SECTION 1: INDUSTRY UPDATES

City Of Fort Lauderdale Police & Firefighters' Retirement System

## KEY NUANCES AND MECHANICS OF PENSION PLAN TERMINATION

The recent market environment has made defined benefit (DB) plan termination a hot topic of conversation. Plan termination is an involved process, likely taking 18-24 months. To be prepared and delivered in a timely manner, it requires a resolution, plan amendments, participant notices, government filings, and annuity bids. Here, we explain key mechanisms of plan termination.

## HIGHLIGHTS FROM OUR LATEST CAPITAL MARKET ASSUMPTIONS

CAPTRUST periodically updates its capital market assumptions (CMAs) to align with the evolving investment landscape. This involves a mix of quantitative and qualitative analyses of economic conditions, policies, and other variables. Here's an overview of our updated expectations compared to 2022.

### Economy

We've reduced our inflation forecast to 2.3%, anticipating a further decline to 2%. Real GDP growth expectations are now at 1.9% due to interest rate headwinds.

### Equity

We remain optimistic about long-term domestic equities and expect them to outperform international shares.

### Fixed Income

Expectations for fixed income returns have increased overall, with a normalizing yield curve favoring shorter-duration issues over long-term ones.

### Alternatives

Our alternatives assumptions have largely remained stable. This year, we've raised our hedged equity performance expectations, reflecting a higher risk-free-rate environment.

	2022	Return 2023	Change	2022	Risk 2023	Change
<b>U.S. Economy</b>						
Economic Growth (Real GDP)	2.10%	1.90%	-0.20%	2.70%	2.70%	-
Inflation (CPI)	2.60%	2.30%	-0.30%	1.25%	1.25%	-

CMAs are not intended to represent exact market predictions. Instead, they are best estimates for potential annualized growth over a 7- to 10-year period, likely covering a full market cycle. Coupled with other factors and your organization's needs, your CAPTRUST advisor can help craft a suitable investment plan.

## CAPITAL MARKET ASSUMPTIONS: CHANGE IMPLICATIONS

Changes in capital market assumptions (CMAs) tend to be incremental. Thus, institutional investors benefit from the ability to maintain a long-term perspective. An increase in fixed income return expectations coupled with an increase in asset class correlations leads to a slight increase in expected returns for most portfolios. However, investors should consider the many roles that bonds play in their portfolio beyond their contribution to total return.

CMAs provide an input for asset allocation decisions, but modest annual changes should not upend long-term investment policies. For many pension plan sponsors, despite lower return expectations, bonds' primary role is hedging pension liabilities. Your CAPTRUST financial advisor can help contextualize your investment strategy, goals, and objectives within the current market outlook.

		Portfolio A	Portfolio B	Portfolio C
Allocation Weightings	LDI Fixed Income	70%	50%	30%
	U.S. Large-Cap Equity	20%	40%	60%
	Hedged Strategies	10%	10%	10%
Return Forecast	2022	5.50%	6.06%	6.50%
	2023	5.60%	6.12%	6.57%
	Change	<b>0.10%</b>	<b>0.06%</b>	<b>0.07%</b>

Plan sponsors should consider whether the updated CMAs suggest reevaluating the expected return on assets used for accounting and actuarial purposes.

ADDITIONAL ROLES	
Liability Hedging	Diversification
<ul style="list-style-type: none"> <li>• LDI strategies hedge funded status volatility created by interest rate movement.</li> <li>• If interest rates fall, bonds appreciate as liabilities increase, helping to preserve funding status.</li> <li>• If rates rise, funding generally improves; most plans maintain less interest rate exposure than their liabilities.</li> </ul>	<ul style="list-style-type: none"> <li>• Historical fixed income returns demonstrate a low correlation to equity returns.</li> <li>• Both our previous and new capital market assumptions expect this low correlation to persist.</li> <li>• By diversifying with bonds, investors can reduce overall portfolio volatility.</li> </ul>

## HIGHLIGHTS FROM OUR LATEST CAPITAL MARKET ASSUMPTIONS

## CAPITAL MARKET ASSUMPTIONS: CHANGE IMPLICATIONS

Changes in capital market assumptions (CMAs) tend to be incremental. Thus, institutional investors benefit from the ability to maintain a long-term perspective. An increase in fixed income return expectations coupled with an increase in asset class correlations leads to a slight increase in expected returns for most portfolios. However, investors should consider the many roles that bonds play in their portfolio beyond their contribution to total return.

CMAs provide an input for strategic asset allocation decisions, but modest annual changes should not upend long-term investment policies. Investors should balance slightly lower expected fixed income returns against the roles the asset class can serve in a portfolio. Your CAPTRUST financial advisor can help you contextualize your investment strategy, goals, and objectives within the current market outlook.

		Portfolio A	Portfolio B	Portfolio C
Allocation Weightings	U.S. Core Fixed Income	70%	50%	30%
	U.S. Large-Cap Equity	20%	40%	60%
	Hedged Strategies	10%	10%	10%
Return Forecast	2022	4.67%	5.47%	6.16%
	2023	5.38%	5.98%	6.56%
	Change	<b>0.71%</b>	<b>0.51%</b>	<b>0.40%</b>

Plan sponsors should consider whether the updated CMAs suggest reevaluating the expected return on assets used for accounting and actuarial purposes.

