

REZONING CRITERIA (PROPOSED ZONING: CF-H)
ULDR SECTION 47-24.4.D.
New Mount Olive Missionary Baptist Church, Inc. (“Applicant”)

The Applicant is seeking to develop a new sanctuary and family life center for the New Mount Olive Baptist Church in Fort Lauderdale (“Property”). The development will consist of a new 1951 seat sanctuary, 300 seat chapel, and the conversion of the existing sanctuary into a new family life center. The existing sanctuary is located at 400 NW 9th Avenue, Fort Lauderdale, FL 33311 and is approximately 40,000 square feet. The proposed development will also include the construction required surface parking lots on the Property.

In accordance with the application submitted, the Applicant proposes to rezone a portion of the Property from RMM-25 to the City’s Community Facility-House of Worship (“CF-H”) zoning district to provide required parking for the proposed expanded church facilities on the Property. As outlined herein, the rezoning application satisfies all of the requirements of Unified Land Development Regulation (“ULDR”) Section 47-24.4.D.

1. **THE ZONING DISTRICT PROPOSED IS CONSISTENT WITH THE CITY’S COMPREHENSIVE PLAN.**

The proposed CF-H zoning district is in compliance with the City’s Comprehensive Plan. The City’s Comprehensive Plan – Land Use Map designates the Property as Northwest Regional Activity Center (“NW-RAC”). The permitted uses and development regulations in the NW-RAC were adopted to encourage a thriving center of commercial, residential and cultural activities. If approved, this rezoning request will result in the applicable Property being developed as a parking lot to support the proposed development of the expanded church on the Property, which will enhance the surrounding community. The proposed development is in line with the CF-H rezoning in that the proposed development of the church facilities, with the required parking, will protect the character of existing residential neighborhoods adjacent to the Property while supporting the viability of the Property.

2. **SUBSTANTIAL CHANGES IN THE CHARACTER OF DEVELOPMENT IN OR NEAR THE AREA UNDER CONSIDERATION SUPPORTS THE PROPOSED REZONING.**

The Applicant proposes to redevelop the Property in order to develop a new sanctuary and family life center on the Property, along with the development of an open “garden” area and surface parking lots. Currently, the subject lot is a vacant parcel. The rezoning contemplated herein will permit the cohesive development of the Property in a manner that will allow for the creation of a project that will enhance the aesthetic and useful enjoyment of the surrounding neighborhood. By developing required parking on the Property subject to the proposed CF-H zoning category, the Applicant will be able to

accommodate the expanded church facilities on the Property and further improve the area.

3. **THE CHARACTER OF THE AREA PROPOSED IS SUITABLE FOR THE USES PERMITTED IN THE PROPOSED ZONING DISTRICT AND IS COMPATIBLE WITH SURROUNDING DISTRICTS AND USES.**

The proposed CF-H zoning district is compatible with surrounding zoning districts and uses. Additionally, the surrounding zoning districts support the rezoning contemplated herein in that this rezoning will permit the development of required parking to support the Applicant's proposed development plan of expanding the church facilities, which is in complete harmony with the surrounding zoning districts. The church is currently located on the Property, and the proposed development of the expanded church with the development of the required parking will enhance the church's existing facilities and services offered for the surrounding community.

SECTION 47-25.2 ADEQUACY REQUIREMENTS (PROPOSED ZONING: CFH)

New Mount Olive Missionary Baptist Church, Inc. (“Applicant”)

In accordance with the Applicant’s application to the City of Fort Lauderdale’s (“City”) to rezone a portion of the property located at 400 NW 9th Avenue, Fort Lauderdale, FL 33311 from RMM-25 to CF-H, the following is being submitted in accordance with Section 47-37.5(4) of the City’s Code.

A. **Applicability.** The adequacy requirements set forth herein shall be used by the city to evaluate the demand created on public services and facilities created by a proposed development permit.

a. **Applicant’s Response:** No response needed.

B. **Communications network.** Buildings and structures shall not interfere with the city’s communication network. Developments shall be modified to accommodate the needs of the city’s communication network, to eliminate any interference a development would create or otherwise accommodate the needs of the city’s communication network within the development proposal.

a. **Applicant’s Response:** Applicant’s communication networks will not interfere with the City’s communication networks.

C. **Drainage facilities.** Adequacy of stormwater management facilities shall be evaluated based upon the adopted level of service requiring the retention of the first inch of runoff from the entire site or two and one-half (2½) inches of runoff from the impervious surface whichever is greater.

a. **Applicant’s Response:** Application shall be made to Broward County DERD and the Applicant shall satisfy all current criteria for surface water requirements and obtain all local and state licenses as applicable.

