Citizens Against Bahia Mar Fiasco

(Note: Scroll down for updates and related news)

The proposed plan for development of Bahia Mar is the most important land use issue the Citizens of Fort Lauderdale have ever faced. The consequences-financially, physically and environmentally-will last forever and will be irreparable.

In 1947 the Citizens of Fort Lauderdale bought the 38-acre Bahia Mar property from the Federal Government. The property included approximately 20 acres of submerged lands and 16 acres of upland, making it perfect for the public recreational purposes for which it was purchased. Seventy years later, Bahia Mar, the site of the original 'Fort Lauderdale', is one of the most valuable and iconic properties owned by its Citizens. The world-famous marina helped to earn Fort Lauderdale its title as Yachting Capital of the World.

Bahia Mar has 46 years remaining on a Lease between the City and Rahn Bahia Mar. The Leaseholder agreed that "the leased premises shall be used as a first-class hotel-marina and resort complex" and to "maintain the character of Bahia Mar as a marina".

Now the Leaseholder wants to redevelop the property to include an additional 651 apartments and almost 176,965 square feet of offices, retail, restaurants, a supermarket and a 2600 car underground garage.

Last year, many Fort Lauderdale residents successfully defeated the Leaseholder's plan. Now the Leaseholder is back with another plan, similar in scope. Our objections are the same.

16 reasons this development must be stopped:

1. Barrier island environment will suffer irreparable harm from the nature and density of this development in violation of the State's Master Environmental Plan.
2. Leaseholder has failed to document any financial benefit to the owner of the property, the City and its Citizens. A news release said this would be a \$2 Billion project for the Leaseholder from their development of leased public land but what is the cost and benefit to the owners of the property?
3. Risk of cost overruns, revenue loss and unpredictable delays from the certainty of storms could jeopardize development and Fort Lauderdale taxpayers could face a financially catastrophic bailout scenario.
4. Use of the Marina by pristine, multi-million dollar yachts will be deterred by 10 years of constant airborne construction dust, chemicals and debris.
5. The size and attendance at the World's Largest Boat Show will inevitably suffer.
6. Fort Lauderdale voters have asked the City Commission to ensure that public property on the Barrier Island be used for a public purpose. What is the public purpose of 651 apartments? The Leaseholder has provided no market surveys to show there is a demand for 651 new rental units.

7. 10 years of construction will add to intolerable traffic grid lock from the beach to 17th Street & Las Olas Boulevard and Sunrise Boulevard.
8. The impact on grossly inadequate public infrastructure and public safety resources is unknown and no studies have been done.
9. Hurricanes, rising sea level & flooding will endanger and disrupt this project, will spike Insurance and maintenance costs and lead to cost overruns.
10. 12 new buildings will cover the precious open space that is Bahia Mar and defile the site of the City's most historic landmark, Fort Lauderdale.
11. No market research has been performed on the public's use of proposed facilities or the competitive impact on existing stores and restaurants. Does the public come to the barrier island for its natural environment and the beach or an urban downtown-like experience?
12. Hotel and marina use and revenues will suffer during the 10 year construction phases.
13. Public officials have ignore sustained and overwhelming citizen opposition for over two years.
14. The project's underground garages will potentially flood as they did in Downtown Miami during Hurricane Irma.
15. Zoning of the site violates Comprehensive Plan and the proposal violates terms of the long term lease.
16. Traffic is already a nightmare – 651 apartments, a super market, shops, restaurants, and offices will make congestion even worse which will detract from the primary destination and purpose of the barrier island, Public access to the beach.

This plan is unsustainable and incompatible with the Maritime concept of a Marina, Hotel-Resort complex open to the public. Permanent residential use, whether condominium ownership or rental units, was never conceived as a use for this public owned property. Other privately owned sites are available for risk development that do not collide with the Marina-Recreation-Resort-Boat Show uses. If this project fails the taxpayers will be facing a monumental financial bailout. The developer will fade back into the Miami sunset.

There are many more reasons why our public officials should JUST SAY NO!

Please sign this petitions and tell Mayor Jack Seiler and Commissioners McKinzie, Roberts, Rogers and Trantalis why this is the wrong project for this site.

The Leaseholder-Developers' Plan will cause IRREPARABLE HARM to this property and they should be prevented from speculating with our Public Land!
