BACKGROUND:

On June 18, 2015 the Supreme Court rules in Reed's favor in Reed vs. Town of Gilbert which required signs to address content neutrality. In an effort to remove any content based sign regulations from the ULDR, staff is amending the current ordinance to address content neutrality. The proposed zoning amendment is intended to regulate on-premise business signs and to allow reasonable advertising area to business establishments. It is meant to eliminate conspicuous excesses in urban advertising but not to destroy the right to advertise. The proposed Ordinance is attached as Exhibit 1.

The new scope of Section 47-22 is to regulate the time, place and manner in which a sign is erected, posted, or displayed on private property such as the height, area, location, and other similar aspects of signs and sign structures and does not in any manner regulate the content of the written or depicted copy on any individual sign, nor does this section regulate in any manner purely graphic material as herein defined; noncommercial holiday signs and decorations; signs on products, product containers, or product dispensers; public informational and safety signs; or signs required by local, state, or federal law; window displays or building designs, exclusive of any commercial signage or other commercial communication. This section regulates signs intended to be viewed from public rights-of-way, vehicular travelways, and waterways. Any sign authorized by this section shall be allowed to contain noncommercial copy in lieu of commercial or other copy.

The proposed regulations are outlined below.
