Florida Department of Transportation
Kevin Homrich-Micocci, P.E.
3400 West Commercial Boulevard
Fort Lauderdale, Florida 33309

Dear Mr. Homrich-Micocci:

Notice to Proceed Issued
Permit Number: BO-694 (Corrected)
Permittee Name: Floria Department of Transportation

Your request for a corrected permit pursuant to Section 161.053, Florida Statutes, for construction or other activities seaward of the coastal construction control line, has been approved by the Department of Environmental Protection, enclosed is the permit. However, construction may not commence until after the permittee complies with any preconstruction requirements described in Special Permit Conditions 1 and 5.

Please read the permit and permit conditions including both the General Permit Conditions and any Special Permit Conditions closely before starting construction. General Permit Conditions 1(q) and 1(s) pertain to written reports which must be submitted to the Department of Environmental Protection at specified times. Forms for use in preparation of these reports are enclosed. Make sufficient copies of the periodic report form to provide the required reports. The periodic reports are due in the office on a monthly basis on the last working day of each month. No progress reports are required until such time as construction activities have started.

The permit will expire on February 11, 2017. Upon receipt of a written request signed by the permittee or authorized agent, the Department will consider extending the permit for up to but no more than three years. You must apply for a new permit for completion of any work not accomplished under the original permit. Although you may apply for a new permit, there is no assurance that such new permit for the same construction or activities would be approved.

The authorized work is strictly limited to that described on the enclosed permit. If you have any questions pertaining to this permit, please contact me by mail at the letterhead address (add Mail Station 3522), by telephone at (850) 921-7780, or by email at John.wettstein@dep.state.fl.us.

Sincerely,

Fritz Wettstein, Environmental Consultation

NOTICE TO PROCEED AND PERMIT FOR CONSTRUCTION OR OTHER ACTIVITIES PURSUANT TO SECTION 161.053, FLORIDA STATUTES

FINDINGS OF FACT: An application for authorization to conduct the activities seaward of the coastal construction control line that are indicated in the project description, was filed by the applicant/permittee named herein on October 28, 2013, determined to be complete pursuant to rule on December 30, 2014, and was approved by the Department of Environmental Protection on February 11, 2014. Subsequent to issuance of the permit, the applicant/permittee noted errors in the project description within the permit which needed corrections. The proposed project is to be located landward of the 30-year erosion projection and existing major structures permitted by the Department in the immediate area.

CONCLUSIONS OF LAW: After considering the merits of the proposal and any written objections from affected persons, the Department finds that upon compliance with the permit conditions, the activities indicated in the project description of this permit are of such a nature that they will result in no significant adverse impacts to the beach/dune areas or to adjacent properties; that the work is not expected to adversely impact nesting sea turtles, their hatchlings, or their habitat; that the work is expendable in nature and/or is appropriately designed in accordance with Section 62B-33.005, Florida Administrative Code. Based on the foregoing considerations, the Department approves the application; authorizes construction and/or activities at the location indicated below in strict accordance with the project description, the approved plans (if any) and the General Permit Conditions which are attached and are by this reference incorporated herein, and any additional conditions shown below, pursuant to Section 161.053(4), Florida Statutes.

EXPIRATION DATE: February 11, 2017

LOCATION: Between approximately 300 feet south of the Department of Environmental Protection reference monument R-64 and 40 feet north of reference monument R-70 in Broward County. Address: State Road A1A (North Ocean Boulevard) between Northeast 9th Street and Northeast 18th Street, Fort Lauderdale.

PERMITTEE: Florida Department of Transportation
PERMIT NUMBER: BO-694 (Corrected)
PAGE 2

PROJECT DESCRIPTION:

SR A1A (North Ocean Boulevard) Roadway (Reconstruction)

1. Location relative to control line: Varies; edge of pavement a maximum of 223 feet seaward (NE 17th Court).
2. Exterior dimensions: Varies; 50 to 73 feet in the shore-normal direction with a total 5,670 linear feet in the shore-parallel direction, including milling/resurfacing.
3. Type of foundation: 12-inch stabilized subgrade with 2.5" asphalt concrete and friction course.

