ERTE 027 Smart Fire Safety and Emergency Training Trailer - Price: \$74,950.00

The Smart Fire Safety and Emergency Training Trailer allows you to create over 20 different interactive emergency response scenarios with dozens of additional hazard recognition training opportunities. The mobile training environment features three (3) interior rooms, including an Interactive Kitchen Emergency Training Room, Interactive Bedroom Training Room, and Pre-training Briefing Room.

Interactive Kitchen Emergency Training Room Features:

- Fully Interactive Thgree-Dimensional Stove with Oven and StoveTop Fire Training Scenarios. Features Integrated Digital Flame, Smoke, and Sound Effects. Fires start and grow dynamically and respond in real time to the actions of the training extinguisher and response of the trainee.
- Fully Interactive TrashCan Fire Prop with Integrated Digital Flames, Smoke, and Sound Effects. Fires can spread from the Stove to the TrashCan if left unchecked. Fires respond dynamically in real time to the actions of the training extinguisher and response of the trainee.
- 5lb Rechargeable Laser Driven Training Fire Extinguisher, with on-board sound effects and rechargeable batteries, that interacts with the Stove and TrashCan SmartProps.
- Central automated network control switch that allows fire to grow dynamically and spread to other linked SmartProps for realistic fire expansion scenarios.
- Interactive Smoke Detector Response Scenario Prop, responds automatically to the stove fire scenario in the room.

- 911 Phone with dial tone, working buttons, and voice message. Use pre-recorded emergency message or customize your own message.
- Overhead Heaters which vary automatically based on the intensity of the scenario fires to create a fire emergency scenario.
- Wireless handheld remote for initiating or stopping emergency scenarios.
- Cabinets and Sink Props.
- Counter Bar and Stool Props.
- Mock window.
- Training-smoke evacuation fan.
- Door to Pre-Training Briefing Room.

Interactive Bedroom Emergency Training Room Features:

- Heated and Smoking Door Prop, with full door heating effects that vary the core temperature from top to bottom, allowing for interactive hazard recognition and evacuation lessons.
- Adjustable temperature control on the door.
- Smoking Outlet (in wall), allowing for electrical safety hazard recognition lessons.
- Smoke Detector with alarm (switch operated).
- Towel rack and towel for smoking door scenario interactions.
- Sliding Window with Exterior Mounted Escape Ladder for EDITH drills.
- Training-smoke evacuation fan.
- Chair, Bed and Lamp Props.
- Door to Pre-Training Briefing Room.

Pre-Training Briefing Room Features:

- Exterior door with steps.
- Doors to both Kitchen and Bedroom.
