BACKGROUND

Created in 1992, the purpose of the Special Entertainment Overlay District (SED) included:

Encourage development areas within a Regional Activity Center (RAC).

Promote cultural, economic, educational, and general welfare of residents and tourists.

Assist in eliminating deteriorating conditions in underutilized or blighted areas.

Enhance the visibility and public awareness of publicly-funded projects.

Incentives within the ordinance are intended to promote redevelopment, and to encourage varied development and uses, while encouraging pedestrians and decreasing vehicular traffic. These incentives include:

Extended hours of operation for the sale and consumption of alcohol .

No distance separation requirements for alcohol sales.

Allow the sale of alcohol outdoors.

Allow open containers of alcoholic beverages within the boundary of the district.

Increased decibel levels and extended hours for noise.

BACKGROUND

In order to create a SED, a request is made to the City Manager outlining how the SED meets the minimum district criteria along with supporting documentation. Within the minimum district criteria it states the district must have the following:

- Common Ownership; or Common Control.
- Common Control is an individual or corporation that controls the underlying real property through a lease or exclusive license vesting control in that entity for a period of not less than ten (10) years.

There are currently a total of five SEDs:

Downtown SEDs

111 Properties (located near SW 2nd Street and SW 2nd Avenue)

McCrory Buildings (located near South Andrews Avenue and West Las Olas Boulevard)

Historic Brickell (located near SW 1st Avenue and West Las Olas Boulevard)