Storm Water Runoff Management System

1. Location relative to control line:
 - 1.1. New Work: Varies; a maximum of approximately 180 feet seaward (NE 17th Street).
 - 1.2. Connections to Existing System: Varies; a maximum of 213 feet seaward (NE 17th Street).
2. Exterior dimensions: Approximately 5,217 linear feet in the shore-parallel direction.
3. Type of construction:
 - 3.1. New work, including 30-inch French drains, pipes, inlets and manholes, between approximately 100 feet south of R-67 and 350 feet south of R-64;
 - 3.2. Connections to existing system, including new inlets and cross drains, between approximately 350 feet south of R-64 and 300 feet north of R-70.

Excavation/Fill

1. Total volume of excavation: Approximately ~~46,391~~ 27,609 cubic yards, including ~~38,108~~ 21,087 cubic yards of temporary excavation and ~~8,283~~ 6,522 cubic yards of permanent excavation. Volume of net excavation: None; excavated material to be placed as fill on the project site.
2. Location of excavation: Varies; From a minimum of approximately 60 feet (NE 18th St.) to a maximum of approximately 189 feet (Sunrise Boulevard) and 241 feet (NE 16th Place) seaward of the control line.

3. Maximum depth of excavation: Varies; French drains to elevation +1.5 feet (NAVD), 5.5 feet below existing grade; Manholes and inlets to a maximum of -4.3 feet (NAVD), 10 feet below grade.
4. Volume of fill to be placed: Approximately ~~69,541~~ 30,483 cubic yards, including ~~31,433~~ 27,609 cubic yards from on-site excavation and 2,874 cubic yards of imported material.
5. Location of fill to be placed: From approximately 60 feet to 241 feet seaward of the control line.

Other Structures/Activities

1. Demolition of pavement, curb and gutter, sidewalks, masonry walls and other structures within the 5,217 linear feet of project rights-of-ways and license agreement areas.
2. Concrete sidewalk with curb and gutter (east side) of dimensions varying between 7.3 and 23.6 feet shore-normal width, extending approximately 5,217 linear feet shore-parallel, and located a maximum of approximately 185 feet seaward of the control line.
3. Concrete sidewalk with curb and gutter (west side) of dimensions 5 and 17 feet shore-normal width by approximately 5,217 feet shore-parallel length to be located landward of the roadway.
4. Shore-parallel concrete decorative and retaining walls of dimensions 2-feet wide by 3-feet high to be located a maximum of approximately 188 feet seaward of the control line and extend approximately 5,217 feet in length. Breakaway walls to include gaps for beach access and 4-foot wide footers.
5. Seventeen beach entry locations at gaps in decorative walls. The entries are concrete slabs with 6-inch diameter wood post shallow footers. Each entry includes a shower column.
 - 5.1. Type 1. Southernmost entry (NE 9th Street) of approximate overall dimensions 6 feet shore-normal by 38 feet shore-parallel, located a maximum of approximately 177 feet seaward of the control line, including shower pad.
 - 5.2. Type 2. Sunrise Boulevard semi-circular entrance of approximate overall dimensions 13 feet shore-normal by 40 feet shore-parallel, located a maximum of 194 feet seaward of the control line, including a seaward decorative wall.
 - 5.3. Type 3. Six 15-foot wide entries of approximate overall dimensions 8 feet shore-normal by 35 feet shore-parallel located a maximum of 196 feet seaward of the control line (Hugh Taylor Birch State Park entrance), including shower pads.

- 5.4. Type 4. Eight 15-foot wide entries of approximate overall dimensions of a maximum of 12 feet shore-normal by 38 feet shore-parallel, located a maximum of 191 feet seaward of the control line (NE 14th Court) and 241 feet (NE 16th Place), including a seaward decorative wall.
- 5.5. Type 5. An emergency vehicle access ramp (NE 18th Street) of approximate dimensions 12 feet shore-normal by 20 feet shore-parallel to be located a maximum of approximately 157.5 feet seaward of the control line, including shower pad.
6. Median strips consisting of concrete curb and gutter located within the roadway.
7. Reconstruction of street accesses, driveways and entrances on the west side of the roadway.
8. Installation of subgrade utility lines.
9. Exterior and landscape lighting.

