

NW 19th Street Project

(NW 31st Avenue to Powerline Road)

The NW 19th Street project will install landscaped islands within the existing center turn lane as well as upgrade the existing street lighting. These items will address the concerns raised by the residents of Lake Aire Palm View, Rock Island, and Lauderdale Manors during public outreach that was conducted earlier this year regarding the potential project to add bike lanes. The priority for these neighborhoods on this street was to reduce the feeling of it being a highway by adding the landscaped islands in the center and to improve the lighting to improve safety.
