Spare parts must be immediately available or in stock and stored locally.

Data Storage/Recall - Critical data such as tank level shall be kept internally in the programmable logic controller (PLC) memory with the level recorded every fifteen minutes for the past 30 days. Accessing the Contractor provided website page with color graphical user interface, the level can be viewed on an x-y chart showing the values and also downloaded in a *.csv or *.txt format to maintain weekly histories. The same shall be accomplished with other measurements (such as flow if a meter is incorporated into the system).

Web-Based Access – Contractor shall provide the City with web based access via a password protected secure virtual private network (VPN) to each of the feed systems that shows vital information in a color graphical user interface format such as pump running, system pressure, dosage target and tank level.

Monthly Reports – Contractor will provide monthly report summaries to the City showing atmospheric sulfide and aqueous Hydrogen Sulfide levels at the monitoring locations and chemical usage at each dosing site and an annual report providing data on monitoring, chemical usage, and equipment maintenance.

3.1 Hydrogen Sulfide Monitoring Services

In order to sufficiently monitor each control point site, the following parameters have been set for wastewater and atmospheric sulfide testing:

Continuous atmospheric sulfide monitoring after screening and grit removal shall be tied to the web-based remote system.

Monthly inspections and reports by trained technicians shall additionally include the following procedures:

- Total & dissolved sulfide level, mg/L
- Atmospheric hydrogen sulfide level, ppm,

Hydrogen Peroxide (50%) Chemical Oxidizer for Odor Control

Hydrogen Peroxide 50% is a strong oxidizer effective at controlling odor-causing sulfides and related oxidizable compounds in municipal and industrial wastewater systems.

During treatment, it decomposes to oxygen and water, thereby adding dissolved oxygen to the system which reduces Biological Oxygen Demand (BOD).

Typical properties are listed for information only, and are not to be considered as specification requirements. These items are not analyzed on a routine basis.

Typical Application

- Gravity mains < 2hrs Retention time (Rt.)
- Force mains < 2hr Rt.
- Lift station wetwells
- Solids processing
- Septage and leachate
- Ponds and lagoons

50% Hydrogen Peroxide is a strong oxidizer effective in controlling sulfide and organic related odors in wastewater collection and treatment systems. It is typically applied to a wastewater system where there is a retention time of less than two hours and at least 30 minutes prior to the point where the hydrogen sulfide is released.

Typical Feed Requirements

50% Hydrogen Peroxide can be added directly to the system creating the odors and is generally applied using custom designed feed systems. Dose rates will vary with the application.

Typically, a minimum of 1-3 mg/L of 50% Hydrogen Peroxide is required to effectively remove 1 mg of sulfide.

For additional treatment information, including dosage specific to your application, please contact your Evoqua representative.

- Symptoms/effects after skin contact : Burns. Blisters. Necrosis.
- Symptoms/effects after eye contact : Serious damage to eyes.
- Symptoms/effects after ingestion : Oxygen rapid release may cause stomach swelling and hemorrhaging, which may produce major or even fatal injury to organs.

4.3. Immediate medical attention and special treatment, if necessary

Hydrogen peroxide at these concentrations is a strong oxidant. Direct contact with the eye is likely to cause corneal damage especially if not washed immediately. Careful ophthalmologic evaluation is recommended, and the possibility of local corticosteroid therapy should be considered. Because of the likelihood of corrosive effects on the gastrointestinal tract after ingestion, and the unlikelihood of systematic effects, attempts at evacuating the stomach via emesis induction or gastric lavage should be avoided. There is a remote possibility that a nasogastric or orogastric tube may be required for the reductions of severe distension due to gas formation.

SECTION 5: Fire-fighting measures

5.1. Suitable (and unsuitable) extinguishing media

- Suitable extinguishing media : Water spray.
- Unsuitable extinguishing media : dry chemical powder. Foam. Carbon dioxide (CO2).

5.2. Specific hazards arising from the chemical

- Fire hazard : May cause fire or explosion; strong oxidizer.

Hydrogen Peroxide 50%

Safety Data Sheet

according to Federal Register / Vol. 77, No. 58 / Monday, March 26, 2012 / Rules and Regulations

Hazardous decomposition products in case of fire : Toxic fumes may be released.

5.3. Special protective equipment and precautions for fire-fighters

Firefighting instructions : Use water spray to cool fire exposed surfaces and protect personnel. Move containers from fire area if you can do it without risk. In case of major fire and large quantities: Evacuate area.

Protection during firefighting : Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

6.1.1. For non-emergency personnel

Emergency procedures : Isolate and post spill area. Keep people away from and upwind of spill/leak. Eliminate all sources of ignition and remove combustible materials. Avoid contact with skin, eyes and clothing.

6.1.2. For emergency responders

Protective equipment : Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".

6.2. Environmental precautions

Avoid release to the environment. Do not allow to enter drains or water courses.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up : Dike to collect larger spills. Stop leak and contain spill if this can be done safely. Flush area with flooding quantities of water. Hydrogen peroxide may be decomposed by adding sodium metabisulfite or sodium sulfite after diluting to about 5%.

Other information : Combustible materials exposed to hydrogen peroxide should be immediately submerged in or rinsed with large amounts of water to ensure that all hydrogen peroxide is removed. Residual hydrogen peroxide that is allowed to dry on organic materials such as paper, fabrics, cotton, leather, wood, or other combustibles can cause the material to ignite.

6.4. Reference to other sections

For further information refer to section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Precautions for safe handling : Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Wear personal protective equipment. Use only outdoors or in a well-ventilated area. Avoid contact with skin and eyes. Do not breathe dust/fume/gas/mist/vapors/spray. Never return unused hydrogen peroxide to original container. Empty drums should be triple rinsed with water before discarding. Utensils used for handling hydrogen peroxide should only be made of glass, stainless steel, aluminum, or plastic. Pipes and equipment should be passivated before first use.