SPECIAL PERMIT CONDITIONS:

1. Prior to commencement of construction activity authorized by this permit, a preconstruction conference shall be held at the site among the contractor, the permit holder (owner or authorized agent), and a staff representative of the Department of Environmental Protection (Department) to establish an understanding among the parties as to the items specified in the special and general conditions of the permit. The permit holder shall provide at least ten (10) business days advance notice prior to the conference, and provisions for the meeting to be conducted by phone or electronically by staff of the Florida Fish and Wildlife Conservation Commission (FWC). The proposed locations of the structures shall be staked out for the conference. A copy of the all approved plans (including the lighting plan) shall be made available on site for the meeting and shall remain on site for consultation during project construction. Contact **Christian Lambright** at 561-681-6600 or christian.lambright@dep.state.fl.us to schedule the conference.
2. No operation, transportation or storage of equipment or materials is authorized seaward of the dune crest or rigid coastal structure during the marine turtle nesting season. The marine turtle nesting season is March 1 through October 31.
3. Construction fences installed on the east side of the roadway must located as far landward as possible, designed to prevent the entrapment or entanglement of sea turtles, constructed without concrete footers or rock base materials and installed outside the marine turtle nesting season. All construction fences must be removed at the completion of construction.
4. All rubble and debris resulting from this construction shall be removed to a location landward of the coastal construction control line.

5. All additional fill material shall be obtained from a source landward of the control line and shall consist of sand which is similar to that already on the site in both grain size and coloration. All imported and excavated fill material shall be free of construction debris, rocks, or other foreign matter. A sample of the sand shall be provided to the staff representative of the Department during the preconstruction conference.
6. Construction activities must be conducted to minimize interference with public beach access.
7. Prior to completion of construction activity authorized under this permit, the permit holder shall submit to the Department for review and approval a dune enhancement and mitigation plan containing, at minimum, the following:
 - 7.1. A schedule for completion of dune enhancement activities, reporting of enhancement activities and quantities, and monitoring of planting success.
 - 7.2. Dune enhancement plan and cross-section views, and specifications for the placement of beach compatible sand to fill isolated gaps between existing dune gaps and to restore the dune system where no dunes nor access points occur. The seaward toe of fill must be located so as not to interact with high frequency storm events. Side slopes match the slope of natural dunes in the area or are equal or less than the angle of repose for the proposed fill material (approximately 32 degrees) and in no case shall exceed a 4:1 horizontal run to vertical rise ratio. Dune crest elevations should be set at the approximate crest elevation of existing dunes in the area.
 - 7.3. A planting plan, including temporary irrigation or watering, for the establishment of a minimum of 8,900 square feet of native beach dune vegetation plantings. Dune enhancement plantings must meet the following minimum standards.
 - 7.3.1. A mix of a minimum of three different species of native tolerant beach dune vegetation are to be planted. Herbaceous and grass species are to be spaced throughout the designated dune enhancement area in staggered rows a maximum distance of 18 inches apart. Grass planting units must be installed a minimum of 6 inches deep. Planting units must be fertilized, and watered-in the at the time of installation, then irrigated/watered and fertilize only as necessary until the plants are established and meet the survival criteria below.
 - 7.3.2. Irrigation pipes, if any, must be entrenched 1 to 3 inches below grade so as not to pose a barrier to marine turtle hatchlings and to allow for easy removal. The irrigation system is to be designed and maintained so that watering of the unplanted

sandy beach does not occur. In the event a marine turtle nest is deposited within the newly established dune planting area, the irrigation system must be modified so that watering within 10 feet of the nest does not occur. Daily inspection of the irrigation system is to be conducted to ensure compliance with this condition.

- 7.3.3. The dune restoration area must be located to prevent trampling or protected from foot traffic or other encroachments. Signs or rope and bollard barriers, if necessary, will be constructed as approved by the Department field representative to prevent trampling of vegetation and erosion of the dune feature. Rope and post bollards are to be of minimal dimensions, spaced on minimum 10-foot centers and designed and maintained so that the rope is a minimum of 3-feet above ground.
- 7.3.4. Within 180 days of installation, a minimum 90 percent overall survival rate of the planting units will be established and 80 percent of the planted area covered with the selected species. Deficient areas must be replanted and maintain the plantings until the above success criterion are met. Irrigation systems and other structures placed during plant installation must be removed only after approval of planting success by the Department and within thirty days from the submittal for final project certification.
- 7.4. Plantings in other areas of the project shall not include invasive nuisance plant species such as listed in the Florida Exotic Pest Plant Council's 2005 List of Invasive Species Category I and II.
- 7.5. Prior to submitting the final certification, the permit holder shall submit an as-built plan prepared and certified by a licensed surveyor and mapper, landscape architect, or professional engineer, showing that the dune enhancement fill placement and planting establishment has been completed in full accordance with the special permit conditions and the approved planting plan.
- 8. All permanent exterior lighting shall be installed and maintained such that lights do not disturb marine turtles (are not visible from the beach) as per Section 62B-33.005, Florida Administrative Code. Lighting shall be installed and maintained as depicted on the Department's and FWC approved lighting plan, (approved lighting schematic, Fixture Table and associated cutsheets) signed and dated February 6, 2014.
 - 8.1. No substitutions or alterations to the approved FWC stamped lighting plan are allowed. If during construction, an approved fixture or lamp needs to be changed to a different type, manufacturer or catalog number for any reason, including visibility from the beach; or if the location of any approved fixture needs to be changed, it shall be submitted for review and approval by the Department and FWC prior to installation.

