C. Northwest Regional Activity Center (NWRAC). *Northwest Regional Activity Center (NWRAC)*. This land use designation applies to the geographical area containing a mixture of small to medium scale businesses, cultural and residential uses. The purpose is to foster an active pedestrian friendly environment while maintaining the established historic and eclectic atmosphere and cultural diversity of the area through long-term sustainable redevelopment and adaptive reuse.

- 1. *NWRAC-MU Northwest Regional Activity Center Mixed Use* is intended to promote and enhance the existing commercial and residential character of the main corridors of the NWRAC by providing a wide range of employment, shopping, services, cultural and residential opportunities through allowing a mix of residential and non-residential uses. These areas include higher densities along the corridors transitioning to the lower densities and intensities of the surrounding zoning districts subject to adopted regulations.

**~~Sec. 47-13.31. - SRAC special regulations applicable to all SRAC zoning districts.~~**

~~A. *Applicability.* The following regulations shall apply to development permitted within a SRAC zoning district as shown on the List of Permitted and Conditional Uses – Section 47-13.10~~

~~B. *Density.* Density within the entire SRAC is limited in accordance with the number of units as provided in the adopted Comprehensive Plan.~~

~~1. Density within the entire SRAC may be increased as provided in the Comprehensive Plan.~~

~~2. Dwelling units are allocated at the time of development plan approval. Upon expiration of a development plan the allocation of dwelling units shall terminate and such units shall be made available for future development.~~

~~3. The allocation of dwelling units shall be subject to all provisions of the ULDR applicable at the time of development permit approval when the dwelling units are allocated and subject to any conditions imposed by Broward County on the approval of the land use plan amendment that permits additional dwelling units including but not limited to conditions requiring affordable housing, student station fees or any other fees required to be collected as a condition of the allocation of dwelling units.~~

~~4. The dwelling units that are allocated to the SRAC as provided in the City's Comprehensive Plan are available in accordance with the ULDR applicable at the time a development plan application is submitted on a first come, first serve basis.~~

~~5. Dwelling units shall be allocated in the SRAC land use district in accordance with regulations adopted by City for the dwelling units allocated and no development shall be permitted unless and until the City adopts a zoning regulation addressing the allocation of the dwelling units identified in the City's Plan.~~

~~C. *Streetscape Regulations and Classification.*~~

~~1. The purpose of the streetscape regulations is to create a safe, comfortable and visually interesting experience for the pedestrian, thereby encouraging more street level activity by creating a well landscaped street corridor defined by a consistent streetwall.~~

~~The regulations are intended to accomplish streetscape goals by requiring or encouraging the following:~~

~~a. Delineation of a streetwall through the limitation of space between buildings along the street.~~

~~b. Enhancing pedestrian and vehicular safety through traffic calming measures and regulation of sidewalk width and quality as well as vehicular crossings and the location of off-site parking;~~

- e. ~~Providing sufficient light and air through stepback regulations, while providing weather protection from rain and sunshine through the use of natural shade trees, canopies and awnings;~~
  - d. ~~Sidewalks that are safe to travel by regulating the width and quality of sidewalk and vehicular crossings, and the location of off-site parking;~~
  - e. ~~The provision of an interesting experience for pedestrian activity by locating non-residential, active uses on the first floor, principal building access to be oriented toward the street, requiring transparent glazing, architectural features or both on the first floor fronting of a building to front toward the street, and encouraging consolidated open areas along the street front along with street furniture.~~
  - f. ~~Permitting a mix of housing, retail and business uses that will create an active urban environment.~~
  - g. ~~Light and view to those occupying a building above the 6th floor or 75 feet by requiring stepbacks at this height.~~
2. ~~*Street Classifications.* In the SRAC all streets are classified as primary or secondary. This classification is made according to various functional characteristics of the street such as width, traffic volume, and suitability for human-scale, pedestrian-friendly street life. The form of development that occurs on any given street is in part determined by the street classification. The regulations for development arising from street classifications encourage development of both sides of the street in a consistent manner.~~
- a. ~~*Primary Streets:* Primary streets are characterized by active commercial and retail frontage at the ground floor, taller and more intensive buildings fronting the street, and a consistent streetwall. Primary Streets typically feature a full complement of pedestrian amenities, including wide sidewalks, on street parking, and a well-developed streetscape, which may include open space for public use. Primary Streets are the principal urban streets and are intended to be well used by vehicles and pedestrians and to be the primary transit routes. In the SRAC, the Primary streets are:~~
    - i. ~~South Andrew's Avenue.~~
    - ii. ~~Davie Boulevard.~~
    - iii. ~~South East 17th Street.~~
  - b. ~~*Secondary Streets:* Secondary streets are more residential in nature, and have smaller scale non-residential uses transitioning between the more urban areas and the existing residential and commercial neighborhoods. Secondary streets offer a combination of a mix of uses, but at less intensity and with less vehicular traffic while maintaining a pedestrian friendly environment. Secondary streets are streets other than Primary Streets listed in subsection (a) above.~~

3. The SRAC establishes development provisions intended to reinforce the qualities described for primary and secondary streets. For each street type, the right-of-way width and particular street section may vary depending on available space and other existing constraints.

This classification is made according to various functional characteristics of the street such as width, traffic volume, and suitability for human-scale, pedestrian-friendly street life. The form of development that occurs on any given street is in part determined by the street classification. The regulations for development arising from street classifications encourage development of both sides of the street in a consistent manner and in character with the established residential areas of the NWRAC-MU or development that is compatible with zoning districts outside of the NWRAC-MU.
