City of Fort Lauderdale Re: Bid 12585-325

To the City of Fort Lauderdale,

Southern Cross is pleased to submit the following proposal to further highlight our capabilities as the field services provider of choice for utility partners, large and small.

Founded in 1946 as one of the first leak survey detection companies, Southern Cross has since expanded to become a well-rounded field services provider. Over the years, we have expanded our service offerings to include electric, gas, water, and oil services; with everything from damage prevention, locating, meter reading to meter deployments and remediation. With current partnerships across the country and over 500 technicians in the field performing a wide range of services, Southern Cross is confident in our ability to meet, and hopefully exceed, your team's project expectations. Our goal for this project, as it is with any client, is to provide City of Fort Lauderdale with the highest possible customer service and safe, reliable services for your community.

The following proposal contains specific information about our company and is fully accurate to the best of our knowledge. If you should have any further questions, please feel free to contact me at (919) 799-3701.

We look forward to your team's decision.

Sincerely,

long S.

Jody Boyles Vice President of Business Development

# Executive Summary

Southern Cross has been providing field services since our founding in 1946. Over the last 75 years, Southern Cross has expanded from a small leak survey provider to a national organization with over 500 field technicians in the field and 50+ annual contracts. With seven decades of field services experience under our belt, we believe our history, continuous growth and focus on safe, high-quality services is what sets us apart.

Our corporate headquarters is located just outside of Atlanta, Georgia with satellite offices across the United State. With a diverse and wide-reaching footprint, Southern Cross has the resources to scale up to meet any project's needs.

Although our history is based in natural gas leak survey, Southern Cross has also become a well-rounded service organization across the natural gas, water, and electric utilities. Our capabilities are not limited to just these services as we continue to take on new projects and expand our portfolio.

# Approach to Work

Our team understands the importance of a smooth, on time transition from the incumbent to the newly awarded contractor. Our team is ready and able to manage this transition efficiently to ensure that the project quality and timelines are not compromised throughout this process. Our standard startup time frame for a project of this size is 8 - 12 weeks from contract signature. This amount of time is necessary to ensure our team can hire enough resources, secure fleet vehicles and equipment. These items are time sensitive and can greatly impact the start time of a project, as such a timely notice of award is of the upmost importance to ensure our team has ample time to prepare for project start.

For this project our team has estimated for the following resource needs: 10 Technicians, 1 Productive Supervisor, and 1 Project Manager.

Southern Cross will utilize our internal corporate recruiting staff to begin hiring for the project as soon as possible. The project manager and supervisors are typically identified first and are then deplyoed to the project location to interview the prospective hires. Our recruiting team will begin to recruit within the City of Fort Lauderdale area immediately upon contract award. With the City of Fort Lauderdale's approval, our team would also look to reach out to the current incumbent's team members to potentially hire them at our pay rate. The current hiring market is exceptionally competitive and we believe that bringing in these individuals at a higher wage rate will give us the ability to secure a portion of the existing workforce while attracting other local resources. By hiring the team members who already performing these services, we can leverage their experience expertise to assist in a successful transition.

CAM 22-0287

Exhibit 7 Page 7 of 33

We have provided an outline of the preparations and activities at the start of project, leading up to the first day of implementation as to what can be expected as the project evolves.

### Stage 1: Preparation

- Schedule meetings with Client to begin establishing relationships with point of contact personnel and discuss/agree on parameters surrounding SOW.
- Southern Cross will identify and mobilize experienced project team members to oversee this project and ensure a successful startup and project kickoff.
- Our external recruiting efforts will begin; we will identify a pool of applicants that meet Southern Cross' employment criteria. Applicants not initially selected will be considered for future employment opportunities.
- All employees selected will have their background evaluated, motor vehicles records checked, and drug screen completed (DOT if applicable).
- Southern Cross will obtain a suitable office space in the regional territory to serve as the project's headquarters during startup and throughout the entirety of the project.
- Southern Cross will begin to acquire fleet vehicles.