ADDITIONAL ROLES	
Liability Hedging	Diversification
<ul style="list-style-type: none"> <li>Bond performance is generally less volatile than asset classes like equities.</li> <li>While interest rates may impact fixed income prices, unless a default occurs, principal repayment occurs at maturity.</li> <li>Bond payments are legal obligations of the issuer, while companies can suspend dividends.</li> </ul>	<ul style="list-style-type: none"> <li>Historical fixed income returns demonstrate a low correlation to equity returns.</li> <li>By diversifying with bonds, investors can reduce overall portfolio volatility.</li> <li>Bonds tend to exhibit a lower standard deviation (a measure of risk) than equities.</li> </ul>

## THE CORE COMPONENTS OF PORTFOLIO CONSTRUCTION

Preparing investment recommendations for client portfolios is an iterative process. It begins with understanding each client's unique needs. CAPTRUST's approach emphasizes customization. However, there are three central themes we explore when preparing potential solutions.

PORTFOLIO CONSTRUCTION STEPS		
Step	What Is Involved?	Example Considerations
1 <b>Determine the mission, needs, and goals of the organization.</b>	The first step in portfolio construction is understanding which needs and restrictions may be in place for an asset pool. An organization may have multiple asset pools that serve distinct purposes.	<ul style="list-style-type: none"> <li>• Which portfolio spending behaviors or growth objectives are in place?</li> <li>• Are there any liquidity or debt covenant constraints?</li> <li>• Will the portfolio be subject to donor restrictions or ESG/SRI requirements?</li> </ul>
2 <b>Outline which asset allocation options may be appropriate.</b>	There are different methods of evaluating which risk posture and asset classes may be best equipped to meet portfolio objectives. The goal is to view strategic asset allocation (SAA) targets in the context of a full market cycle.	<ul style="list-style-type: none"> <li>• Would taking on additional risks be worth the potential return, and how may those risks take shape?</li> <li>• Should diversifying assets be considered, and if so, which types may be most appropriate?</li> </ul>
3 <b>Determine how asset class mandates will be implemented.</b>	Once SAA targets are established, it's time to determine which manager(s) may best represent each asset mandate. Like asset classes, relative performance of managers will fluctuate. We seek to balance managers with high-conviction strategies against lower-cost passive options where appropriate.	<ul style="list-style-type: none"> <li>• When should active and passive management be considered?</li> <li>• Which vehicle types may allow the best fit for the portfolio?</li> <li>• Is it better to have a broader or more granular manager asset mandate?</li> </ul>

Putting an investment portfolio into action is only the beginning. It's important to periodically assess whether the needs of an asset pool have changed or if any further opportunities for refinement of the portfolio are available. Your CAPTRUST financial advisor can review these factors with you to determine if any adjustments are needed to better achieve your goals.

