Task Order No. 23 Dated the <u>Stu</u> day of <u>January</u>, 2013 CITY PROJECT NO. 11773 CITY OF FORT LAUDERDALE GEORGE T. LOHMEYER REGIONAL WASTEWATER TREATMENT PLANT LARGE DIAMETER PROCESS PIPE REPLACEMENT – PHASE II DESIGN

On May 3, 2011, the City Commission authorized a Continuing Services Agreement with CDM Smith Inc. formerly known as Camp Dresser & McKee Inc. (Consultant), for the General Wastewater Consulting Professional Architectural – Engineering Service (RFQ No. 606-10482) associated with the City's wastewater and stormwater systems ("Master Agreement") as amended and approved by City Commission on May 1, 2012. This task order is being performed under the terms and conditions of the Amended Master Agreement.

The Master Agreement with the Consultant includes design services for the George T. Lohmeyer Wastewater Treatment Plant.

BACKGROUND

In September, 2011, the City experienced several large diameter process pipe failures at the George T. Lohmeyer Wastewater Treatment Plant. The following actions were taken by the City.

Task order 11, completed October 2011 – The City and Consultant temporarily bypassed the 48"/60" diameter prestressed concrete cylinder pipe conveying pretreated raw sewage between the pretreatment building and reactor 2 influent.

Task order 12, completed May 2012 – The City and Consultant identified approximately 2,460 linear feet of critical-duty prestressed concrete cylinder pipe consisting of 660 feet of 66" pipe; 180 feet of 54" pipe; 780 feet of 48" pipe, and 840 feet of 42" pipe. Reference separately attached Exhibit A, Process Pipe Replacement Sequencing. The Consultant then evaluated replacement materials, sizes, and options for permanent pipe replacement. The City and Consultant developed a preliminary construction sequence to keep the plant in service during pipe replacement for the temporary bypassed 48"/60" pipe into reactor 2; and the leaking 42"/60" pipe into clarifier battery 3; and replace the 48"/54" pipe into reactor 1.

SCOPE OF SERVICES

1.0 Design services for the 60 percent design development consists of advancing the development of drawings based on the findings of the definition, conceptual, and preliminary design phases necessary to implement the replacement identified in task order 12. Specifically, the influent to both reactors, the influent to battery 3 clarifiers, and the influent bypass line for reactor 1. The length of process pipe to be replaced is approximately 2,460 linear feet and generally consists of 660 feet of 66" pipe; 180

feet of 54" pipe; 780 feet of 48" pipe and 840 feet of 42" pipe. This design development phase includes structural review and modifications incidental to perform temporary bypass piping during construction. The Consultant will provide design provisions to temporarily protect or relocate the existing non-potable water, potable water, seal water, plant drain, chlorine solution, power, and communication utilities to facilitate the process pipe replacement. The Consultant will provide bypass pump flow requirements as well as process pipe replacement construction sequencing initiated in task order 12. Piping changes during construction are an inherent nature of this work, so the design development services will include internal quality technical and constructability reviews to minimize change orders associated with underground utilities, structural modifications, or repairs due to bypass piping, during replacement of the process pipe identified in task order 12.

The design development services shall also include the replacement of the existing 1,200 linear feet of 6" fiberglass pipe conveying odor control chlorine solution originating from the chlorine building's west exterior and terminating at the pretreatment building's east exterior. The replacement pipe material shall be schedule 80 polyvinyl chloride. The existing odor control chlorine solution pipe extends above ground at the liquid oxygen facility but the new pipe would be placed below ground if feasible.

The design development services shall also include a bypass pipe line or an in-line jumper pipe, depending upon hydraulic and operational considerations, around a 48" flow meter. The 48" flow meter shall be located above ground between the pretreatment building and reactor 2.

The design development services include drawings for the proposed work using AutoCAD Civil 3D 2012 software prepared per City CADD specifications current at the time they are submitted. Design drawings shall be uploaded to a safe file transfer protocol site in a portable document format.

This Phase is estimated at 602 hours and \$83,875. This phase builds upon previous phases and is interdependent with each subsequent phase.