Hygiene measures : Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Always wash hands after handling the product.

7.2. Conditions for safe storage, including any incompatibilities

Storage conditions : Store out of direct sunlight and away from combustibles. Use only outdoors or in a well-ventilated area. Containers should be visually inspected on a regular basis to detect any abnormalities. Store only in vented original containers. Store rooms or warehouses should be made of non-combustible materials with impermeable floors. In case of release, spillage should flow to safe area.

Incompatible materials : Combustible materials.

- Appropriate engineering controls : Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Ensure good ventilation of the work station.
- Environmental exposure controls : Avoid release to the environment.

8.3. Individual protection measures/Personal protective equipment

Hand protection:

For hand protection, wear approved gloves made of nitrile, PVC, or neoprene. DO NOT use cotton, wool or leather for these materials react RAPIDLY with higher concentrations of hydrogen peroxide. Thoroughly rinse the outside of gloves with water prior to removal. Inspect regularly for leaks.

Eye protection:

Use chemical splash-type monogoggles and a full-face shield made of polycarbonate, acetate, polycarbonate/acetate, PETG or thermoplastic.

Skin and body protection:

For body protection wear impervious clothing such as an approved splash protective suit made of SBR rubber, PVC (PVC Outershell w/Polyester Substrate), Gore-Tex (Polyester trilaminate w/Gore-Tex), or a specialized HAZMAT Splash or Protective Suite (Level A, B, or C). For foot protection, wear approved boots made of NBR, PVC, Polyurethane, or neoprene. Overboots made of Latex or PVC, as well as firefighter boots or specialized HAZMAT boots are also permitted. DO NOT wear any form of boot or overboot made of nylon or nylon blends. DO NOT USE cotton, wool or leather as these materials react rapidly with higher concentrations of hydrogen peroxide. Completely submerge hydrogen peroxide contaminated clothing or other materials in water prior to drying. Residual hydrogen peroxide, if allowed to dry on materials such as paper, fabrics, cotton, leather, wood or other combustibles, can cause the material to ignite and result in a fire.

Respiratory protection:

If concentrations in excess of 10 ppm are expected, use NIOSH/DHHS approved self-contained breathing apparatus (SCBA) or other approved air-supplied respirator (ASR) equipment (e.g, a full-face airline respirator (ALR)). DO NOT use any form of air-purifying respirator (APR) or filtering facepiece (dust mask), especially those containing oxidizable sorbants such as activated carbon.

- 5.15 UNUSUAL CIRCUMSTANCES:** If during a contract term where costs to the City are to remain firm or adjustments are restricted by a percentage or CPI cap, unusual circumstances that could not have been foreseen by either party of the contract occur, and those circumstances significantly affect the Contractor's cost in providing the required prior items or services, then the Contractor may request adjustments to the costs to the City to reflect the changed circumstances. The circumstances must be beyond the control of the Contractor, and the requested adjustments must be fully documented. The City may, after examination, refuse to accept the adjusted costs if they are not properly documented, increases are considered to be excessive, or decreases are considered to be insufficient. In the event the City does not wish to accept the adjusted costs and the matter cannot be resolved to the satisfaction of the City, the City will reserve the following options:
1. The contract can be canceled by the City upon giving thirty (30) days written notice to the Contractor with no penalty to the City or Contractor. The Contractor shall fill all City requirements submitted to the Contractor until the termination date contained in the notice.
 2. The City requires the Contractor to continue to provide the items and services at the firm fixed (non-adjusted) cost until the termination of the contract term then in effect.
 3. If the City, in its interest and in its sole opinion, determines that the Contractor in a capricious manner attempted to use this section of the contract to relieve Contractor of a legitimate obligation under the contract, and no unusual circumstances had occurred, the City reserves the right to take any and all action under law or equity. Such action shall include, but not be limited to, declaring the Contractor in default and disqualifying Contractor from receiving any business from the City for a stated period of time.

If the City does agree to adjusted costs, these adjusted costs shall not be invoiced to the City until the Contractor receives notice in writing signed by a person authorized to bind the City in such matters.

- 5.16 ELIGIBILITY:** If applicable, the Contractor must first register with the Florida Department of State in accordance with Florida Statutes, prior to entering into a contract with the City.
- 5.17 PATENTS AND ROYALTIES:** The Contractor, without exception, shall defend, indemnify, and hold harmless the City and the City's employees, officers, employees, volunteers, and agents from and against liability of any nature and kind, including cost and expenses for or on account of any copyrighted, patented or un-patented invention, process, or article manufactured or used in the performance of the contract, including their use by the City. If the Contractor uses any design, device, or materials covered by letters, patent or copyright, it is mutually agreed and understood without exception that the bid prices shall include any and all royalties or costs arising from the use of such design, device, or materials in any way involved in the work.

- 5.18 ASSIGNMENT:** Contractor shall not transfer or assign the performance required by this ITB without the prior written consent of the City. Any award issued pursuant to this ITB, and the monies, which may become due hereunder, are not assignable except with the prior written approval of the City Commission or the City Manager or City Manager's designee, depending on original award approval.
- 5.19 GOVERNING LAW; VENUE:** The Contract shall be governed by and construed in accordance with the laws of the State of Florida. Venue for any lawsuit by either party against the other party or otherwise arising out of the Contract, and for any other legal proceeding, shall be in the courts in and for Broward County, Florida, or in the event of federal jurisdiction, in the Southern District of Florida.

3. Ensure that public records that are exempt or confidential and exempt from public records disclosure requirements are not disclosed except as authorized by law for the duration of the contract term and following completion of the contract if the Contractor does not transfer the records to the City.
