Current Market Themes

- COVID-19 caseloads reach record highs as the Omicron variant emerges as the dominant strain

- The U.S. economy is characterized by:
 - Rapidly increasing inflation
 - Improved labor market conditions
 - Depressed consumer confidence

- The Federal Reserve is reducing monetary policy accommodation
 - Accelerated pace of asset purchase tapering
 - Fed expects three rate hikes in 2022
 - Changing composition of FOMC leadership

- The U.S. Treasury yield curve experiences “bear-flattening”
 - Short-term yields shift higher amid rate hike expectations
 - Longer-term yields adjust to evolving inflation and economic growth uncertainties

U.S. GDP Rebounds from Pandemic

Real U.S. GDP

Factors Driving Growth...

- Better-than-expected corporate profit margins fueling equity markets
- Unprecedented accommodative monetary policy and fiscal stimulus
- Access to COVID-19 vaccines and reduction of pandemic-era lockdowns
- Continued adaptation of all sectors of the economy to the challenging health situation

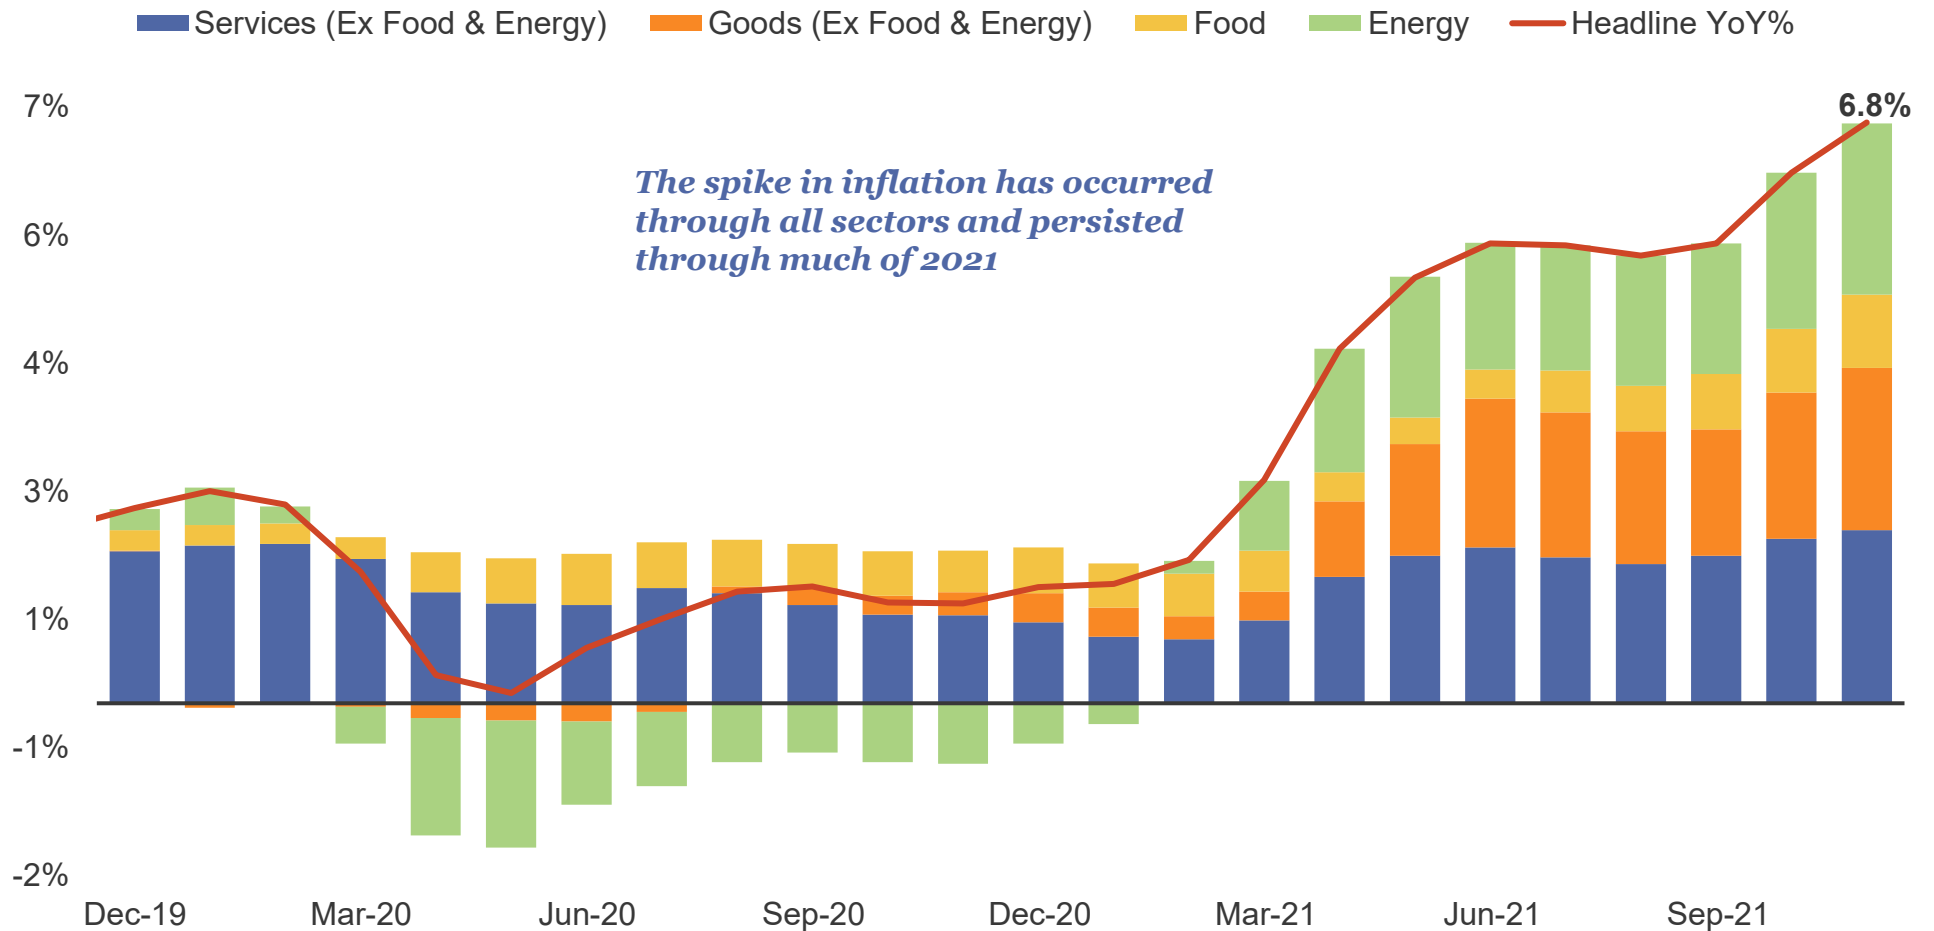

Growth is Expected to Moderate...

- Persistent damage to supply chains continues to disrupt the production and distribution network
- Age-related impacts to labor force growth predating the pandemic
- Return to more normal household income and saving trends
- Normalizing fiscal and monetary policies

Fixed-Income Sector Commentary – 4Q 2021

- **U.S. Treasury** securities generated negative performance as yields rose across maturities. The higher absolute level of yields support duration extensions and roll-down where the curve is steep.
- **Federal agency** spreads widened modestly, generating slightly negative excess returns. Spreads remain tight by historical standards and opportunities to add will be limited.
- **Supranational** securities performed in line with their federal agency counterparts – supply from seasonal issuance should provide opportunities to add sector exposure.
- **Corporates** underperformed after consistently being one of the top performing sectors in prior quarters. Modestly wider spreads are likely to provide opportunities to increase exposure on an issuer-specific basis.
- **Asset-Backed Securities** issuance remains robust and wider spreads enhance the sector's relative value as collateral performance remains strong.
- **Mortgage-Backed Securities** performance was generally negative across collateral and coupon types with 15-yr MBS pools being the exception. FOMC asset purchase tapering and potential balance sheet reduction will continue to weigh negatively on the sector.
- **Taxable Municipal** securities were one of the best performing sectors in Q4. Limited supply is likely to keep downward pressure on spreads and limit opportunities to increase allocations.
- **Commercial Paper and CD** rates gravitated higher throughout the quarter as market expectations for rate hikes sent short maturities higher, creating opportunities to add.