2.0 Design Services for 90 Percent (Pre-Final) Design consists of development of drawings and specifications necessary to advance the replacements identified in the design development phase above. Services include detailed drawings for the proposed work using AutoCad Civil 3D 2012 software prepared per City CADD specifications current at the time they are submitted. Consultant technical specifications, utilizing the Construction Specifications Institute 16-Division format, shall be prepared and shall consist of written technical descriptions of materials, construction, systems, standards and workmanship as applied to this project. Services include internal quality technical and constructability reviews for the design. Design drawings and technical specifications shall be uploaded to a safe file transfer protocol site in a portable document format. These documents can be used to accompany any necessary permit application submittal.

This phase is estimated at 455 hours and \$61,185. This phase builds upon previous phases and is interdependent with each subsequent phase.

3.0 Final Design Services for bid set drawings consist of drawings and specification necessary to obtain construction bids to implement the replacements identified in the pre-final design development phase above. These documents shall include review comments from regulatory agencies, the City, and the

Consultant on the 90 percent submittal documents. Services include detailed drawings for the proposed work using AutoCad Civil 3D 2012 software prepared per City CADD specifications current at the time they are submitted. Technical specifications consisting of written technical descriptions of materials, construction, systems, standards and workmanship as applied to this project shall be finalized. Services include internal quality technical and constructability reviews for the design. Design drawings shall be uploaded to the City's file transfer protocol site in a portable document format. City provided front end documents and Consultant technical specifications shall be assembled/paginated, and then uploaded to a safe file transfer protocol site in a portable document format. A final statement of probable construction costs based upon the City approved final detailed construction document shall be provided.

This phase is estimated at 370 hours and \$42,890. This phase builds upon previous phases and is interdependent with each subsequent phase.

4.0 Permitting Services consist of preparation of necessary construction license applications to the various regulatory agencies having jurisdiction on this project. Licenses may be required from the following regulatory agencies:

- a. Broward County Development and Environmental Regulation Division; Form 212-0004; and
- b. Florida Department of Environmental Protection; Form 62-604.300(8)(a).

License application forms shall be delivered by the Consultant to the appropriate regulatory agencies. The Consultant will reply to regulatory questions generated from the submittal of these forms. The City shall provide all permit fees based on the fee value provided by the regulator.

This phase is estimated at 46 hours and \$6,110. This phase builds upon previous phases and is interdependent with each subsequent phase.

5.0 Bidding Services include the work necessary to assist the City with bidding of the project. The work includes the following:

- a. Provide the City with written responses to questions from plan holders on technical aspects of bid documents for an addendum;
- b. Attend the pre-bid conference and bid opening. The City shall reproduce and distribute the contract documents, maintain plan holders list, and tabulate bids; and
- c. Telephone the references provided by the lowest responsive bidder and prepare a letter of recommendation for the lowest responsive bidder. Bidding services shall end with the recommendation of the award.

This phase is estimated at 98 hours and \$12,595. This phase builds upon previous phases.

DATA OR ASSISTANCE TO BE PROVIDED BY THE CITY

A. Provide forms, bidding instructions and administration procedures (front ends);

- B. Review and provide comments on the 60 percent, and 90 percent design documents;
- C. Provide assistance with regulatory agencies and provide payment for permit fees;
- D. Advertisement of project at bidding;
- E. Reproduce and distribute the contract documents and maintain plan holder list;
- F. Hold, conduct and generate minutes for pre-bid conference and site visit by bidders;
- G. Tabulate bids; and
- H. Prepare notice of award.

DELIVERABLES

- 1.0 Design development phase drawings via the safe file transfer protocol site.
- 2.0 Pre-Final design phase drawings and technical specifications via the safe file transfer protocol site.
- 3.0 Final design phase drawings; front end/technical specifications; final statement of probable construction costs via the safe file transfer protocol.
- 4.0 Agency licenses to construct improvement or agency license waivers.
- 5.0 Letter of recommendation of award to the lowest responsive bidder.

TIME OF COMPLETION

The Scope of Services from design development to final design is budgeted to be six months from receipt of the notice to proceed and purchase order. Bidding services are budgeted to be four months in duration, but are not within the Consultant's control. Permitting will run concurrent with the project execution. The time of completion of this task order may be extended through the City's contract administrator.

CITY CONTACTS

Requests for payments should be directed to City of Fort Lauderdale Accounts Payable via e-mail to <u>AcctsPayble@FortLauderdale.gov</u>.

All other correspondence and submittals should be directed to the attention of Jorge Holguin at the address shown below.

City of Fort Lauderdale City Hall, 4th Floor – Engineering 100 North Andrews Avenue Fort Lauderdale, FL 33301

CONSULTANT CONTACTS

Timothy J. O'Neil, P.E., BCEE 6365 NW 6th Way # 200 Fort Lauderdale, FL 33309 954 776-1731

PAYMENT AND COMPENSATION

Invoicing for the services will be monthly based on time and hourly rate for labor at the time services are provided. A status report shall accompany each progress invoice.

A breakdown of the estimated labor for Consultant services and subconsulting expenses are provided on the following page and summarized below.

DESCRIPTION	A	MOUNT
Estimated Labor Cost	\$2	206,655
Estimated Reimbursable Subconsulting Expenses	\$	34,117

Replacement of Large Diameter Process		
Task Order No. 23		
Project No. 11773		
18-Dec-12		
LABOR CATEGORY-	Employee Title:	Project Role:
Principal Associate	Project Manager	Guide and manage the week to week activities of the team; Primary point of contact for the project; Stay ahead of schedule; Stay under budget; Engineer of record for the entire project (civil, electrical, controls, structural). Prepare, refine, finalize the bid tab; Prepare, refine, finalize the constructability design to keep existing water, chlorine, non-potable, electrical, controls, in service or temporarily removed
Senior Professional	Structural Engineer	Design structural modifications or repairs due to bypass piping during-replacement of the 2,460 feet of 48"-66" process pipe; Design the 48" flow meter pipe supports
	Electrical Engineer	Design the power source/conduit/wire for the 48" flow meter, Design the control conduit/cable for the 48" flow meter, Design the lightening protection grounding system for the 48" flow meter, Design for temporary relocation /protection of existing power and control conduit during replacement of 2,460 feet of 48"-56" process pipe
	Controls Engineer	Define the advantages of a 48" inline venturi flow meter versus an inline magnetic flow meter and make a recommendation based on the application; Design the flow meter, flow range, lining, control signal output/input, accuracy, transmitter, local indicator. Design the temporary flow meters _flow, range, size, type, control signal_during replacement of 2,460 feet of 48"-66" process pipe
	Bypass Pipe Engineer	Build upon T/O 12 to design the temporary bypass pumps flow/head selection design; Temporary bypass piping diameter/flow/ velocity/ material selection design
Professional II	New Pipe Engineer	Build upon T/O 12's material selection and unit cost to design the new 2,460 feet of .48"-66" pipe line work ; Design the flow meter bypass pipe line or in-line jumper pipe; take the lead in answering construction bid questions.
Senior Staff Support Services	AutoCAD	AutoCAD drawings drafter ; Create drawings from designer redline drawings; and from electrical and controls redline drawings; and from structural pipe support redline drawings
Staff Support Services	Estimator	Final statement of probable construction cost estimator
Project Administration	Administration	Format 94 specifications; Assemble/ paginate 94 specifications; Two permit letters; One bid letter
	Financial	Monthly invoices Labor/Expenses/ Certified backup plus initial project setup
Senior Quality Control Manager	Lead Practitioner	Independent checking of constructability / MOPO design work, as a fresh pair of eyes, build upon technical review comments from T/O 12; Confirm constructability, pipe joint restraints, pipe testing procedures: Confirm drawing call-out notes, dimensions, depth of cover, drawing details, restoration procedures, Independent checking of temporary bypass pipe design work, as a fresh pair of eyes, build upon technical review comments from T/O 12; Confirm the temporary bypass pumps now/nead selections; Confirm the temporary bypass piping diameter/flow/ velocity selections
