3.6.1 ANSI CONFORMANCE: All containers shall meet ANSI container standards Z-245.30 and Z-245.60 for “Type B/G” containers. The bidder must submit independently certified copies of all ANSI test results with the proposal.

3.6.2 FINISH: The container shall be manufactured with a smooth surface inside and out, free of inside recesses, projections or other obstructions where material inside the containers could be trapped. No coatings or sprayed on surfaces are permitted. The body and lid shall have no foreign substances, shrink holes, cracks, thin spots, blow holes, drill holes, webs, or other similar poor workmanship.

3.6.3 STABILITY: The container shall be designed to remain in the upright position when the lid is thrown open, either loaded or empty. The container must be designed to withstand winds averaging 35 miles per hour when empty (based on the average wind resistance of the four sides of the cart).

3.6.4 LIFT SYSTEM: The container shall be manufactured with a foot operated tilt feature designed into the axle area to facilitate easy tipping. The container shall be designed to be picked up and dumped by a semi-automated lifting device that will pick up the leading side of the container and also will prevent it from falling into the truck hopper, and by a fully automated lifting device that encircles the cart. The container shall function normally and regularly with a mechanized collection system, both automated and semi-automated lifts.

- 3.6.5** ABRASION PROTECTION: The containers must be designed with a double drag rail on the container bottom. The container base must be reinforced in the area that contacts the ground with a molded-in strip.
- 3.6.6** RIM OF BODY: The top of the container body shall be molded with a reinforced rim to add structural strength and stability to the container and to provide a flat surface for lid closure. This reinforced rim shall have a raised perimeter to serve as a barrier to escaping odors, intrusion of pests, and to prevent moisture from entering the cart under the edge of the lid. The rim of the cart must not be designed to have an inward radius to obstruct free flow emptying of material out from the container.
- 3.6.7** WALL THICKNESS: The containers shall be manufactured with a nominal wall thickness of .175 inches throughout the body of the container and a minimum wall thickness of .185 inches in critical wear points (i.e., cart bottom, handle and lift mechanism). Alternative proposals will be reviewed with the City reserving the right to request product testing documentation. The City reserves the right not to accept alternative proposals at its sole discretion.
- 3.6.8** LIDS: The container lid shall be manufactured from the same material as the container body and be of such a configuration that it will not warp, bend, slump, or distort to such extent that it no longer fits the container properly or becomes otherwise unserviceable. A UVR inhibitor is required. The inhibitor shall be guaranteed effective against sun deterioration and/or the lid becoming brittle due to exposure. The lid shall be one-piece construction and the lid design and weight shall prevent rainwater from entering the container and will not blow open under general weather conditions. The container section will be furnished with a hinged lid, with hinge to the rear of wheeled section. Lids shall be curved or built up to drain and shall be light and stiff for convenient handling. Lids shall overlap sides but shall flare out so they will not bind against the sides if the lifting device distorts the container. Lids shall be securely attached to the container without the use of nuts and bolts and shall be hinged to open by gravity as the container is dumped. The lid shall open to a position 270 degrees from the closed position and hang open without stressing the lid, container body or tipping over the cart. Lids must be capable of being imprinted with a custom hot stamp, heat transferred label, or in-molded label technology. Lids shall not have a locking device. The City must approve lid design.
- 3.6.9** HANDLES: Each container shall have a horizontal handle to provide comfortable gripping areas for pulling or pushing the container. The handle and handle mounts must be an integrally molded part of the container body or lid, and only expose plastic surfaces to the hands of the user.
- 3.6.10** WHEELS: Each container shall be furnished with two (2) plastic molded or rubber snap on wheels and each wheel shall be furnished with an inner lock pin made from a corrosion resistant metal.
- 3.6.11** AXLE: Each container shall be furnished with a universal axle with a corrosion resistant coating. Axle must slide in the cart bottom and must not be exposed to contents inside of container. This Axle shall be interchangeable with 65 and 95 carts in this ITB.
- 3.6.12** AIR VENT: Yard Waste Carts shall be manufactured with four air vents.