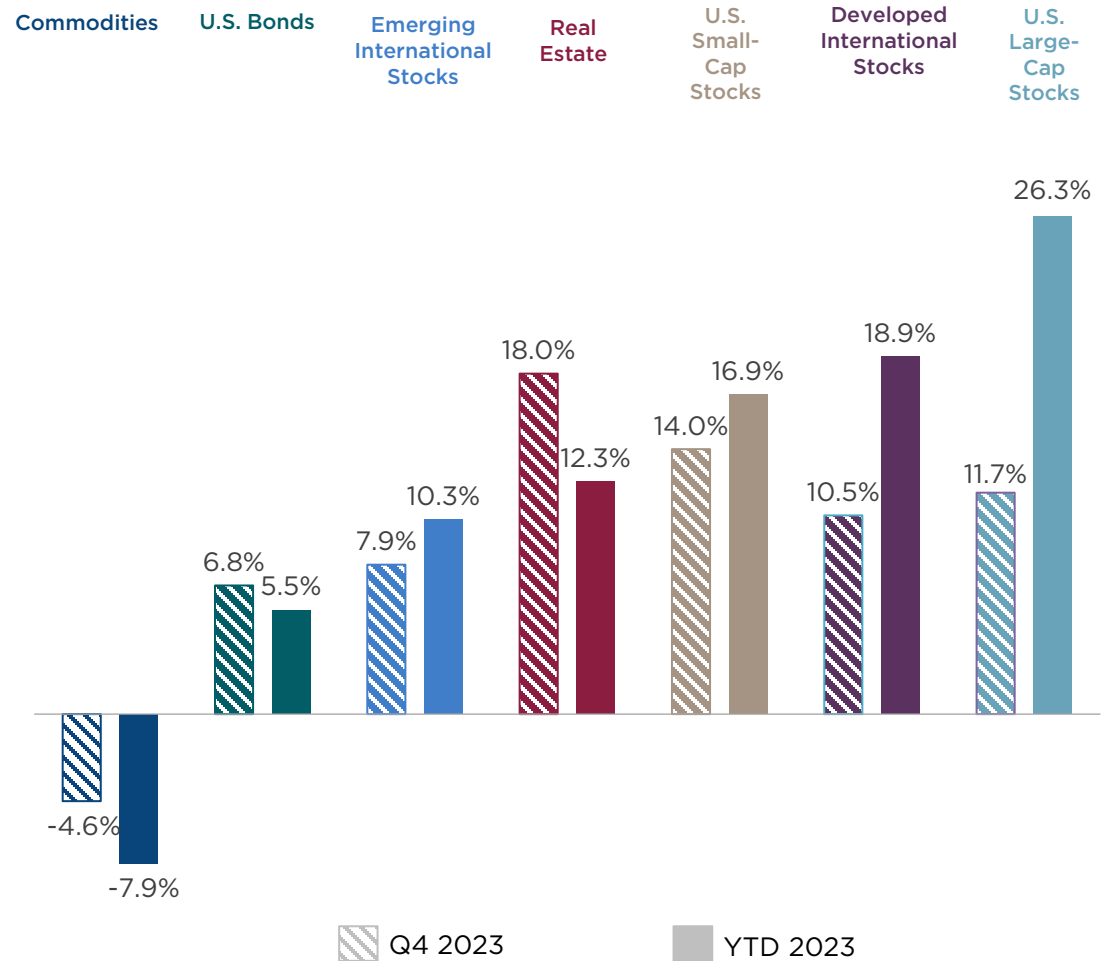

## RESETTING EXPECTATIONS

The higher-for-longer interest rate message reiterated by the Federal Reserve through the first three quarters of 2023 was essentially dismissed by investors late last year as inflation data showed continued easing. Consequently, expectations for future interest rate changes were reset significantly lower. Nearly all asset classes soared.

- Along the capitalization spectrum, the decline in rate expectations was most impactful to small-cap stocks. The small-cap value segment of the market benefited most, driven by sizable exposure to regional banks.
- Broader large-cap equities also surged, and multiple sectors within the index ended the quarter with double-digit gains. The interest-rate-sensitive real estate sector led the pack. Only the energy sector failed to gain ground, erasing its year-to-date achievements.
- Bond investors also captured the value of falling rate expectations, with fixed income markets recouping their modest year-to-date losses.
- Outside the U.S., international stock market gains were more minimal, but a weakening U.S. dollar filled the gap.
- Declining oil prices weighed heavily on commodity markets.

Asset class returns are represented by the following indexes: Bloomberg U.S. Aggregate Bond Index (U.S. bonds), S&P 500 Index (U.S. large-cap stocks), Russell 2000® (U.S. small-cap stocks), MSCI EAFE Index (international developed market stocks), MSCI Emerging Market Index (emerging market stocks), Dow Jones U.S. Real Estate Index (real estate), and Bloomberg Commodity Index (commodities).

## DIGGING DEEPER: STOCKS AND BONDS

### Equities

	Q4 2023	YTD 2023	Last 12 Months
U.S. Stocks	11.7%	26.3%	26.3%
• Q4 Best Sector: Real Estate	18.8%	12.4%	12.4%
• Q4 Worst Sector: Energy	-6.9%	-1.3%	-1.3%
International Stocks	10.5%	18.9%	18.9%
Emerging Markets Stocks	7.9%	10.3%	10.3%

### Fixed Income

	12.31.23	9.30.23	12.31.22
1-Year U.S. Treasury Yield	4.79%	5.46%	4.73%
10-Year U.S. Treasury Yield	3.88%	4.59%	3.88%
	QTD 2023	YTD 2023	Last 12 Months
10-Year U.S. Treasury Total Return	6.87%	3.21%	3.21%

### Equities - Relative Performance by Market Capitalization and Style

	Q4 2023			YTD 2023			Last 12 Months				
	Value	Blend	Growth	Value	Blend	Growth	Value	Blend	Growth		
Large	9.5%	11.7%	14.2%	Large	11.5%	26.3%	42.7%	Large	11.5%	26.3%	42.7%
Mid	12.1%	12.8%	14.5%	Mid	12.7%	17.2%	25.9%	Mid	12.7%	17.2%	25.9%
Small	15.3%	14.0%	12.7%	Small	14.6%	16.9%	18.7%	Small	14.6%	16.9%	18.7%

Sources: Morningstar, U.S. Treasury, Federal Reserve Bank of St. Louis. Asset class returns are represented by the following indexes: S&P 500 Index (U.S. stocks), MSCI EAFE Index (international developed market stocks), and MSCI Emerging Markets Index (emerging market stocks). Relative performance by market capitalization and style is based upon the Russell US Style Indexes except for large-cap blend, which is based upon the S&P 500 Index.

## DIGGING DEEPER: U.S. EQUITY MARKETS

The S&P 500 Index is a market-capitalization-weighted index of U.S. large-cap stocks across a diverse set of industry sectors. The stocks represented in these 11 sectors generated a range of returns for the last 12 months and the most recent quarter.

Returns by S&P 500 Sector

Sources: Morningstar, S&P Global. All calculations are cumulative total return, not annualized, including dividends for the stated period. Past performance is not indicative of future returns.

## DIGGING DEEPER: FIXED INCOME MARKET

Interest Rates	3 Months	2 Years	5 Years	10 Years	30 Years	Mortgage Rate
September 2023	5.55%	5.03%	4.60%	4.59%	4.73%	7.31%
December 2023	5.40%	4.23%	3.84%	3.88%	4.03%	6.61%
Change	-0.15%	-0.80%	-0.76%	-0.71%	-0.70%	-0.70%

U.S. Treasury yields moved lower this quarter with the expectation of a less-aggressive Fed in 2024. Mortgage rates moderated slightly, but remain high, contributing to a slowing housing market.

Core Fixed Income Index	Yield to Worst	Duration	Total Return Q4 2023	Spread	Treasury Rate	AA Spread	BBB Spread
September 2023	5.38%	6.06	6.82%	0.55%	4.83%	0.48%	1.44%
December 2023	4.51%	6.10		0.44%	4.06%	0.42%	1.19%
Change	-0.87%	0.04		-0.10%	-0.77%	-0.06%	-0.25%

Performance for core bonds was positive for the quarter as yields moved lower. Credit spreads narrowed slightly.

