WHEREAS, the taxiway is located 305 feet from the centerline of Runway 9-27, instead of the required 400 foot distance; and

WHEREAS, the FAA is recommending that this portion be relocated to the required 400 foot separation distance in order to comply with current FAA runway/taxiway separation criteria; and

WHEREAS, the project will involve the demolition of the existing 3,200 linear feet of taxiway pavement, including lights and guidance signs, and construction of a new asphalt paved taxiway including grading, subgrade, limerock base course, pavement striping, new taxiway LED edge-lights, and guidance signs; and

WHEREAS, the existing run-up apron located between taxiways Delta and Sierra will be demolished and a new run-up area will be constructed to the east of Taxiway Sierra; and

WHEREAS, the design costs are estimated to be \$390,002; and

WHEREAS, the Florida Department of Transportation ("FDOT") and the FAA have agreed to provide grant funding for 95% reimbursement of eligible design costs for this project; and

WHEREAS, Airport staff have prepared a grant application for acceptance of a grant from the FAA in the amount of \$351,002, or 90% of the anticipated design costs, whichever is less;

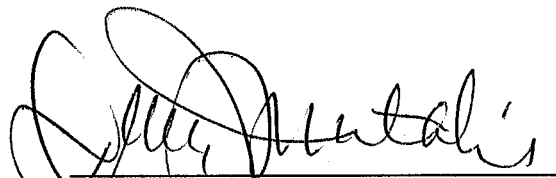

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COMMISSION OF THE CITY OF FORT LAUDERDALE, FLORIDA:
