TASK ORDER No. 4

Dated this 21st day of October, 2014

FORT LAUDERDALE PUBLIC WORKS DEPARTMENT

ENVIRONMENTAL FEASABILITY STUDY OF THE LAS OLAS MARINA

PROFESSIONAL SERVICES

Describing a specific agreement between the City of Fort Lauderdale (CITY) and Miller, Legg & Associates, Inc. (CONSULTANT) in accordance with terms of the agreement for General Civil Engineering Consultant Services dated November 6, 2012 between CITY and CONSULTANT ("MASTER AGREEMENT").

PROJECT BACKGROUND

The Project is generally described as follows: The City of Fort Lauderdale (COFL) is seeking a due diligence study to evaluate the environmental considerations and regulatory requirements associated with the proposed Las Olas Marina Expansion project. The proposed marina expansion would consider a reconfiguration of the Las Olas Marina including deepening of the marina basin to the proposed Intracoastal Waterway (ICWW) depth, reconfiguration and replacement of the marina docks, and expansion of the marina limits further east. It has been requested to evaluate the feasibility based on a conceptual marina expansion plan, current permitting status, mitigation requirements, and soil disposal to evaluate what is still required, and what obstacles there are to construct the project and what new criteria would be needed based on the updated plan. In a related project, the Florida Inland Navigation District (FIND) plans to deepen the ICWW in the vicinity of the Las Olas Marina. COFL is evaluating dredging the ICWW bottom extending from the eastern limit of the FIND ICWW dredging to the face of the docks at the Las Olas Marina. A COFL conceptual mitigation plan considers seagrass mitigation associated with this dredging and does not address any potential mitigation associated with the proposed marina expansion. The project is located at 240 East Las Olas Circle in Fort Lauderdale and the specific area of study is north of the Las Olas Bridge as shown in Exhibit 1.

SPECIFIC SCOPE OF SERVICES AND DELIVERABLES

The Scope of Services to be provided by CONSULTANT shall be as follows:

Task 1 Environmental Project Study – CONSULTANT shall perform a study to identify the project status and required information for the proposed marina expansion into the current uplands as depicted in concept attached as Exhibit 2 as it relates to environmental permitting and constraints. No specific studies or surveys will be performed in this scope and would be performed under separate task or by others in the future. This is to identify what studies, design and issues are still necessary to address for a proposed concept and an anticipated cost. Anticipated areas of concentrated review include:

1. Current permitting status. Review applications and meet with agencies on status of applications and resolution of mitigation requirements for seagrass and other natural resources. Identify additional studies or surveys or analyses that will be required to obtain permits (which may include assessment of flushing and water quality impacts associated with excavation and dredging of marina expansion, evaluation of drainage impacts associated with expansion, tree removal).

2. Geotechnical review. Review sufficiency of existing geotechnical data and determine suitability of material for use, disposal, and additional testing required. Soil Disposition – estimate of disposal and handling options based on structural suitability and environmental properties of the material and market use.

Deliverables:

Deliverables for this project shall consist of the following:

- Written Report including identified existing data, additional data and information required and summarizing findings in PDF format.

PROJECT ASSUMPTIONS

Permit applications have been made to the agencies for the dredging activity but not for the expansion.

This work effort excludes any site specific studies or surveys (i.e. geotechnical, soil testing, utility locates, topographic or bathymetric surveys). Cost estimates have already been prepared for construction and other elements including seagrass mitigation. This scope is to validate the proposed environmental mitigation plan and identify the remaining environmental items to be addressed by the additional excavation and dredging expanding into the uplands.

CITY'S RESPONSIBILITIES

- CITY shall provide access to site.
- CITY shall provide survey files in electronic AutoCAD format.
- CITY shall provide all available reports and studies previously performed as well as the proposed expansion footprint. CITY shall be available for consultation during review process to facilitate addressing project intent and proposed plan.

ADDITIONAL SERVICES

If authorized in writing by the CITY as an amendment to this Task Order, the CONSULTANT shall furnish, or obtain from others, Additional Services of the types listed in Article 8 of the Master Agreement. The CITY, as indicated in the Master Agreement, will pay for these services.

PERFORMANCE SCHEDULE

The CONSULTANT shall perform the services identified in Task 1 within six (6) weeks of written Notice to Proceed.

PROJECT FUNDING

The project will be funded by the City of Fort Lauderdale Community Redevelopment Agency (CRA).

METHOD OF COMPENSATION

The services performed will be accomplished using the Not-to-Exceed method of compensation. Reimbursable expenses associated with these services are not included in the fees and will be itemized separately, subject to an established Not-to-Exceed limit. The total hourly rates payable by the CITY for

each of CONSULTANT's employee categories, reimbursable expenses and sub-consultant fees are shown on Exhibit "A" attached hereto and made a part hereof.

TERMS OF COMPENSATION

Services will be provided for the following Not-to-Exceed amounts:

Task No	Task Title	Labor Fees		Total
		Consultant	Sub consultant	
1	Document Compile/Review	\$ 2,900.00	\$ -	\$ 2,900.00
1	Agency Meetings/coord	\$ 2,235.00	\$ -	\$ 2,235.00
1	City coordination/mtgs	\$ 1,495.00	\$ -	\$ 1,495.00
1	Seagrass Mit. Assessment	\$ 2,910.00	\$ -	\$ 2,910.00
1	Spoil material review	\$ 2,540.00	\$ 1,150.00	\$ 3,690.00
1	Report Preparation	\$ 4,900.00	\$ -	\$ 4,900.00
All tasks				\$ 18,130.00
Task No	Description	Other Cost		Total
		Consultant	Sub consultant	
1		\$ -	\$ -	\$ -
All other costs				\$ -

The total number of hours for the project is (151) for CONSULTANT and (9) for Sub consultant.

CITY CONTACTS

Requests for payments should be directed to City of Fort Lauderdale Accounts Payable via e-mail to AcctsPayable@FortLauderdale.gov. All other correspondence and submittals should be directed to the attention of Thomas Green, Design Engineer, at the address shown below. **Please be sure that all correspondence refers to the City project number and title as stated above.**