Long Credit Index	Yield to Worst	Duration	Total Return Q4 2023	Spread	Treasury Rate	AA Spread	BBB Spread
September 2023	6.16%	12.49	13.71%	1.36%	4.80%	0.84%	1.74%
December 2023	5.28%	12.70		1.19%	4.09%	0.75%	1.52%
Change	-0.88%	0.21		-0.17%	-0.71%	-0.09%	-0.22%

Performance for longer-maturity bonds was boosted by lower yields and nearly unchanged credit spreads.

Sources: Morningstar, FactSet, U.S. Treasury, Federal Reserve Bank of St. Louis, CAPTRUST Research

## ECONOMIC OUTLOOK

The resolution of pandemic effects and successful monetary policy has led inflation downward toward the Federal Reserve’s long-term 2% target. It’s likely the Fed will start lowering rates in 2024, supporting an already robust labor market. Still, the lagging effects of rate hikes will be felt as consumers grapple with debt and housing affordability. These challenges could be offset by artificial intelligence-led productivity gains.

### HEADWINDS

#### Consumer Challenges Ahead

- Credit card balances are high, and excess savings have been mostly depleted. Despite higher borrowing costs, consumers continue to spend and are now facing high interest payments on loans.

#### Housing Market Upended

- In 2023, higher interest rates created an inventory shortage and pushed home prices higher. Although mortgage rates have declined, it will take time for housing affordability to return to historical norms.

#### Election Uncertainty

- While markets generally perform well in election years, market leadership can be fluid, especially when candidates have fundamentally different policy agendas.

#### Investor Optimism Creates Risk

- The prospect of lower interest rates has inspired high optimism, which may drive volatility if reality falls short of expectations.

### TAILWINDS

#### Economic Soft Landing

- As inflation wanes to pre-pandemic levels without having spurred a recession, a soft landing seems likely. Fed rate cuts and a lower inflationary environment could drive economic growth.

#### Inflation-Adjusted Wage Growth

- Real wage growth remained positive in 2023, leaving consumers better positioned to tackle rising debt.

#### Productivity-Fueled Growth

- The potential for operational efficiency and revenue enhancement has driven heavy investment in artificial intelligence across industries. Widespread implementation over the next decade has the potential to boost productivity growth above long-term averages, thereby increasing gross domestic product (GDP).

