Mayor Trantalis provided a brief overview of this Agenda item addressing the redistricting of the four (4) City Commission Districts.

Mike Stamm, Adjunct Faculty Member - Director of Urban and Regional Planning, Florida Atlantic University (FAU), narrated the presentation entitled, *Florida Atlantic University - Map Alternatives for the City of Fort Lauderdale City Commission Meeting - 1st Reading, illustrating City district map alternatives*. He reviewed the qualifications of the FAU team, redistricting parameters, the 2020 population, 2023 population projections, and the redistricting map alternatives.

***A copy has been made part of the backup to this Agenda item.***

In response to Commissioner Sorensen's question, Mr. Stamm explained *communities of interest* relate to items such as neighborhood civic associations to assist in making redistricting decisions. He commented on efforts to maintain the entire area of a neighborhood association in one district.

In response to Vice Mayor Moraitis' questions regarding the last redistricting process based on *2010 Census* data, Mr. Stamm explained that FAU was not involved and that City Staff handled that redistricting process.

Vice Mayor Moraitis commented on concerns about including growth data in redistricting maps. Mr. Stamm noted the significant amount of population growth in the City since 2020. Should population growth data not be included in this redistricting process, the degree of change in the 2030 process would be extreme. Vice Mayor Moraitis expounded on her

viewpoint, including the need for consistency and the impact of redistricting being disruptive. Further comment and discussion ensued.

In response to Commissioner McKinzie's question, City Manager Lagerbloom confirmed working towards a mid-April deadline for submitting redistricting maps.

In response to Commissioner Sorensen's question regarding a downside to one district representing the majority of the beach and the majority of downtown, Mr. Stamm explained it is the preference of the Commission and said redistricting is a mathematical exercise.

In response to Commissioner Sorensen's question regarding the beach area and the downtown being *communities of interest*, Mr. Stamm confirmed.

In response to Commissioner Glassman's questions, City Attorney Boileau said according to the City Charter, a Commission Member must reside in the district he represents. Redistricting maps take effect upon Commission approval.

Commissioner Glassman pointed out that one redistricting map alternative was not an option because District 2 did not include his place of residence. Mr. Stamm said FAU's redistricting maps did not factor in Commission Members' places of residence. Further comment and discussion ensued regarding redistricting map alternatives and proposed modifications.

In response to Commissioner Glassman's question regarding public workshop comments on redistricting, Mr. Stamm explained Staff forwarded public comments to the *FAU* team. Comments included the need to keep neighborhood associations together. Further comment and discussion ensued regarding shifting populations and modifications to the proposed redistricting map alternatives to achieve equal populations in each of the four (4) districts.

Mr. Stamm explained the goal is to minimize the degree of change and keep neighborhood associations intact while maintaining population equity among the four (4) districts. The *FAU* team will review direction given and will return with recommendations.

Mayor Trantalis recommended deferring Agenda item PH-2 related to this subject on tonight's Regular Meeting Agenda.