3.6.13 NESTING AND DESIGN: The container shall be manufactured with a narrow width design to fit through 30" door opening. The container shall be manufactured with a slight taper so that the top of the body is slightly larger than the bottom for nesting during shipment. There shall be no other metal attachments, metal framing, or nuts and bolts on the container, excluding the metal axle and the wheel's inner lock pin.

3.6.14 SERIAL NUMBERS: Each container must have a serial number and barcode hot stamped in white on the face of its body. The serial number shall be determined by the City of Fort Lauderdale. Serial numbers shall be in sequence beginning with the year of manufacture.

3.6.15 CONTAINER LOGO: The City of Fort Lauderdale logo shall be affixed by hot stamp onto both sides of the container. The logo shall be placed near the top portion of the cart to avoid being damaged by the automated lifting arm.

3.6.16 ADDITIONAL MARKINGS: All carts and/or lids shall be clearly embossed with raised letters as follows:

- 5.15 UNUSUAL CIRCUMSTANCES:** If during a contract term where costs to the City are to remain firm or adjustments are restricted by a percentage or CPI cap, unusual circumstances that could not have been foreseen by either party of the contract occur, and those circumstances significantly affect the Contractor's cost in providing the required prior items or services, then the Contractor may request adjustments to the costs to the City to reflect the changed circumstances. The circumstances must be beyond the control of the Contractor, and the requested adjustments must be fully documented. The City may, after examination, refuse to accept the adjusted costs if they are not properly documented, increases are considered to be excessive, or decreases are considered to be insufficient. In the event the City does not wish to accept the adjusted costs and the matter cannot be resolved to the satisfaction of the City, the City will reserve the following options:
1. The contract can be canceled by the City upon giving thirty (30) days written notice to the Contractor with no penalty to the City or Contractor. The Contractor shall fill all City requirements submitted to the Contractor until the termination date contained in the notice.
 2. The City requires the Contractor to continue to provide the items and services at the firm fixed (non-adjusted) cost until the termination of the contract term then in effect.
 3. If the City, in its interest and in its sole opinion, determines that the Contractor in a capricious manner attempted to use this section of the contract to relieve Contractor of a legitimate obligation under the contract, and no unusual circumstances had occurred, the City reserves the right to take any and all action under law or equity. Such action shall include, but not be limited to, declaring the Contractor in default and disqualifying Contractor from receiving any business from the City for a stated period of time.

If the City does agree to adjusted costs, these adjusted costs shall not be invoiced to the City until the Contractor receives notice in writing signed by a person authorized to bind the City in such matters.

- 5.16 ELIGIBILITY:** If applicable, the Contractor must first register with the Florida Department of State in accordance with Florida Statutes, prior to entering into a contract with the City.
- 5.17 PATENTS AND ROYALTIES:** The Contractor, without exception, shall defend, indemnify, and hold harmless the City and the City's employees, officers, employees, volunteers, and agents from and against liability of any nature and kind, including cost and expenses for or on account of any copyrighted, patented or un-patented invention, process, or article manufactured or used in the performance of the contract, including their use by the City. If the Contractor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the bid prices shall include any and all royalties or costs arising from the use of such design, device, or materials in any way involved in the work.

- 5.18 **ASSIGNMENT:** Contractor shall not transfer or assign the performance required by this ITB without the prior written consent of the City. Any award issued pursuant to this ITB, and the monies, which may become due hereunder, are not assignable except with the prior written approval of the City Commission or the City Manager or City Manager's designee, depending on original award approval.
- 5.19 **GOVERNING LAW; VENUE:** The Contract shall be governed by and construed in accordance with the laws of the State of Florida. Venue for any lawsuit by either party against the other party or otherwise arising out of the Contract, and for any other legal proceeding, shall be in the courts in and for Broward County, Florida, or in the event of federal jurisdiction, in the Southern District of Florida.