#### Uptick in Government Funding

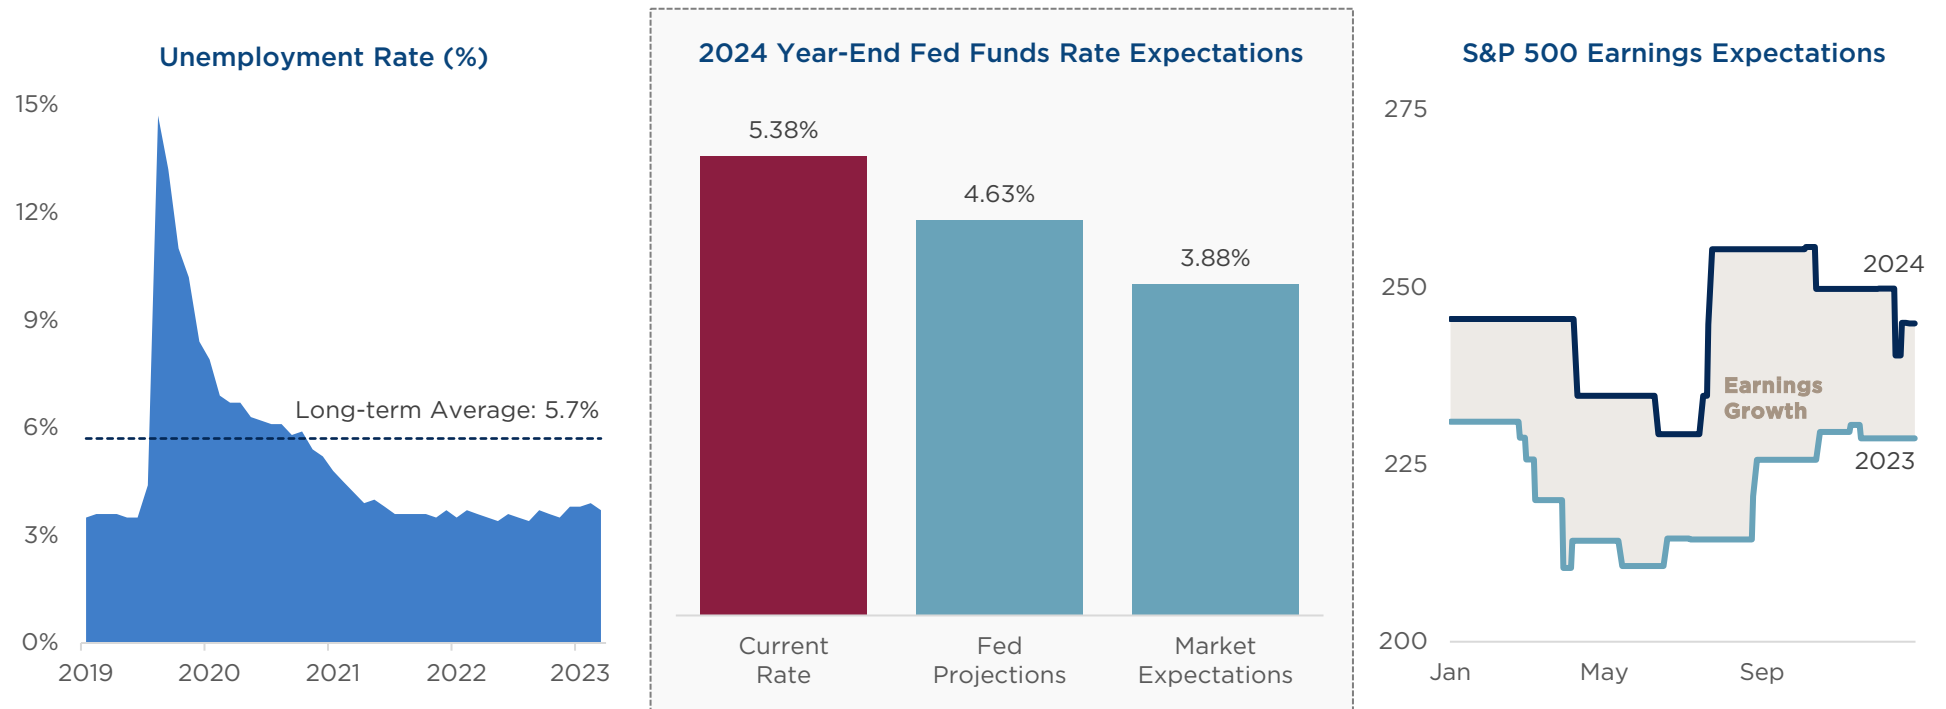

- Funds from programs targeting infrastructure and clean energy will be deployed in 2024, adding liquidity to the economy.

While many of the risks faced in 2023 have been resolved positively, it is still prudent for investors to move forward with caution. Investor optimism is near all-time highs and may create disappointment, which is another reason to remain vigilant, diversified, and prepared for volatility.

## IS A SOFT LANDING ON THE HORIZON?

As 2023 progressed, economic stability overtook recessionary fears. With inflation now receding, the Federal Reserve's *higher-for-longer* monetary policy stance has eased. Investors now expect an economic soft landing and interest rate cuts in 2024, although the pace remains uncertain. Market expectations and Fed projections are currently misaligned.

### INVESTOR EXPECTATIONS

Generally, the Fed's actions are reactionary, with policies responding to economic outcomes. However, proactive interest rate cuts may be the only way to reconcile market expectations with current economic strength and earnings growth estimates. Despite increased odds of a soft landing, the number and degree of rate cuts could fall short of investor expectations, thereby increasing market volatility.

Sources: U.S. Bureau of Economic Analysis, FactSet, CAPTRUST Research. Data as of 12.29.2023

## INVESTOR SENTIMENT BUOYS MARKETS

Market movements are driven primarily by investor expectations. For instance, after a challenging 2022, investors were largely pessimistic, expecting a recession to weigh on stocks in 2023. As the outlook improved, so did investor expectations. Sentiment and equity prices climbed in tandem. Now, the question becomes: Are the markets priced to perfection, or will they falter by expecting perfection?

### INVESTOR OPTIMISM

Bullish sentiment, as measured weekly by the American Association of Individual Investor (AAII) survey, is the expectation that stocks will rise in the next six months. Sentiment rose steadily in the fourth quarter of 2023, reaching a near-all-time high of 52%. This optimism is fueled by investor expectations for a soft landing and proactive Fed interest rate cuts in 2024. However, with this much conviction in a single outcome, it is possible that any shortfall—in either the pace or magnitude of rate cuts or the glidepath to a soft landing—could create an outsized market response.

Sources: American Association of Individual Investors, FactSet, CAPTRUST Research. Data as of 12.30.2023

## 2024 KNOWN UNKNOWNNS

Questions about the U.S. consumer will be the primary focus of 2024, given the rise in credit card debt, the decline in excess personal savings, and the resumption of student loan payments. However, additional known unknowns could have an outsized impact on the economic landscape. Commercial real estate borrowers face a wall of maturities that will likely need refinancing, and national elections are scheduled in 2024 for countries representing 60% of global GDP.

**Refinancing Conditions**  
Tightening Lending Standards

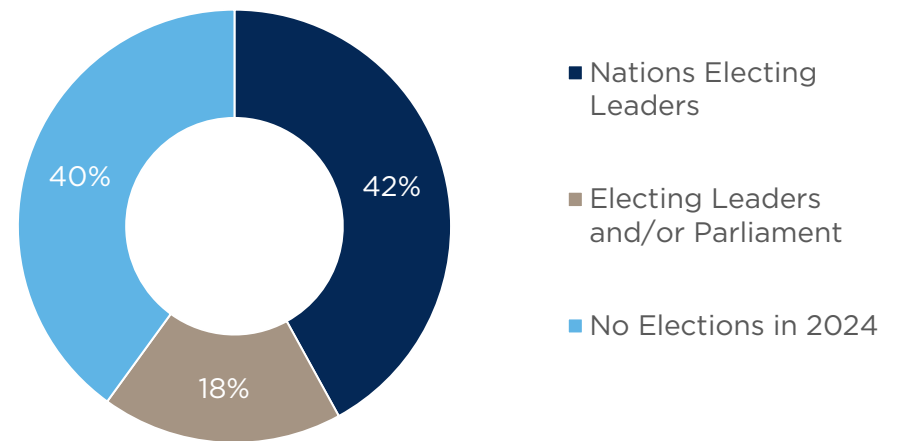

Approximately 65% of respondents to the Fed’s “Senior Loan Officer Survey” projected tightening lending standards on multifamily and other commercial real estate loans in 2024.

