

**CITY OF FORT LAUDERDALE  
City Commission Agenda Memo  
CONFERENCE MEETING**

**#19-0406**

---

**TO:** Honorable Mayor & Members of the  
Fort Lauderdale City Commission

**FROM:** Chris Lagerbloom, ICMA-CM, City Manager

**DATE:** May 7, 2019

**TITLE:** Zonar Update Presentation – Zoning Code Software and Smart 3D  
Modeling – Gridics LLC - **(Commission Districts 1, 2, 3 and 4)**

---

**Background**

The purpose of this presentation is to update the City Commission on the Zonar interactive digital mapping software implementation. The City Commission approved a two-year contract for the purchase of the Zonar software from Gridics, LLC on January 23, 2018.

The software provides a three-dimensional interactive digital mapping solution to help staff conduct development feasibility studies, scenarios and site plan review analysis. Utilizing integration with GIS data, the software can be used to the benefit of staff and the community to visually evaluate the effects of proposed development projects, as well as visualize the effects zoning regulations and zoning changes have on the existing built environment by imagining potential build-out scenarios or proposed zoning changes.
