Spare parts must be immediately available or in stock and stored locally.

Data Storage/Recall - Critical data such as tank level shall be kept internally in the programmable logic controller (PLC) memory with the level recorded every fifteen minutes for the past 30 days. Accessing the Contractor provided website page with color graphical user interface, the level can be viewed on an x-y chart showing the values and also downloaded in a *.csv or *.txt format to maintain weekly histories. The same shall be accomplished with other measurements (such as flow if a meter is incorporated into the system).

Web-Based Access – Contractor shall provide the City with web based access via a password protected secure virtual private network (VPN) to each of the feed systems that shows vital information in a color graphical user interface format such as pump running, system pressure, dosage target and tank level.

Monthly Reports – Contractor will provide monthly report summaries to the City showing atmospheric sulfide and aqueous Hydrogen Sulfide levels at the monitoring locations and chemical usage at each dosing site and an annual report providing data on monitoring, chemical usage, and equipment maintenance.

3.1 Hydrogen Sulfide Monitoring Services

In order to sufficiently monitor each control point site, the following parameters have been set for wastewater and atmospheric sulfide testing:

The Contractor shall maintain a minimum of two (2) technicians for routine wastewater analysis, equipment maintenance, delivery support and other services.

Each technician employed by the Contractor shall have a minimum of five (5) years of experience in municipal wastewater analysis.

- Temperature (Fahrenheit)
- PH value
- Chemical residue, ppm
- 24-hour atmospheric hydrogen sulfide monitoring (7-Day session per month)

Upon request, and at no additional costs to the City, the technician will assist the City in conducting resident complaint follow-up. The Contractor shall not be held responsible for this assistance should the dosage rate be reduced below the recommended rate based on decisions by the City.

Lohmeyer Wastewater Treatment Plant (GTL) for control of hydrogen sulfide induced odor and corrosion, and a plan must be implemented to examine and record sulfides contained in wastewater streams and in the air in areas surrounding these control points. This plan is to be used for the purpose of providing the most cost-effective and optimized sulfide control program possible to the City. The City reserves the right to change one control point to a different chemical feed for testing or other purposes. This will not absolve the contractor of sulfide monitoring in this area.