- 8.2. There may be a decrease in the wattage of an approved lamp and/or a decrease in the total number of each approved fixture without submitting a modified lighting plan for review and approval.
- 8.3. No additional permanent or temporary exterior lighting is authorized on any structure or in the landscape in the project area unless otherwise authorized in an approved lighting plan, including fixtures intended to illuminate the project area. Prior to installing any temporary, construction or special event lighting, detailed lighting plans should be submitted to FWC for review.
9. To clarify General Condition 1. (s) of Section [62B-33.0155, Florida Administrative Code](#), the final certifications shall include a statement from the project engineer, architect, or lighting designer, as appropriate, that all permanent exterior lighting has been installed as depicted on the approved lighting plans. If sent electronically to the Department, a copy of the form shall also be sent to FWC at marineturtle@myfwc.com at the same time.
10. The permit holder shall arrange for a site inspection by FWC representatives within 30 days of the completion of all construction activities, including the installation of all exterior lights, by sending notification to marineturtle@myfwc.com.

Approved plans are incorporated into this permit by reference.

Done and ordered this 13th day of February 2014, in Tallahassee, Florida.

Attachment: General Permit Conditions

FILING AND ACKNOWLEDGEMENT
FILED, on this date, pursuant to S120.52
Florida Statutes, with the designated
Department Clerk, receipt of which is
hereby acknowledged.

Deputy Clerk

02/13/2014

Date

State of Florida
Department of Environmental Protection

Tony D. McNeal, P.E., Administrator
Coastal Construction Control Line Program
Division of Water Resource Management

NOTICE OF RIGHTS

This action is final and effective on the date filed with the Clerk of the Department unless a petition for an administrative hearing is timely filed under sections 120.569 and 120.57, Florida Statutes, before the deadline for filing a petition. On the filing of a timely and sufficient petition, this action will not be final and effective until further order of the Department. Because the administrative hearing process is designed to formulate final agency action, the hearing process may result in a modification of the agency action or even denial of the application.

Petition for Administrative Hearing

A person whose substantial interests are affected by the Department's action may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57, Florida Statutes. Pursuant to rule 28-106.201, Florida Administrative Code, a petition for an administrative hearing must contain the following information:

- (a) The name and address of each agency affected and each agency's file or identification number, if known;
- (b) The name, address, and telephone number of the petitioner; the name, address, and telephone number of the petitioner's representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner's substantial interests are or will be affected by the agency determination;
- (c) A statement of when and how the petitioner received notice of the agency decision;
- (d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;
- (e) A concise statement of the ultimate facts alleged, including the specific facts that the petitioner contends warrant reversal or modification of the agency's proposed action;
- (f) A statement of the specific rules or statutes that the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and
- (g) A statement of the relief sought by the petitioner, stating precisely the action that the petitioner wishes the agency to take with respect to the agency's proposed action.

The petition must be filed (**received by the Clerk**) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000. Also, a copy of the petition shall be mailed to the applicant at the address indicated above at the time of filing.

Time Period for Filing a Petition

In accordance with rule 62-110.106(3), Florida Administrative Code, petitions for an administrative hearing by the applicant must be filed within 21 days of receipt of this written notice. Petitions filed by any persons other than the applicant, and other than those entitled to written notice under section 120.60(3), Florida Statutes, must be filed within 21 days of publication of the notice or within 21 days of receipt of the written notice, whichever occurs first. Under section 120.60(3), Florida Statutes, however, any person who has asked the Department for notice of agency action may file a petition within 21 days of

receipt of such notice, regardless of the date of publication. The failure to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under sections 120.569 and 120.57, Florida Statutes, or to intervene in this proceeding and participate as a party to it. Any subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with rule 28-106.205, Florida Administrative Code.