Central Beach SEDs

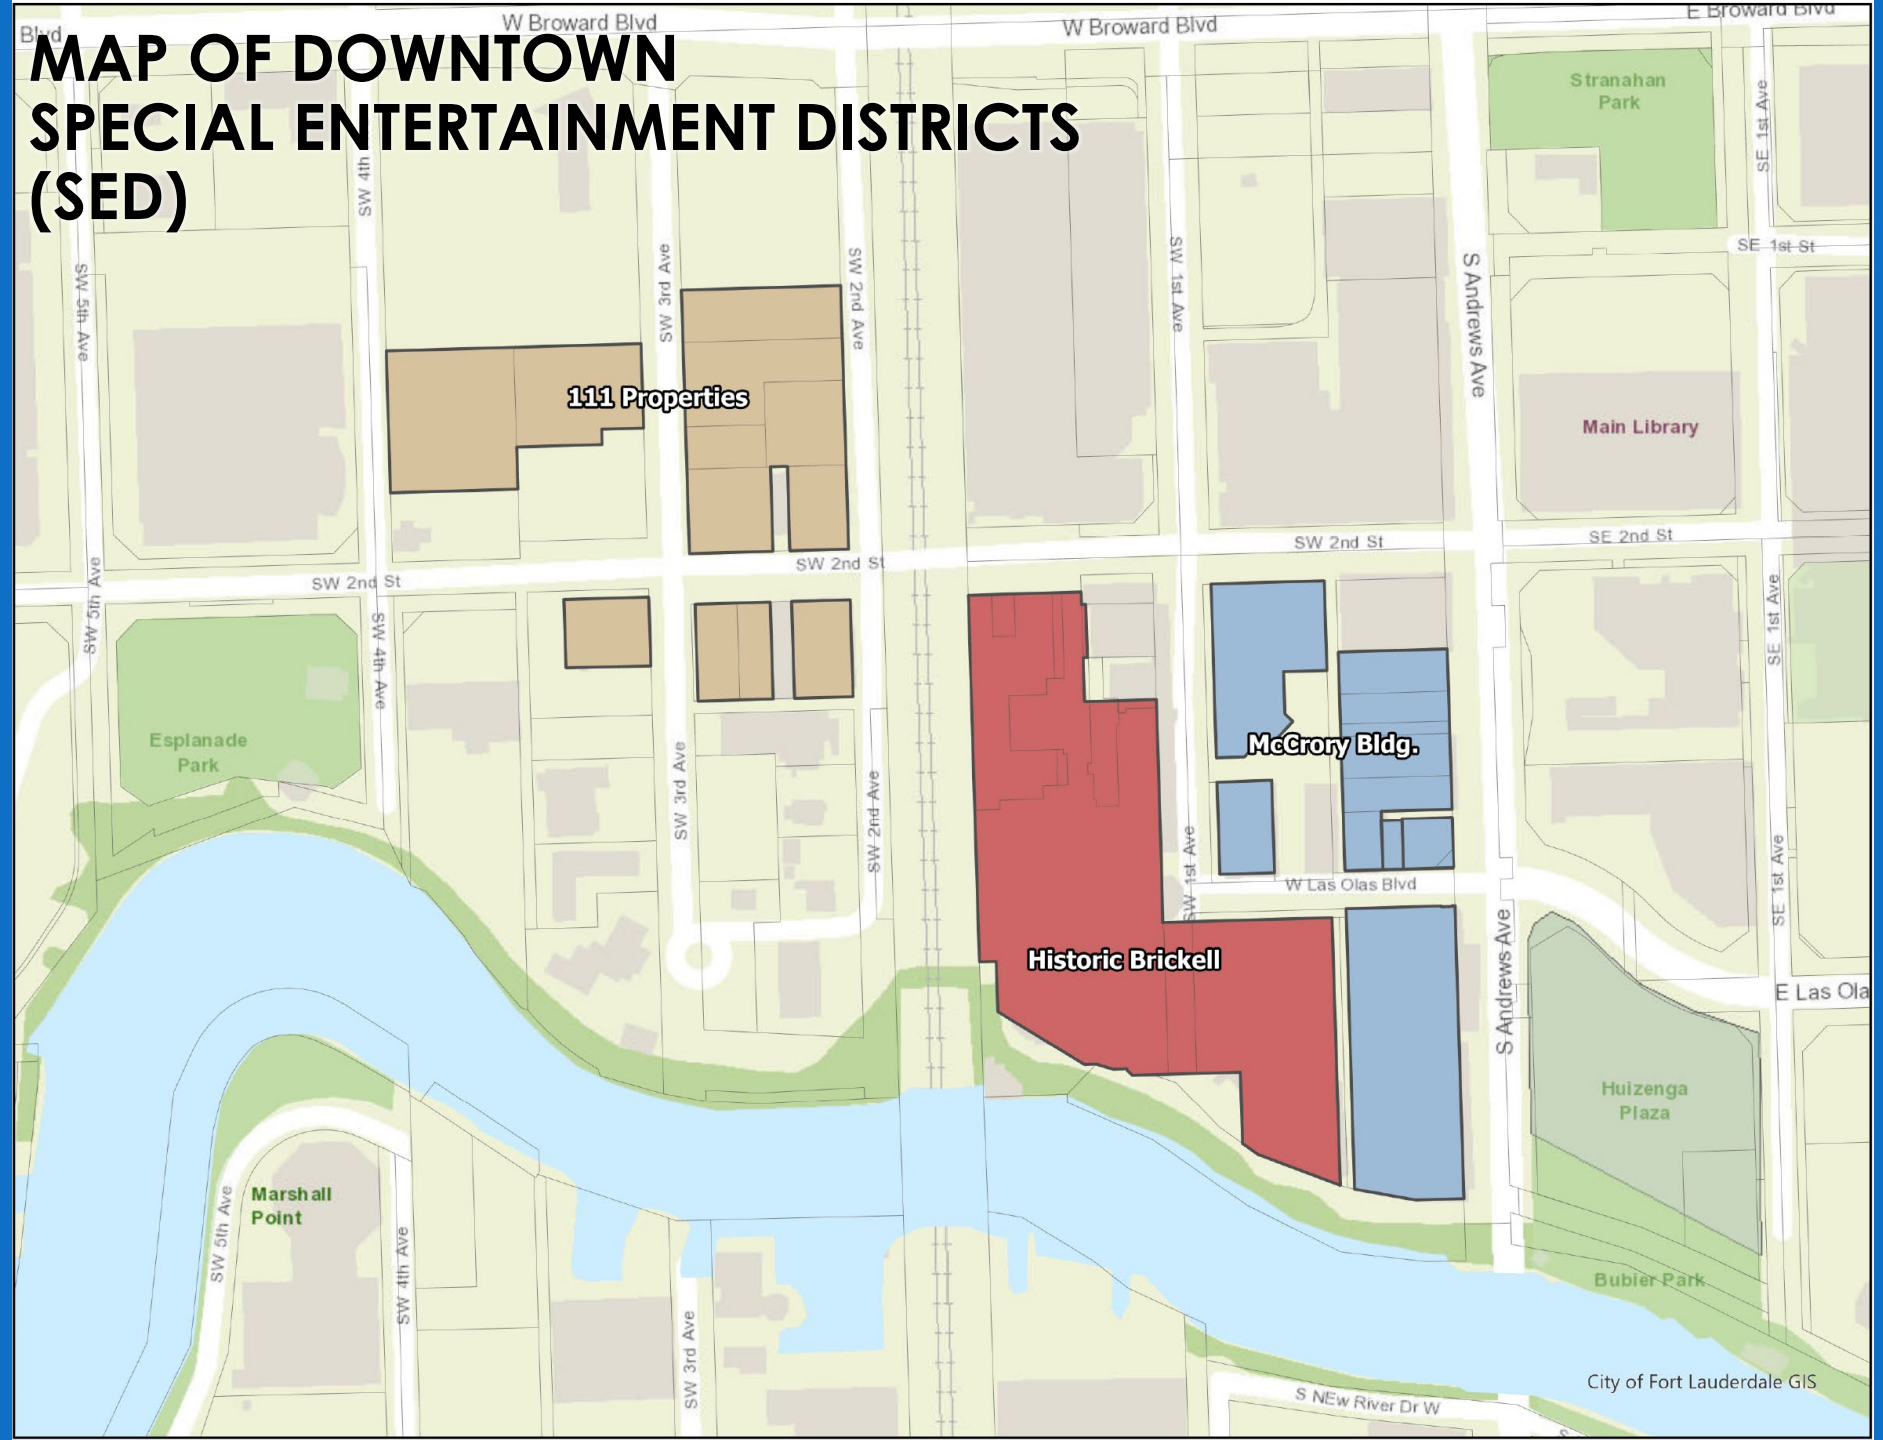

Beach Place (located on A1A and Cortez Street)

Toomey (located on A1A between East Las Olas Boulevard and Poinsetta Street)

SERVICE CALLS DATA FOR HIMMARSHÉE AREA

POLICE DATA

- Calls for service data trendline yielded a minor decrease over a 40-month timeline (January 2022 – March 2025).
- The most notable decrease is during the month of March (spring break), which decreased by almost 17% in comparing March 2022 data to the data collected in March 2025.

FIRE DATA

- The Himmarshee area consistently reports higher call volumes between midnight and 4:00a.m., largely due to increased activity in the entertainment district. Since 2021, there has been a significant rise in medical-related incidents during these late-night hours, surpassing call volumes seen during typical business hours.
- From 2021 to 2024, substance related call volume has increased by 56% and is projected to continue rising over the next two (2) years. A noticeable spike in calls during March corresponds with the annual influx of college students for Spring Break.