### Stage 2: Training and Equipment

- Safety Training will be introduced to all employees through a joint effort by Client and Southern Cross.
- Customer Care including Client/Southern Cross policy and procedures will be disseminated to each trainee.
- Project-specific training will be conducted in accordance with the client's project requirements.
- Southern Cross will obtain required handhelds and outfit each with the proper technology.
- Each employee will be afforded uniforms and equipment required to perform tasks. All assigned equipment will be inventoried internally.

### Project Team

Southern Cross understands the importance of planning and executing a project successfully from the very start. In our experience, one of the critical components for success on this type of work is to hire and train the right people from the beginning to maintain and ensure consistent production levels.

Our team is prepared to provide long term investment in this project by hiring local, full-time resources, and continuously investing in our training and quality efforts to ensure that this project is continuously working safely and productively. Below is a high-level overview of the team members who would work with the City of Fort Lauderdale team to ensure a successful project.

### **Operation Support**

At the corporate level, our operations team will provide equipment, human resources, and compliance tracking monitoring to ensure the project is complying with contractual, regulator, and Southern Cross obligations. Exception reports are provided, and critical items are elevated to appropriate levels.

CAM 22-0287

Exhibit 7 Page 8 of 33 12585-325

### Vice President of Meter Services

The Vice President of Meter Services' responsibilities include oversight and support of the Project Manager in the fulfillment of their job. The VP of Meter Services would provide hands-off oversight and constant support and would only become involved in the project as necessary. The role of this individual is another way that Southern Cross provides checks and balances to ensure that each project is running smoothly, and each Project Manager is provided with the necessary resources to perform their duties successfully.

### **Project Manager**

The Project Manager (PM) participates in all phases of a project with lead/support in contract negotiations, project mobilization, project execution and project close out. During contract negotiation, the PM leads the development of the Statement of Work and assures the Terms and Conditions match the Scope of Work. The Project Manager will serve as the single point of contact throughout all phases of the project with the client. The PM's responsibilities include ensuring goals are accomplished as well as overseeing the execution of the program plan, managing resources and personnel to ensure the needs and requirements of the client are completed as requested on time and on schedule. The PM will meet with the client on an agreed upon schedule (i.e., weekly, monthly, etc.) for project status updates and to get any additional information or requested changes from the client which may impact the project.

### Field Supervisors/Auditors

Field Supervisors/Auditors act as the direct support and contact for the technicians and respond, as needed, to abnormal conditions the technicians may encounter throughout the day. The Supervisor's duties also include addressing operational issues, coordinating program specific training, and ensuring quality work is performed in accordance with guidelines while promoting safe work behaviors by auditing the technicians in the field.

# Training

### Southern Cross utilizes a balanced approach to training, including the following methods:

- Project specific field manual
- Technical training slides
- Safety equipment samples & demonstrations
- Custom training videos (DVDs & PowerPoint presentations)
- Participant training reinforcement exercises
- Instructor presentations
- Personalized tests & quizzes
- In-field training

Our approach to training for this deployment would include a combination of all the above exercises. Southern Cross has invested heavily in a robust training organization over the last few years, and we pride ourselves on delivering great training to new employees and our seasoned workforce. Our training curriculum addresses the different learning styles of each employee to ensure they have an equal chance at success working for Southern Cross.

CAM 22-0287

- Customer Service Training

- Handheld Training

# **Diversity & Subcontracting Partnerships**

Southern Cross plans to self-perform of 100% of the services; as such we will not be subcontracting to any third-parties or MWBE organizations at this time.

# Local Business

Our team does not have a local presence currently. However, upon contract award, our team would obtain a local office space and hire local resources to support this project. This has been our standard business model for over 75 years, and we are confident that our lack of local presence will not be a detriment in our ability to successfully execute on this project.