Extension of Time

Under rule 62-110.106(4), Florida Administrative Code, a person whose substantial interests are affected by the Department's action may also request an extension of time to file a petition for an administrative hearing. The Department may, for good cause shown, grant the request for an extension of time. Requests for extension of time must be filed with the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000, before the applicable deadline for filing a petition for an administrative hearing. A timely request for extension of time shall toll the running of the time period for filing a petition until the request is acted upon.

Mediation

Mediation is not available in this proceeding.

Judicial Review

Once this decision becomes final, any party to this action has the right to seek judicial review pursuant to section 120.68, Florida Statutes, by filing a Notice of Appeal pursuant to rules 9.110 and 9.190, Florida Rules of Appellate Procedure, with the Clerk of the Department in the Office of General Counsel, 3900 Commonwealth Boulevard, M.S. 35, Tallahassee, Florida 32399-3000; and by filing a copy of the Notice of Appeal accompanied by the applicable filing fees with the appropriate District Court of Appeal. The Notice of Appeal must be filed within 30 days from the date this action is filed with the Clerk of the Department.

The Agency will not publish or require the person requesting a permit to publish in a newspaper a notice of receipt of the permit application or notice of Agency action granting or denying the permit.

Persons receiving a permit are advised that interested parties who become aware of Agency action approving or denying the permit, or who observe work on the project within certain time frames without any prior notice, may have rights to petition for an administrative hearing under Chapter 120, F.S. For this reason, it may be in the best interest of the person proposing the activity to publish, at its expense, a one-time "Notice of Permit Issuance" in a newspaper of general circulation in the county where the activity is located meeting the requirements of Chapter 50, F.S. Agency staff can provide persons with the information for such a notice upon request. Persons who are substantially affected by the proposed action may petition for an administrative hearing within the time frames specified in the notice and Chapter 120, F.S.

General Permit Conditions

Rule 62B-33.0155, Florida Administrative Code

- 1 The following general permit conditions shall apply, unless waived by the Department or modified by the permit:
 - a) The permittee shall carry out the construction or activity for which the permit was granted in accordance with the plans and specifications that were approved by the Department as part of the permit. Deviations therefrom, without written approval from the Department, shall be grounds for suspension of the work and revocation of the permit pursuant to Section 120.60(7), F.S., and shall result in assessment of civil fines or issuance of an order to alter or remove the unauthorized work, or both. No other construction or activities shall be conducted. No modifications to project size, location, or structural design are authorized without prior written approval from the Department. A copy of the notice to proceed shall be conspicuously displayed at the project site. Approved plans shall be made available for inspection by a Department representative.
 - b) The permittee shall conduct the construction or activity authorized under the permit using extreme care to prevent any adverse impacts to the beach and dune system, marine turtles, their nests and habitat, or adjacent property and structures.
 - c) The permittee shall allow any duly identified and authorized member of the Department to enter upon the premises associated with the project authorized by the permit for the purpose of ascertaining compliance with the terms of the permit and with the rules of the Department until all construction or activities authorized or required in the permit have been completed and all project performance reports, certifications, or other documents are received by the Department and determined to be consistent with the permit and approved plans.
 - d) The permittee shall hold and save the State of Florida, the Department, and its officers and employees harmless from any damage, no matter how occasioned and no matter what the amount, to persons or property that might result from the construction or activity authorized under the permit and from any and all claims and judgments resulting from such damage.
 - e) The permittee shall allow the Department to use all records, notes, monitoring data, and other information relating to construction or any activity under the permit, which are submitted, for any purpose necessary except where such use is otherwise specifically forbidden by law.
 - f) Construction traffic shall not occur and building materials shall not be stored on vegetated areas seaward of the control line unless specifically authorized by the permit. If the Department determines that this requirement is not being met, positive control measures, such as temporary fencing, designated access roads, adjustment of construction sequence, or other requirements, shall be provided by the permittee at the direction of the Department. Temporary construction fencing shall not be sited within marine turtle nesting habitats.
 - g) The permittee shall not disturb existing beach and dune topography and vegetation except as expressly authorized in the permit. Before the project is considered complete, any disturbed topography or vegetation shall be restored as prescribed in the permit with suitable fill material or revegetated with appropriate beach and dune vegetation.
 - h) All fill material placed seaward of the control line shall be sand which is similar to that already existing on the site in both coloration and grain size. All such fill material shall be free of construction debris, rocks, clay, or other foreign matter; shall be obtained from a source landward of the coastal construction control line; and shall be free of coarse gravel or cobbles.
 - i) If surplus sand fill results from any approved excavation seaward of the control line, such material shall be distributed seaward of the control line on the site, as directed by the Department, unless otherwise specifically authorized by the permit.
 - j) Any native salt-tolerant vegetation destroyed during construction shall be replaced with plants of the same species or, by authorization of the Department, with other native salt-tolerant vegetation suitable for beach and dune stabilization. Unless otherwise specifically authorized by the Department, all plants installed in beach and coastal areas – whether to replace vegetation displaced, damaged, or destroyed during construction or otherwise – shall be of species indigenous to Florida beaches and dunes, such as sea oats, sea grape, saw palmetto, panic grass, saltmeadow hay cordgrass, seashore saltgrass, and railroad vine, and grown from stock indigenous to the region in which the project is located.
 - k) All topographic restoration and revegetation work is subject to approval by the Department, and the status of restoration shall be reported as part of the final certification of the actual work performed.
 - l) If not specifically authorized elsewhere in the permit, no operation, transportation, or storage of equipment or materials is authorized seaward of the dune crest or rigid coastal structure during the marine turtle nesting season. The marine turtle nesting season is May 1 through October 31 in all counties except Brevard, Indian River, St. Lucie, Martin, Palm Beach, and Broward counties where leatherback turtle nesting occurs during the period of March 1 through October 31.
 - m) If not specifically authorized elsewhere in the permit, no temporary lighting of the construction area is authorized at any time during the marine turtle nesting season and no additional permanent exterior lighting is authorized.

