As the duly authorized representative of the Grantee, I certify that the Grantee:

- Will not use an indirect cost rate to calculate and charge indirect costs under the grant.

- Will calculate and charge indirect costs under the grant using the indirect cost rate(s) listed below, and each rate listed is included in an indirect cost rate proposal developed in accordance with the applicable appendix to 2 CFR part 200 and, *if required*, was approved by the cognizant agency for indirect costs.

Agency/Dept./Major Function	Indirect cost rate	Direct Cost Base

Instructions for the Recipient:

The Recipient must mark the one (and only one) checkbox above that best reflects how the Grantee’s indirect costs will be calculated and charged under the grant. Do not include indirect cost rate information for subrecipients.

The table following the third box must be completed only if that box is checked. When listing a rate in the table, enter both the percentage amount (e.g., 10%) and the type of direct cost base to be used. For example, if the direct cost base used for calculating indirect costs is Modified Total Direct Costs, then enter “MTDC” in the “Type of Direct Cost Base” column.

If using the Simplified Allocation Method for indirect costs, enter the applicable indirect cost rate and type of direct cost base in the first row of the table.

If using the Multiple Allocation Base Method, enter each major function of the organization for which a rate was developed and will be used under the grant, the indirect cost rate applicable to that major function, and the type of direct cost base to which the rate will be applied.

If the Grantee is a government and more than one agency or department will carry out activities under the grant, enter each agency or department that will carry out activities under the grant, the indirect cost rate(s) for that agency or department, and the type of direct cost base to which each rate will be applied.

To learn more about the indirect cost requirements, see 2 C.F.R. part 200, subpart E and Appendix VII to Part 200 (for state and local governments).

NARRATIVE

Project Name Breakers Avenue Resiliency & Pedestrian Traffic Improvements Project
Address Breakers Avenue between Windamar Street and Terramar Street, Fort Lauderdale, FL 33304
Project Purpose The City of Fort Lauderdale's purpose of this project is to design and construct Breakers Avenue to encourage slower travel speeds, and provide safe movement of pedestrians on the corridor, while supporting the character and destinations along the Avenue.

Project Narrative The project site is located from Riomar Street to Vistamar Street within the right-of-way of Breakers Avenue. Breakers Avenue is a two-way street extending between Riomar Street and Vistamar Street, in the City of Fort Lauderdale. The current cross section includes one travel lane in each direction, with diagonal parking in the wide median. It is proposed to modify Breakers Avenue to provide a single vehicular travel in each direction with adjacent parallel parking spaces. The travel lanes will be 9 feet in width with 2-foot valley gutters on the outside edges. The adjacent sidewalks will be widened to 10 feet, with an additional 9 feet of seating area in sections without adjacent parallel parking. The design speed is 25 miles per hour. Landscape planters will be added at locations where seating or parking spaces are not provided. Currently, Breakers Avenue presents vehicular conflicts only on one side of the travel lane – the inside parking lane. As proposed, motorists will be presented with potential conflicts on both sides of the travel lane – parallel parking on the right-side and oncoming motorists on the left-side since the travel lanes will not be separated by a median. Parallel parking is accepted by the Institute of Transportation Engineers as providing the most speed reduction compared to angled parking. Typical lane widths for City streets range from 10 to 12 feet in width; combined with the parking and oncoming traffic, the narrower 9-foot travel lanes will encourage slower speeds. The enhanced pedestrian facilities – wider sidewalks and seating areas – could generate more pedestrian activity in the area. With more pedestrian activity, including seated in the seating areas and walking on the wider sidewalks, drivers are more likely to travel at lower speeds. The curb radii at the cross streets are being reduced, as well. Smaller radii require motorists to travel at a lower speed while turning; therefore, this design feature will encourage drivers to further slow down while turning to and from Breakers Avenue. Reduced radii are proposed at seven locations: Riomar Street, Viramar Street, Windamar Street, Terramar Street, Auramar Street, Belmar Street, and Vistamar Street. The first phase will start at Riomar Street and extend north to Terramar Street. The work under this grant will cover all work between Windamar and Terramar Street. The second phase will be optional and will start at Terramar Street and extend to Vistamar Street. The following Scope of work is to be performed at the first phase: 267 feet of Breakers Avenue between Windamar Street and Terramar Street: Maintenance of Traffic, clearing/demolition, earthwork/grading, potable water, storm drainage, sanitary sewer, street lighting and electrical, roadway construction, parking area construction, concrete sidewalk/curbs, furnishings, striping/signage, landscaping, irrigation, and water Improvements.

The curb radii at the cross streets are being reduced, as well. Reduced radii are proposed at seven locations: Riomar Street, Viramar Street, Windamar Street, Terramar Street, Auramar Street, Belmar Street, and Vistamar Street. In addition, raised curbs are provided at intervals along the otherwise curbless street. Landscaping behind these curbs will create a visually narrowing effect to motorists. Mature trees are being added to the streetscape to further provide a sense of enclosure. Since the overall width of the street is narrower, and since the landscaping will create the illusion of narrowness, drivers will be encouraged to drive at slower speeds. Curbs are provided at 54 separate locations along the length of the street. The first phase will start at Riomar Street and extend north to Terramar Street. The work under this grant will cover all work between Windamar Street and Terramar Street. The second phase will be optional and will start at Terramar Street and extend to Vistamar Street. CPF Funding Description The project site is located from Riomar Street to north of Vistamar Street within the right-of-way of Breakers Avenue. Breakers Avenue is a two-way street extending between Riomar Street and Vistamar Street, in the City of Fort Lauderdale. The travel lanes will be 9 feet in width with 2-foot valley gutters on the outside edges. The adjacent sidewalks will be widened to 10 feet, with an additional 9 feet of seating area in sections without adjacent parallel parking. The design speed is 25 miles per hour.
