## Part 3: Project Information

### Project Title: Downtown Fort Lauderdale Mobility Hub Streetscape

Project Number	Temporary Project Number	Date Created	Start Date	End Date
FL-2016-028-01-00	7106-2016-3-P1	4/29/2016	7/31/2016	6/30/2019

#### Project Description

This is an FY 2014 STP Flex (Section 5307) application in the amount of \$3,500,000 and a Joint Development Initiative to identify opportunities surrounding a public-private partnership to develop a Mobility Hub in Downtown Fort Lauderdale. The Broward MPO will fund the design and construction of streetscape improvements to ensure connectivity with the mass transit services, facilitate ease of movement throughout the area, and promote safety for pedestrians and bicyclists. The streetscape improvements will be in compliance with the guiding Fort Lauderdale plans, policies and programs, and will include hardscape and softscape elements such as traffic calming and pedestrian safety treatments, wide sidewalks, landscaping, and street furniture such as benches, trash receptacles, bicycle racks and light poles.

#### Project Benefits

The streetscape improvements in this project will provide safe and comfortable pedestrian connections to the existing and future transit options in the area. The streetscape will also provide the physical framework for private investment in the redevelopment of properties in the area.

#### Additional Information

The Broward MPO developed the concept of Mobility Hubs as high-density places where readily-available and high-quality transit service intersects with dense, mixed-use development, as well as bicycle and pedestrian-friendly urban design. A Mobility Hub is a place where people go to make transportation connections. More specifically, Mobility Hubs are critical points within the multi-modal transportation system, with frequent transit service, connections for walking, biking, park-n-ride, transit, and carpooling, proximity to areas with high development potential, and opportunities to generate transit ridership and transfers.

The Downtown Fort Lauderdale Mobility Hub will be a multi-block intermodal terminal that will connect various transportation choices. Current transit service includes local bus service to points throughout Broward County, shuttle bus connections to Tri-Rail stations, and Sun Trolley community shuttle connections. Upcoming transit service includes the?? Wave Streetcar project,?? All-Aboard Florida/Brightline (intercity passenger rail service on the Florida East Coast (FEC) corridor between Downtown Miami and Orlando,??Tri-Rail Coastal Link (FEC commuter rail passenger rail service), and regional express bus service.

#### Location Description

The project study area is a roughly four (4) block area that lies north and west of the northwest corner of Broward Boulevard and Andrews Avenue. The study area limits has a southern boundary of Broward Boulevard, northern boundary of NW 4th Street, eastern boundary of Andrews Avenue and western boundary of the FEC Railroad.

#### Security

No -- our organization will NOT expend at least 1% of the 5307 funds in this application for security-related projects

Comment	<p>1. The attachment of the TDC approval at the application level is correct. However, the appropriate amount of toll credits must be reflected in the appropriate area in the Budget Control Totals of each ALI in TrAMS. You will see the option to add these amounts in the Activity Line Items and Budget Screen [See screenshot below].</p> <p>2. For all of those capital expenditure ALIs without items over \$5k (i.e., 11.75.95), must explicitly state that no items will exceed \$5k in cost.</p>