- n) All windows and glass doors visible from any point on the beach must be tinted to a transmittance value (light transmission from inside to outside) of 45% or less through the use of tinted glass or window film.
 - o) The permit has been issued to a specified property owner and is not valid for any other person unless formally transferred. An applicant requesting transfer of the permit shall sign two copies of the permit transfer agreement form, agreeing to comply with all terms and conditions of the permit, and return both copies to the Bureau. The transfer request shall be provided on the form entitled "Permit Transfer Agreement" – DEP Form 73-103 (Revised 1/04), which is hereby adopted and incorporated by reference. No work shall proceed under the permit until the new owner has received a copy of the transfer agreement approved by the Department. A copy of the transfer agreement shall be displayed on the construction site along with the permit. An expired permit shall not be transferred.
 - p) The permittee shall immediately inform the Bureau of any change of mailing address of the permittee and any authorized agent until all requirements of the permit are met.
 - q) For permits involving major structures or activities, the permittee shall submit to the Bureau periodic progress reports on a monthly basis beginning at the start of construction and continuing until all work has been completed. If a permit involves either new armoring or major reconstruction of existing armoring, the reports shall be certified by an engineer licensed in the State of Florida. The permittee or engineer, as appropriate, shall certify that as of the date of each report all construction has been performed in compliance with the plans and project description approved as a part of the permit and with all conditions of the permit, or shall specify any deviation from the plans, project description, or conditions of the permit. The report shall also state the percent of completion of the project and each major individual component. The reports shall be provided to the Bureau using the form entitled "Periodic Progress Report" – DEP Form 73-111 (Revised 6/04), which is hereby adopted and incorporated by reference. Permits for minor structures or activities do not require submittal of periodic reports unless required by special permit condition.
 - r) For permits involving habitable major structures, all construction on the permitted structure shall stop when the foundation pilings have been installed. At that time the foundation location form shall be submitted to and accepted by the Bureau prior to proceeding with further vertical construction above the foundation. The form shall be signed by a professional surveyor, licensed pursuant to Chapter 472, F.S., and shall be based upon such surveys performed in accordance with Chapter 472, F.S., as are necessary to determine the actual configuration and dimensioned relationship of the installed pilings to the control line. The information shall be provided to the Bureau using the form entitled "Foundation Location Certification" – DEP Form 73-114B (Revised 9/05), which is hereby adopted and incorporated by reference. Phasing of foundation certifications is acceptable. The Department shall notify the permittee of approval or rejection of the form within seven (7) working days after staff receipt of the form. All survey information upon which the form is based shall be made available to the Bureau upon request. Permits for repairs or additions to existing structures with nonconforming foundations are exempt from this condition.
 - s) For permits involving major structures, the permittee shall provide the Bureau with a report by an engineer or architect licensed in the State of Florida within thirty (30) days following completion of the work. The report shall state that all locations specified by the permit have been verified and that other construction and activities authorized by the permit have been performed in compliance with the plans and project description approved as a part of the permit and all conditions of the permit; or shall describe any deviations from the approved plans, project description, or permit conditions, and any work not performed. Such report shall not relieve the permittee of the provisions of paragraph 62B-33.0155(1)(a), F.A.C. If none of the permitted work is performed, the permittee shall inform the Bureau in writing no later than 30 days following expiration of the permit. The report shall be provided on the form entitled "Final Certification" DEP Form 73-115B (Revised 9/05), which is hereby adopted and incorporated by reference.
 - t) Authorization for construction of armoring or other rigid coastal structures is based on an engineering review and assessment of the design and anticipated performance and impact of the structure as a complete unit. Construction of any less than the complete structure as approved by the Department is not authorized and shall result in the assessment of an administrative fine and the issuance of an order to remove the partially constructed structure. Modifications to the project size, location, or structural design shall be authorized by the Department in accordance with Rule 62B-33.013, F.A.C.
- 2 The permittee shall not commence any excavation, construction, or other physical activity on or encroaching on the sovereignty land of Florida seaward of the mean high water line or, if established, the erosion control line until the permittee has received from the Board of Trustees of the Internal Improvement Trust Fund the required lease, license, easement, or other form of consent authorizing the proposed use.
 - 3 The permittee shall obtain any applicable licenses or permits required by Federal, state, county, or municipal law.
 - 4 This permit does not authorize trespass onto other property.
 - 5 In the event of a conflict between a general permit condition and a special permit condition, the special permit condition shall prevail.
 - 6 Copies of any forms referenced above can be obtained by writing to the Department of Environmental Protection, Bureau of Beaches and Coastal Systems, 3900 Commonwealth Boulevard, Mail Station 300, Tallahassee, Florida 32399-3000, or by telephoning (850) 488-7708.