D. **Environmentally sensitive lands.**

1. In addition to a finding of adequacy, a development shall be reviewed pursuant to applicable federal, state, regional and local environmental regulations. Specifically, an application for development shall be reviewed in accordance with the following Broward County Ordinances which address environmentally sensitive lands and wellfield protection which ordinances are incorporated herein by reference:

- a. Broward County Ordinance No. 89-6.
 - b. Section 5-198(I), Chapter 5, Article IX of the Broward County Code of Ordinances.
 - c. Broward County Ordinance No. 84-60.
2. The applicant must demonstrate that impacts of the proposed development to environmentally sensitive lands will be mitigated.

a. **Applicant's Response:** Not applicable.

E. ***Fire protection.*** Fire protection service shall be adequate to protect people and property in the proposed development. Adequate water supply, fire hydrants, fire apparatus and facilities shall be provided in accordance with the Florida Building Code, South Florida Fire Code and other accepted applicable fire and safety standards.

a. **Applicant's Response:** Fire protection services shall be provided to protect people and property on the development.

F. ***Parks and open space.***

1. The manner and amount of providing park and open space is as provided in Section 47-38A, Park Impact Fees, of the ULDR.
2. No building permit shall be issued until the park impact fee required by Section 47-38A of the ULDR has been paid in full by the applicant.

a. **Applicant's Response:** The Property is not a residential project, however, there will be open space provided.

G. ***Police protection.*** Police protection service shall be adequate to protect people and property in the proposed development. The development shall provide improvements which are consistent with Crime Prevention Through Environmental Design (CPTED) to minimize the risk to public safety and assure adequate police protection.

a. **Applicant's Response:** Applicant will coordinate with appropriate personnel to ensure that CPTED principals are utilized effectively.

H. ***Potable water.***

1. Adequate potable water service shall be provided for the needs of the proposed development. The proposed development shall be designed to provide adequate areas and easements which may be needed for the installation and maintenance of potable water systems in accordance with city

engineering standards, the Florida Building Code, and applicable health and environmental regulations. The existing water treatment facilities and systems shall have sufficient capacity to provide for the needs of the proposed development and for other developments in the service area which are occupied, available for occupancy, for which building permits are in effect or for which potable water treatment capacity has been reserved. Capital expansion charges for water and sewer facilities shall be paid by the developer in accordance with Resolution 85-265, as it is amended from time to time. Improvements to the potable water service and system shall be made in accordance with city engineering standards and other accepted applicable engineering standards.

2. *Potable water facilities.*

- a. If the system is tied into the city treatment facility, the available capacity shall be determined by subtracting committed capacity and present flow from design capacity. If there is available capacity, the city shall determine the impact of the proposed development utilizing Table 3, Water and Wastewater, on file with the department.
- b. If there is adequate capacity available in the city treatment plant to serve the proposed development, the city shall reserve the necessary capacity to serve the development.
- c. Where the county is the projected service provider, a similar written assurance will be required.

a. **Applicant's Response:** Existing potable water facilities are available for connection to service the Property. No significant demand beyond a typical connection is anticipated for the project. A letter from the City's Public Works Department shall be obtained verifying that sufficient potable water and sanitary sewer facilities exist for the proposed water and sanitary sewer demand.

I. ***Sanitary sewer.***

1. If the system is tied into the city treatment facility, the available capacity shall be determined by subtracting committed capacity and present flow from the design capacity. If there is available capacity, the city shall determine the impact of the proposed development utilizing Table 3, Water and Wastewater, on file with the department.
2. If there is adequate capacity available in the city treatment plant to serve the proposed development, the city shall reserve the necessary capacity to serve the proposed development.
3. Where the county is the projected service provider, a written assurance will be required.

4. Where septic tanks will be utilized, the applicant shall secure and submit to the city a certificate from the Broward County Health Unit that certifies that the site is or can be made suitable for an on-site sewage disposal system for the proposed use.

a. **Applicant's Response:** Existing sanitary sewer facilities are available for connection to service the Property. No significant demand beyond a typical connection is anticipated for the project. A letter from the City's Public Works Department shall be obtained verifying that sufficient potable water and sanitary sewer facilities exist for the proposed water and sanitary sewer demand.