Nearly \$700 billion in U.S. commercial real estate debt matures in 2024, with banks holding the largest outstanding share.

U.S. regulators note that commercial real estate is the leading risk to financial stability.

**Election Uncertainty**  
Percent (%) of Global GDP

While the U.S. presidential election will undoubtedly garner the most attention, pundits predict more voters will participate in national elections in 2024 than any year in history. This uptick has the potential to reshape the global economic and geopolitical landscapes.

Geopolitical hot spots Taiwan, Russia, Ukraine, and Pakistan are all scheduled to elect new leaders in 2024. A national election in Mexico could impact near-shoring and immigration policies.

Sources: Federal Reserve Board, “Senior Loan Officer Opinion Survey on Lending – October 2023;” CRED iQ, Bloomberg, Allianz, CAPTRUST Research

## THE POWER OF PRODUCTIVITY

Productivity is a silent driver of economic prosperity. In simple terms, productivity can be defined as the same number of individuals producing more goods or services. Few variables are more impactful to improving a country’s standard of living. Hence, the prospect of a productivity increase from using generative artificial intelligence (AI) has prompted major investment across industries. While the impact of these advancements won’t be fully realized for a decade or more, their sheer potential has driven markets higher.

### PRODUCTIVITY IN ACTION

Generative AI has the potential to turn every company into a technology company by automating labor tasks, expediting training processes, anticipating problems, and supporting solutions.

#### CUSTOMER SUPPORT

- One study found customer support agents handled 13.8% more inquiries per hour with AI support resources.
- The quality of outcomes modestly improved, and the learning curve for new agents was accelerated.

#### BUSINESS PROFESSIONALS

- Another study found professionals across industries wrote business documents 59% faster using AI support resources.
- Independent evaluators found AI-supported documents provided higher quality content.

#### COMPUTER PROGRAMMING

- A third study found experienced computer programmers were 126% more productive, completing projects in less than half the time using AI support resources.
- Project quality was unchanged.

## LEGEND

●	IN GOOD STANDING	▼	MARKED FOR REVIEW	●	CONSIDER FOR TERMINATION
---	------------------	---	-------------------	---	--------------------------

The CAPTRUST Investment Policy Monitor (“Scorecard”) is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields for actively managed investment options. Quantitative scoring areas include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; Style Attribution; and Confidence. Qualitative Scoring Areas measure the quality of the Management Team while also considering the stewardship of the investment option’s parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have an Investment Management assessment of ‘25’ as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Some Investments that have less than 3 years of performance history may not be scored.

This material is for institutional investor use only and is not intended to be shared with individual investors.

This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, excess return, and risk-adjusted performance.
Lazard Global Listed Infrastructure Inst	●	This fund currently meets the guidelines set forth by CAPTRUST for distinct investments in the Investment Policy Statement. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, excess return, and risk-adjusted performance.

**PASSIVE INVESTMENTS**

INVESTMENT	Overall	Commentary
Rhumblin S&P 400 Pooled Index Fund		
Rhumblin S&P 500 Pooled Index Fund		
Rhumblin S&P 600 Pooled Index Fund	●	This fund currently meets the guidelines set forth by CAPTRUST for passively managed investments. This assessment is based on both quantitative and qualitative data. Examples of quantitative and qualitative items considered include, but are not limited to, quality of management, tracking error, and cost.

The CAPTRUST Investment Policy Monitor ("Scorecard") is an illustration of our monitoring system and is designed to assist our clients in their efforts to provide fiduciary oversight to investment assets. It is not intended as a solicitation to buy any security. The scoring system measures quantitative areas as well as qualitative (or subjective) fields. Quantitative scoring areas for target date funds include Risk Adjusted Performance (3 & 5 yr.); Performance vs. Relevant Peer Group; and Glidepath. Qualitative Scoring Areas for target date funds measure the quality of the Management Team while also considering the stewardship of the investment option's parent company under Investment Family Items. Qualitative areas of analysis are subjective in nature. Qualitative Scoring for Target Date funds also includes a score for Portfolio Construction and Underlying Investment vehicles to express CAPTRUST's views on the manager or strategy. CAPTRUST typically requires at least 3 months of monitoring before including an investment in this report. Investments that have been added to our system less than 3 months prior to a report being generated may have an Investment Management assessment of '25' as a default, but will be updated, if necessary, after the first quarter of monitoring to more accurately reflect our system. Some Investments that have less than 3 years of performance history may not be scored. Capital Preservation options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics, depending on the type of capital preservation option being evaluated, and may include quantitative criteria such as: Crediting Rate/Yield, Market to Book Ratio, Average Crediting Quality, Insurer Quality/Diversification, Duration, and Sector Allocations, and/or qualitative criteria such as quality and experience of the Management Team and stewardship of the investment option's parent company. Passively Managed options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics and may include quantitative criteria such as: Tracking Error, Fees, and Performance versus relevant peer group, and/or qualitative criteria such as index replication strategy, securities lending practices, and fair value pricing methodology. Distinct investment options are evaluated using a comprehensive scoring methodology proprietary to the Investment Consultant. This methodology incorporates both qualitative and quantitative metrics. This material is for institutional investor use only and is not intended to be shared with individual investors.

