plan or methodology to correct identified deficiencies.

- **Internal Safety and Security Review** - If the City of Fort Lauderdale finds areas of non-compliance during internal audits of City of Fort Lauderdale's Public Transportation Agency Safety Plan or Security and Emergency Preparedness Plan, those areas of non-compliance must be remedied by a corrective action plan within 30 calendar days. If FDOT or BCT rejects the City of Fort Lauderdale annual safety or security audit report, the city will have **15 calendar days** to develop a corrective action plan to correct identified deficiencies.

Corrective Action Plan Required Components:

- Identified noted Hazard or Deficiency
 - Date Corrective Action Plan was opened.
 - Process, Plan or Mechanism to address and resolve deficiencies.
 - Deadline for Implementation of Plan of Action.
- Departments and Persons who will be responsible for Implementation.

III: Safety Assurance

Safety Assurance

- ☞ *A transit agency must develop and implement a safety assurance process, consistent with this subpart. A small public transportation provider is not required to describe Management of Change and Continuous Improvement.*
- ☞ *A transit agency must establish activities to:*
 - *Monitor its system for compliance with, and sufficiency of, the agency's procedures for operations and maintenance;*
 - *Monitor its operations to identify any safety risk mitigations that may be ineffective, inappropriate, or were not implemented as intended;*
 - *Conduct investigations of safety events to identify causal factors; and*
 - *Monitor information reported through any internal safety reporting programs.*

Safety Assurance is accomplished through implementation of safety oversight and risk monitoring activities. Safety performance measures are used to select improvement targets, monitor safety performance, and encourage continuous improvements in service delivery. As the City of Fort Lauderdale implements its SMS, several activities will be initiated, and tools will be developed to support these safety oversight and risk monitoring activities. Safety assurance includes safety reviews, evaluations, inspections, as well as safety data collection, tracking, and analysis from various resources (including investigations), and development of Key Performance Indicators (KPIs).

Safety Performance Monitoring and Measurement

The City of Fort Lauderdale has developed and implemented a safety assurance process for its transit programs, including the CSP, consistent with 49 CFR Part 673 to ensure that the transit system complies with or exceeds the established safety standards set forth in the PTASP (as well as Rule Chapter 14-90, Florida Administrative Code located in the final section of this document). These Safety Performance Monitoring and Measurement processes will allow the City of Fort Lauderdale to:

- Monitor the system for compliance with procedures for operations and maintenance.
- Monitor operations to identify hazards not identified through the Safety Risk Management process (per 49 CFR 673.25)

- Monitor operations to identify safety risk mitigations that may be ineffective, inappropriate, or were not implemented as intended. Conduct investigation of safety events, including identification of causal factors.
- Monitor information reported through internal safety reporting programs.

Results from the above processes are compared against recent performance trends monthly, quarterly, by the City of Fort Lauderdale and SMS Key Staff, including Subcontractor SMS Key Staff, to determine where action needs to be taken. The Chief Safety Officer will review the performance of individual safety risk mitigations during scheduled Safety Committee/Council meetings, based on the reporting schedule determined. The SMS Manager enters any identified non-compliant or ineffective activities, including mitigations, back into the Safety Risk Management process for re-evaluation with oversight by the City of Fort Lauderdale and Contractors SMS Executives (Chief Safety Officer and contracted General Manager).

These processes will provide confidence to the City of Fort Lauderdale leadership that the organization and system is functioning at an acceptable level of safety.