J. ***Schools.*** For all development including residential units, the applicant shall be required to mitigate the impact of such development on public school facilities in accordance with the Broward County Land Development Code or section 47-38C. Educational Mitigation, as applicable and shall provide documentation to the city that such education mitigation requirement has been satisfied.

a. **Applicant's Response:** Not applicable

K. ***Solid waste.***

1. Adequate solid waste collection facilities and service shall be obtained by the applicant in connection with the proposed development and evidence shall be provided to the city demonstrating that all solid waste will be disposed of in a manner that complies with all governmental requirements.

2. *Solid waste facilities.* Where the city provides solid waste collection service and adequate service can be provided, an adequacy finding shall be issued. Where there is another service provider, a written assurance will be required. The impacts of the proposed development will be determined based on Table 4, Solid Waste, on file with the department.

a. **Applicant's Response:** Applicant will have on-site dumpsters which will be serviced by private solid waste haulers.

L. ***Stormwater.*** Adequate stormwater facilities and systems shall be provided so that the removal of stormwater will not adversely affect adjacent streets and properties or the public stormwater facilities and systems in accordance with the Florida Building Code, city engineering standards and other accepted applicable engineering standards.

a. **Applicant's Response:** Application shall be made to Broward County DERD and Applicant shall satisfy all current criteria for surface water requirements and obtain all local and state licenses as applicable.

M. *Transportation facilities.*

1. The capacity for transportation facilities shall be evaluated based on Table 1, Generalized Daily Level of Service Maximum Volumes, on file with the department. If a development is within a compact deferral area, the available traffic capacity shall be determined in accordance with Table 2, Flowchart, on file with the department.

2. *Regional transportation network.* The regional transportation network shall have the adequate capacity, and safe and efficient traffic circulation to serve the proposed development. Adequate capacity and safe and efficient traffic circulation shall be determined by using existing and site-specific traffic studies, the adopted traffic elements of the city and the county comprehensive plans, and accepted applicable traffic engineering standards. Site-specific traffic studies may be required to be made and paid for by the applicant when the city determines such a study is needed in order to evaluate the impacts of the proposed development on proposed or existing roadways as provided for in subsection M.4. An applicant may submit such a study to the city which will be considered by the DRC in its review. Roadway improvements needed to upgrade the regional transportation network shall be made in accordance with the city, the county, and Florida Department of Transportation traffic engineering standards and plans as applicable.

3. *Local streets.* Local streets shall have adequate capacity, safe and efficient traffic circulation, and appropriate functional classification to serve the proposed development. Adequate capacity and safe and efficient traffic circulation shall be determined by using existing and site-specific traffic studies, the city's comprehensive plan and accepted applicable traffic engineering standards. Site-specific traffic studies may be required to be made and paid for by the applicant when the city determines such a study is required in order to evaluate the impact of the proposed development on proposed or existing roadways as provided for in subsection M.4. An applicant may submit to the city such a study to be considered as part of the DRC review. Street improvements needed to upgrade the capacity or comply with the functional classification of local streets shall be made in accordance with the city engineering standards and acceptable applicable traffic engineering standards. Local streets are those streets that are not classified as federal, state or county roadways on the functional classification map adopted by the State of Florida.

4. *Traffic impact studies.*

- a. When the proposed development may generate over one thousand (1,000) daily trips; or
- b. When the daily trip generation is less than one thousand (1,000) trips; and (1) when more than twenty percent (20%) of the total daily trips are anticipated to arrive or depart, or both, within one-half ($\frac{1}{2}$) hour; or (2) when the proposed use creates varying trip generation each day, but has the potential to place more than twenty percent (20%) of its maximum twenty-four (24) hour trip generation onto the adjacent transportation system within a one-half ($\frac{1}{2}$) hour period; the applicant shall submit to the city a traffic impact analysis prepared by the county or a registered Florida engineer experienced in trafficways impact analysis which shall:
 - i. Provide an estimate of the number of average and peak hour trips per day generated and directions or routes of travel for all trips with an external end.
 - ii. Estimate how traffic from the proposed development will change traffic volumes, levels of service, and circulation on the existing and programmed trafficways.
 - iii. If traffic generated by the proposed development requires any modification of existing or programmed components of the regional or local trafficways, define what city, county or state agencies have programmed the necessary construction and how this programming relates to the proposed development.
 - iv. A further detailed analysis and any other information that the review committee considers relevant.
 - v. The traffic impact study may be reviewed by an independent licensed professional engineer contracted by the city to determine whether it adequately addresses the impact and the study supports its conclusions. The cost of review by city's consultant shall be reimbursed to the city by the applicant.
 - vi. When this subsection M.4.b. applies, the traffic study shall include an analysis of how the peak loading will affect the transportation system including, if necessary, an operational plan showing how the peak trips will be controlled and managed.