FUND MANAGEMENT ITEMS	COMMENTARY
Carillon Eagle Small Cap Growth	<p>The Carillon Eagle Small Cap Growth strategy had net outflows of approximately 11% of the portfolio's assets in Q2 2023.</p> <p>The strategy uses a valuation-conscious approach when looking for companies with accelerating earnings growth, strong management teams, reasonable debt levels, and price-to-earnings ratios below the company's growth rates. This has led to uneven results, as the strategy performed well from 2014-2017 but has been up and down since. From 2018 to 2021, they underperformed three out of four years before rebounding in 2022 and then struggling once again last year. We believe that the team is not executing well relative to its peers and our expectations. In order for us to become comfortable with the strategy, we will need to see more consistent results. As such, we believe that the strategy merits further consideration.</p>
Lazard International Strategic Equity	<p>John Reinsberg has been appointed chair of the Strategic Growth Group. As a result, he has relinquished his role as portfolio manager for the Lazard International Equity, International Strategic Equity, and Global Strategic Equity strategies. His portfolio management responsibilities have been assumed by the remaining team members on each respective strategy.</p> <p>The strategy invests primarily in developed market companies that the team believes are undervalued based on their earnings, cash flow, or asset values. Up to 15% can be allocated to companies located in emerging markets. The strategy is benchmark agnostic and will actively invest across the full market capitalization spectrum and may have more exposure to midsize and smaller capitalization securities. The strategy is executed by a broad team of four portfolio managers, most of whom have been on the team for well over ten years, leading to a consistently applied process. The strategy had experienced successful results over prior periods including the years from 2010 through 2014 and 2017 through 2020. The last three years have been more challenging for the strategy as the higher valuation securities that the portfolio has been invested in more recently have seen their multiples contract and the portfolio has underperformed the core benchmark in each of the past three calendar years. We have been patient with the strategy given its stable team and consistently applied process and the fund's results did improve in the fourth quarter. However, the prolonged period of weakness over the past three years has reached a concerning duration and we believe the strategy merits further consideration.</p>

City Of Fort Lauderdale Police & Firefighters' Retirement System

FUND MANAGEMENT ITEMS	COMMENTARY
<p>American Strategic Value Realty Fund</p>	<p>Austin Maddux, co-portfolio manager, left ARA to pursue a new entrepreneurial opportunity. Martha Shelley has been appointed as the co-portfolio manager of the Core Fund. Martha has been with ARA for more than eight years and recently served as the deputy portfolio manager of the American Strategic Value Realty Fund. She is a member of the firm's Investment Committee, as well as the ESG+R and Valuation committees. Martha will work alongside Scott Darling, the fund's current co-portfolio manager, to execute the strategy and management activity of the fund.</p>
<p>FUND FIRM ITEMS</p>	<p>COMMENTARY</p>
<p>Janus Capital Management LLC</p>	<p>Adam Hetts has been promoted to global head of multi-assets for Janus Henderson. Adam was previously global head of Portfolio Construction and Strategy. In his new role, he will continue to lead the Portfolio Construction and Strategy teams. George Maris, head of Americas Equities, has departed Janus Henderson to pursue other opportunities. He is succeeded by Marc Pinto, who previously spent 26 years with the firm, but departed 2 years ago for another opportunity. Additionally, Lucas Klein is joining Janus in September as head of EMEA and APAC Equities, taking over for Alex Crooke, who has decided to refocus his attention solely on his investment responsibilities. Mr. Klein brings over 25 years of industry experience, most recently at Fidelity International, where he was global head of Equity Research.</p>
<p>Lazard Asset Management LLC</p>	<p>Leon Chen was appointed Head of Global Risk Management and Yury Dubrovsky, a managing director, retired from the firm. Leon Joined the firm in 2021. Peter Orszag, CEO of Lazard's Financial Advisory business, has been appointed CEO of Lazard. Mr. Orszag succeeds Kenneth Jacobs, who now serves as executive chairman of the Board. Evan Russo will continue to serve as the CEO of Lazard Asset Management.</p>

City Of Fort Lauderdale Police & Firefighters' Retirement System

FUND FIRM ITEMS	COMMENTARY
<p><a href="#">Prudential Global Investment Management</a></p>	<p>PGIM Real Estate appointed Cathy Marcus and Raimondo Amabile as co-chief executive officers. Cathy will retain her responsibilities as global chief operating officer while Raimondo retains his responsibilities as global chief investment officer. However, Sultana Reigle has assumed Cathy's previous role as head of U.S. Equity. Additionally, Sebastian Ferrante has been promoted to head of Europe, Enrique Lavin has been promoted to head of Latin America, and Christina Hill has been appointed to the newly created role as global head of Asset Management and Sustainability. Michael Lillard, head of PGIM Fixed Income, will retire in April 2024. Effective January 1, 2024, John Vibert will become president and CEO, and Mr. Lillard will transition to an advisory role until his retirement in April. PGIM Fixed Income is a subsidiary of Prudential.</p>
<p><a href="#">Rhumbline Advisors Corp</a></p>	<p>Sally Gigliotti joined RhumbLine as chief financial officer, succeeding Kim McCant, who has retired.</p>

**ALPHA**

Alpha measures a manager's rate of return in excess of that which can be explained by its systematic risk, or Beta. It is a result of regressing a manager's returns against those of a benchmark index. A positive alpha implies that a manager has added value relative to its benchmark on a risk-adjusted basis.