The City of Fort Lauderdale has established safety objectives, performance targets and performance measures in coordination with its contracted service provider, BCT, FDOT and Broward MPO in compliance with all requirements set forth in FTA's Public Transportation Safety Agency Plan (PTASP) and the National Public Transportation Safety Plan (NSP). The initial focus of City of Fort Lauderdale performance measure and established safety performance targets is based on existing data delivered to the National Transit database (NTD) for:

- Fatalities – total number of reportable fatalities and rate per total vehicle revenue miles
- Injuries – total number of reportable injuries and rate per total vehicle revenue miles
- Safety Events – total number of reportable events (accidents, incidents, and occurrences) as defined in CFR Part 673.5 and rate per total vehicle revenue miles.
- System Reliability – mean distance between major mechanical failures

The City of Fort Lauderdale also establishes performance criteria and monitoring for operations and maintenance areas including Rules and Procedure Compliance, Facilities and Equipment, Vehicle Inspections and Preventive Maintenance, Safety Data Collection and Analysis, Internal Safety Audit Processes, Accident and Incident Reporting and Investigation, Internal System Safety Audit and Review, Drug and Alcohol Program and Medical Monitoring, and Employee Safety Reporting and Training. The City of Fort Lauderdale will maintain 100% compliance with all safety performance requirements through use of the following performance measure activities:

- Safety audits; informal inspections
- Regular safety review of onboard camera footage to assess drivers and specific incidents.
- Employee safety reporting program
- Investigation of safety occurrences
- Daily data gathering and monitoring of data related to service delivery.
- Regular vehicle inspections and preventive maintenance.
- Adherence to schedules set and acceptable measures.
- Appropriate corrective action plans (CAPS) for findings and reasonable timeframe for closure of CAPS in coordination with federal, state, and local oversight agencies as necessary

Results from the above processes are compared against recent performance trends annually by the Chief Safety Officer to determine where action needs to be taken. The Chief Safety Officer enters any identified non-compliant or ineffective activities, including mitigations, back into the SRM process for reevaluation by the Safety Committee.

The City of Fort Lauderdale monitors safety risk mitigations to determine if they have been implemented and are effective, appropriate, and working as intended. The Chief Safety Officer maintains a list of safety risk mitigations in the Safety Risk Register. The mechanism for monitoring safety risk mitigations varies depending on the mitigation. The Chief Safety Officer establishes one or more mechanisms for monitoring safety risk mitigations as part of the mitigation implementation process and assigns monitoring activities to the appropriate director, manager, or supervisor. These monitoring mechanisms may include tracking a specific metric on daily, weekly, or monthly logs or reports; conducting job performance observations; or other activities. The Chief Safety Officer will endeavor to make use of existing City of Fort Lauderdale processes and activities before assigning new information collection activities. The City of Fort Lauderdale's Chief Safety Officer and Safety Committee review the performance of individual safety risk mitigations during bimonthly Safety Committee meetings, based on the reporting schedule determined for each mitigation, and determine if a specific safety risk mitigation is not implemented or performing as intended. If the mitigation is not implemented or performing as intended, the Safety Committee will propose a course of action to modify the mitigation or take other action to manage the safety risk. The Chief Safety Officer will approve or modify this proposed course of action and oversee its execution. The City of Fort Lauderdale's Chief Safety Officer and Safety Committee also monitor City of Fort Lauderdale's Community Shuttle Program transit system operations on a large scale to identify mitigations that may be ineffective, inappropriate, or not implemented as intended by:

- Reviewing results from accident, incident, and occurrence investigations.
- Monitoring employee safety reporting.
- Reviewing results of internal safety audits and inspections; and
- Analyzing operational and safety data to identify emerging safety concerns.

The Chief Safety Officer works with the Safety Committee and Accountable Executive to carry out and document all monitoring activities.

The City of Fort Lauderdale maintains documented procedures for conducting safety investigations of events (accidents, incidents, and occurrences, as defined by FTA) to find causal and contributing factors and review the existing mitigations in place at the time of the event (see City of Fort Lauderdale System Safety Program Plan for specific procedures for conducting safety investigations). These procedures also reflect all traffic safety reporting and investigation requirements established by Florida's Department of Motor Vehicles. The Chief Safety Officer maintains all documentation of the City of Fort Lauderdale's investigation policies, processes, forms, checklists, activities, and results.