5. *Dedication of rights-of-way.* Property shall be conveyed to the public by plat, deed or grant of easement as needed in accordance with the Broward County Trafficways Plan, the city's comprehensive plan, subdivision regulations and accepted applicable traffic engineering standards.

6. *Pedestrian facilities.* Sidewalks, pedestrian crossing and other pedestrian facilities shall be provided to encourage safe and adequate pedestrian movement on-site and along roadways to adjacent properties. Transit service facilities shall be provided for as required by the city and Broward County Transit. Pedestrian facilities shall be designed and installed in accordance with city engineering standards and accepted applicable engineering standards.

7. *Primary arterial street frontage.* Where a proposed development abuts a primary arterial street either existing or proposed in the trafficways plan, the development review committee (DRC) may require marginal access street, reverse frontage with screen planting contained in a nonaccess reservation along the rear property line, deep lots with or without rear service alleys, or such other treatment as may be necessary for adequate protection of residential properties and to assure separation of through and level traffic.

8. *Other roadway improvements.* Roadways adjustments, traffic control devices, mechanisms, and access restrictions may be required to control traffic flow or divert traffic, as needed to reduce or eliminate development generated traffic.

9. *Street trees.* In order to provide for adequate landscaping along streets within the city, street trees shall be required along the length of the property abutting a street. A minimum of fifty percent (50%) of the required street trees shall be shade trees, and the remaining street trees may be provided as flowering or palm trees. These percentages may be varied based on existing or proposed physical conditions which may prevent the ability to comply with the street tree requirements of this subsection. The street trees shall be planted at a minimum height and size in accordance with the requirements of Section 47-21, Landscape and Tree Preservation Requirements, except in the downtown RAC districts the requirements of Sec. 47-13.20.H.8 shall apply. The location and number of street trees shall be determined by the department based on the height, bulk, mass and design of the structures on the site and the proposed development's compatibility to surrounding properties. The requirements for street trees, as provided herein, may be located within the public right-of-way as approved by the entity with jurisdiction over the abutting right-of-way.

- a. **Applicant's Response:** Applicant understands the need to address traffic impacts in connection with its development and will do so as agreed upon by relevant agencies.

N. ***Wastewater.***

1. *Wastewater.* Adequate wastewater services shall be provided for the needs of the proposed development. The proposed development shall be designed

to provide adequate areas and easements which may be needed for the installation and maintenance of a wastewater and disposal system in accordance with applicable health, environmental and engineering regulations and standards. The existing wastewater treatment facilities and systems shall have adequate capacity to provide for the needs of the proposed development and for other developments in the service area which are occupied, available for occupancy, for which building permits are in effect or for which wastewater treatment or disposal capacity has been reserved. Capital expansion charges for water and sewer facilities shall be paid by the developer in accordance with Resolution 85-265, as it is amended for time to time. Improvements to the wastewater facilities and system shall be made in accordance with the city engineering and accepted applicable engineering standards.

a. **Applicant's Response:** City will provide wastewater treatment for the Property.

O. ***Trash management requirements.*** A trash management plan shall be required in connection with non-residential uses that provide prepackaged food or beverages for off-site consumption. Existing non-residential uses of this type shall adopt a trash management plan within six (6) months of the effective date of this provision.

a. **Applicant's Response:** Not applicable.

P. ***Historic and archaeological resources.***

1. If a structure or site has been identified as having archaeological or historical significance by any entity within the State of Florida authorized by law to do same, the applicant shall be responsible for requesting this information from the state, county, local governmental or other entity with jurisdiction over historic or archaeological matters and submitting this information to the city at the time of, and together with, a development permit application. The reviewing entity shall include this information in its comments.

a. **Applicant's Response:** The site subject to the proposed development is not historically significant. The original church which is not part of the proposed development is historically significant and has been designed as such.

Q. ***Hurricane evacuation.*** If a structure or site is located east of the Intracoastal Waterway, the applicant shall submit documentation from Broward County or such agency with jurisdiction over hurricane evacuation

analysis either indicating that acceptable level of service of hurricane evacuation routes and hurricane emergency shelter capacity shall be maintained without impairment resulting from a proposed development or describing actions or development modifications necessary to be implemented in order to maintain level of service and capacity.

- a. **Applicant's Response**: Not applicable.