**BETA**

Beta measures a manager's sensitivity to systematic, or market risk. Beta is a result of the analysis regressing a manager's returns against those of a benchmark Index. A manager with a Beta of 1 should move perfectly with a benchmark. A Beta of less than 1 implies that a manager's returns are less volatile than the market's (i.e., selected benchmarks). A Beta of greater than 1 implies that a manager exhibits greater volatility than the market (i.e., selected benchmark).

**BEST (WORST) QUARTER**

Best (Worst) Quarter is the best (worst) three-month return in the measurement period. The three-month period is not necessarily a calendar quarter.

**CONSISTENCY (BATTING AVERAGE)**

Formerly known as Batting Average, Consistency measures the percentage of time an active manager outperforms the benchmark.

**CAPTURE RATIO**

Up Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was positive. Down Market Capture is the average return of a manager relative to a benchmark index using only periods where the benchmark return was negative. An Up Market Capture of greater than 100% and a Down Market Capture of less than 100% is considered desirable.

**INFORMATION RATIO**

The Information Ratio measures a manager's excess return over the passive index divided by the volatility of that excess return or Tracking Error. To obtain a higher Information Ratio, which is preferable, a manager must demonstrate the ability to generate returns above its benchmark while avoiding large performance swings relative to that same benchmark.

**MAXIMUM DRAWDOWN**

The Maximum Drawdown measures the maximum observed percentage loss from a peak to a trough in the measurement period.

**MAX DRAWDOWN RECOVERY PERIOD**

The Maximum Drawdown Recovery period counts the number of months needed to meet or exceed the prior peak starting from the beginning of the Maximum Drawdown period. If the prior peak has not been met or exceeded, this statistic will not populate.

**PERCENTILE RANK**

Percentile Rankings are based on a manager's performance relative to all other available funds in its universe. Percentiles range from 1, being the best, to 100 being the worst. A ranking in the 50th percentile or above demonstrates that the manager has performed better on a relative basis than at least 50% of its peers.

**POSITIVE (NEGATIVE) MONTHS RATIO**

Positive (Negative) Months Ratio is the ratio of months in the measurement period where the returns are positive (negative).

**RISK-ADJUSTED PERFORMANCE**

Risk-adjusted Performance, or RAP, measures the level of return that an investment option would generate given a level of risk equivalent to the benchmark index.

**R-SQUARED**

R-squared measures the portion of a manager's movements that are explained by movements in a benchmark index. R-squared values range from 0 to 100. An R-squared of 100 means that all movements of a manager are completely explained by movements in the index. This measurement is identified as the coefficient of determination from a regression equation. A high R-squared value supports the validity of the Alpha and Beta measures, and it can be used as a measure of style consistency.

---

**SHARPE RATIO**

Sharpe ratio measures a manager's return per unit of risk, or standard deviation. It is the ratio of a manager's excess return above the risk-free rate divided by a manager's standard deviation. A higher Sharpe ratio.

---

**STANDARD DEVIATION**

Standard Deviation is a measure of the extent to which observations in a series vary from the arithmetic mean of the series. This measure of volatility or risk allows the estimation of a range of values for a manager's returns. The wider the range, the more uncertainty, and, therefore, the riskier a manager is assumed to be.

---

**TRACKING ERROR**

Tracking Error is the standard deviation of the portfolio's residual (i.e. excess) returns. The lower the tracking error, the closer the portfolio returns have been to its risk index. Aggressively managed portfolios would be expected to have higher tracking errors than portfolios with a more conservative investment style..

---

**TREYNOR RATIO**

The Treynor Ratio is a measure of reward per unit of risk. With Treynor, the numerator (i.e. reward) is defined as the excess return of the portfolio versus the risk-free rate. The denominator (i.e. risk) is defined as the portfolio beta. The result is a measure of excess return per unit of portfolio systematic risk. As with Sharpe and Sortino ratios, the Treynor Ratio only has value when it is used as the basis of comparison between portfolios. The higher the Treynor Ratio, the better.

QUANTITATIVE EVALUATION ITEMS      QUALITATIVE EVALUATION ITEMS

The following categories of the Investment Policy Monitor appear “Marked For Review” when:

**CAPTRUST’s Investment Policy Monitoring Methodology**

The Investment Policy Monitoring Methodology document describes the systems and procedures CAPTRUST uses to monitor and evaluate the investment vehicles in your plan/account on a quarterly basis.

Our current Investment Policy Monitoring Methodology document can be accessed through the following link:

[captrust.com/investmentmonitoring](https://captrust.com/investmentmonitoring)

**3/5 Year Risk- adjusted Performance**

The investment option’s 3 or 5 Year Annualized Risk Adjusted Performance falls below the 50th percentile of the peer group.

**3/5 Year Performance vs. Peers**

The investment option’s 3 or 5 Year Annualized Peer Relative Performance falls below the 50th percentile of the peer group.

**3/5 Year Style**

The investment option’s 3 or 5 Year R-Squared measure falls below the absolute threshold set per asset class.

**3/5 Year Confidence**

The investment option’s 3 or 5 Year Confidence Rating falls below the 50<sup>th</sup> percentile of the peer group.

**Fund Management**

A significant disruption to the investment option’s management team has been discovered.

**Fund Family**

A significant disruption to the investment option’s parent company has been discovered.