As detailed in the City of Fort Lauderdale procedures, an investigation report is prepared which identifies if:

- The accident was preventable or non-preventable.
- Personnel require discipline or retraining.
- The causal factor(s) indicate(s) that a safety hazard contributed to or was present during the event; and
- The accident appears to involve underlying organizational causal factors beyond just individual employee behavior
- 14-90, FAC (Vehicle Safety Inspection Report)
- ILA requirements to report all accidents that involve CSP operations.

The Chief Safety Officer and Safety Committee routinely review safety data captured in employee safety reports, safety meeting minutes, customer complaints, and other safety communication channels. When necessary, the Chief Safety Officer and Safety Committee ensure that the concerns are investigated or analyzed through the City of Fort Lauderdale Safety Risk Management process. The Chief Safety Officer and Safety Committee also review internal and external reviews, including audits and assessments, with findings concerning the City of Fort Lauderdale CSP's safety performance, compliance with operations and maintenance procedures, or the effectiveness of safety risk mitigations.

Procedures for Reporting Near Miss

The City of Fort Lauderdale's PTASP requires proactive reporting of safety hazards or safety concerns on the part of all employees to maintain a proactive position on risk. Each employee,

regardless of his or her position within the organization, is expected to cooperate in all aspects of safety reporting.

When an employee becomes aware of a hazard or near miss, they shall submit a report at the end of the shift using the following reporting forms: 1) City of Fort Lauderdale's contractor/subcontractor's Hazard Incident Report Form or 2) City of Fort Lauderdale or Subcontractor's Driver's View Form for any system deficiencies, road hazards, passenger concerns, etc. that require the attention of management for resolution.

A full investigation may not be required for all near misses. In this case, the Contracted General Manager, will determine the level of investigation appropriate to effectively address the report and will forward the final completed investigation report and other documentation to the SMS Manager who will be responsible for documenting and recording on the hazard event tracking log.

When the contributing or causal factor is not readily determined the Contracted General Manager for the respective department will review and conduct the follow-up investigations using the same procedures as outlined for other safety events.

[Transit Asset Management/State of Good Repair](#)

The City of Fort Lauderdale addresses the requirements of 49 CFR Parts 625 and 630, Transit Asset Management (TAM) and State of Good Repair (SGR), through Broward County Transit's (BCT) Transit Asset Management Plan, which includes TAM and SGR performance measures. The TAM Plan allows BCT to predict the impact of its policies and investment justification decisions on the condition of its assets throughout the asset's life cycle and enhances the ability to maintain SGR by proactively investing in an asset before the asset's condition deteriorates to an unacceptable level. The goal of these policies is to allow BCT to determine and predict the cost to improve BCT's fixed route and CSP asset condition(s) at various stages of the asset life cycle while balancing prioritization of capital, operating, and expansion needs. The two foundational criteria of SGR performance measures are Useful Life Benchmark (ULB) and Condition.

IV: Safety Promotion

Safety Promotion

- ⌚ *A transit agency must establish and implement a comprehensive safety training program for all agency employees and contractors directly responsible for safety in the agency's public transportation system. The training program must include refresher training, as necessary.*
- ⌚ *A transit agency must communicate safety and safety performance information throughout the agency's organization that, at a minimum, conveys information on hazards and safety risks relevant to employees' roles and responsibilities and informs employees of safety actions taken in response to reports submitted through an employee safety reporting program.*

This section outlines the City of Fort Lauderdale's commitment to safety and competencies training, including refresher training for all employees and contractors directly responsible for safety, and safety communication.

Competencies and Training

This section describes the comprehensive safety training program for all agency employees and Subcontractors directly responsible for safety. Broward County Transit CSP's comprehensive safety training program applies to all the City of Fort Lauderdale CSP's sub-contractor employees directly responsible for safety, including:

- Bus vehicle operators,
- Dispatchers,
- Maintenance technicians,
- Managers and supervisors,
- Agency Leadership and Executive Management,
- Chief Safety Officer, and
- Accountable Executive.