Important Disclosures

- Market values that include accrued interest are derived from closing bid prices as of the last business day of the month as supplied by Refinitiv, Bloomberg, or Telerate. Where prices are not available from generally recognized sources, the securities are priced using a yield-based matrix system to arrive at an estimated market value.
- In accordance with generally accepted accounting principles, information is presented on a trade date basis; forward settling purchases are included in the monthly balances, and forward settling sales are excluded.
- Performance is presented in accordance with the CFA Institute's Global Investment Performance Standards (GIPS). Unless otherwise noted, performance is shown gross of fees. Quarterly returns are presented on an unannualized basis. Returns for periods greater than one year are presented on an annualized basis. Past performance is not indicative of future returns.
- Bank of America/Merrill Lynch Indices provided by Bloomberg Financial Markets.
- Money market fund/cash balances are included in performance and duration computations.
- Standard & Poor's is the source of the credit ratings. Distribution of credit rating is exclusive of money market fund/LGIP holdings.
- Callable securities in the portfolio are included in the maturity distribution analysis to their stated maturity date, although, they may be called prior to maturity.
- MBS maturities are represented by expected average life.

Glossary

- **Accrued Interest:** Interest that is due on a bond or other fixed income security since the last interest payment was made.
- **Agencies:** Federal agency securities and/or Government-sponsored enterprises.
- **Amortized Cost:** The original cost of the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discount or premium with respect to short-term securities (those with less than one year to maturity at time of issuance) is amortized on a straight line basis. Such discount or premium with respect to longer-term securities is amortized using the constant yield basis.
- **Asset-Backed Security:** A financial instrument collateralized by an underlying pool of assets – usually ones that generate a cash flow from debt, such as loans, leases, credit card balances, and receivables.
- **Bankers' Acceptance:** A draft or bill of exchange accepted by a bank or trust company. The accepting institution guarantees payment of the bill as well as the insurer.
- **Commercial Paper:** An unsecured obligation issued by a corporation or bank to finance its short-term credit needs, such as accounts receivable and inventory.
- **Contribution to Total Return:** The weight of each individual security multiplied by its return, then summed for each sector to determine how much each sector added or subtracted from the overall portfolio performance.
- **Effective Duration:** A measure of the sensitivity of a security's price to a change in interest rates, stated in years.
- **Effective Yield:** The total yield an investor receives in relation to the nominal yield or coupon of a bond. Effective yield takes into account the power of compounding on investment returns, while nominal yield does not.
- **FDIC:** Federal Deposit Insurance Corporation. A federal agency that insures bank deposits to a specified amount.
- **Interest Rate:** Interest per year divided by principal amount and expressed as a percentage.
- **Market Value:** The value that would be received or paid for an investment in an orderly transaction between market participants at the measurement date.
- **Maturity:** The date upon which the principal or stated value of an investment becomes due and payable.
- **Negotiable Certificates of Deposit:** A CD with a very large denomination, usually \$1 million or more, that can be traded in secondary markets.
- **Par Value:** The nominal dollar face amount of a security.
- **Pass-through Security:** A security representing pooled debt obligations that passes income from debtors to its shareholders. The most common type is the mortgage-backed security.

Glossary

- Repurchase Agreements: A holder of securities sells these securities to an investor with an agreement to repurchase them at a fixed price on a fixed date.
- Settle Date: The date on which the transaction is settled and monies/securities are exchanged. If the settle date of the transaction (i.e., coupon payments and maturity proceeds) occurs on a non-business day, the funds are exchanged on the next business day.
- Supranational: A multinational union or association in which member countries cede authority and sovereignty on at least some internal matters to the group, whose decisions are binding on its members.
- Trade Date: The date on which the transaction occurred; however, the final consummation of the security transaction and payment has not yet taken place.
- Unsettled Trade: A trade which has been executed; however, the final consummation of the security transaction and payment has not yet taken place.
- U.S. Treasury: The department of the U.S. government that issues Treasury securities.
- Yield: The rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
- YTM at Cost: The yield to maturity at cost is the expected rate of return based on the original cost, the annual interest receipts, maturity value, and the time period from purchase date to maturity, stated as a percentage on an annualized basis.
- YTM at Market: The yield to maturity at market is the rate of return based on the current market value, the annual interest receipts, maturity value, and the time period remaining until maturity, stated as a percentage on an annualized basis.
