Night Time Noise Mitigation Plan

To whom it may concern,

In reference to the night-time work associated with utility installations on SE 5th Avenue (Building Permit #14101171), the following steps will be taken to reduce and mitigate noise:

- Saw-cutting/removal of asphalt and excavation of dirt to take place during normal working hours
- Installations to be pre-fabricated as much as possible
- Trucks/equipment to utilize white-noise back up signaling

The night time work is to take place over 3 nights within the 30 day overall duration and only entails work requiring water service shut-downs.

Respectfully,

Guy Reese