ISSUED: February 5, 2021

This addendum is being issued to make the following change(s):

1. Regarding Question 6:
 - QUESTION 6: 3.6.16 For reference would the City be so kind as to provide a current picture of the cart and lids?
 - **ANSWER:** See below

2. Regarding Question 15: Vendor submitted the following question and chart on page 3:

- *QUESTION 15: 3.11 – In order to collect participation data, the City would need to purchase RFID readers for the collection vehicles. These read the RFID tags in the carts as the trucks collect the carts. The hardware for this is a fixed cost and also has some monthly cellular and service fees that would be included. In section 3.4 the city has the right to vary from the initial estimated carts being ordered. That said, Would the City consider either breaking out the RFID hardware and supporting cellular & software costs OR commit to a reasonable volume so the vendors can spread the costs out over the carts? An example of this would be: emailed to: Lplatkin@ftfortlauderdale.gov (954)-828-5138 on 2/5/21 (Submitted: Feb 5, 2021 6:46:57 AM EST)*

- **ANSWER:**
We are not purchasing readers for collection vehicles

All other terms, conditions, and specifications remain unchanged.

Question and Answers for Bid #12492-813 - Refuse and Recycling Carts, Semi-Automatic

Overall Bid Questions

Question 1

Section 2.32 The contract has a 3 year initial term beginning September 1, 2021 or after the award. Given there are fixed cost requirements for hardware and monthly service fees, should we price this to accommodate for the optional 2 year extension OR should we use three years and the City will pay for the technology separately if they so choose to renew the 4th and 5th year? (Submitted: Feb 4, 2021 2:57:14 PM EST)

Answer

- All costs should include hardware and monthly service fees throughout the potential contract life, including extensions, should the City and vendor opt to extend. (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 2

Section 2.33 The first 3 years of prices are firm; the plastic industry relied heavily on resin as our raw material. This raw material has fluctuations monthly, like fuel, Would the City consider allowing for a resin escalator every 90/120/bi-annually/annually to accommodate for this unknown. If the City would allow, the prices would be much lower for you overall as the manufacturers would be protected and not have to predict resin costs out 3 years. Especially when considered, we will not even make a cart for at least 8 months from now. Sample verbiage: ? "Prices quoted in response to this Bid solicitation shall be firm for the first 90 days of the contract period. After 90 days, prices may be subject to revision and such changes shall be based on resin fluctuation during that period. Should the market price of resin increase or decrease from the initial unit bid price, the increase/decrease will be passed on to The City 30 days following the bid opening and throughout the term of the contract." (Submitted: Feb 4, 2021 2:58:19 PM EST)

Answer

- No (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 3

Section 2.33 The City indicated CPI as the preferred index however, we found that the CPI is affiliated more closely with labor. Plastics manufacturers rely heavily on resin and the industry standard is the Chemical Data Index, this is updated monthly due to the volatility of the resin market. Would the consider changing the index to CDI rather than CPI (Submitted: Feb 4, 2021 2:58:41 PM EST)

Answer

- No (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 4

3.4 - The number of containers ordered fluctuates but in other sections the City is requesting hardware (fixed) and software (monthly) costs to be added to the cart price. We simply cannot accommodate both of these requests. We will either need a firm commitment on cart sizes and/or quantities OR the hardware/software must be broken out as separate line items. (Submitted: Feb 4, 2021 3:01:16 PM EST)

Answer

- This isn't a question- no response (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 5

3.6.16 – Do the Garbage carts need a full color IML? (Submitted: Feb 4, 2021 3:01:50 PM EST)

Answer

- Yes (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 6

3.6.16 For reference would the City be so kind as to provide a current picture of the cart and lids? (Submitted: Feb 4, 2021 3:02:17 PM EST)

Answer

- Yes - Photo supplied in Addendum 1 (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 7

3.7 – Is the City requiring samples at this time? (Submitted: Feb 4, 2021 3:02:37 PM EST)

Answer

- No (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 8

3.7 - Would the City consider accepting sample carts of different colors and using a color chip to color match to current carts. Many manufacturers have few sample on the floor and are not always these exact colors. The cost to manufacture one of each in exact color would be cost prohibitive. (Submitted: Feb 4, 2021 3:17:38 PM EST)

Answer

- Yes (Answered: Feb 5, 2021 4:32:12 PM EST)

Question 9

3.10.3 – Many work order and inventory management systems are run on cell phone apps. Is it the City's request that cell phones and cellular services of these phones be provided or would the City provide these if the vendor is in fact an app based mobile user system? In our experience, it is far cheaper for the City to provide these to their employees vs. us.