FINAL CERTIFICATION

Mail to:

Coastal Construction Control Line Program
Division of Water Resource Management
Florida Department of Environmental
Protection 2600 Blair Stone Road
Mail Station 3566
Tallahassee, Florida 32399-2400

Permit Number: BO-694 (Corrected)

E-Mail to: CCCL@dep.state.fl.us

Permittee Name: Florida Department of Transportation

This is to certify that the work under the permit for construction or other activities seaward of the coastal construction control line pursuant to Section 161.053, Florida Statutes, was inspected by the undersigned and was found to be acceptable and satisfactory in accordance with the approved plans and project description and with all conditions of the permit. All permitted construction or activities have been completed, and no unpermitted construction or activities have occurred. Location and elevations specified by the permit and approved plans have been verified and found to be correct, and topography and vegetation have been either preserved or restored as required by the permit.

FOR WORK INCLUDING: Construction of SR A1A (North Ocean Boulevard) roadway (reconstruction), storm water runoff management system, other structures/activities, excavation, and fill placement.

NOTE: Any deviations from the permit and any portions of the permitted work not actually performed shall be noted and described in detail as an exception to this certification.

PERMITTEE NAME: Florida Department of

1. If construction has occurred, please describe its maximum extent in the space provided below (If no work at all has been performed, please report "Not Started." If construction or other authorized activity has begun but no progress has been made since the last report, please report "No Progress"):

CONSTRUCTION TO DATE INCLUDES:

2. All work performed as of this date is described above and is hereby certified to be in compliance with the project description and plans approved by the Department of Environmental Protection as part of the permit and with all conditions of the permit. Locations and elevations of all construction as of this date have been specifically verified as applicable and have been found to comply with the project description, approved plans, and conditions of the permit. No unpermitted construction or activity has occurred (Any exceptions to the statement above are to be described and explained under Item Number 1 above, as part of this report. The explanation should state why the construction or activities not in accordance with the permit has occurred.)
3. The property owner or authorized agent may sign these progress reports. However for new armoring or major reconstructed armoring, the reports must be signed by an engineer licensed in the state of Florida following each period in which construction has occurred.