The City of Fort Lauderdale dedicates resources to conducting a comprehensive safety training program, as well as training on SMS roles and responsibilities. The scope of the safety training, including annual refresher training, is appropriate to each employee's individual safety-related job responsibilities and their role in the SMS. Basic training requirements for City of Fort Lauderdale employees, including frequencies and refresher training, are documented in City of Fort Lauderdale System Safety Program Plan (SSPP) and the Operator Manual/Handbook. Training records are kept in each employee's file.

Operations safety-related skill training includes the following:

- New-hire bus vehicle operator classroom and hands-on skill training,
- Bus vehicle operator refresher training,

- Bus vehicle operator retraining (recertification or return to work),
- Classroom and on-the-job training for dispatchers,
- Classroom and on-the-job training for operations supervisors and managers, and
- Accident investigation training for operations supervisors and managers.

Vehicle maintenance safety-related skill training includes the following:

- Ongoing vehicle maintenance technician skill training,
- Ongoing skill training for vehicle maintenance supervisors,
- Accident investigation training for vehicle maintenance supervisors,
- Ongoing hazardous material training for vehicle maintenance technicians and supervisors, and
- Training provided by vendors.

Training mechanisms include classroom, written and video communications, field exercises, and drills. There are formal training programs for operators and employees involved in maintenance activities. These include training classes, training manuals, lesson plans, and field observations.

Safety Communication

The City of Fort Lauderdale's Chief Safety Officer coordinates safety communication activities for the SMS. City of Fort Lauderdale's activities focus on the three categories of communication activity established in 49 CFR Part 673 (Part 673):

- **Communicating safety and safety performance information throughout the agency:** Broward County Transit communicates information on safety and safety performance in its quarterly newsletter and during quarterly All-Staff Meetings. The City of Fort Lauderdale's contractor also has a permanent agenda item in all monthly Drivers' Meetings dedicated to safety. Information typically conveyed during these meetings includes safety performance statistics, lessons learned from recent occurrences, upcoming events that may impact City of Fort Lauderdale's CSP service or safety performance, and updates regarding SMS implementation. The City of Fort Lauderdale's contractor also requests information from drivers during these meetings, which is recorded in meeting minutes. Finally, the City of Fort Lauderdale posts safety bulletins and flyers on the bulletin boards located in all bus operator and maintenance technician break rooms, advertising safety messages and promoting awareness of safety issues.
- **Communicating information on hazards and safety risks relevant to employees' roles and responsibilities throughout the agency:** As part of new-hire training, the City of Fort Lauderdale's contractor distributes safety policies and procedures, included in the City of Fort Lauderdale CSP's Employee/Driver Handbook/Manual, to all employees. The City of Fort Lauderdale's contractor provides training on these policies and procedures and discusses them during safety talks between supervisors and bus operators and vehicle technicians. For newly emerging issues or safety events at the agency, the City of Fort Lauderdale's Chief Safety Officer issues bulletins or messages to contractor General Manager that are reinforced by supervisors in one-on-one or group discussions with employees.

- **Informing employees of safety actions taken in response to reports submitted through the Employee Safety Reporting Program (ESRP):** The City of Fort Lauderdale provides targeted communications to inform employees of safety actions taken in response to reports submitted through the ESRP, including handouts and flyers, safety talks, updates to bulletin boards, and one-on-one discussions between employees and supervisors.

State of Florida Requirements

This section includes policies and procedures adopted to meet State of Florida Equipment and Operational Safety Standards for Bus Transit Systems found in Rule Chapter 14-90 of the Florida Administrative Code (F.A.C.). In accordance with Rule 14-90, F.A.C., the City of Fort Lauderdale has adopted safety and security procedures and policies including but not limited to:

- System Safety Program Plan (SSPP)
- System Security Plan (SSP)
- Wireless Communications Policy (WCP)
- Preventative Maintenance Plan
- Operator Training, Testing, and Supervision
- Operator Hours Tracking
